Reglementări naționale: Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice. Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase. REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase; HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase; REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006. Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008). REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH). Regulament 552/2009 de modificare a anexei XVII din Regulamentul (CE) nr. 1907/2006 – REACH privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase HG 735/2006 privind limitarea emisiei de compuși organici volatili. HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații. Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase; Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase; HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă. REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei. HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006. O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.
Legislația privind eliminarea deșeurilor: Legea 211/2011 privind regimul deșeurilor. HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României. HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 349/2005 privind depozitarea deșeurilor; OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor; HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase. HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.
Legislația pentru deșuri de ambalaj: Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșuri de ambalaje. HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje. HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

AVOIL WA/LT

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut
PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioaccumulative, toxice
vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioaccumulative
TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore
TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt
TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de pericol utilizate în secțiunile anterioare**

H304: Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii

H317 : Poate provoca o reacție alergică a pielii

EUH066: Expunerea repetată poate provoca uscarea sau crăparea pielii

R43: Poate provoca sensibilizare în contact cu pielea

R65: Nociv: poate provoca afecțiuni pulmonare în caz de înghițire.

R66: Expunerea repetată poate provoca uscarea sau crăparea pielii

Fraze de precauție / siguranță utilizate în secțiunile anterioare

P262: Evitați orice contact cu ochii, pielea sau îmbrăcămintea.

P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S24: A se evita contactul cu pielea.

S36/37/39: Purtați echipament de protecție corespunzător, mănuși și mască de protecție pentru ochi / față

S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
SUBSTANȚA / AMESTECUL ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS07	Toxicitate orală acută 4 H302 - Nociv în caz de înghițire
	GHS05	Afectare oculară 1 H318 – Provoacă leziuni oculare grave.
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
	Xn - nociv	R22: Nociv în caz de înghițire
	Xi - nociv	R41: Risc de leziuni oculare grave
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	<div></div> <div>GHS07 GHS05</div>	
Fraze de precauție:	<p>P264: Spălați-vă bine pe mâini după utilizare.</p> <p>P270: A nu mânca, bea sau fuma în timpul utilizării produsului</p> <p>P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței.</p> <p>P310: Sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.</p> <p>P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.</p>	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:		<div>Xn – Nociv R22: Nociv în caz de înghițire</div> <div>Xi – Iritant R41: Risc de leziuni oculare grave.</div>
Sfaturi de siguranță::	<p>S25: A se evita contactul cu ochii.</p> <p>S24/25: Evitați contactul cu pielea și ochii.</p> <p>S36/37: Purtați echipament de protecție și mănuși corespunzătoare.</p>	
Eliminarea:	S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos	
2.3. Alte pericole

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți imediat persoana afectată afară/la aer curat și țineți-o la căldură și în repaus. Dacă simptomele persista, solicitați ajutor medical. În caz de întreruperi ale respirației, administrați oxigen.
După contactul cu pielea:	Scoateți imediat toate hainele contaminate. Clătiți imediat cu apă din abundență.
După contactul cu ochii:	Țineți pleoapele deschise și spălați ochii cu apă din abundență timp de cel puțin 15 minute. Solicitați asistență medicală. Îndepărtați lentilele de contact
După înghițire:	Nu induceți vomă. Solicitați ajutor medical imediat.
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.
5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați, urmați instrucțiunile.
Mijloace de stingere corespunzătoare:	În caz de incendiu utilizați ABC pulbere, dioxid de carbon CO ₂ , produse chimice uscate, apa pulverizată.
Mijloace de stingere necorespunzătoare:	Halon
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Nu permiteți ca scurgerile de materiale folosite la stingerea incendiilor să pătrundă în canalizare sau în cursurile de apă
Echipamente speciale de stingere a incendiilor	Păstrați containerele și zonele inconjuratoare reci cu jet de apă. Preveniți ca apa folosită la stingerea incendiilor să nu contamineze apa de suprafață sau pânza freatică. Reziduurile de ardere și apa folosită la stingere care a fost contaminată trebuie să fie eliminate în conformitate cu reglementările locale
6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Purtați echipament de protecție (mănuși, ochelari de protecție și îmbrăcăminte)
Proceduri de urgență:	Fiti atenți la răspândirea de gaze în special la nivelul solului (mai greu decât aerul) și pe direcția vântului
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Material absorbant, organic, nisip
Metode de limitare a poluării	Nu permiteți să intre în sol / subsol. Păstrați în containerele închise și adecvate pentru eliminare.
Informații suplimentare:	N.a.

**- AVAWASH OBM-LT -**

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Nu inspirați vaporii sau jetul de pulverizare. Asigurați o reîmprospătare a aerului suficientă și / sau evacuare la locul de muncă. Evitați depășirea limitelor de expunere la locul de muncă
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	A se păstra în recipientul original. Se vor păstra containerele ermetic închise, într-un loc uscat, răcoros și bine ventilat
Specificațiile zonei de depozitare:	Depozitați în zone uscate, bine ventilate
Specificațiile recipientilor:	Se vor păstra containerele ermetic închise
Incompatibilități:	Păstrați la distanță de căldură și de sursele de aprindere
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Agent deblocant cu toxicitate redusă, de conducte pentru fluide de foraj pe baza de ulei (OBM)

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanța		2,2' – Iminodiethanol CAS No. 111-42-2
TLV _{Ceiling} :		- - -
TLV _{TWA} :		1 mg/m ₃
TLV _{STEL} :		- - -
Limika biologică:		- - -
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Ventilație generală este necesara
8.2.2. Măsurile de protecție individuală, precum echipamentul de protecție personală.		Asigurați o ventilație adecvată. Stație de spalare ochi si dus de urgenta – in apropiere.
Protecția individuală	Respiratorie:	Atunci când lucrătorii se confruntă cu concentrații peste limita de expunere trebuie să utilizeze aparate de respirat corespunzătoare certificate
	Ochi	Folosiți ochelari cu ecrane laterale
	Maini	Purtați mănuși de protecție rezistente, de exemplu în cauciuc nitril sau cauciuc butil
	Corp	Utilizați îmbrăcăminte care oferă protecție completă pentru piele
8.3. Controlul expunerii mediului		
Variante de expunere		Preveniti scăpările sau scurgerile ulterioare dacă este sigur să facă acest lucru

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Lichid
Aspect:	Lichid
Culoare:	Ambră
Miros:	Caracteristic
Prag olfactiv:	N.a.
9.2. Informații pentru sănătate, siguranță și mediu	
pH:	11
Punct de topire:	N.a.
Punct de fierbere:	>150°C
Punct de aprindere:	65°C

**- AVAWASH OBM-LT -**

Inflamabilitate (solid, gaz):	N.a.
Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	1,007 g/cm ³
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	N.a.
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	Solubil
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE**10.1. Reactivitate**

Condiții care trebuie evitate:	Nu se produce o polimerizare periculoasă. Evitați căldura excesivă, căldura, flăcări și scântei
--------------------------------	---

10.2. Stabilitate chimică

Materiale incompatibile:	Aldehide, alcalinizante, cetone, anhidride organice, halogenuri organice, acizi tari, baze tari, agenți de oxidare tari, agenți reducători puternici.
Posibilitatea de reacții periculoase:	Stabil în condiții normale de depozitare

10.3. Produse de descompunere periculoase

Alte informații:	Dioxid de carbon și monoxid de carbon, hidrocarburi, oxizi de azot (NO _x), oxizi de sulf.
------------------	---

11. INFORMAȚII TOXICOLOGICE**11.1. Toxicitate Acută**

Substance	2,2'-iminodietanol CAS No. 111-42-2
Toxicitate orală acută:	DL50 (Șobolan): 680 mg/kg
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	DL50 (Iepure): > 8.200 mg/kg

11.2. Corozivitate

Piele:	N.a.
Ochi:	N.a.

11.3. Iritabilitate primară

Piele:	N.a.
Ochi:	N.a.

11.4. Nocivitate

Ingestie:	N.a.
Inhalare:	N.a.

11.5. Sensibilitate

Piele:	N.a.
--------	------

**- AVAWASH OBM-LT -**

Ochi:	N.a.
11.6. Alte efecte adverse	
Alte informații:	N.a.

12. INFORMAȚII ECOLOGICE

12.1. Toxicitate	
Substance	2,2'-imminodietanol CAS No. 111-42-2
Toxicitate în apă:	LC50 (Pești) 96 h: > 100 mg/l LC50 (Daphnia magna) 48 h: 96,3 - 124,6 mg/l LC50 (Daphnia magna) 48 h: 55 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	N.a.
12.3. Potenția Bioacumulativ	
Alte informații:	N.a.
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA

13.1. Metode de eliminare a produsului	
Sfaturi:	Evacuați în conformitate cu Directivele europene privind reziduurile și deșeurile periculoase
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Eliminati în conformitate cu reglementările locale și naționale
Alte recomandări:	Nu contaminați apele și canalele de scurgere cu substanța chimică sau containerele utilizate. Containerele sunt periculoase și atunci când sunt goale.

14. INFORMAȚII REFERITOARE LA TRANSPORT

14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Norme de transport ONU	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport

**- AVAWASH OBM-LT -**

Clasa IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE**15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.**

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr.1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;

HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;

REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr.1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiilor de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

**- AVAWASH OBM-LT -**

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.

HG 1872/2006 pentru modificarea și completarea HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

**- AVAWASH OBM-LT -**

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de pericol utilizate în secțiunile anterioare**

H302: Nociv în caz de înghițire

H315: Provoacă iritarea pielii

H318: Provoacă leziuni oculare grave

H373: Poate provoca leziuni ale organelor în caz de expunere prelungită sau repetată.

H412: Nociv pentru mediul acvatic cu efecte pe termen lung.

R22: Nociv în caz de înghițire

R38: Iritant pentru piele

R41: Risc de leziuni oculare grave

R48/22: Nociv: pericol de efecte grave asupra sănătății la expunere prelungită prin înghițire.

Fraze de precauție / siguranță utilizate în secțiunile anterioare

P264: Spălați-vă bine pe mâini după utilizare.

P270: A nu mânca, bea sau fuma în timpul utilizării produsului

P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței.

P310: Sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.

P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S25: A se evita contactul cu ochii.

S24/25: Evitați contactul cu pielea și ochii.

S36/37: Purtați echipament de protecție și mănuși corespunzătoare.

S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos

MATERIAL SAFETY DATA SHEET

Product Trade Name: SODIUM BROMIDE BRINE

Revision Date: 29-Jan-2013

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Statement of Hazardous Nature Non-Hazardous according to the criteria of NOHSC, Non-Dangerous Goods according to the criteria of ADG.

Manufacturer/Supplier Halliburton Australia Pty. Ltd.
15 Marriott Road
Jandakot
WA 6164
Australia

ACN Number: 009 000 775
Telephone Number: 61 (08) 9455 8300
Fax Number: 61 (08) 9455 5300

Product Emergency Telephone

Australia: 08-64244950
Papua New Guinea: 05 1 281 575 5000
NewZealand: 06-7559274

Fire, Police & Ambulance - Emergency Telephone

Australia: 000
Papua New Guinea: 000
New Zealand: 111

Identification of Substances or Preparation

Product Trade Name: SODIUM BROMIDE BRINE
Synonyms: None
Chemical Family: Salt
UN Number: None
Dangerous Goods Class: None
Subsidiary Risk: None
Hazchem Code: None Allocated
Poisons Schedule: None Allocated
Application: Additive

Prepared By Chemical Compliance
Telephone: 1-580-251-4335
e-mail: fdunexchem@halliburton.com

2. COMPOSITION/INFORMATION ON INGREDIENTS

Substances	CAS Number	PERCENT	Australia NOHSC	New Zealand WES	ACGIH TLV-TWA
Sodium bromide	7647-15-6	30 - 60%	Not applicable	Not applicable	Not applicable

Non-Hazardous Substance to Total of 100%

3. HAZARDS IDENTIFICATION

Hazard Overview	May cause eye and skin irritation. May cause headache, dizziness, and other central nervous system effects. May be harmful if swallowed. Repeated overexposure may cause liver and kidney effects.
Risk Phrases	R36 Irritating to eyes.
HSNO Classification	Not Determined

4. FIRST AID MEASURES

Inhalation	If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult give oxygen. Get medical attention.
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes. Get medical attention. Remove contaminated clothing and launder before reuse.
Eyes	In case of contact, or suspected contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention immediately after flushing.
Ingestion	Do not induce vomiting. Slowly dilute with 1-2 glasses of water or milk and seek medical attention. Never give anything by mouth to an unconscious person.
Notes to Physician	Not Applicable

5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media	All standard fire fighting media
Extinguishing media which must not be used for safety reasons	None known.
Special Exposure Hazards	Decomposition in fire may produce toxic gases.
Special Protective Equipment for Fire-Fighters	Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautionary Measures	Use appropriate protective equipment.
Environmental Precautionary Measures	Prevent from entering sewers, waterways, or low areas.
Procedure for Cleaning / Absorption	Isolate spill and stop leak where safe. Contain spill with sand or other inert materials. Scoop up and remove.

