

ANNEX I. GIS – MODEL of relevant habitat of the species (built on the basis of data on known habitats of the type and its requirements to altitude and habitat type).

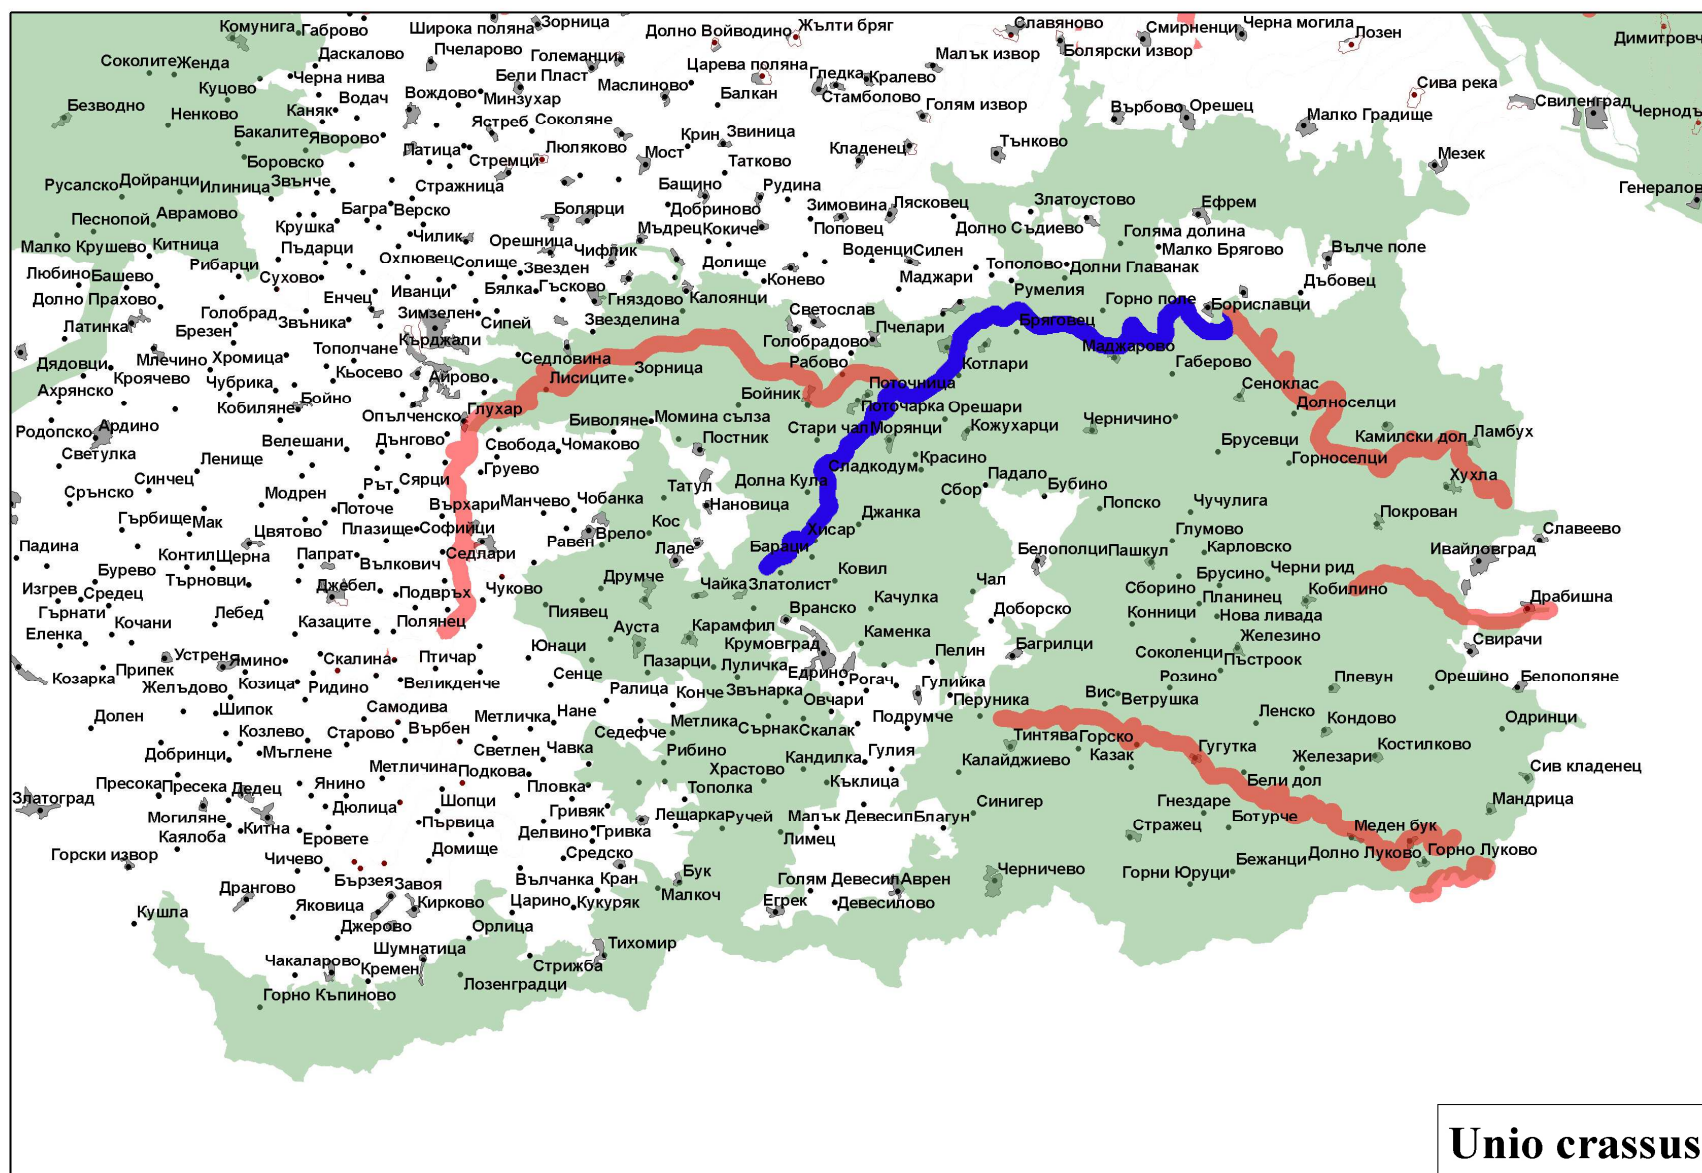

Figure 1. Map of river sections with relevant habitat for *Unio crassus* within the PZ “Rhodopes – Eastern” (blue line – river section which is potentially endangered in the implementation of IP)

