Attn: Executive Director Ms. Dr. Cristina Mihaela SCHIPOR

Dear Mrs. Andreea RADUCU,

Following your letter no. 43/15.07.2024 registered at INSP (*National Institute for Public Health*) under no. 12663 on 25.07.2024, by which you request an opinion of our specialists with regard to the project "Parc ENERGETIC EOLIAN 48(46), Statii de Transformare, Retele electrice de racord, construire si modernizare cai de comunicatii si acces" (*Wind Energy Park, Transformer Stations, Connection Power Networks, Building and Upgrading of Communication and Access Ways*) proposed to be executed in the place Cerchezu, county of Constanta and the assessment of the impact over the public health in cross-border context, we hereby report as follows:

- The transmitted documentation contains:
 - The Notification – assistance specialized in public health no. IMA 13375R/ 25.03.2024 issued by DSP (*Directorate for Public Health*) Constanta for the objective "Parc energetic eolian 48(46), Statii de Transformare, Retele electrice de racord, construire si modernizare cai de comunicatii si acces" commune Cerchezu, county of Constanta, in which it is specified that "the conditions provided by the sanitary law provisions in force are met" and that "all the sanitary standards provided by the Order of Health Minister 119/2014 as subsequently modified and added, as well as the conditions and recommendations of the Study of Impact over the Public Health prepared by SC South Wind SRL are to be observed";
 - The Study of Assessment of the Impact over the Public Health and Comfort in relation to the objective "Parc energetic eolian 48CE, Statii de Transformare, Retele electrice de racord, construire si modernizare cai de comunicatii si acces, extravilan (*outside the built-up area*), Comuna (*commune*) Cerchezu, judetul (*county*) Constanta – P.U.Z. (*Regional*

Urban Planning) + D.T.A.C. (*Technical Documentation for Obtaining the Building Permit*)" issued by SC VEST MEDICAL IMPACT SRL, a company certified according to Order of Health Minister no. 1.524/2019. We mention that the Study of Impact over the Public Health attached specifies as follows: "According to the check list regarding the social and health impact factors specific to the objective, it is shown that the functioning of the objective CANNOT generate significant risks for the health status of the public in the reviewed area under the analyzed conditions".

- Within the Methodology of organizing the studies for assessment of the impact of certain public and private projects over the population health approved by the Order of Health Minister no. 1.524/2019, the functional objective which may determine cross-border pollution is defined by Article 1 point o), as follows: -"an investment project located in the territory of a boundary county adjacent to the border of Romania, by the execution of which emissions of pollutants may be generated which are able to cause damage of the environment of another country, by crossing the borders via ways such as water or air".
- INSP establishes whether an objective determines cross-border pollution, following the motivated application transmitted by the directorate of public health of the county in the territory of which the proposed objective is to be found. INSP did not receive any application to this effect from DSP Constanta. DSP Constanta did not deem that the proposed objective may determine cross-border pollution and issued the Notice no. IMA 13375R/25.03.2024, by which it deems that the conditions provided in the sanitary law provisions in force are met.

Respectfully,
GENERAL DIRECTOR