7. HANDLING AND STORAGE

Handling Precautions	Avoid contact with eyes, skin, or clothing. Wash hands after use. Launder contaminated clothing before reuse.
-----------------------------	---

Storage Information

Store away from oxidizers. Store away from acids. Store in a cool, dry location. Keep container closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls	Use in a well ventilated area.
Respiratory Protection	Not normally needed. But if significant exposures are possible then the following respirator is recommended: Dust/mist respirator. (N95, P2/P3)
Hand Protection	Nitrile gloves.
Skin Protection	Normal work coveralls.
Eye Protection	Chemical goggles; also wear a face shield if splashing hazard exists.
Other Precautions	Eyewash fountains and safety showers must be easily accessible.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
Color:	Clear colorless
Odor:	Odorless
pH:	Not Determined
Specific Gravity @ 20 C (Water=1):	1.44 - 1.5
Density @ 20 C (kg/l):	1.5
Bulk Density @ 20 C (kg/m³):	Not Determined
Boiling Point/Range (C):	Not Determined
Freezing Point/Range (C):	Not Determined
Pour Point/Range (C):	Not Determined
Flash Point/Range (C):	Not Determined
Flash Point Method:	Not Determined
Autoignition Temperature (C):	Not Determined
Flammability Limits in Air - Lower (g/m³):	Not Determined
Flammability Limits in Air - Lower (%):	Not Determined
Flammability Limits in Air - Upper (g/m³):	Not Determined
Flammability Limits in Air - Upper (%):	Not Determined
Vapor Pressure @ 20 C (mmHg):	Not Determined
Vapor Density (Air=1):	Not Determined
Percent Volatiles:	Not Determined
Evaporation Rate (Butyl Acetate=1):	Not Determined
Solubility in Water (g/100ml):	Soluble
Solubility in Solvents (g/100ml):	Not Determined
VOCs (g/l):	Not Determined
Viscosity, Dynamic @ 20 C (centipoise):	Not Determined
Viscosity, Kinematic @ 20 C (centistokes):	Not Determined
Partition Coefficient/n-Octanol/Water:	Not Determined
Molecular Weight (g/mole):	Not Determined
Decomposition Temperature (C):	Not Determined

10. STABILITY AND REACTIVITY

Stability Data:	Stable
Hazardous Polymerization:	Will Not Occur
Conditions to Avoid	None anticipated

Incompatibility (Materials to Avoid)	Strong oxidizers.
Hazardous Decomposition Products	Carbon monoxide and carbon dioxide.
Additional Guidelines	Not Applicable

11. TOXICOLOGICAL INFORMATION

Principle Route of Exposure Eye or skin contact, inhalation.

Symptoms related to exposure **Inhalation**

Vapors given off by heated product may be harmful. May cause respiratory irritation. May cause central nervous system depression including headache, dizziness, drowsiness, incoordination, slowed reaction time, slurred speech, giddiness and unconsciousness.

Skin Contact May cause skin irritation.

Eye Contact May cause eye irritation.

Ingestion Harmful if swallowed. May cause central nervous system depression including headache, dizziness, drowsiness, muscular weakness, incoordination, slowed reaction time, fatigue blurred vision, slurred speech, giddiness, tremors and convulsions. May cause liver and kidney damage.

Aggravated Medical Conditions Skin disorders. Central nervous system disorders.

Chronic Effects/Carcinogenicity Repeated overexposure may cause liver and kidney effects.

Other Information None known.

Toxicity Tests

Oral Toxicity: LD50: 3500 mg/kg (Rat)

Dermal Toxicity: Not determined

Inhalation Toxicity: Not determined

Primary Irritation Effect: Not determined

Carcinogenicity Not determined

Genotoxicity: Not determined

Reproductive / Developmental Toxicity: Not determined

12. ECOLOGICAL INFORMATION

Mobility (Water/Soil/Air) Not determined

Persistence/Degradability Not determined

Bio-accumulation Not determined

Ecotoxicological Information

Acute Fish Toxicity:	Not determined
Acute Crustaceans Toxicity:	Not determined
Acute Algae Toxicity:	Not determined

Chemical Fate Information	Not determined
---------------------------	----------------

Other Information	Not applicable
-------------------	----------------

13. DISPOSAL CONSIDERATIONS

Disposal Method	Disposal should be made in accordance with federal, state, and local regulations.
-----------------	---

Contaminated Packaging	Follow all applicable national or local regulations.
------------------------	--

14. TRANSPORT INFORMATION

Land Transportation

ADR
Not restricted

Air Transportation

ICAO/IATA
Not restricted

Sea Transportation

IMDG
Not restricted

Other Transportation Information

Labels:	None
---------	------

15. REGULATORY INFORMATION

Chemical Inventories

Australian AICS Inventory	All components listed on inventory or are exempt.
New Zealand Inventory of Chemicals	All components listed on inventory or are exempt.
US TSCA Inventory	All components listed on inventory or are exempt.
EINECS Inventory	This product, and all its components, complies with EINECS

Classification	Xi - Irritant.
----------------	----------------

Risk Phrases	R36 Irritating to eyes.
--------------	-------------------------

Safety Phrases	None S25 Avoid contact with eyes.
----------------	-----------------------------------

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 1 din 16

FI TEHNIC DE SECURITATE

SEC IUNEA 1

IDENTIFICAREA SUBSTAN EI/AMESTECULUI I A COMPANIEI/ANTEPRIZEI

La data revizuirii de mai sus, aceasta Fisa Tehnica de Securitate este conforma cu legislatia din România.

1.1. IDENTIFICATOR PRODUS

Denumirea produsului: ESCAID 110

Descrierea produsului: Hidrocarburi dearomatizate

Denumire de înregistrare:

Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice

Num r de înregistrare:

01-2119456620-43-0000; 01-2119456620-43

1.2. UTILIZ RI IDENTIFICATE RELEVANTE ALE SUBSTAN EI SAU AMESTECULUI I UTILIZ RI NERECOMANDATE

Utilizare specific : Solvent minier, Solvent

Utilizari identificate:

Fabricarea substan ei

Distribuirea substan ei

Formularea i (re)ambalarea substan elor i amestecurilor

Utilizare în opera iunile de foraj i produc ie petrolier - Industrial

Utilizare în laboratoare - Industrial

Substan e chimice de uz minier

Utilizare în opera iunile de foraj i produc ie petrolier - Profesional

Utilizare în laboratoare - Profesional

Utilizari nerecomandate: Utiliz rile identificate de mai sus sunt specifice clientului c ruia îi este destinat această Fi tehnic de securitate i sunt utiliz ri pentru care datele din această Fi tehnic de securitate sunt aplicabile. Pot fi suportate/înregistrate i alte utiliz ri pentru acest produs. Acest produs nu este recomandat pentru nicio utilizare industrial , profesional sau de consum decât cele care sunt suportate/înregistrate.

1.3. DETALIILE FURNIZORULUI FI EI TEHNICE DE SECURITATE

Furnizor:

ExxonMobil Chemical Belgium

A division of ExxonMobil Petroleum & Chemical

Polderdijkweg 3B

B-2030 ANTWERP

Belgia

Telefon: 32 3 543 31 11

Contact general cu furnizorul:

E-mail:

+49 221-770-31

SDS.DE@EXXONMOBIL.COM

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 2 din 16

1.4. NUMĂR DE TELEFON PENTRU URGENȚE

Urgențe medicale 24 ore:

SGS Romania 0040-744- 34 14 53

Urgențe pe timp de noapte - 0040-744-34 14 53

Centrul național de control al toxicității:

+49 30 30686 790 (Giftnotruf Berlin)

SECȚIUNEA 2

IDENTIFICAREA PERICOLELOR

2.1. CLASIFICAREA SUBSTANȚEI SAU AMESTECULUI

Clasificarea în conformitate cu Regulamentul (CE) nr.1272/2008

Toxic prin aspirație: Categoria 1.

H304: Poate fi mortal în caz de înghițire și de prundere pe căile respiratorii.

Clasificare conform Directivei UE 67/548/CEE/ 1999/45 CE

| Xn; R65 | R66 |

Nociv.

R65; Nociv: poate cauza vătămări pulmonare, dacă este înghițit. R66; Expunerea repetată poate cauza uscarea sau craparea pielii.

Clasificarea acestui produs se bazează în întregime sau în parte pe datele testului.

2.2. ELEMENTE DE ETICHETARE

Elemente de etichetare în conformitate cu Regulamentul (CE) nr.1272/2008

Pictograme:

Cuvânt-semnal: Pericol

Fraze de pericol:

H304: Poate fi mortal în caz de înghițire și de prundere pe căile respiratorii.

EUH066: Expunerea repetată poate cauza uscarea și fisurarea pielii.

Fraze de precauție:

P210: A se păstra departe de flăcări și suprafețe încinse. -- Fumatul interzis. P280: Purtați mînuși de protecție și echipament de protecție a ochilor/ echipament de protecție a feței.

P301 + P310: ÎN CAZ DE ÎNGHIȚIRE: sunați imediat la un CENTRU PENTRU OTRĂVIRI sau un doctor. P331:

NU provoca vărmă. P370 + P378: În caz de incendiu: Folosiți abur de apă, spumă, substanță chimică uscată sau dioxid de carbon (CO2) pentru a stinge focul.

P403 + P235: A se depozita într-un spațiu bine aerisit. A se păstra la rece. P405: A se depozita într-un spațiu închis.

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 3 din 16

P501: Arunca i con inutul i recipientul în conformitate cu reglement rile locale.

Con ine: Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice

2.3. ALTE PERICOLE

Pericole Fizice/Chimice:

Materialul poate acumula înc rc turti electrostatice care pot provoca incendiu. Produsul poate elibera vapori ce formeaza rapid amestecuri inflamabile. Acumularea de vapori poate lua foc si/sau exploda daca este aprinsa. Inflamabil.

Pericole pentru s n tate:

Poate irita ochii, nasul, gâtul si plămânii. Expunerea repetata poate cauza uscarea sau craparea pielii.

Riscuri pentru mediul înconjur tor:

Nu sunt pericole semnificative. Materialul nu întrune te criteriile de a fi un PBT sau un vPvB, conform Anexei XIII a REACH.

SEC IUNEA 3

COMPOZI IE / INFORMA II DESPRE INGREDIEN I

3.1. SUBSTAN E

Acest material este definit ca substan .

Substan (e) periculoas (e) raportabil (e) conform (e) cu criteriile de clasificare i/sau cu limit de expunere (OEL)

Denumire	CAS#	Nr. CE	Înregistrare#	Concentra ie*	clasificare GHS/CLP
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice		926-141-6	01-2119456620-43	100 %	Asp. Tox. 1 H304, EUH066, [Flam. Liq. 4 H227]

Not – orice clasificare redat între paranteze este un bloc GHS care nu a fost adoptat de c tre UE în reglementarea CLP (nr. 1272/2008) i, prin urmare, nu este aplicabil în rile UE sau non-UE care au implementat reglementarea CLP, fiind dat cu scop pur informativ.

Denumire	CAS#	Nr. CE	Înregistrare#	Concentra ie*	Simboluri DSD/Fraze de risc
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice		926-141-6	01-2119456620-43	100 %	Xn;R65, R66

* Toate concentratiile sunt exprimate în procente de greutate, în afara de cazurile în care produsul este un gaz. Concentratiile gazelor sunt exprimate în procente de volum. Concentra iile pot varia.

Not : Orice intrare în coloana EC# care începe cu cifra 9 este un număr provizoriu de list furnizat de ECHA până la publicarea numărului oficial de inventar EC pentru substan . Vezi sec iunea 15 pentru informa ii suplimentare privind numărul CAS pentru substan .

Not : Consulta i sec iunea 16 a FTS pentru textul integral al razelor R. Vezi FTS(M) Sec iunea 16 pentru textul complet al frazelor de pericol.