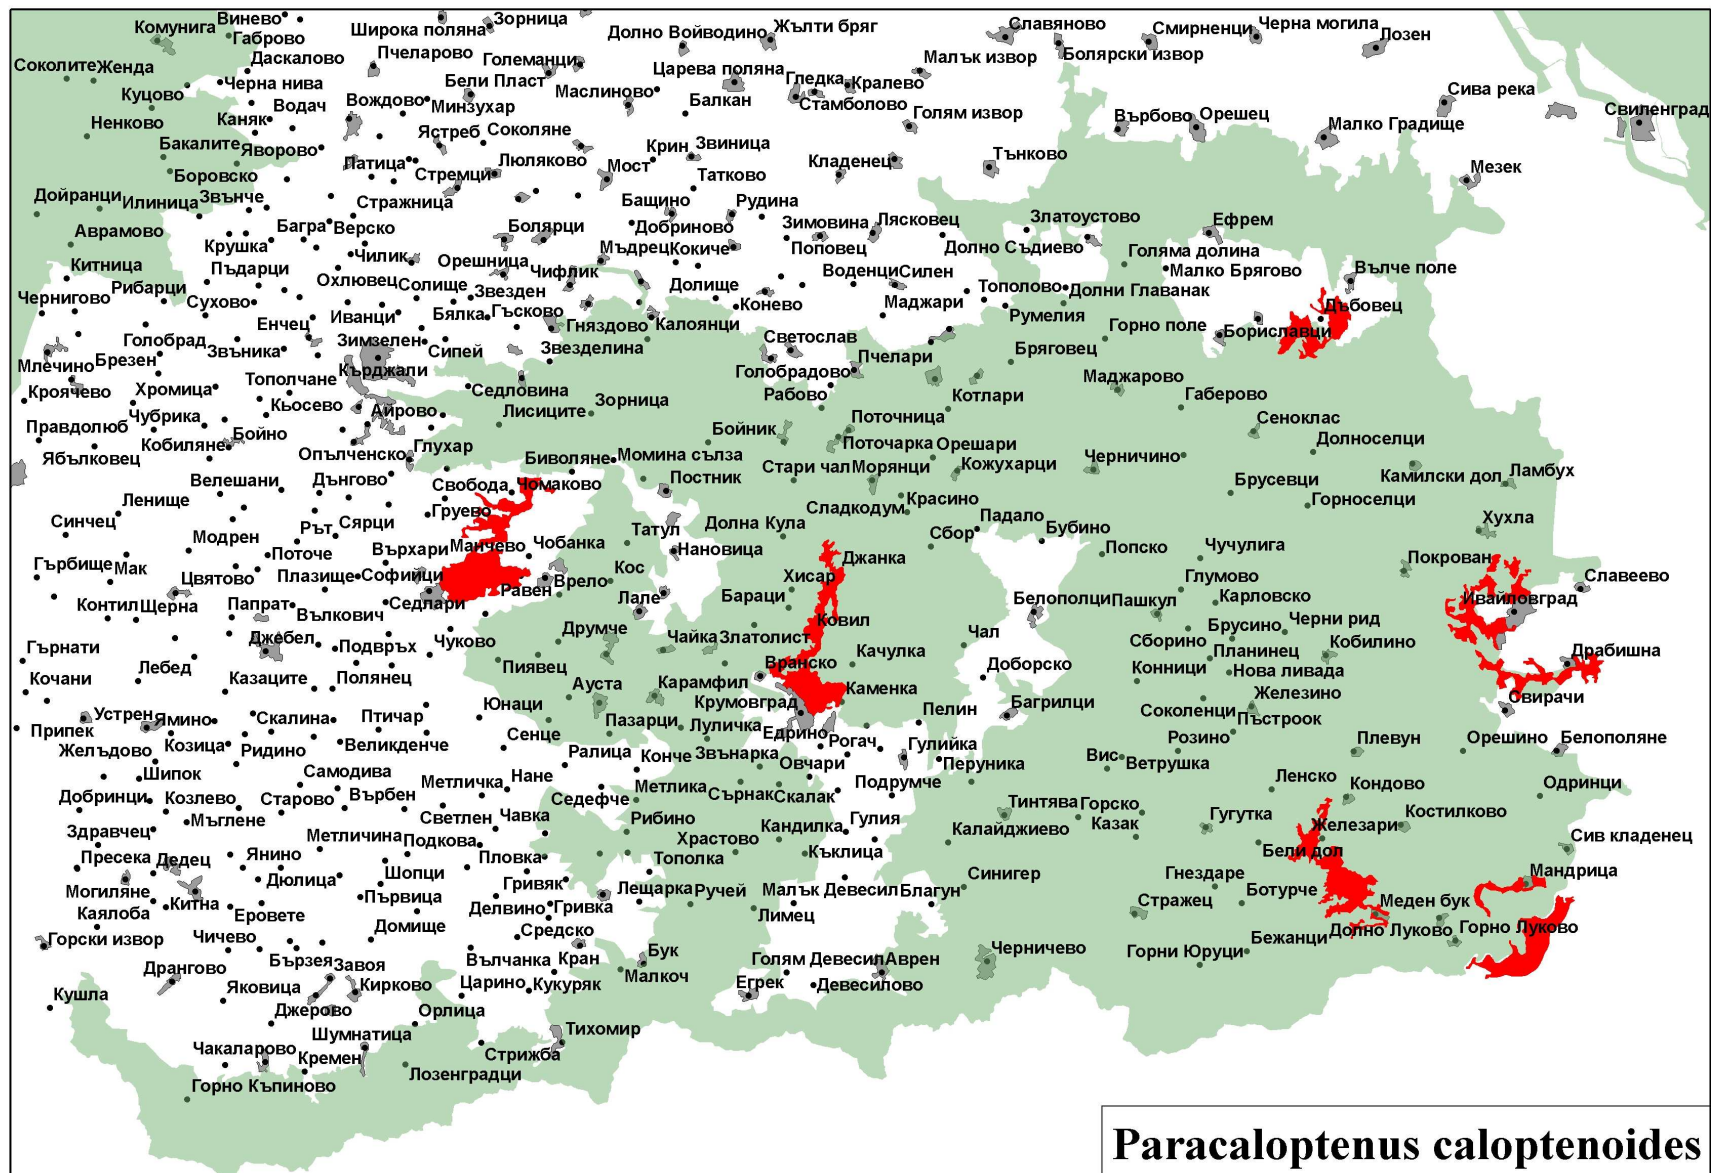

Figure 2. Habitats of *Paracaloptenus caloptenoides* in the territory of PZ “Rhodopes – Eastern” (in red)

