Reg. No. 378/28.06.2010

TO: THE EXECUTIVE DIRECTOR OF BALKAN MINERAL AND MINING EAD
26 Bacho Kiro St., Sofia

Following your letter No. 0046/22.06.2010

Re: Proposal for use of state roads to the Ada Tepe prospect for for mining and
processing of gold ores.

DEAR MR. GOLDSTONE,

The options proposed by you for access to the Ada Tepe prospect on the territory of Kardzhali Municipality are along state roads II and III class.

The state roads are exclusively state owned, free for public use while observing the Road Traffic Act. Road H-59 has distributional functions in the transportation system and the traffic along this road is quite heavy. That is why option B is approved (via Tokachka village), for access to Ada Tepe Prospect along the state roads SH-5902 and SH-509. This option will avoid the passing through the town centre of Krumovgrad.

Sincerely,

Eng. Radostin Lambrev

Director of Regional Road Management - Kardzhali