Denumirea produsului: ESCAID 110

3.2. AMESTECURI Nu este cazul. Acest produs este reglementat ca substanță .

SEC IUNEA 4

M SURI DE PRIM AJUTOR

4.1. DESCRIEREA M SURILOR DE PRIM AJUTOR

INHALARE

Îndepătați persoana din zona de expunere. Persoanele care acordă primul ajutor trebuie să evite expunerea. Se va utiliza protecție respiratorie corespunzătoare. În cazul în care apar iritații ale căilor respiratorii, ametele, greata sau în caz de pierdere a cunoștinței, solicitați imediat asistență medicală. În cazul stopului respirator, asigurați ventilația cu ajutorul dispozitivelor medicale mecanice sau utilizați metoda de resuscitare gura la gura.

CONTACT CU PIELEA

Spălați cu apă și săpun zonele care au intrat în contact cu produsul. Îndepătați îmbrăcămintea contaminată. Spălați îmbrăcămintea contaminată înainte de reutilizare.

CONTACTUL CU OCHII

Clătiți abundent cu apă. În cazul când apar iritații, solicitați asistență medicală.

ÎNGHITIRE

Adresați-vă imediat medicului. Nu induceți starea de voma.

4.2. CELE MAI IMPORTANTE SIMPTOME ȘI EFECTE, ATÂT ACUTE CÂT ȘI TARDIVE

Înroșire, uscăreală și fisurare a pielii.

4.3. INDICAȚIE PENTRU SOLICITARE DE ASISTENȚĂ MEDICALĂ IMEDIAT ȘI TRATAMENT SPECIAL

Dacă este ingerată, substanța poate fi aspirată în plămâni și cauza pneumonie chimică. Acordați tratamentul corespunzător.

SEC IUNEA 5

M SURI DE COMBATERE A INCENDIULUI
--

5.1. MEDII DE STINGERE A INCENDIILOR

Mediu de stingere adecvat: Folosiți apă pulverizată, spuma, pudră chimică sau dioxid de carbon (CO₂) pentru a stinge incendiul.

Mediu de stingere nepotrivit: Jet direct de apă.

5.2. PREICOLE SPECIALE CARE DECURG DIN SUBSTANȚĂ SAU AMESTEC

Produse periculoase rezultate din combustie: Fum, vapori, Produse de combustie incomplet, Oxizi de carbon

5.3. RECOMANDĂRI PENTRU POMPIERI

Instrucțiuni de stingere a incendiilor: Evacuați zona. Luați măsuri de prevenire ca scurgerea reziduurilor rezultate din stingerea incendiului să nu patrundă în cursuri de apă, în rețeaua de canalizare, sau în rețeaua de alimentare cu apă potabilă. Pompierii trebuie să folosească echipamente de protecție standard, iar pentru incendii în spații închise, aparate de respirație autonome. Folosiți apă pulverizată pentru răcirea containerelor expuse incendiului și pentru protejarea personalului.

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 5 din 16

Riscuri în timpul incendiului: Inflamabil. Substanța periculoasă. Pompierii trebuie să folosească echipamentul de protecție indicat la Secțiunea 8.

PROPRIETĂȚI DE INFLAMABILITATE

Punct de inflamabilitate [Metoda]: >70°C (158°F) [ASTM D-93]

Limite superioară /inferioară de inflamabilitate (Exprimate în % de volum în aer): UEL: 7.0 LEL: 0.6 [Extrapolat]

Temperatura de autoaprindere: >200°C (392°F) [Extrapolat]

SECȚIUNEA 6

M SURSĂ ÎMPOTRIVA PIERDERILOR ACCIDENTALE

6.1. PRECAUȚII PERSONALE, ECHIPAMENT DE PROTECȚIE ȘI PROCEDURI DE URGENȚĂ

PROCEDURI DE NOTIFICARE

În cazul scurgerilor accidentale ale produsului, anunțați autoritățile competente conform regulamentelor aplicabile.

M SURSĂ DE PROTECȚIE

Evitați contactul cu produsul varsat. Avertizați sau evacuați persoanele aflate în apropiere și în zonele din direcția vântului, dacă toxicitatea și inflamabilitatea produsului o cer. Consultați Secțiunea 5 pentru Informații privind combaterea incendiilor. Pentru Pericole semnificative, vezi Secțiunea de Identificare a Pericolelor. A se vedea Secțiunea 4 pentru Recomandări de acordare a primului ajutor. Consultați Secțiunea 8 pentru îndrumări privind cerințele minime referitoare la echipamentul de protecție personal. Pot fi necesare măsuri de protecție suplimentare, în funcție de împrejurările specifice și/sau de expertiza persoanelor care acționează ca răspuns la situația de urgență.

Mănuși de lucru (de preferință mănuși lungi) care asigură un grad adecvat de rezistență chimică. Notă: mănușile fabricate din PVA nu sunt rezistente la apă și nu sunt potrivite pentru utilizare în situații de urgență. Dacă este posibil sau anticipat contactul cu produsul fierbinte, se recomandă utilizarea de mănuși termorezistente și izolate termic. Protecție respiratorie: se pot purta mască parțială sau completă cu filtru(e) anti-vapori organici și, acolo unde este cazul, anti-H₂S, precum și aparat de respirat autonom (SCBA), în funcție de mărimea deversării și de nivelul potențial de expunere. Dacă expunerea nu poate fi caracterizată complet ori este posibil sau anticipat o atmosferă cu deficit de oxigen, se recomandă utilizarea SCBA. Se recomandă utilizarea de mănuși de lucru care sunt rezistente la hidrocarburi aromatice. Notă: mănușile fabricate din polivinil acetat (PVA) nu sunt rezistente la apă și nu sunt potrivite pentru utilizare în situații de urgență. Se recomandă purtarea de ochelari de protecție chimică dacă sunt posibile împrăștierea sau contactul cu ochii. Deversări mici: îmbracă manta de lucru antistatică normală este, de obicei, adecvată. Deversări mari: se recomandă folosirea unui combinezon complet din material rezistent la substanțe chimice, antistatic.

6.2. PROTECȚIA MEDIULUI

Surgeri importante: Îndiguiți scurgerea de lichid pentru recuperare și eliminare ulterioară. Preveniți scurgerea produsului în cursuri de apă, în canalizare sau în spații închise. Luați măsuri pentru a preveni patrunderea în cursuri de apă, canale de scurgere sau zone închise.

6.3. METODE ȘI MATERIALE PENTRU STĂVILIRE ȘI CURĂȚARE

Deversare pe sol: Opreți scurgerea dacă acest lucru este posibil fără riscuri. Absorbiți sau acoperiți cu pământ, nisip ori alt produs necombustibil uscat și puneți substanța în containere. Recuperați sau îndepărtați produsul prin pompare sau cu ajutorul unor materiale absorbante inerte.

Deversare în apă: Opreți scurgerea dacă acest lucru este posibil fără riscuri. Avertizați celelalte transporturi.

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 6 din 16

Îndepărtați de pe suprafață prin colectare superficială sau cu ajutorul unor absorbantă adecvați. Soliciți opinia unui specialist înainte de a utiliza dispersanți.

Recomandarile referitoare la scurgerile produsului în apă și pe sol se bazează pe cel mai probabil scenariu de scurgere pentru acest produs; totuși, condițiile geografice, vântul, temperatura și (în cazul scurgerilor în apă) valurile, direcția și viteza curenților pot influența mult alegerea celor mai adecvate metode ce urmează a fi adoptate. Din aceste motive, vor trebui consultați specialiștii locali. Nota: Regulamentele locale recomandă sau interzic metodele ce urmează a fi adoptate.

6.4. REFERINȚE CĂTRE ALTE SECȚIUNI

Vezi secțiunile 8 și 13.

SECȚIUNEA 7

MANIPULARE ȘI DEPOZITARE

7.1. PRECAUȚII PENTRU MANIPULARE ÎN CONDIȚII DE SIGURANȚĂ

Evitați contactul cu pielea. Preveniți pierderile și scurgerile în cantități mici pentru a evita pericolul de alunecare. Materialul poate acumula încărcături electrostatice care pot provoca o scânteie electrică (sursă de aprindere). Când materialul este manipulat în vrac, o scânteie electrică poate aprinde orice vapori inflamabili proveniți de la lichidele sau reziduurile care pot fi prezente (de exemplu, în cursul operațiunilor de „switch-loading”). Utilizați proceduri adecvate de legare și/sau împănțare. Cu toate acestea, instalațiile de legare și împănțare nu pot elimina pericolul reprezentat de acumulările electrostatice. Pentru îndrumare, consultați standardele locale aplicabile. Referințele suplimentare includ American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents), National Fire Protection Agency 77 (Recommended Practice on Static Electricity) sau CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Temperatură la încălzire / descălzire: [Ambient]

Temperatura la transport: [Ambient]

Presiunea la transport: [Ambient]

Acumulare electrostatică: Acest material acumulează sarcini electrostatice. În mod tipic, un lichid este considerat ca fiind un acumulator static non-conductor dacă conductivitatea sa este mai mică de 100 pS/m (100×10^{-12} Siemens per metru) și este considerat ca fiind un acumulator static semi-conductor dacă conductivitatea sa este mai mică de 10,000 pS/m. Precauțiile sunt aceleași indiferent dacă lichidul este non-conductor sau semi-conductor. O serie de factori, de exemplu temperatura lichidului, prezența contaminanților, aditivii anti-statici și filtrarea pot influența puternic conductivitatea unui lichid.

7.2. CONDIȚII PENTRU DEPOZITAREA ÎN SIGURANȚĂ, INCLUSIV ORICE INCOMPATIBILITĂȚI

Alegerea containerului, de exemplu a vasului pentru depozitare, poate influența acumularea și disiparea sarcinilor electrostatice. Pastrati containerul închis. Manipulați containerele cu grijă. Deschideți-le încet pentru a controla schimbarea de presiune. A se depozita într-o zonă răcoasă și bine aerisită. Containerele de depozitare trebuie așezate pe pământ și legate. Containerele fixe de depozitare, containerele de transfer și echipamentele asociate trebuie să fie prevăzute cu legături de împănțare pentru a preveni acumulările electrostatice.

Temperatura de depozitare: [Ambient]

Presiunea de depozitare: [Ambient]

Containere/ ambalaje corespunzătoare: Buri; Canistre; Autocisterne; Vagoane automotoare

Materialele și acoperirile adecvate (compatibilitate chimică): Oel carbon; Oel inoxidabil; Poliester; Polietilen; Polipropilen; Teflon

Materiale învelișuri necorespunzătoare: Cauciuc natural; Butil cauciuc; Etilen-propilen-dien monomer

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 7 din 16

(EPDM); Polistiren

SEC IUNEA 8

CONTROLUL EXPUNERII / PROTEC IE PERSONAL

8.1. PARAMETRI DE CONTROL

VALOARI ALE LIMITEI DE EXPUNERE

Limitele/standardele de expunere (Not : Limitele de expunere nu au caracter adi ional)

Denumirea substan ei	Form	Limit / Standard			Not	Surs
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice	Vapori	RCP - TWA	1200 mg/m3	165 ppm	Total hidrocarburi	ExxonMobil

Limitele ocupationale de expunere conform Legii 319/2006 - Securitatea si s n tatea în munc si HG 1218/2006 privind stabilirea cerintelor minime de securitate si s n tate în munc pentru asigurarea protectiei lucr torilor împotriva riscurilor legate de prezenta agentilor chimici-anexa 1.

Nota: Informatiile referitoare la procedurile recomandate de monitorizare pot fi obtinute de la urmatoarele agentii sau institutii:

Ministerul Muncii Solidaritatii Sociale si Familiei

NIVELUL DERIVAT NICIUN EFECT (DNEL)/NIVELUL DERIVAT EFECT MINIM (DMEL)

Muncitor

Denumirea substan ei	Dermic	Inhalare
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice	NA	NA

Consumator

Denumirea substan ei	Dermic	Inhalare	Oral / bucal
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice	NA	NA	NA

Not : Nivelul Derivat Nici un Efect (DNEL) este un nivel estimat de siguran a expunerii care este derivat din datele de toxicitate în conformitate cu îndrum rile specifice aferente reglement rilor REACH europene. DNEL poate fi diferit de Limita de Expunere Ocupa ional (OEL) pentru aceea i substan chimic . Valorile OEL pot fi recomandate de o companie individual , de o institu ie guvernamental de reglementare sau de o organiza ie de expertiz , cum sunt Scientific Committee for Occupational Exposure Limits (SCOEL) sau American Conference of Governmental Industrial Hygienists (ACGIH). OEL sunt considerate ca fiind nivele sigure de expunere pentru un muncitor tipic într-un mediu ocupa ional, pentru un schimb de lucru de 8 ore, 40 de ore pe s pt mân , ca o medie ponderat pe un interval de timp (TWA) sau o limit de expunere pe termen scurt, de 15 minute (STEL). Considerate, de asemenea, ca având un rol

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 8 din 16

protector pentru sănătate, OEL-urile sunt derivate printr-un process diferit de cel utilizat în cazul REACH.