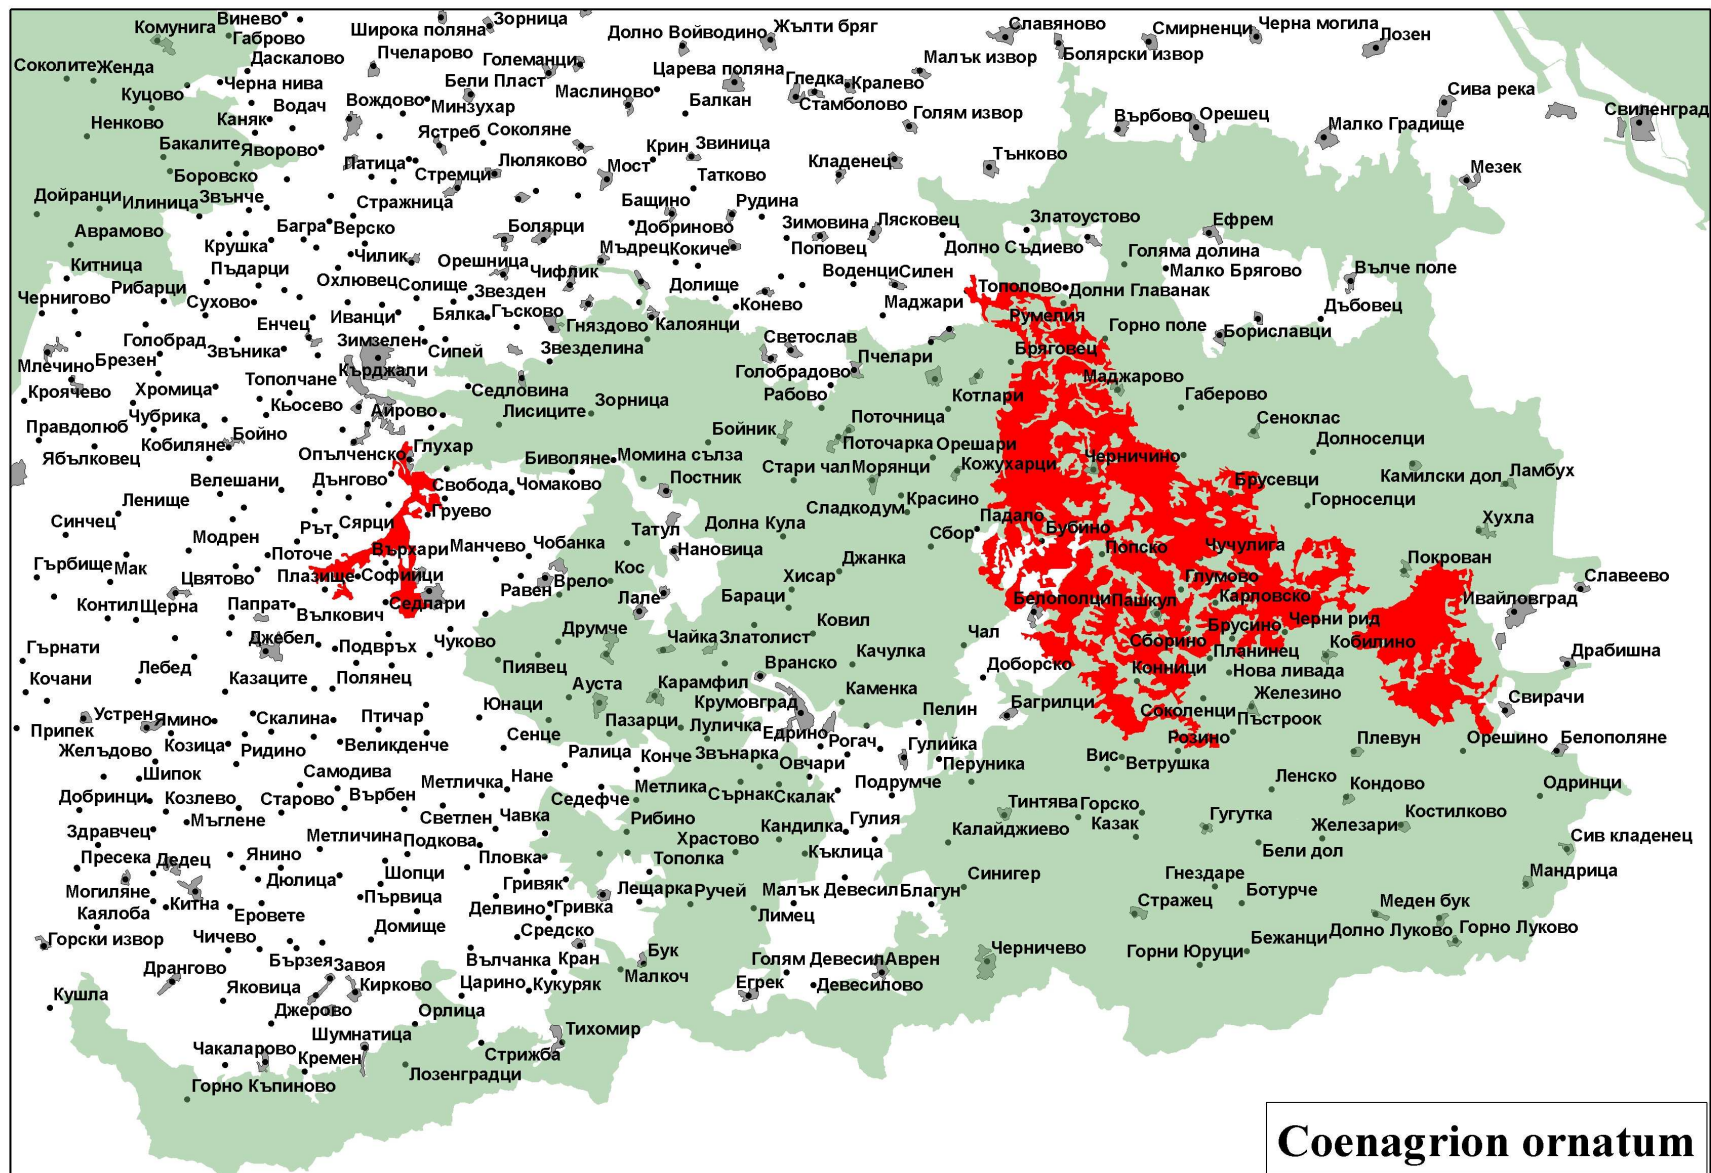

Figure 3. Habitats (in red) of *Coenagrion ornatum* in PZ “Rhodopes – Eastern”

