**Outgoing No: 78/21. 02. 2011**

**TO: MR. ALEXANDER CHAKMAKOV  
EXECUTIVE DIRECTOR OF  
"GRAVEL AND SAND PITS BULGARIA" EAD**

**Regarding:** Your enquiry about presence or absence of archeological sites on the territory of Mishka Section and Kama Section

**Dear Mr. CHAKMAKOV,**

Rousse Regional Museum of History for objective reasons is not in a position to answer categorically about presence or absence of archeological sites in the river bed of river Danube. At the right bank of river Danube, in the stated by your investment proposal sections of the river the following archeological sites are registered:

- km 458.0 – km 460 Roman fortress and late antique town Apiaria, antique acropolis (Reg. No 7824/39);

- km 508.0 Thracian late antique and medieval settlement (Reg. No 7818/33);

- km 510.0 Thracian, Roman and late antique fortress Mediolana and medieval Bulgarian town Pirgos (Reg. No 7819/34).

The above sites are declared as immobile cultural treasures, pursuant to the Cultural Heritage Act, where under the found declared immobile monuments of culture retain their status of cultural treasures. As such, the aforesaid sites are protected by the state and are its property.

After the erosion activity large part of these sites are in the water of river Danube. Due to that, in finding objects, having the characteristics of mobile cultural value, strict observance of the requirements of Article 93 (1) and 93 (2) of the Cultural Heritage Act is necessary, in particular: within 7 days' term the nearest state or municipal museum shall be informed and

the respective item shall be kept in the type and state it has been found until its delivery to the competent bodies.

With wishes for gratifying work,  
Respectfully,

*/Signature illegible/*

**Ass. Prof. Dr. Nikolay Nenov**