CONCENTRAȚIA PREVĂZUTĂ ÎN CĂZUL NICIUN EFECT (PNEC)

Denumirea substanței	Ap (ap dulce)	Ap (ap de mare)	Ap (eliberare intermitent)	Uzin de tratare a apelor uzate	Sediment	Sol	Oral (otrăvire secundară)
Hidrocarburi, C11-C14, n-alcani, izoalcani, ciclice, <2% aromatice	NA	NA	NA	NA	NA	NA	NA

Pentru UVCB-urile hidrocarbonate, nu este identificată o valoare PNEC singulară pentru substanța globală sau nu este utilizată în calculele de evaluare a riscului. Prin urmare, în tabelul de mai sus nu sunt date valori ale PNEC. Pentru informații suplimentare, vă rugăm să contactați ExxonMobil.

8.2. MĂSURI DE CONTROL AL EXPUNERII

CONTROALE TEHNICE

Nivelul de protecție și măsurile necesare de control a expunerii variază în funcție de condițiile potențiale de expunere. Măsurile tehnice de control ce vor fi luate în considerare:

Ventilarea adecvată este necesară pentru a se evita depășirea limitelor de expunere. Folosiți un echipament de ventilare protejat împotriva exploziilor.

PROTECȚIE PERSONALĂ

Alegerea echipamentului personal de protecție variază în funcție de condițiile potențiale de expunere, cum ar fi operațiile de aplicare și manipulare, concentrația și ventilația. Informațiile de mai jos, referitoare la alegerea echipamentului de protecție ce urmează a fi utilizat în timpul manipulării acestui produs, se referă la utilizarea în condiții normale a produsului.

Protecție respiratorie: Dacă măsurile de control tehnic nu mențin concentrațiile vaporilor și aerosolilor din aer la un nivel adecvat pentru protecția sănătății muncitorilor, este necesară purtarea unei măști de gaze aprobate. Alegerea, utilizarea și întreținerea măștii de gaze se va face în conformitate cu reglementările în vigoare, acolo unde este cazul. Tipurile măștilor de gaze necesare în cazul acestui tip de material includ:

Filtru respirator pentru jumătate de față. Material de filtrare tip A, Comitetul European pentru Standardizare (CEN) standardele EN 136, 140 și 405 prevăd măști respiratorii, iar EN 149 și 143 recomandă filtre.

Pentru concentrații mari de vapori în aer, utilizați o mască de gaze aprobată, prevăzută cu alimentare de aer și cu presiune pozitivă. Măștile de gaze cu alimentare de aer și cu butelie de evacuare se pot dovedi necesare atunci când nivelul de oxigen este insuficient, când condițiile de avertizare referitoare la gaze/vapori sunt necorespunzătoare sau când capacitatea/puterea nominală a filtrelor de purificare a aerului este depășită.

Protecția mâinilor: Informațiile privind măsurile de protecție se bazează pe date din literatură sau pe datele furnizate de producător. Condițiile de lucru pot afecta semnificativ durabilitatea mănușilor. Contactați producătorii de mănuși pentru recomandările specifice în ceea ce privește alegerea mănușilor pentru condițiile dvs. specifice de lucru. Verificați și înlocuiți mănușile uzate sau deteriorate. Tipurile de mănuși de protecție necesare în cazul acestui tip de produs includ:

Denumirea produsului: ESCAID 110

Data revizuirii: 06 Mar. 2013

Pagina 9 din 16

Se recomanda purtarea manusilor de protectie impotriva agentilor chimici. Cauciuc nitrilic, Standardele CEN: EN 420 i EN 374 prezinta cerinta generala i enumera tipuri de manusi

Protectia ochilor: In cazul in care exista posibilitatea de contact, este recomandabil sa purtati ochelari de protectie cu ecrane laterale.

Protectia pielii i a corpului: Toate datele referitoare la echipamentul de protectie se bazeaza pe materialele publicate si pe informatiile furnizate de producator. Tipurile de echipament de protectie necesar in cazul acestui tip de material includ:

Se recomanda purtarea unui echipament de protectie impotriva produsilor chimici/uleiosi.

Msuri de igien specifice: Respectati intotdeauna regulile de igiena personala, cum ar fi spalatul pe maini dupa manipularea materialului si inainte de a manca, bea si/sau fuma. Spalati in mod regulat hainele de lucru si echipamentul de protectie pentru a elimina contaminarea. Indepartati de articolele de imbracaminte si incaltaminte contaminate ce nu mai pot fi curatate. Respectati regulamentele de manipulare si organizare.

M MSURI DE CONTROL CU PRIVIRE LA MEDIUL INCONJUR TOR

Respectati regulamentele aplicabile pentru protectia mediului inconjurator, care limiteaza descarcarea in aer, apa i sol. Protejati mediul inconjurator prin aplicarea de msuri de control adecvate pentru a preveni sau limita emisiile.

SEC IUNEA 9

ale studiilor nu întrunesc criteriile pentru clasificare.	similar(e) cu ghidul OECD. 401
Piele	
Toxicitate acuta (Iepure): LD50 > 5000 mg/kg Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Toxicitate minima. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 402
Corosiunea pielii/Iritare: Date disponibile Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Poate usca pielea, cauzând disconfort si dermatita. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 404
Ochi	
Leziuni oculare grave/Iritare: Date disponibile Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Poate cauza disconfort usor si de scurta durata pentru ochi. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 405
Sensibilizare	
Sensibilizare respiratorie: Nu exist date referitoare la punctul-limit pentru material.	Nu este de a teptat s fie sensibilizant pentru c ile respiratorii.
Sensibilizarea pielii: Date disponibile. Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Nu este de a teptat s fie sensibilizant pentru piele. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 406
Aspira ie: Date disponibile.	Poate fi mortal în caz de înghi ire i de p trundere pe c ile respiratorii. Pe baza propriet ilor fizico-chimice ale materialului.
Mutagenitate asupra celulelor germinale: Date disponibile. Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Nu este de a teptat s fie mutagen pentru celulele germinale. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 471 473 474 476 478 479
Carcinogenicitate: Date disponibile. Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Nu este de a teptat s cauzeze cancer. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 453
Toxicitate pentru sistemul reproductiv: Date disponibile. Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Nu este de a teptat s fie toxic pentru func ia de reproducere. Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 414 421 422
Al ptare: Nu exist date referitoare la punctul-limit pentru material.	Nu este de a teptat s d uneze copiilor al pta i la sân.
Toxicitate specific de organ- int (STOT)	
Expunere unic : Nu exist date referitoare la punctul-limit pentru material.	Nu este de a teptat s d uneze organelor printr-o expunere unic .
Expunere repetat : Date disponibile. Scorurile testelor sau alte rezultate ale studiilor nu întrunesc criteriile pentru clasificare.	Nu este de a teptat s d uneze organelor prin expunere prelungit sau repetat . Pe baza datelor obtinute din teste efectuate pentru materiale cu compozitie similara Test(e) echivalent(e) sau similar(e) cu ghidul OECD. 408 413 422

ALTE INFORMA II

Produsul ca atare:

Concentratiile de vapori care depasesc nivelurile de expunere recomandate sunt iritante pentru ochi si pentru caile respiratorii, pot provoca dureri de cap si ameteli, sunt anestezice si pot avea alte efecte asupra sistemului nervos central. Contactul repetat si/sau prelungit cu pielea al substantelor cu vâscozitate scazuta poate determina degresarea pielii, ceea ce poate duce la iritatii si dermatita. Cantitati mici de lichid aspirat in plamâni in timpul înghitirii sau prin inducere de voma pot cauza pneumozee chimica sau edem pulmonar.

SEC IUNEA 12	INFORMA II ECOLOGICE
---------------------	-----------------------------

Informatiile furnizate se bazeaza pe datele disponibile pentru produs, elementele produsului si pentru produse similare.

12.1. TOXICITATE

Material -- Nu este de a teptat s fie nociv fa de organismele acvatice.

Material -- Nu are toxicitate cronica asupra organismelor acvatice.

12.2. PERSISTEN I DEGRADABILITATE

Biodegradare:

Material -- Se anticipeaza biodegradarea rapida.

Hidroliz :

Material -- Transformarea datorata hidrolizei nu va fi semnificativa.

Fotoliz :

Material -- Transformarea datorata fotolizei nu va fi semnificativa.

Oxidare atmosferic :

Material -- Aceasta substanta se poate degrada rapid in aer.

12.3. POTEN IAL DE BIOACUMULARE Nedeterminat.

12.4. MOBILITATE ÎN SOL Nedeterminat.

12.5. PERSISTEN , BIOACUMULARE I TOXICITATE PENTRU SUBSTAN (E)

Acest produs nu este sau nu con ine o substan care este un PBT sau un vPvB.

12.6. ALTE EFECTE ADVERSE

Nu sunt previzibile efecte adverse.

MASURI PRIVIND ELIMINAREA DESEURILOR

Recomandarile de eliminare se bazeaza pe produs în starea în care a fost furnizat. Eliminarea se va face în conformitate cu reglementarile nationale, tinând cont de caracteristicile produsului în momentul eliminarii.

13.1. METODE PENTRU TRATAREA DE DEURILOR

Se recomanda incinerarea produsului într-un arzator închis, controlat pentru puterea calorifica a combustibilului sau eliminarea prin incinerare supravegheata la temperaturi foarte înalte pentru a preveni formarea produselor secundare de combustie.

INFORMA II PRIVIND REGLEMENT RILE REFERITOARE LA ELIMINAREA DESEURILOR

Codul European al De eurilor: 08 XX XX

NOTA: Aceste coduri sunt atribuite în functie de utilizările cele mai frecvente ale acestui produs si este posibil sa nu reflecte impuritățile care rezulta din utilizarea reala. Producatorii de deseuri trebuie sa evalueze procesele propriu-zise utilizate în momentul generării deeurilor si contaminantilor respectivi, în vederea atribuirii codului(rilor) de deeu corespunzatoare.

Avertisment privind containerele goale Avertisment pentru container golit (dac este cazul): Containerele golite pot conține reziduuri și pot fi periculoase. Nu încerca să reumpleți sau să scurțați containerele în lipsa instrucțiunilor corespunzătoare. Butoaiele golite trebuie scurse complet și depozitate în siguranță până la recondiționarea sau eliminarea lor, în condiții de siguranță. Containerele golite trebuie să fie trimise spre reciclare, recuperare sau eliminare prin intermediul unui contractor calificat și licențiat în mod corespunzător și în conformitate cu reglementările guvernamentale. **A NU SE PRESURIZA, TĂIA, SUDA, ALĂMI, LIPI, GĂURI, POLIZA SAU EXPUNE ASEMENEA CONTAINERE LA CALDURĂ, FLĂCĂRI, SCÂNTEI, ELECTRICITATE STATICĂ SAU ALTE SURSE DE APRINDERE. ELE POT EXPLODA, CAUZÂND RĂNIRE SAU DECES.**

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți imediat persoana afectată afară, în afara zonei contaminate cu praf și lăsați-l să-și sufle nasul.
După contactul cu pielea:	A se spală cu apă
După contactul cu ochii:	Clătiți bine cu apă. Dacă iritația persistă, adresați-vă unui medic.
După înghițire:	Nu provocați vomă. Adresați-vă unui medic .
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	Poate provoca iritație ușoară
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	Produsul nu este combustibil. În caz de incendiu respectați, urmați instrucțiunile.
Mijloace de stingere corespunzătoare:	Produsul nu este combustibil.
Mijloace de stingere necorespunzătoare:	Niciunul
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Produsul în sine nu arde, nu se aprinde. Nu prezintă risc de incendiu sau explozie.
Echipamente speciale de stingere a incendiilor	În caz de incendiu, masca de praf și echipamentul de protecție.
Recomandări destinate pompierilor:	N.a.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Purtați echipament de protecție (mănuși, ochelari de protecție și îmbrăcăminte)
Proceduri de urgență:	Eliminați persoanele neprotejate. Asigurați o ventilație adecvată. Se recomandă utilizarea de ochelari de protecție, mănuși și mască de praf de tip P1, în cazul unor cantități mari de praf
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Non-toxic, inert, nu dăunează mediului
Metode de limitare a poluarii	Îndepărtarea mecanică a produsului
Informații suplimentare:	Evacuați apa de spălare contaminată în conformitate cu reglementările locale