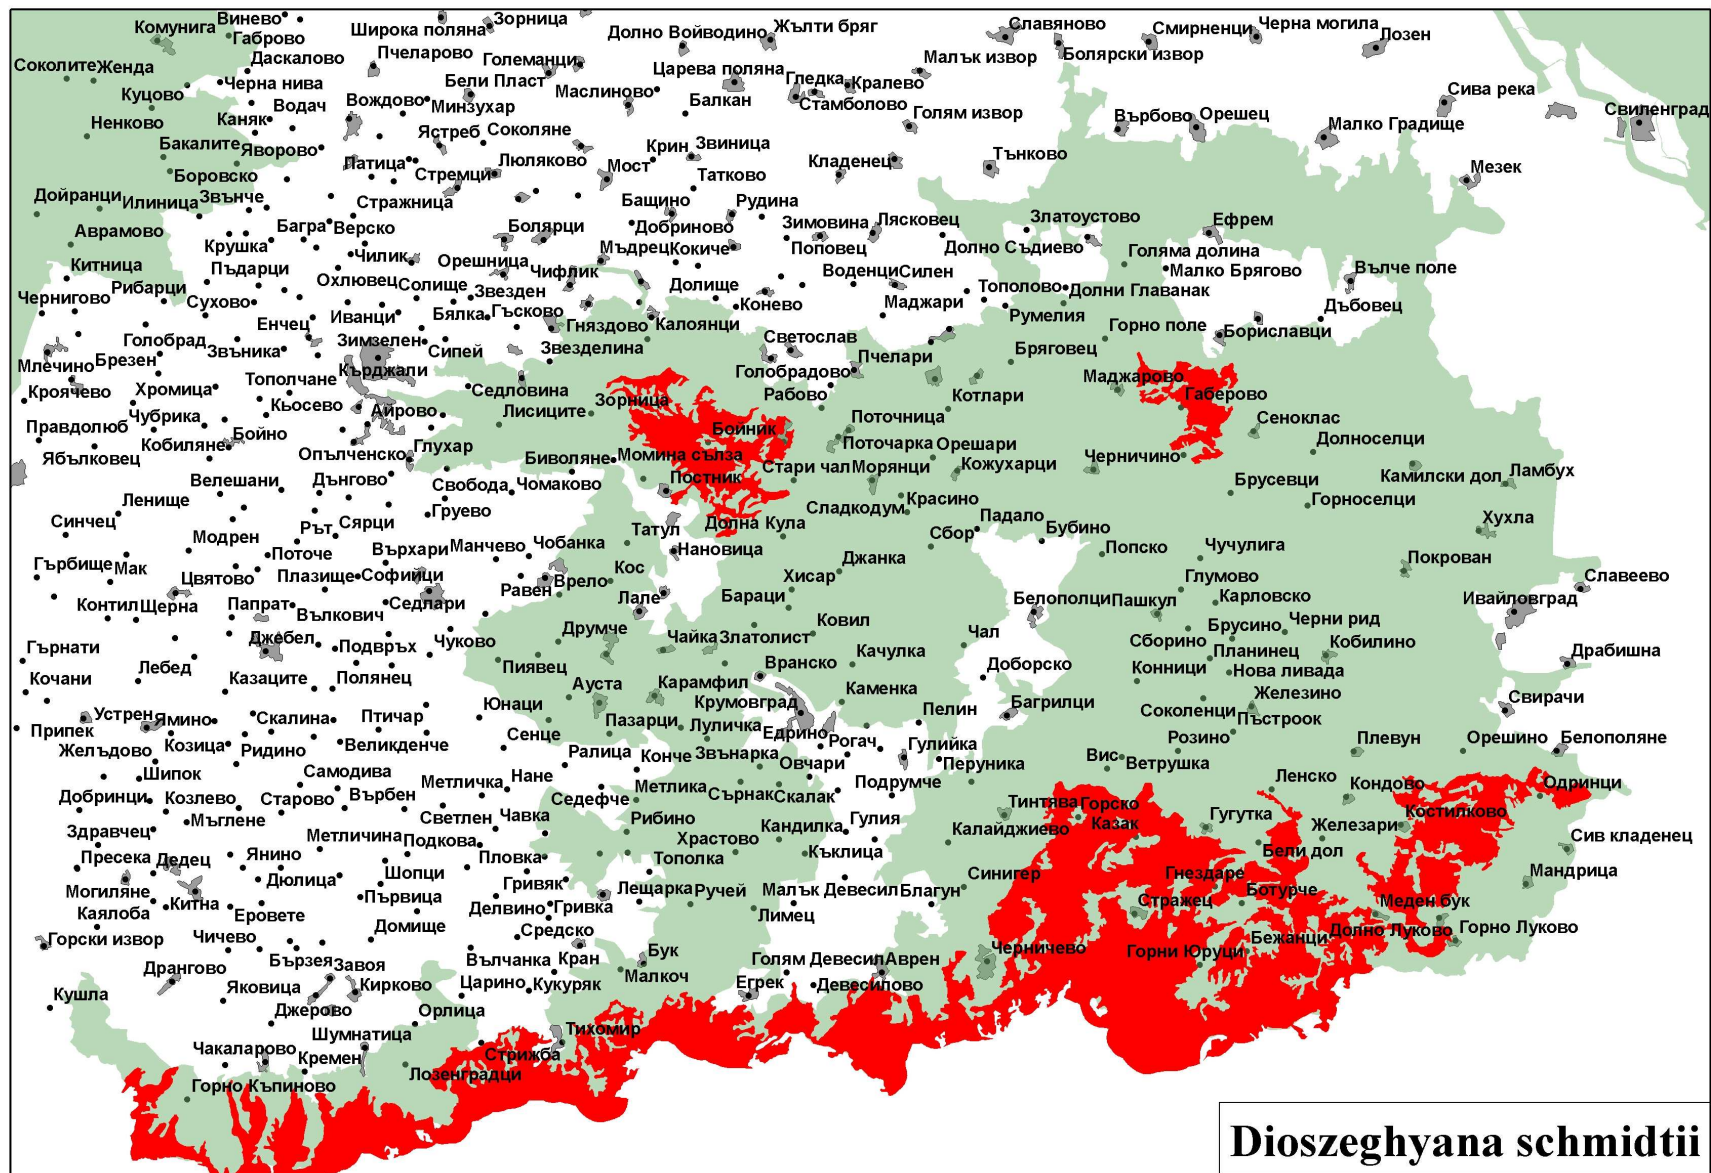

Figure 4. Habitats (in red) of *Dioszeghyana schmidtii* in PZ “Rhodopes – Eastern”

Figure 5. Habitats (in red) of *Eriogaster catax* in PZ “Rhodopes – Eastern”

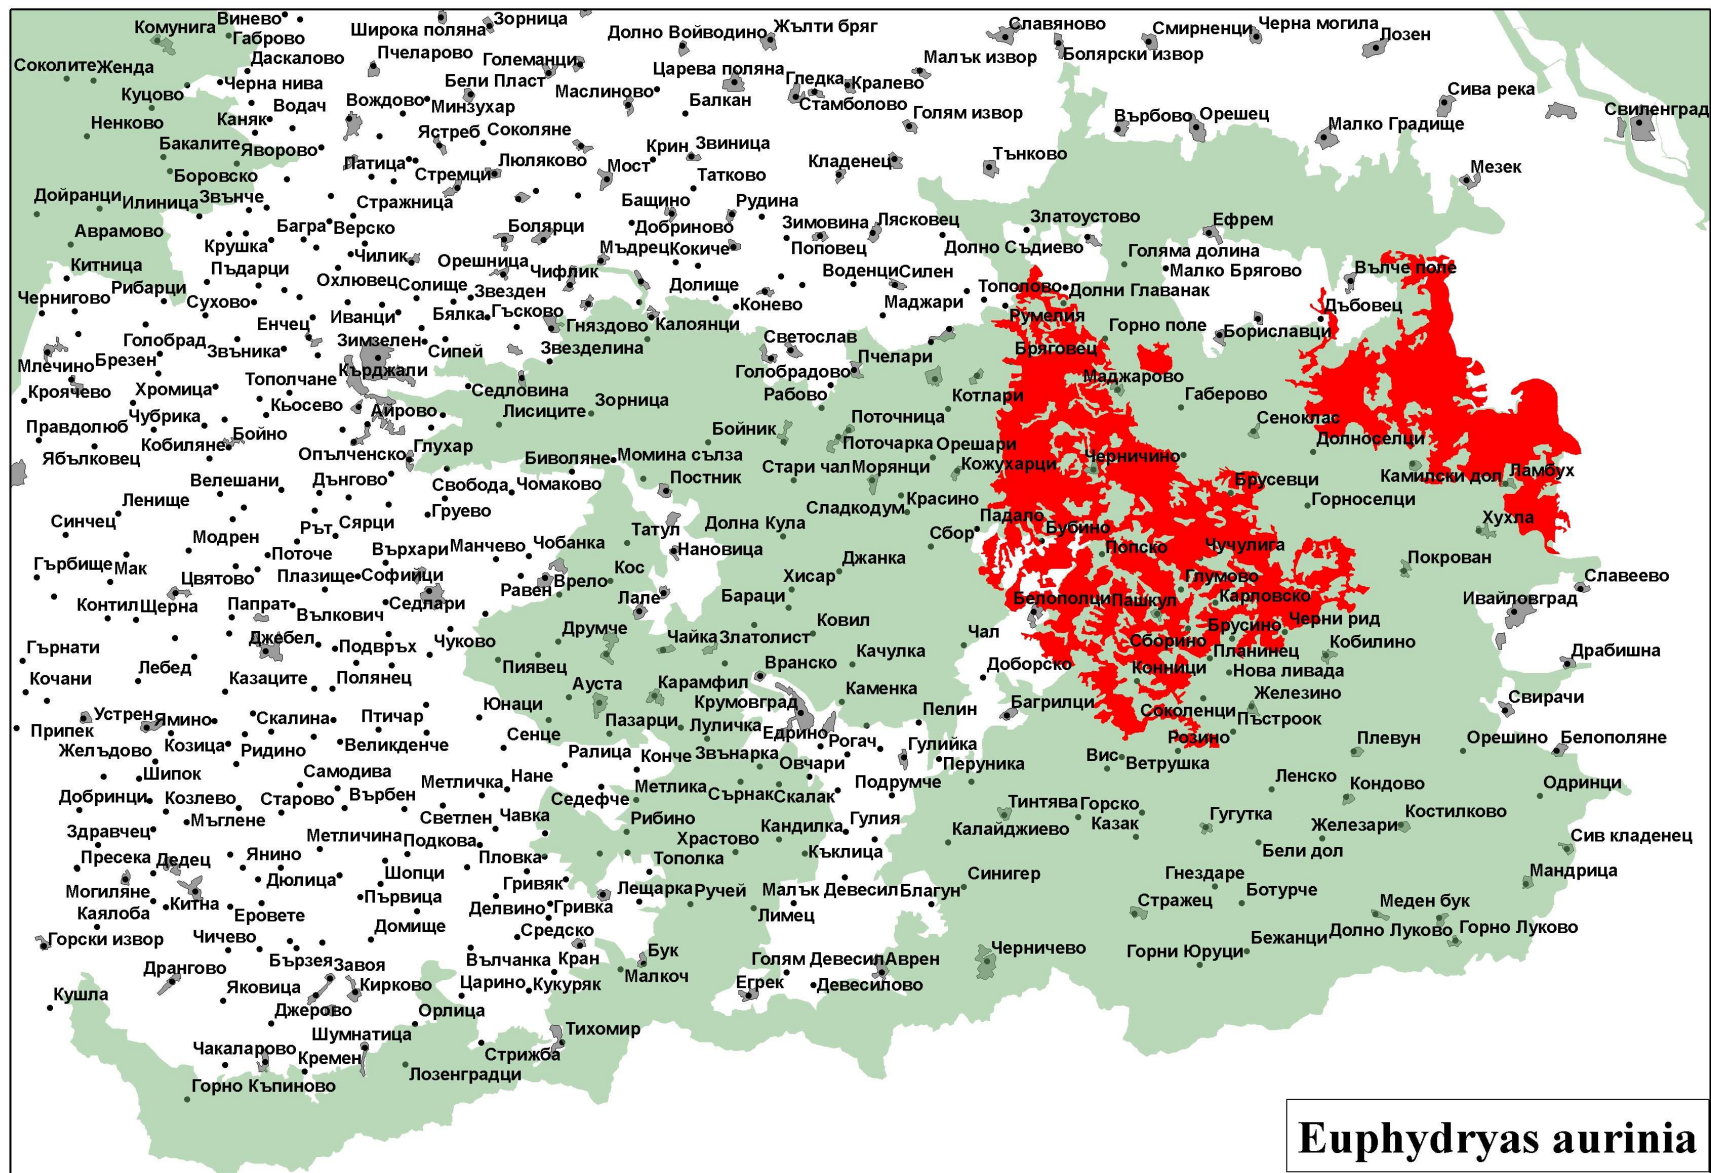

Figure 6. Habitats (in red) of *Euphydryas aurinia* in PZ “Rhodopes – Eastern”