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Este o substanță non-toxică. Respectați măsurile normale de protecție individuală. Se recomandă utilizarea de ochelari de protecție, mănuși și mască de praf de tip P1, în cazul unor cantități mari de praf
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Depozitați în locuri răcoroase și uscate. Depozitați la distanță de acizi

- INTAFLOW -

Specificațiile zonei de depozitare:	Depozitați în locuri răcoroase și uscate
Specificațiile recipientilor:	Păstrați recipientul închis ermetic
Incompatibilități:	Depozitați la distanță de de acizi
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Agent de reducere a pierderilor de circulație pentru fluidele de foraj

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanța		Carbonat de calciu micronizat natural CAS No. 471-34-1
TLV _{Ceiling} :		- - -
TLV _{TWA} :		3,0 mg/m ³
TLV _{STEL} :		10 mg/m ³
Limita biologică:		- - -
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Ventilație generală este recomandată
8.2.2. Măsurile de protecție individuală, precum echipamentul de protecție personală.		Asigurați ventilație corespunzătoare.
Protecția individuală	Respiratorie:	În mod normal nu este necesară protecție respiratorie. Evitați generarea de praf. În caz de expunere la praf, se va utiliza cel puțin masca de praf tip P1.
	Ochi	Ochelari de protecție în cazul prezenței unei cantități importante de praf.
	Maini	Mănuși
	Corp	Îmbrăcăminte de protecție
8.3. Controlul expunerii mediului		
Variante de expunere		Niciuna

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Pudră
Aspect:	Pudră
Culoare:	Albă
Miros:	Inodor
Prag olfactiv:	Inodor
9.2. Informații pentru sănătate, siguranță și mediu	
pH (10 g/l) la 20 °C:	8,5 – 9,5
Punct de topire:	825°C cu descompunere
Punct de fierbere:	N.a.
Punct de aprindere:	Nu este inflamabil
Inflamabilitate (solid, gaz):	Nu este inflamabil
Temperatura de autoaprindere:	Nu este inflamabil
Temperatura de descompunere:	825°C
Pericol de explozie:	Nu este explozibil
Limita de inflamabilitate superioară:	Nu este inflamabil/ Nu este explozibil
Limita inferioară de inflamabilitate:	Nu este inflamabil/ Nu este explozibil
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	N.a.
Densitatea aparentă (20°C):	N.a.

- INTAFLOW -

Densitatea relativă:	2.71 g/cm ³
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	0,014 g/l a 20°C
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE**10.1. Reactivitate**

Condiții care trebuie evitate:	Inert, nu reactiv. Stabil în condiții normale. Se descompune la temperatură de peste 825 ° C, cu degajare de CO ₂ și formarea de CaO
--------------------------------	---

10.2. Stabilitate chimică

Materiale incompatibile:	Acizi
Posibilitatea de reacții periculoase:	Reacționează cu acizii, cu formarea de CO ₂

10.3. Produsi de descompunere periculoși

Alte informații:	Reacționează cu acizii, cu formarea de CO ₂
------------------	--

11. INFORMAȚII TOXICOLOGICE**11.1. Toxicitate Acută**

Amestec toxic	<i>Micronized Natural Calcium Carbonate CAS No. 471-34-1</i>
Toxicitate orală acută:	LD50 (Șobolan): >6450 mg/kg
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	N.a.

11.2. Corozivitate

Piele:	Substanța nu este corozivă
Ochi:	Substanța nu este corozivă

11.3. Iritabilitate primară

Piele:	Substanța nu este iritantă
Ochi:	Poate provoca iritarea ușoară a ochilor.

11.4. Nocivitate

Ingestie:	N.a.
Inhalare:	N.a.

11.5. Sensibilitate

Piele:	Nu există efecte nocive așteptate. Nu este periculos.
Ochi:	Nu există efecte nocive așteptate. Nu este periculos.

12. INFORMAȚII ECOLOGICE**12.1. Toxicitate**

Toxicitate în apă:	Nu este toxic
Toxicitate în aer:	Nu este toxic
Toxicitate în sol:	Nu este toxic

12.2. Persistență și degradabilitate

Alte informații:	Nu este biodegradabil
------------------	-----------------------

12.3. Potențial de Bioacumulare

Alte informații:	N.a.
------------------	------

12.4. Mobilitate în sol

- INTAFLOW -

Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Substanța nu este clasificată ca deșeu periculos. Contactați o firmă autorizată pentru eliminare
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Substanța nu este clasificată ca deșeu periculos. Contactați o firmă autorizată pentru eliminare
Alte recomandări:	N.a.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Normele de transport ONU:	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Clasa IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	
Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei	
Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)	

- INTAFLOW -

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)
Regulament (CE) nr.1907/2006 (REACH) Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.
Reglementări naționale: Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice. Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase. REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase; HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase; REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006. Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008). REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH). Regulament 552/2009 de modificare a anexei XVII din Regulamentul (CE) nr.1907/2006 – REACH privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase HG 735/2006 privind limitarea emisiei de compuși organici volatili. HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații. Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase; Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase; HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă. REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei. HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006. O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.
Legislația privind eliminarea deșeurilor: Legea 211/2011 privind regimul deșeurilor. HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României. HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 349/2005 privind depozitarea deșeurilor; OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor; HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase. HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.
Legislația pentru deșeurile de ambalaj: Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje. HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje. HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration - concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioaccumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioaccumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C: Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații

Fraze de precauție și siguranță utilizate în secțiunile anterioare

S22: A nu se inspira praful.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
ACEST AMESTEC ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI:		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS05	Lezare ochi 1 H318: Provoacă leziuni oculare grave
	GHS07	Irit. Piele 2 H315: Provoacă iritarea pielii
		STOT SE H335: Poate provoca iritarea căilor respiratorii.
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	 GHS05 ...GHS07	Lezare ochi 1 H318: Provoacă leziuni oculare grave
		Irit. Piele 2 H315: Provoacă iritarea pielii
		STOT SE H335: Poate provoca iritarea căilor respiratorii.
Fraze de precauție:	P280: Purtați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/echipament de protecție a feței P302+P352: ÎN CAZ DE CONTACT CU PIELEA: spălați cu multă apă și săpun. P305+P351+P338: ÎN CAZ DE CONTACT CU OCHII: Clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Substanță					
Conținut:	În conformitate cu tabelul de mai jos

4. MĂSURI DE PRIM AJUTOR

4.1. Descrierea măsurilor de prim ajutor

Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Dacă respirația este neregulată sau nu respiră, procedați la respirație artificială.. Solicitați asistență medicală. Arătați medicului ambalajul sau eticheta.
După contactul cu pielea:	Spălați imediat din abundență zona afectată cu apă și săpun.
După contactul cu ochii:	În caz de contact cu ochii, clătiți cu multă apă curată o perioadă suficientă de timp. Consultați un medic oftalmolog. Protejați ochiul nevătămat.
După înghițire:	Clătiți gura cu apă și beți apă din abundență. Nu induceți vomă . Consultați un medic imediat.
Alte informații:	Hidroxidul de calciu. Nu este definit ca fiind toxic dacă este înghițit, inhalat sau dacă vine în contact cu pielea. Este clasificat ca fiind iritant pentru piele și poate cauza leziuni severe ale ochilor. Nu există preocupări pentru efecte sistemice adverse deoarece principalul pericol pentru sănătate îl reprezintă efectele locale (efectul pH-ului)

4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.

Simptome	Nu sunt date disponibile.
----------	---------------------------

4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.

Supraveghere medicală:	Nu este necesară supravegherea medicală în timpul activității la locul de muncă sau în caz de accident. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	Nu este cazul.

5. MĂSURI DE COMBATERE A INCENDIILOR

5.1. Mijloace de stingere a incendiilor

Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați următoarele instrucțiuni:
Mijloace de stingere corespunzătoare:	Produsul nu este combustibil. Pentru stingere utilizați: pulbere, spumă sau Dioxid de carbon. Utilizați măsurile de stingere care sunt corespunzătoare circumstanțelor locale și a mediului înconjurător.
Mijloace de stingere necorespunzătoare:	apa
Pericole care derivă din ardere (produși de descompunere termică periculoși):	Hidroxidul de calciu este iritant pentru piele și sistemul respirator, și implică un risc serios de lezare a ochilor.
Echipamente speciale de stingere a incendiilor	În caz de incendiu folosiți aparat pentru respirație adecvat.
Altele	Nu sunt date disponibile.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1. Precauții personale, echipament de protecție și proceduri de urgență

- VAR STINS (Var hidratat) -

Echipament de protecție:	Purtați echipament individual de protecție. Protecție respiratorie adecvată.
Proceduri de urgență:	Nu respirați praful. Deplasați oamenii neprotejați într-o zonă sigură. Furnizați ventilație adecvată.
6.2. Precauții pentru mediul înconjurător	
Mijloace de limitare:	Măturați și strângeți cu lopata. Pentru praf fin, utilizați sisteme de aspirare.
Metode de limitare a poluării	Evitați formarea prafului. Păstrați materialul uscat, dacă este posibil. Ridicați produsul mecanizat fără apă. Utilizați un aspirator sau o lopată și aruncați într-un sac.
Informații suplimentare:	Nu sunt date disponibile.
6.3 Metode și material pentru izolarea incendiilor și pentru curățenie	
	Nu sunt date disponibile.
6.4 Trimiteri către alte secțiuni) (trimiteri către secțiunile 8 și 13).	
	A se vedea și declarațiile de la secțiunile 8 și 13.

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Evitați contactul cu pielea și ochii. Nu respirați praf. Purtați echipament de protecție individual.
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Păstrați ambalajele închise etanș. Păstrați departe de alimente, băuturi și hrana animalelor. Evitați contactul cu aerul și umiditatea.
Specificațiile zonei de depozitare:	Zone ventilate adecvat, departe de materiale incompatibile.
Specificațiile recipientilor:	Întotdeauna păstrați containerele închise etanș.
Incompatibilități:	Depozitați departe de acizi, de cantități semnificative de hârtie, paie sau nitrocompuși.
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Material pentru reglarea pH-ului

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanță:		
TLV _{Ceiling} :		- - -
TLV _{TWA} :		1 mg/m ³
TLV _{STEL} :		4 mg/m ³
Limita biologică:		- - -
8.2. Controale ale expunerii profesionale		
Controale tehnice corespunzătoare :		Asigurați ventilație adecvată.
Protecție colectivă:		Asigurați ventilația adecvată. Fântâni pentru ochi, în apropiere.
Protecția individuală	Respiratorie:	Utilizați aparate pentru respirație.
	Ochi	Utilizați ochelari de protecție
	Mâini	Mănuși de protecție totală.
	Corp	Îmbrăcăminte de protecție pentru întreg corpul.
8.3. Controlul expunerii mediului		
Scenarii de expunere		Nu sunt date disponibile.

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Aspect:	Pulbere fină

- VAR STINS (Var hidratat) -

Starea fizica:	pulbere
Culoare:	Alb - bej
Miros:	inodor
Prag olfactiv:	N/A
9.2. Informații pentru sănătate, siguranță și mediu	
pH :	12,4
Punct de topire:	> 450 ° C
Punct de fierbere:	N/A
Punct de aprindere:	N/A
Inflamabilitate (solid, gaz):	Nu sunt date disponibile
Temperatura de autoaprindere:	Nu sunt date disponibile
Temperatura de descompunere:	> 580 ° C: se descompune în CaO și apă.
Pericol de explozie:	Nu sunt date disponibile
Limita de inflamabilitate superioară:	Nu sunt date disponibile
Limita inferioară de inflamabilitate:	Nu sunt date disponibile
Presiunea de vapori:	Nu sunt date disponibile.
Densitatea la 20 °C:	Nu sunt date disponibile
Densitatea aparentă (20°C)	Nu sunt date disponibile
Densitatea în vrac (Bulk)	Nu sunt date disponibile.
Densitatea relativă (20°C):	2,24 g/cm ³
Densitatea de vapori:	Nu sunt date disponibile.
Rata de evaporare:	Nu sunt date disponibile.
Solubilitate în apă (20°C):	1845 mg/l
Coeficientul de distribuție (n-octanol):	Nu sunt date disponibile.
Vâscozitatea (40°C):	Nu sunt date disponibile
9.3. Alte informații	
Alte informații:	Nu sunt date disponibile.

10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	Minimizați expunerea la aer și umiditate pentru a preveni degradarea substanței..
10.2. Stabilitate chimică	
Materiale incompatibile	Reacționează exoterm cu acizii pentru a forma săruri. În prezența umidității, hidroxidul de calciu reacționează cu aluminiul și alama, astfel formând hidrogen. $\text{Ca (OH) } 2 + 2 \text{ Al} + 6 \text{ H}_2\text{O} \rightarrow \text{Ca [Al (OH) } 4\text{] } 2 + 3 \text{ H}_2$
Posibilitatea de reacții periculoase:	Posibile reacții exoterme cu acizii.
10.3. Posibilitatea de reacții periculoase	
Hidroxidul de calciu reacționează cu dioxidul de carbon, formând carbonatul de calciu, o substanță existentă în natură. $\text{Ca(OH)}_2 + \text{CO}_2 \rightarrow \text{CaCO}_3 + \text{H}_2\text{O}$	
10.4. Condiții de evitat	
Nu sunt date disponibile.	
10.5. Materiale incompatibile	
Nu sunt date disponibile.	
10.6. Produși de descompunere periculoși	
Nu sunt date disponibile.	

- VAR STINS (Var hidratat) -

11. INFORMAȚII TOXICOLOGICE	
11.1. Informații privind efectele toxicologice	
Toxicitatea substanță:	<i>Hidroxid de calciu CAS No. 1305-62-0</i>
Toxicitate Acută	
Toxicitate orală acută:	LD50 (șobolan): >2000 mg/kg.
Toxicitate inhalatorie acută:	Nu sunt date disponibile.
Toxicitate cutanată acută:	LD50 (iepure): >2500 mg/kg
11.2. Corozivitate	
Piele:	Nu sunt date disponibile
Ochi:	Nu sunt date disponibile
11.3. Iritație	
Piele:	Iritant pentru piele.
Ochi:	Risc de lezare gravă a ochilor
11.4. Toxicitate la doze repetate	
Ingestie:	Nu sunt date disponibile.
Inhalare:	Iritant a traiectului respirator superior.
11.5. Sensibilitate	
Piele:	Nu sunt date disponibile
Ochi:	Nu sunt date disponibile.
11.6 Cancerogenitate	
	Nu sunt date disponibile.
11.7 Mutagenitate	
	Nu sunt date disponibile.
11.8 Toxicitate pentru reproducere	
	Nu sunt date disponibile.
12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	LC50 (96h) (peste de apă dulce): 50,6 mg/l LC50 (96h) (pește de apă sărată): 457 mg/l EC50 (48h) (nevertebrate de apă dulce): 49,1 mg/l LC50 (96h) (nevertebrate marine): 158 mg/l EC50 (72h) (alge de apă dulce) : 184,57 mg/l
Toxicitate în aer:	Nu sunt date disponibile.
Toxicitate în sol:	Nu sunt date disponibile.
12.2. Persistență și degradabilitate	
Alte informații:	Nu sunt date disponibile
12.3. Potențial de Bioacumulare	
Alte informații:	Nu sunt date disponibile
12.4. Mobilitate în sol	
Alte informații:	Hidroxidul de calciu este o substanță solubilă moderat și de aceea are o mobilitate slabă în cele mai multe soluri și de aceea este utilizată ca fertilizator.
12.5. Rezultatele evaluării PBT și vPvB	
PBT:	Nu este PTB
vPvB:	Nu este vPvT.
12.6. Alte efecte adverse	

- VAR STINS (Var hidratat) -

Alte informații:	Nu sunt date disponibile
------------------	--------------------------

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Eliminați conform reglementărilor Directivelor Europene referitoare la deșeuri și deșeuri periculoase.
Cod de deșeu:	Nu sunt date disponibile.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Nu sunt date disponibile.
Alte recomandări:	Eliminare conform reglementărilor în vigoare locale și naționale.
	Legislația privind eliminarea deșeurilor: Legea 211/2011 privind regimul deșeurilor. HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României. HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 349/2005 privind depozitarea deșeurilor; OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor; HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase. HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.
	Legislația pentru deșeuri de ambalaj: Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje si deșeuri de ambalaje. HG 247/2011 pentru modificarea si completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor si a deșeurilor de ambalaje. HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările in transport
Norme de transport ONU	Nu sunt date disponibile.
Clasa (clasele) de pericol pentru transport	Nu sunt date disponibile.
Grupul de ambalare:	Nu sunt date disponibile.
Pericol pentru mediu	Nu sunt date disponibile.
Precauții pentru utilizatori	
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările in transport
Poluant marin:	Nu sunt date disponibile.
14.3. Transport Aerian (ICAO-TI si IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările in transport
Clasa IATA	Nu sunt date disponibile.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările in transport
Codul IBC:	Nu sunt date disponibile.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	
Reglementări naționale: Legea 319/2006 – legea referitoare la sănătatea și securitatea în muncă	

- VAR STINS (Var hidratat) -

HG 1425/2006 consolidată – Norme de aplicare ale Legii 301/2006

HG 1218/2006 privind Stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

15.2 Evaluarea securității chimice

Nu a fost efectuată o evaluare a securității chimice.

16. ALTE INFORMAȚII

16.1. Principalele surse bibliografice

ECDIN - Environmental Chemicals Data and Information Network - Rețeaua de Informații și Date despre Substanțele Chimice utilizate în Mediul Înconjurător creată de Joint Research Centre, Commission of the European Communities - Centrul European Comun de Cercetare al Comisiei Comunităților Europene

SAX's DANGEROUS PROPERTIES OF INDUSTRIAL MATERIALS - Eight Edition – Van Nostrand Reinold

Istituto Superiore di Sanità - Inventario Nazionale Sostanze Chimiche-/ Institutul Superior de sănătate – Inventarul Național al Substanțelor (Italia)

ACGIH - Threshold Limit Values - 2009 edition/ ACGIH – Valorile limită de prag - ediția 2009

Ghid de redactare a fișelor cu date de securitate, versiunea 2, Decembrie 2013, ECHA

16.2. Lista frazelor de pericol și de precauție utilizate Alte informații –

Fraze de pericol utilizate în secțiunile anterioare

H315: Provoacă iritarea pielii.

H318: Provoacă leziuni oculare grave

H335: Poate provoca iritarea căilor respiratorii

Fraze de precauție utilizate în secțiunile anterioare

P280: Purtați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/echipament de protecție a feței

P302+P352: ÎN CAZ DE CONTACT CU PIELEA: spălați cu multă apă și săpun.

P305+P351+P338: ÎN CAZ DE CONTACT CU OCHII: Clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

16.3. Abrevieri și acronime utilizate:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

ECHA – Agenția Europeană pentru Substanțe Chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința Americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

EUH: declarație de pericol, care este convenită în afara sistemului global armonizat GHS

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

N/A: neaplicabil

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

Ppm: părți per milion

FSD: Fișa de Date de securitate

STOT SE: Toxicitate asupra unui organ țintă specific – o singură expunere

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe

- VAR STINS (Var hidratat) -

termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații –

16.4.1 Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul EU 453/2010/. Această fișă anulează și înlocuiește orice ediție precedentă. Modificările intervenite între două ediții ale unei FDS sunt ținute sub control la producător.

16.4.2 Clauze de exonerare de răspundere

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document. Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere conform celor indicate în fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță pentru utilizarea intenționată declarată. Este responsabilitatea utilizatorului să se asigure că este în posesia ultimei ediții a fișei de securitate.

16.4.3 Răspundere

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate cu excepția acelor informații din secțiunile 1, 13, 15 și 16 care au fost armonizate cu legislația română în vigoare. De asemenea, structura fișei de securitate a fost armonizată cu structura din Anexa II B a Regulamentului UE 1907/2008.

Răspunderea pentru conținutul versiunii în limba engleză al acestei FDS aparține Ava S.p.A.

Răspunderea pentru traducerea în limba română a reviziei 3 a acestei FDS și armonizarea cu cerințele legislației române la secțiunile mai sus indicate, aparține AVA EASTERN EUROPE D.F & S srl prin Compartimentul QSHE și Isabela NIȚĂ, inginer chimist.

Sfârșitul fișei de securitate

4. MĂSURI DE PRIM AJUTOR

4.1. Descrierea măsurilor de prim ajutor

Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți persoana la aer curat și tratați în funcție de simptome. Consultați un medic.
După contactul cu pielea:	Spălați zona expusă cu apă și săpun. Consultați un medic dacă iritațiile se dezvoltă.
După contactul cu ochii:	Clătiți cu grijă ochii cu apă curată. Dacă iritațiile continuă, consultați un medic.
După înghițire:	Dați câteva pahare de apă pentru a dilua. Dacă a fost înghițită o cantitate mare, consultați un medic
Alte informații:	Nu sunt date disponibile.

- SAND SEAL F-C -

4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	Nu sunt date disponibile.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Nu este necesară supravegherea medicală în timpul activității la locul de muncă. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	Nu sunt date disponibile.

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați următoarele instrucțiuni:
Mijloace de stingere corespunzătoare:	Utilizați stingătoare de incendiu standard
Mijloace de stingere necorespunzătoare:	Nu sunt date disponibile.
Pericole care derivă din ardere (produși de descompunere termică periculoși):	Nu este considerat că are potențial explozibil
Echipamente speciale de stingere a incendiilor	Nu sunt date disponibile.
Altele	Utilizați materialul solicitat în zona.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Evitați respirarea prafului
Proceduri de urgență:	Nu sunt date disponibile.
6.2. Precauții pentru mediul înconjurător	
Mijloace de limitare:	Nu sunt date disponibile
Metode de limitare a poluării	Evitați măturarea uscată; stropiți cu apă sau utilizați un sistem de aspirare pentru a preveni formarea prafului.
Informații suplimentare:	Nu sunt așteptate efecte adverse.

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Evitați generarea de praf.
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Asigurați o ventilație potrivită și depozitați pentru a preveni deteriorări accidentale. Protejați de umiditate.
Specificațiile zonei de depozitare:	Depozitați în zone uscate și reci.
Specificațiile recipientilor:	Păstrați containerele închise etanș.
Incompatibilități:	Nu sunt date disponibile.
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Material de reducere a pierderilor de circulație pentru fluidele de foraj

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ	
8.1. Parametri de control	

- SAND SEAL F-C -

TLV _{Celing} :	---	
TLV _{TWA} :	10 mg/m3 total dust; 4 mg/m3 respirable dust	
TLV _{STEL} :	---	
Limita biologică:	---	
8.2. Controale ale expunerii profesionale		
Controale tehnice corespunzătoare :	Asigurați o ventilare adecvată.	
Protecție colectivă:	Se recomandă o ventilare generală.	
Protecția individuală	Respiratorie:	În mod normal nu este necesară.
	Ochi	Se recomandă ochelari de protecție
	Mâini	Mănuși de protecție
	Corp	Se recomandă îmbrăcăminte de protecție.
8.3. Controlul expunerii mediului		
Scenarii de expunere	Nu sunt date disponibile.	

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Aspect:	solid
Starea fizică:	Pulbere de granulație fină sau medie
Culoare:	Maro închis sau bej
Miros:	inodor
Prag olfactiv:	Nu sunt date disponibile.
9.2. Informații pentru sănătate, siguranță și mediu	
pH	Nu sunt date disponibile
Punct de topire:	Nu sunt date disponibile
Punct de fierbere:	N/A

10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	Stabil chimic, nu se cunoaște nici o incompatibilitate specială
10.2. Stabilitate chimică	
Materiale incompatibile	Nici unul
Posibilitatea de reacții periculoase:	Nici unul
10.3. Posibilitatea de reacții periculoase	
Alte informații	Nu sunt date disponibile

11. INFORMAȚII TOXICOLOGICE	
11.1. Informații privind efectele toxicologice	
Toxicitate Acută	
Toxicitate orală acută:	Nu sunt date disponibile.
Toxicitate inhalatorie acută:	Nu sunt date disponibile.
Toxicitate cutanată acută:	Nu sunt date disponibile.
11.2. Corozivitate	
Piele:	Nu sunt date disponibile
Ochi:	Nu sunt date disponibile
11.3. Iritație	
Piele:	Nu sunt date disponibile.
Ochi:	Nu sunt date disponibile.
11.4. Toxicitate la doze repetate	
Ingestie:	Nu sunt date disponibile.
Inhalare:	Nu sunt date disponibile
11.5. Sensibilitate	
Piele:	Nu sunt date disponibile.
Ochi:	Nu sunt date disponibile.