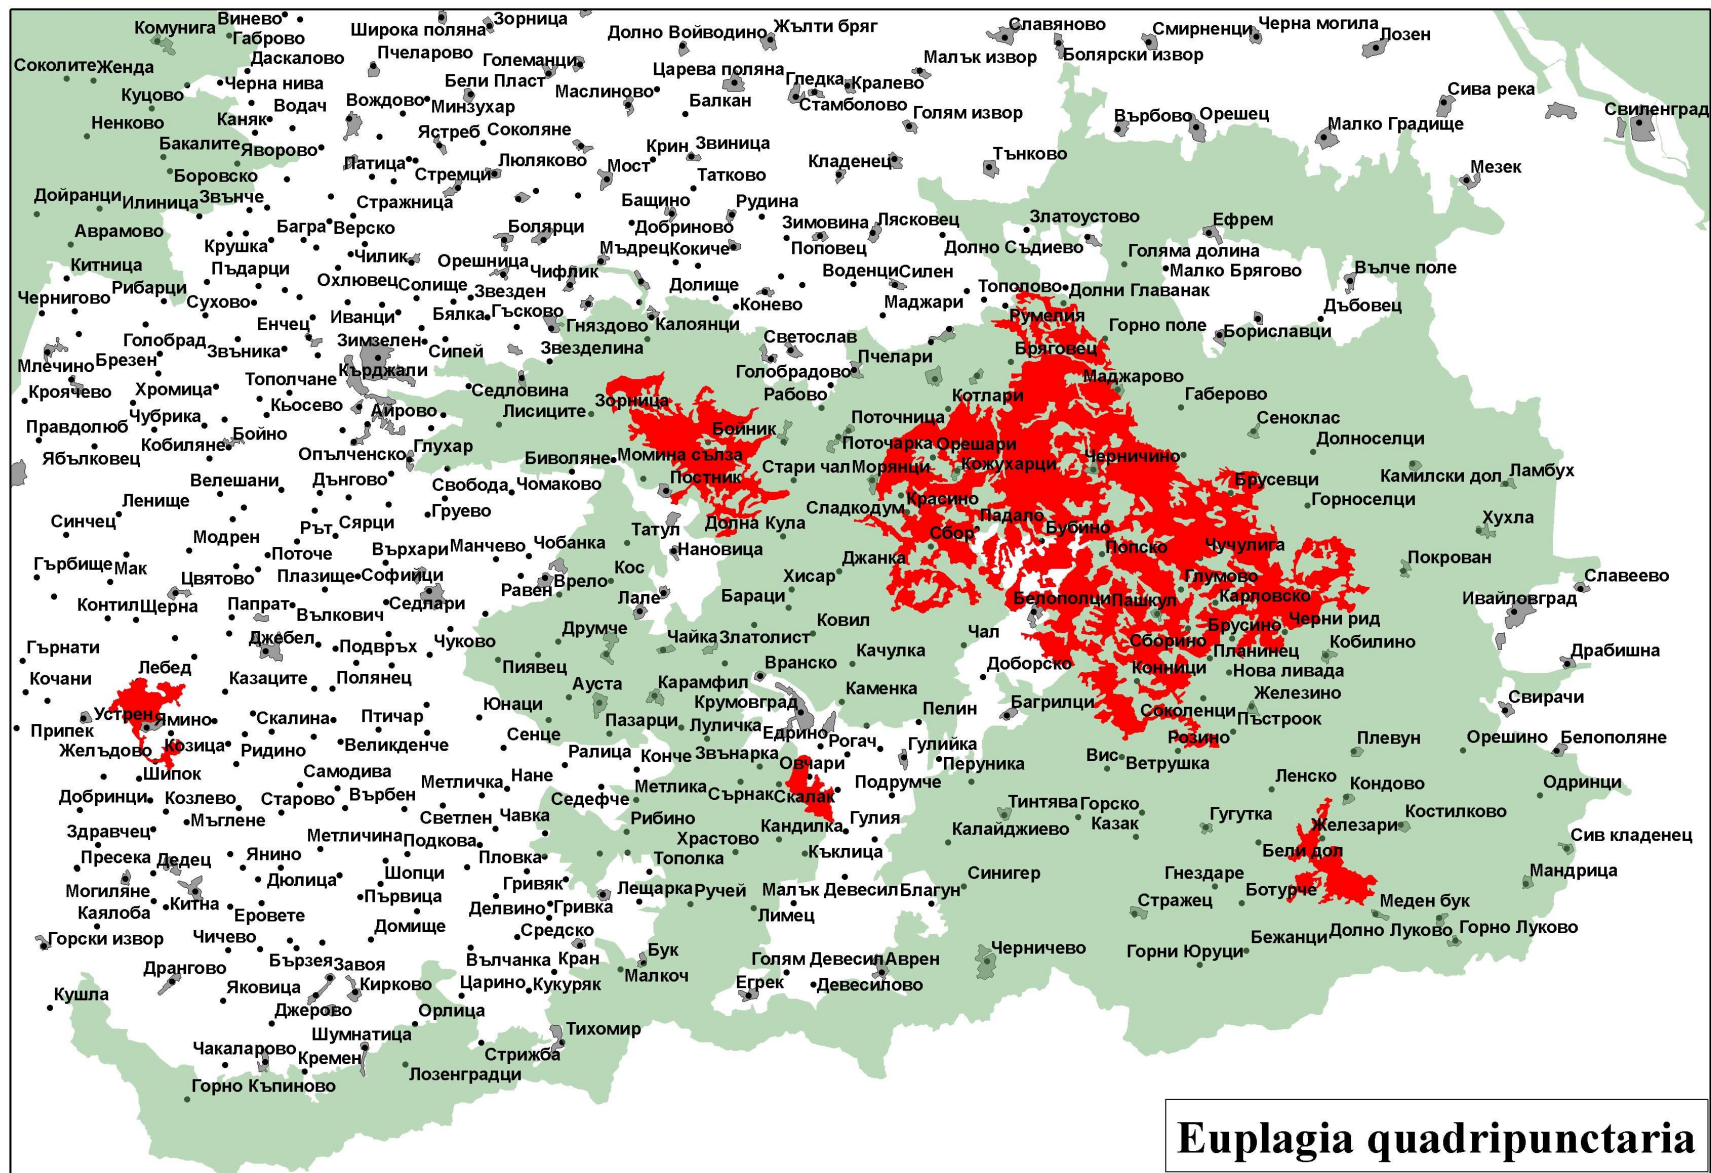

Figure 7. Habitats of *Callimorpha* (*Euplagia*) *quadripunctaria* (in red) in PZ “Rhodopes – Eastern”

Figure 8. Map of relevant habitats (in red) of *Lycaena dispar* in PZ "Rhodopes – Eastern"