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	Sand Seal F-C este o pudra nepericuloasa, de origini vegetale iar deseul nu este un subiect de cerinte speciale
Toxicitate în aer:	Nu sunt date disponibile.
Toxicitate în sol:	Nu sunt date disponibile.
12.2. Persistență și degradabilitate	
Alte informații:	Nu sunt date disponibile
12.3. Potențial de Bioacumulare	
Alte informații:	Nu sunt date disponibile
12.4. Mobilitate în sol	
Alte informații:	Nu sunt date disponibile.
12.5. Rezultatele evaluării PBT și vPvB	
PBT:	Nu sunt date disponibile.
vPvB:	Nu sunt date disponibile.
12.6. Alte efecte adverse	

- SAND SEAL F-C -

Alte informații:	Sand Seal F-C este o pudra nepericuloasă, de origini vegetale iar deseul nu este un subiect de cerințe speciale
------------------	---

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Materialul trebuie îngropat pentru a preveni emisia de praf respirabil. Reciclarea ar trebui să fie preferată în detrimentul eliminării.
Cod de deșeu:	Nu sunt date disponibile.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Nici unul în special. În orice caz, ar trebui evitată formarea prafului de la ambalare și garantată o protecție adecvată pentru lucrători. Reciclarea și eliminarea ambalajelor ar trebui să fie realizată de o companie cu un management al deșeurilor adecvat.
Alte recomandări:	Legislația română privind eliminarea deșeurilor: (trece la 13) Legea 211/2011 privind regimul deșeurilor. HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României. HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor. HG 349/2005 privind depozitarea deșeurilor; OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor; HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase. HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.
	Legislația pentru deșeurile de ambalaj: Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje. HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje. HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Norme de transport ONU	Nu sunt date disponibile.
Clasa (clasele) de pericol pentru transport	Nu sunt date disponibile.
Grupul de ambalare:	Nu sunt date disponibile.
Pericol pentru mediu	Nu sunt date disponibile.
Precauții pentru utilizatori	
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Poluant marin:	Nu sunt date disponibile.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Clasa IATA	Nu sunt date disponibile.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Codul IBC:	Nu sunt date disponibile.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	

- SAND SEAL F-C -

Reglementări naționale:

Legea 319/2006 – legea referitoare la sănătatea și securitatea în muncă

HG 1425/2006 consolidată – Norme de aplicare ale Legii 301/2006

HG 1218/2006 privind Stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

15.2 Evaluarea securității chimice

Nu a fost efectuată o evaluare a securității chimice.

16. ALTE INFORMAȚII

16.1. Principalele surse bibliografice

ECDIN - Environmental Chemicals Data and Information Network - Rețeaua de Informații și Date despre Substanțele Chimice utilizate în Mediul Înconjurător creată de Joint Research Centre, Commission of the European Communities - Centrul European Comun de Cercetare al Comisiei Comunităților Europene

SAX's DANGEROUS PROPERTIES OF INDUSTRIAL MATERIALS - Eight Edition – Van Nostrand Reinold

Istituto Superiore di Sanità - Inventario Nazionale Sostanze Chimiche-/ Institutul Superior de sănătate – Inventarul Național al Substanțelor (Italia)

ACGIH - Threshold Limit Values - 2009 edition/ ACGIH – Valorile limită de prag - ediția 2009

Ghid de redactare a fișelor cu date de securitate, versiunea 2, Decembrie 2013, ECHA

16.2. Lista frazelor de pericol și de precauție utilizate Alte informații –

Fraze de pericol utilizate în secțiunile anterioare

-

Fraze de precauție utilizate în secțiunile anterioare

P260: Nu inspirați praful/fumul/gazul/ceața/vaporii/spray-ul

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare

S22: Nu inspirați praf

S26: În caz de contact cu ochii, clătiți imediat cu apă din abundență și consultați un medic

S24/25: Evitați contactul cu pielea și ochii

16.3. Abrevieri și acronime utilizate:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

ECHA – Agenția Europeană pentru Substanțe Chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința Americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

EUH: declarație de pericol, care este convenită în afara sistemului global armonizat GHS

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

N/A: neaplicabil

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

FSD: Fișa de Date de securitate

STOT SE: Toxicitate asupra unui organ țintă specific – o singură expunere

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

- SAND SEAL F-C -

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații –

16.4.1 Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul EU 453/2010/. Această fișă anulează și înlocuiește orice ediție precedentă. Modificările intervenite între două ediții ale unei FDS sunt ținute sub control la producător.

16.4.2 Clauze de exonerare de răspundere

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document. Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere conform celor indicate în fiecare secțiune a prezentei fișe, astfel ca produsul să fie utilizat în siguranță pentru utilizarea intenționată declarată. Este responsabilitatea utilizatorului să se asigure că este în posesia ultimei ediții a fișei de securitate.

16.4.3 Răspundere

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate cu excepția acelor informații din secțiunile 1, 13, 15 și 16 care au fost armonizate cu legislația română în vigoare. De asemenea, structura fișei de securitate a fost armonizată cu structura din Anexa II B a Regulamentului UE 1907/2008.

Răspunderea pentru conținutul versiunii în limba engleză al acestei FDS aparține Ava S.p.A.

Răspunderea pentru traducerea în limba română a reviziei 3/4 a acestei FDS și armonizarea cu cerințele legislației române la secțiunile mai sus indicate , aparține AVA EASTERN EUROPE D.F & S srl prin Compartimentul QSHE și Isabela NIȚĂ, inginer chimist.

Sfârșitul fișei de securitate

Carbonat de calciu ventilat natural REACH No. 01-2119486795-18-XXXX	471-34-1	207-439-9	100%	---	---	---

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți imediat persoana afectată afară la aer proaspăt. Tratați simptomele. Adresați-vă unui medic.
După contactul cu pielea:	Spălați zona contaminată cu apă din abundență.
După contactul cu ochii:	Clătiți bine cu apă. Dacă iritația persistă, adresați-vă unui medic.
După înghițire:	Clătiți imediat gura bine cu apă de mai multe ori. Adresați-vă unui medic.
Alte informații:	N.a.

**- AVACARB -**

4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	---

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu, respectați instrucțiunile.
Mijloace de stingere corespunzătoare:	Acest produs nu este inflamabil.
Mijloace de stingere necorespunzătoare:	Niciunul
Riscuri care derivă din ardere (produsi de descompunere termică periculoși):	Produsul nu se aprinde singur. Nu sunt prezentate pericolele de incendiu sau explozie.
Echipamente speciale de stingere a incendiilor	Purtați aparatul respirator și îmbrăcăminte de protecție.
Recomandări destinate pompierilor:	N.a.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Purtați echipament individual de protecție (mănuși, ochelari și combinezon)
Proceduri de urgență:	Îndepărtați persoanele neprotejate. Asigurați o ventilație adecvată.
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	N.a.
Metode de limitare a poluarii	Îndepărtați cu mătura, lopata sau sistem de vidare.
Informații suplimentare:	Evacuați apa de spălare contaminată în conformitate cu reglementările locale

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Evitați generarea de praf
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Depozitați în locuri răcoroase și uscate
Specificațiile zonei de depozitare:	Depozitați în zone uscate, bine ventilate
Specificațiile recipientilor:	N.a.
Incompatibilități:	Depozitați la distanță de acizi
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Material de îngreunare pentru fluide de foraj

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ	
8.1. Parametri de control (Limite de expunere)	
Amestec	
TLVC _{celing} :	---
TLV _{TWA} :	TLV-TWA (fracțiune inhalabilă): 10 mg/m ³

**- AVACARB -**

TLV _{STEL} :		TLV-TWA (fracțiune respirabilă): 3,0 mg/m3
Limita biologică:		- - -
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Stație de spălare ochi în apropiere.
8.2.2. Măsurile de protecție individuală, precum echipamentul de protecție personală.		Ventilație forțată
Protecția individuală	Respiratorie:	În mod normal, nu este necesară. Evitati generarea de praf. Mască de praf tip FFP1, cel puțin atunci când există expunere la praf.
	Ochi	Ochelari de protecție.
	Maini	Mănuși de protecție
	Corp	Recomandată îmbrăcăminte de protecție
8.3. Controlul expunerii mediului		
Variante de expunere		N.a.

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Formă:	Solid
Aspect:	Praf
Culoare:	Alb
Miros:	Inodor

Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE**15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.**

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr. 1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

**- AVACARB -**

<p>HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;</p> <p>HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;</p> <p>REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.</p> <p>Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).</p> <p>REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie

**- AVACARB -**

informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C: Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de precauție/siguranță utilizate în secțiunile anterioare**

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S22: A nu se inspira praful.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
SUBSTANȚA / AMESTECUL NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		

**- AVAMICA F-C -**

Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Fraze de precauție:		
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Sfaturi de siguranță::	S22: A nu se inspira praful.	
Eliminarea:		
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTĂ						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Amestec					
Conținut:	În conformitate cu tabelul următor					
Formula moleculară:	---					
Numărul EC:	---					
Numărul CAS:	---					
Numărul ONU:	---					
Numărul REACH:	---					
3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Mica	12001-26-2	601-648-2	---	---	---	---
Siliciu cristalin	14808-60-7	238-878-4	---	STOT RE 1	 GHS08	H372
	Notă: Acest produs conține o cantitate mai mica de 1% de quart respirabil. Cuarțul respirabil este clasificat STOT RE 1					

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți imediat persoana afectată afară / la aer curat. Tratament simptomatic.

**- AVAMICA F-C -**

După contactul cu pielea:	Scoateți hainele contaminate. Spălați partea/partile afectate cu apă din abundență.
După contactul cu ochii:	Clătiți bine cu apă. Dacă iritația persista, solicitați asistentă medicală.
După înghițire:	Clătiți imediat gura bine cu apă și repetați de mai multe ori. Dacă este necesar să solicitați asistentă medicală.
Alte informații:	---
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	---

5. MĂSURI DE COMBATERE A INCENDIILOR**5.1. Mijloace de stingere a incendiilor**

Măsuri de precauție în caz de incendiu:	În caz de incendiu, respectați instrucțiunile.
Mijloace de stingere corespunzătoare:	Produsul nu este combustibil. Nu este nevoie de metode de stingere specifice.
Mijloace de stingere necorespunzătoare:	N.a.
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Non-combustibil. Nu se descompune termic periculos.
Echipamente speciale de stingere a incendiilor	Nu este necesară o protecție specială de stingere a incendiilor. Folosiți un agent de stingere corespunzător pentru stingerea incendiilor.
Recomandări destinate pompierilor:	N.a.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ**6.1. Precauții personale, echipament de protecție și proceduri de urgență**

Echipament de protecție:	A se evita generarea de praf în aer. Purtați echipament de protecție individual în conformitate cu legislația națională.
Proceduri de urgență:	N.a.

6.2. Precauții pentru mediul înconjurător

Medii de izolare:	Nu deversați în sistemele de canalizare, cursurile de apă sau în pământ.
Metode de limitare a poluării	Evitați măturatul uscat și utilizați pulverizarea cu apă sau sisteme de curățare cu vid, pentru a preveni generarea de praf în aer. Purtați echipament individual de protecție, în conformitate cu legislația națională.
Informații suplimentare:	N.a.