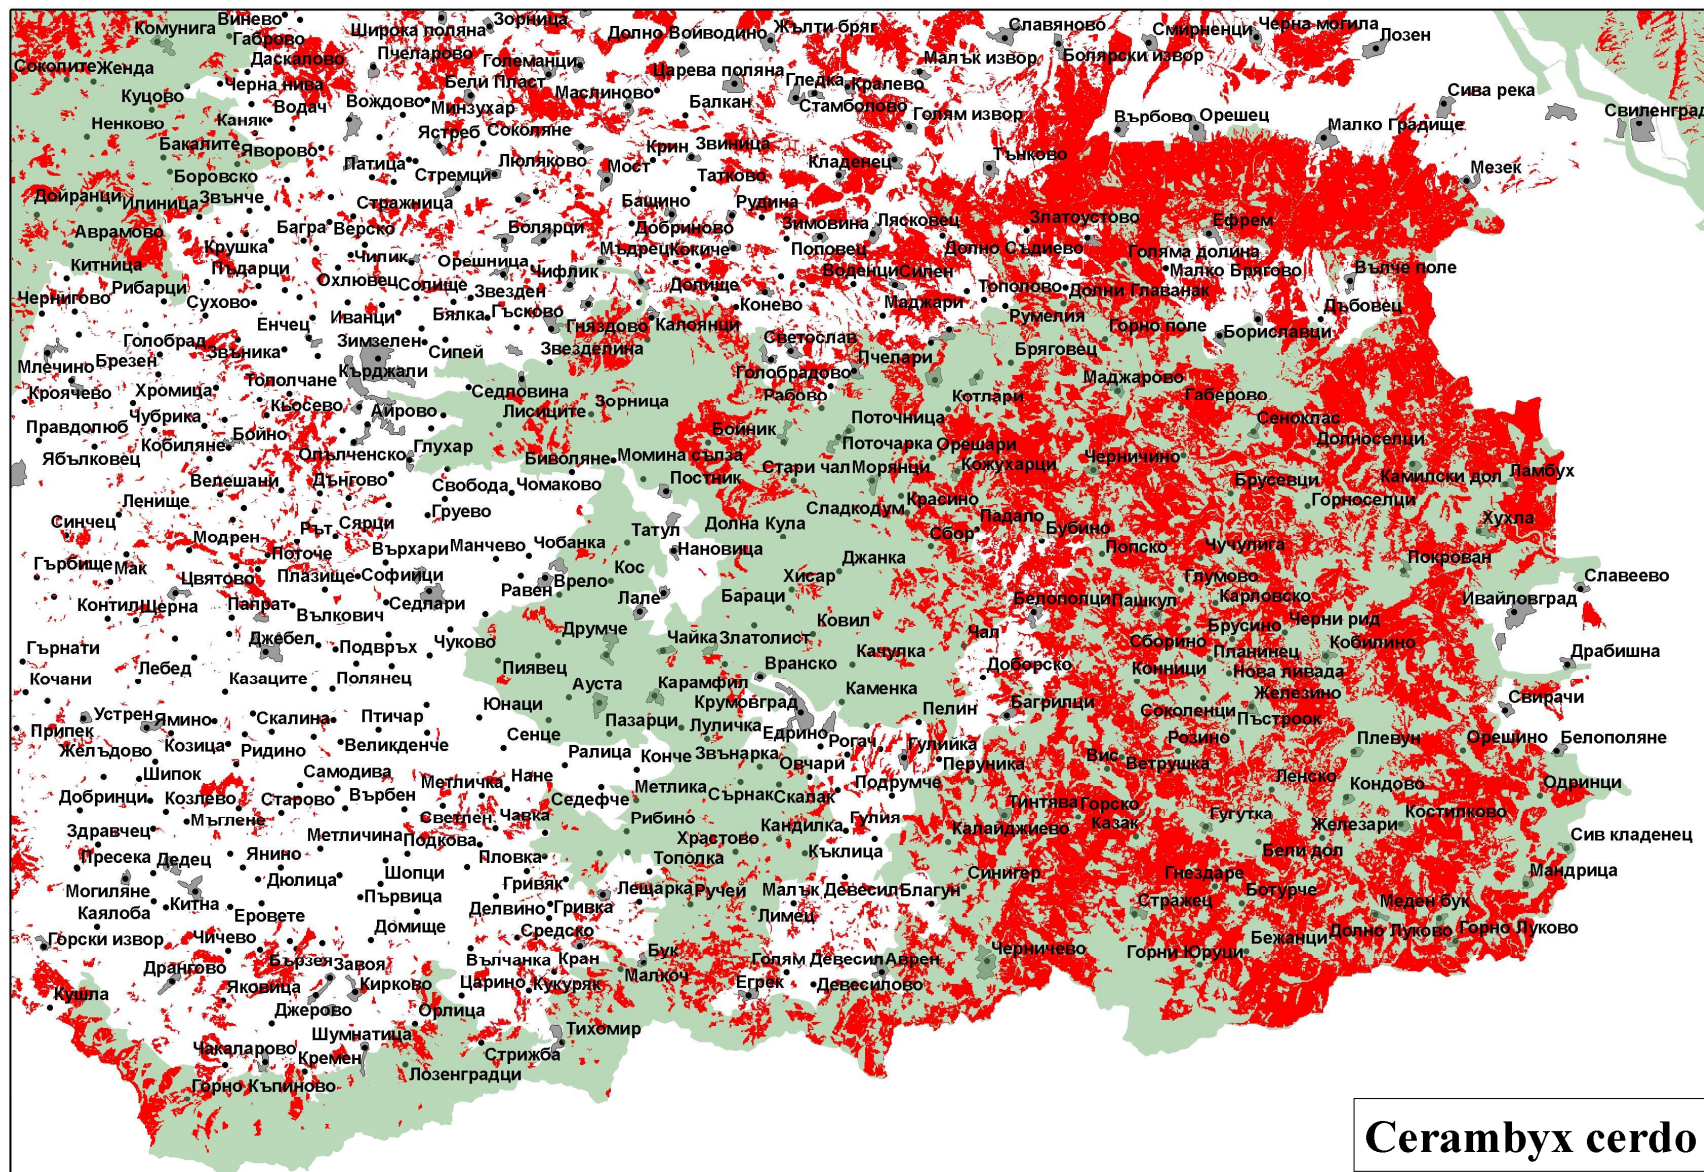

Figure 9. Map of relevant habitats (in red) of *Cerambyx cerdo* in PZ “Rhodopes – Eastern”

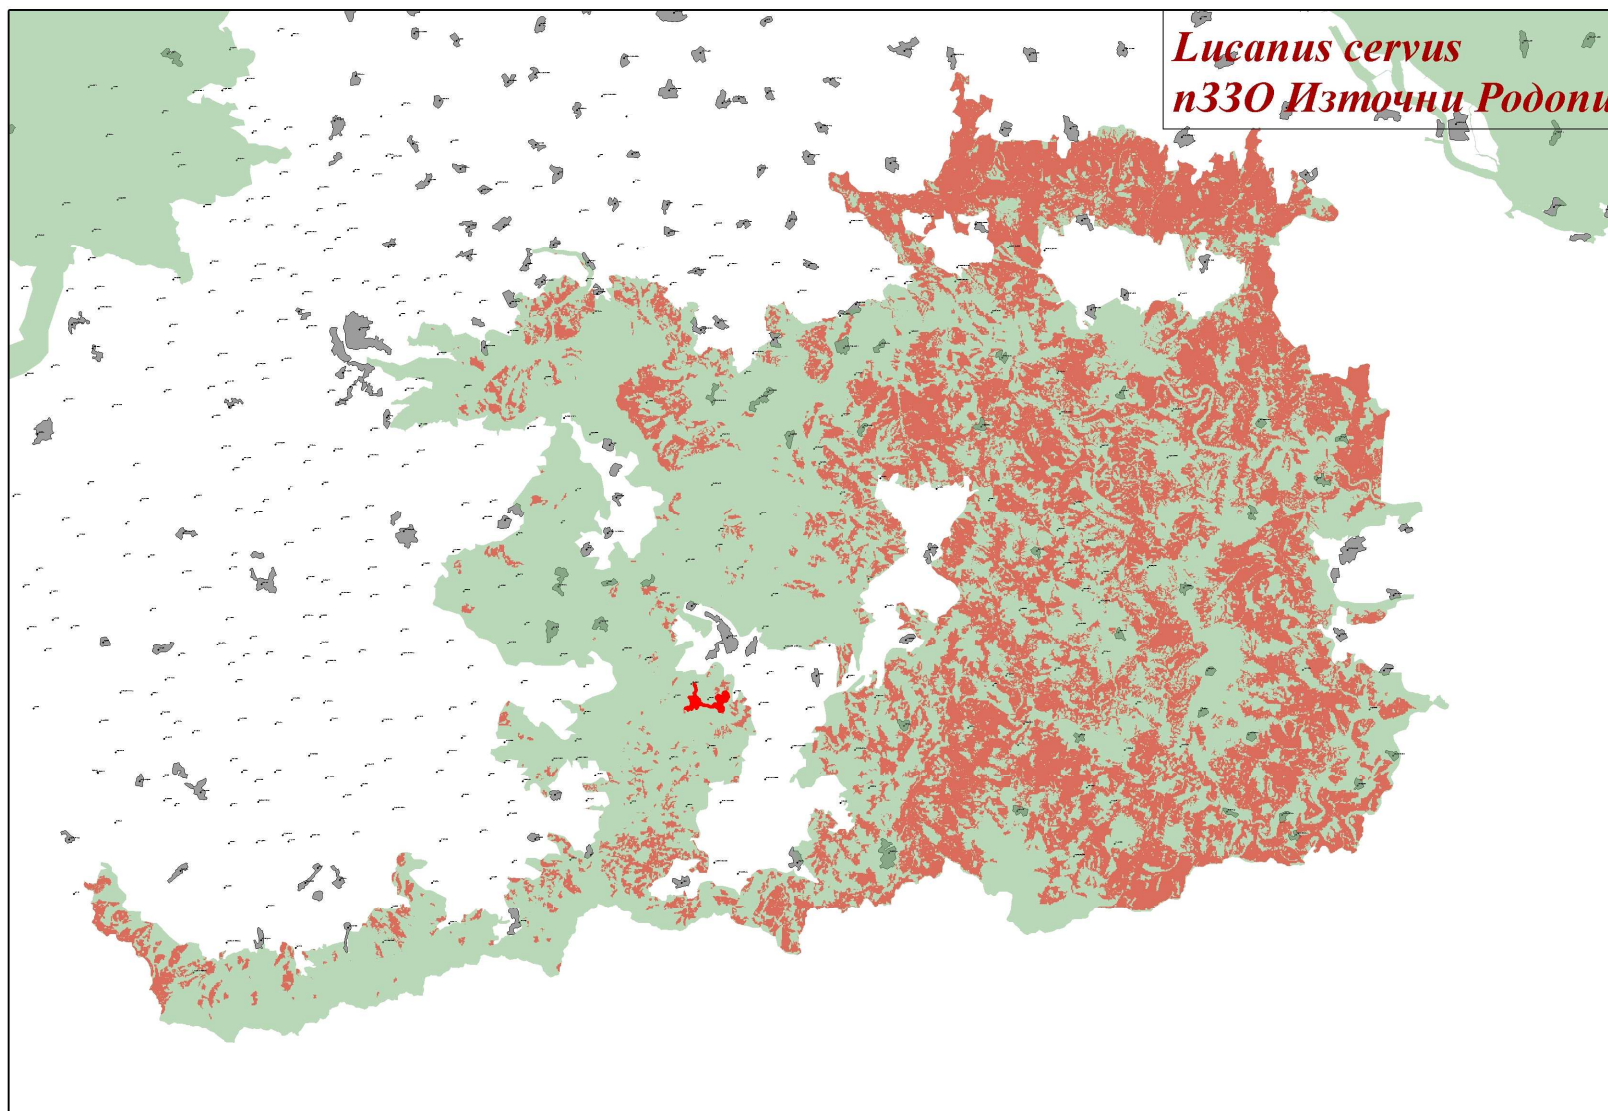

Figure 10. Map of relevant habitats (in red) of *Lucanus cervus* in PZ “Rhodopes – Eastern”

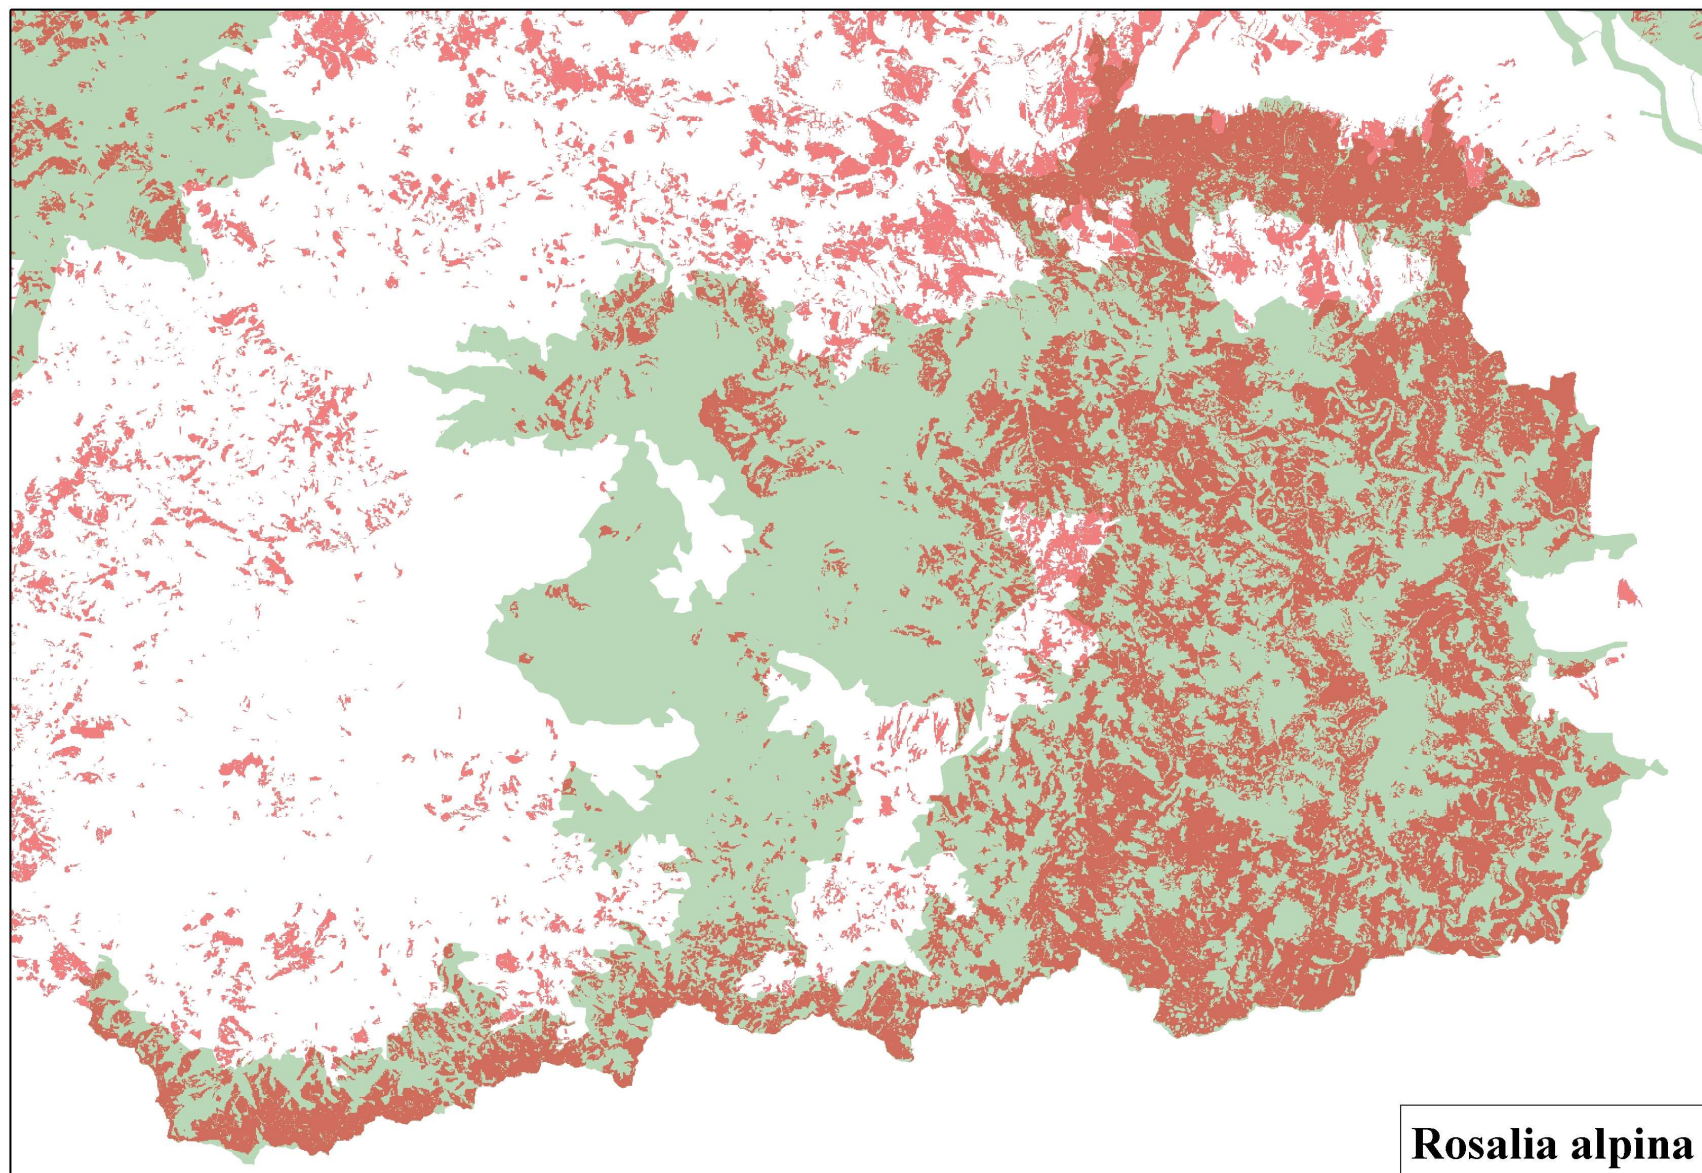

Figure 12. Maps of relevant habitats (in red) of *Rosalia alpina* in PZ “Rhodopes – Eastern”.

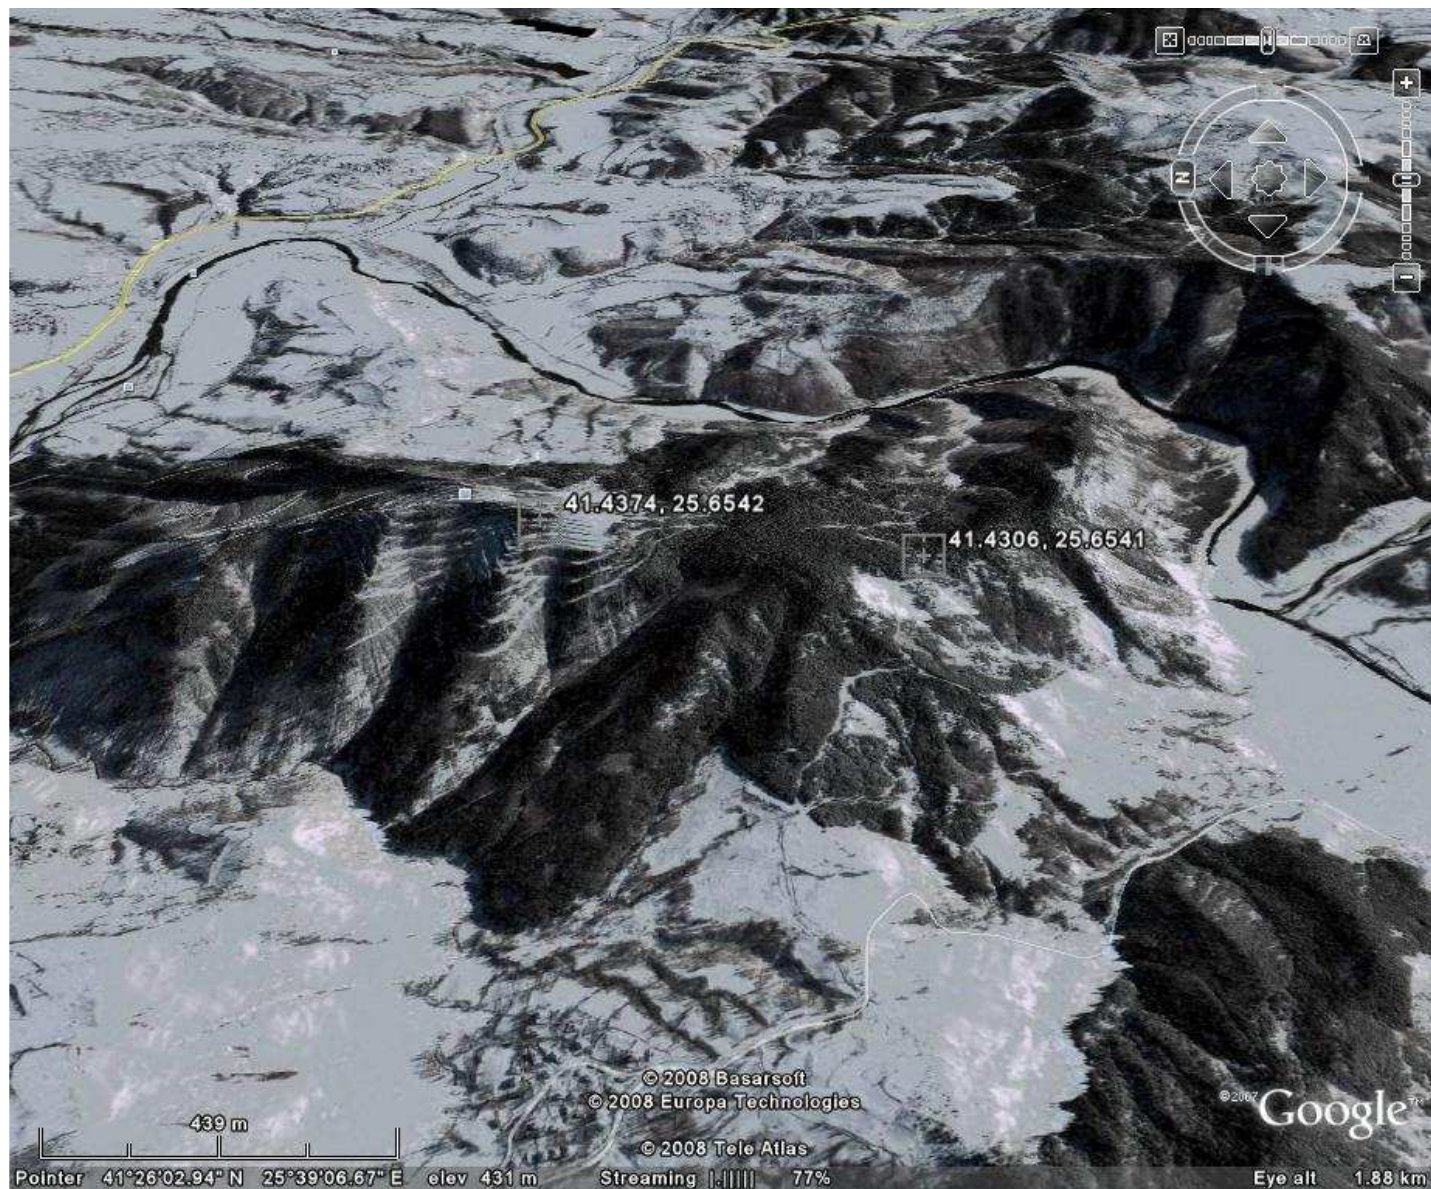

Figure 13. Habitats of *Probatiscus subrugosus* in the territory of Ada Tepe in PZ “Rhodopes – Eastern”