7. MANIPULARE ȘI DEPOZITARE**7.1. Precauții pentru manipularea în condiții de securitate**

Precauții pentru manipulare în condiții de securitate:	Evitați generarea de praf din aer. În caz de ventilație insuficientă, purtați echipament de protecție respiratorie adecvat. Nu a mânca, bea și fuma în zonele de lucru; a se spăla mâinile după utilizare; îndepărtați îmbrăcămintea contaminată și echipamentul de protecție înainte de a pătrunde în locurile de alimentație.
--	---

7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități

Condiții de depozitare:	Depozitați într-o zonă uscată acoperită.
Specificațiile zonei de depozitare:	Minimizați generarea de praf în aer și preveniți dispersarea în vânt în timpul de încărcare și descărcare.
Specificațiile recipientilor:	Păstrați containerele închise și depozitați produsele ambalate astfel încât să se

**- AVAMICA F-C -**

	prevină spargerea accidentală
Incompatibilități:	Nu sunt disponibile.
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Material pentru prevenirea și stoparea pierderilor de circulație

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control (Limite de expunere)		
Substanța		Praf anorganic
TLV _{Celing} :		- - -
TLV _{TWA} :		4 mg/m ³
TLV _{STEL} :		- - -
Limita biologică		- - -
Substanța		Mica Cas No. 12001-26-2
TLV _{Celing} :		- - -
TLV _{TWA} :		0,8 mg/m3
TLV _{STEL} :		- - -
Limita biologică		- - -
Substanța		Siliciu Cristalin CAS No. 14808-60-7
TLV _{CEILING} :		- - -
TLV _{TWA} :		0,1 mg/m ³
TLV _{STEL} :		
Limita biologică		- - -
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Ventilație generală
8.2.2. Măsuri de protecție individuală, precum echipamentul de protecție personală.		Stație spalare- ochi în apropiere.
Protecția individuală	Respiratorie:	Masca de praf
	Ochi	Ochelari de protecție recomandați
	Maini	Mănuși
	Corp	Îmbrăcăminte de protecție recomandată
8.3. Controlul expunerii mediului		
Variante de expunere		- - -

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Aspect:	Pudra sau granule
Forma:	Pudra sau granule
Culoare:	Alb / aproape alb
Miros:	Aproape inodor
Prag olfactiv:	Niciunul
9.2. Informații pentru sănătate, siguranță și mediu	
pH (10 g/l) la 25 °C:	N.a.
Punct de topire:	N.a.
Punct de fierbere:	N.a.
Punct de aprindere:	N.a.
Inflamabilitate (solid, gaz):	N.a.

**- AVAMICA F-C -**

Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	N.a.
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	2.3 kg/l
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	Insolubil
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE**10.1. Reactivitate**

Condiții care trebuie evitate:	Stabil în condiții normale de temperatura si recomandate de utilizare
--------------------------------	---

10.2. Stabilitate chimică

Materiale incompatibile:	Nu sunt specificate materiale, sau grupe de materiale care sunt susceptibile de a reacționa pentru a produce o situație periculoasă .
Posibilitatea de reacții periculoase:	Niciuna

10.3. Produși de descompunere periculoși

Alte informații:	Niciuna în condiții normale
------------------	-----------------------------

11. INFORMAȚII TOXICOLOGICE**11.1. Toxicitate Acută****Toxicitatea amestecului**

Toxicitate orală acută:	N.a.
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	N.a.

11.2. Corozivitate

Piele:	N.a.
Ochi:	N.a.

11.3. Iritabilitate primară

Piele:	Contactul prelungit poate provoca uscarea pielii
Ochi:	Prezența particulelor în ochi poate provoca iritații și usturime

11.4. Nocivitate

Ingestie:	Nu sunt de așteptat efecte nocive
Inhalare:	Praful în concentrații ridicate poate irita sistemul respirator

11.5. Sensibilitate

Piele:	Nu sunt de așteptat efecte nocive
Ochi:	Nu sunt de așteptat efecte nocive

**- AVAMICA F-C -**

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	N.a.
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	Produsul nu este biodegradabil
12.3. Potențial de Bioacumulare	
Alte informații:	N.a.
12.4. Mobilitate în sol	
Alte informații:	Insolubil în apă
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Nu există informații speciale. A se elimina printr-o firmă specializată autorizată
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	N.a.
Alte recomandări:	Eliminați în conformitate cu reglementările locale și naționale

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Norme de transport ONU:	N.a.
Clasă (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasă IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasă ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Clasă IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE

15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr. 1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;

HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;

REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr. 1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiei de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solvenților organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

**- AVAMICA F-C -****Legislația pentru deșeuri de ambalaj:**

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeuri de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.

HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

**- AVAMICA F-C -**

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de pericol utilizate în secțiunile anterioare**

H372: Poate provoca afectari ale organelor în caz de expunere repetata sau prelungita.

Fraze de precautie/ siguranta utilizate în secțiunile anterioare

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S22: A nu se inspira praful.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
SUBSTANȚA / AMESTECUL ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS08	Tox. Asp. 1 H304 – Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii
	GHS05	Cor. Piele 1C H314: Provoacă arsuri grave ale pielii și lezarea ochilor.
	GHS07	Sens. Piele 1 H317: Poate provoca o reacție alergică a pielii.
	GHS09	Acvatic Cronic 1 H410: Foarte toxic pentru mediul acvatic cu efecte pe termen lung.
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
	Xn - Nociv	R65 – Nociv: poate provoca afecțiuni pulmonare în caz de înghițire.
	Xi - Iritant	R36/38 – Iritant pentru ochi și pentru piele
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Fraze de pericol:	    GHS08 GHS05 GHS07 GHS09	
	Tox. Asp. 1 H304 – Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii	
	Cor. Piele 1C H314: Provoacă arsuri grave ale pielii și lezarea ochilor.	
	Sens. Piele 1 H317: Poate provoca o reacție alergică a pielii.	
	Acvatic Cronic 1 H410: Foarte toxic pentru mediul acvatic cu efecte pe termen lung.	
Fraze de precauție:	P261: Evitați să inspirați praful/fumul/gazul/ceața/vaporii/spray-ul. P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței. P301 + 310: ÎN CAZ DE ÎNGHIȚIRE: sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau	

	<p>un medic.</p> <p>P303+P361+P353: ÎN CAZ DE CONTACT CU PIELEA (sau părul): scoateți imediat toată îmbrăcămintea contaminată. Clătiți pielea cu apă/faceți duș.</p> <p>P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.</p>	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare pentru substanțe/amestecuri periculoase.	
Etichetarea conform Directivei 67/548/CEE (DPP) , a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:		Xn - Nociv R65 – Nociv: poate provoca afecțiuni pulmonare în caz de înghițire
		Xi – Iritant R36/38 – Iritant pentru ochi și pentru piele
Sfaturi de siguranță:	<p>S23: A nu se inspira gazul/fumul.vaporii (termenul(ii) corespunzător(i) se specifică de către producător)</p> <p>S 26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul.</p> <p>S28: După contactul cu pielea, spălați imediat cu apă din abundență, cu produsul corespunzător specificat de producător.</p> <p>S36/37/39: Purtați echipament de protecție corespunzător, mănuși și mască de protecție pentru ochi / față</p>	
Eliminarea:	S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Amestec					
Conținut:	În conformitate cu tabelul următor:					
Formula moleculară:	---					
Natura chimică:	Acumulator static					
Numărul EC:	---					
Numărul CAS:	---					
Numărul UN:	---					
Numărul REACH	---					
3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Mutați persoana expusă la aer curat..Consultați un medic după o expunere semnificativă.
După contactul cu pielea:	Scoateți îmbrăcămintea contaminată și încălțăminte imediat. Spălați zona afectată cu apă din abundență. Dacă iritația pielii persistă, solicitați asistență medicală.
După contactul cu ochii:	Clătiți ochii cu apă din abundență, timp de cel puțin 15 minute. Solicitați asistență medicală. Scoateți lentilele de contact.
După înghițire:	Nu provocați vomă. Solicitați asistență medicală.
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și să îi arătați această Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.
5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu urmați instrucțiunile:
Mijloace de stingere corespunzătoare:	În caz de incendiu utilizați: pulbere ABC, dioxid de carbon (CO ₂), Produs chimic uscat, apă pulverizată
Mijloace de stingere necorespunzătoare:	Halon
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Dioxid de carbon și monoxid de carbon, hidrocarburi, oxizi de azot (NO _x)
Echipamente speciale de stingere a incendiilor	În caz de incendiu purtați un aparat de respirat autonom cu presiune pozitivă și îmbrăcăminte de protecție. Nu permiteți scurgerile de la stingerea incendiului să pătrundă în sistemul de canalizare sau în cursurile de apă.
Informații suplimentare:	Păstrați containerele și zonele înconjurătoare răcite cu jet de apă. Prevenirea ca apa de la stingerea incendiilor să nu contamineze apa de suprafață sau pânza de apă freatică. Reziduurile de ardere și apa contaminată folosită la stingere, trebuie eliminate în conformitate cu reglementările locale.
6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Purtați echipament individual de protecție (mănuși, ochelari și combinezon).
Proceduri de urgență:	N.a.
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Păstrați în containere corespunzătoare și închise
Metode de limitare a poluării	Opriți scurgerile, și apoi colectați cu material absorbant non-combustibil (de exemplu, nisip, pământ, pământ kieselgur, vermiculit) și colectați în container în vederea eliminării în conformitate cu reglementările locale / naționale.
Informații suplimentare:	Preveniți scăpările sau scurgerile ulterioare dacă acest lucru se poate face în condiții de siguranță.

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Nu respirați vaporii sau jetul de pulverizare. Evitați contactul cu pielea și ochii. Asigurați reîmprospătarea aerului și / sau o ventilație corespunzătoare la locul de muncă. Nu mâncați sau beți în timpul utilizării.
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Depozitați în containerul original
Specificațiile zonei de depozitare:	Depozitați într-un loc uscat, răcoros și bine ventilat
Specificațiile recipientilor:	Păstrați containerele ermetic închise
Incompatibilități:	Stabil în condițiile de depozitare recomandate
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Agent de modificare a proprietatilor reologice toxicitate redusă pentru fluide de foraj pe baza de ulei (OBM)

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanță	(2 - methoxymethylethoxi) Propanol CAS No. 34590-94-8	
TLV _{Ceiling} :	---	
TLV _{TWA} :	308 mg/m3 - 50 ppm	
TLV _{STEL} :	---	
Limita biologică:	---	
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Asigurați ventilație corespunzătoare
8.2.2. Măsuri de protecție individuală, precum echipamentul de protecție personală.		Se recomandă ventilație generală. Stație de spălare ochi în apropiere. Disponibilitatea de duș de siguranță.
Protecția individuală	Respiratorie:	Protecție respiratorie nu este necesară în mod normal. Evitați generarea de aerosoli și vapori.
	Ochi	Ochelari de protecție cu ecrane laterale
	Maini	Purtați mănuși rezistente, cum ar fi din: polivinil alcool
	Corp	Purtați echipament de protecție individual standard.
8.3. Controlul expunerii mediului		
Variante de expunere	Preveniți scăpările sau scurgerile ulterioare, dacă acest lucru se poate face în condiții de siguranță.	

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Lichid
Aspect:	Lichid
Culoare:	Ambră
Miros:	Caracteristic
Prag olfactiv:	N.a.
9.2. Informații pentru sănătate, siguranță și mediu	
pH	N.a.
Punct de topire:	N.a.
Punct de fierbere:	>150°C
Punct de aprindere:	>75 °C
Inflamabilitate (solid, gaz):	N.a.

Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	N.a.
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	n.A.
Densitatea:	0,94 g/cm ³
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	Insolubil
Solubilitatea în alți solvenți:	Solvent : ulei solubil
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea (40 °C):	> 100 mPa.s
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE**10.1. Reactivitate**

Condiții care trebuie evitate:	Nu permiteți evaporarea până la uscare. Căldură, flăcări și scântei. Expunerea la aer.
--------------------------------	--

10.2. Stabilitate chimică

Materiale incompatibile:	Acizi, săruri de baze tari, baze tari, agenți puternic oxidanți, agenți puternic reducători
Posibilitatea de reacții periculoase:	Stabil în condițiile de depozitare recomandate

10.3. Produși de descompunere periculoși

Alte informații:	Aldehyde, dioxid de carbon și monoxid de carbon, hidrocarburi, oxizi de azot (NOx), cetone
------------------	--

11. INFORMAȚII TOXICOLOGICE**11.1. Toxicitate Acută**

Substanța	<i>Distilați de petrol hidrotratați</i> <i>Hydrotreated petroleum distillates</i> CAS No. 64742-47-8
Toxicitate orală acută:	LD 50 (Șobolan): > 8.000 mg/kg
Toxicitate inhalatorie acută:	LC 50 (RȘobolan) 4h: > 2500 ppm
Toxicitate cutanată acută:	LD 50 (Iepure): > 4.000 mg/kg
Substanța	<i>Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei</i> <i>Fatty acids, C18 unsat, reaction products with diethylenetriamine</i> CAS No. 1226892-43-8
Toxicitate orală acută:	LD 50 (Șobolan): > 2.000 mg/kg
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	N.a.
Substanța	<i>(2 - methoxymethylethoxi) Propanol</i> CAS No. 34590-94-8
Toxicitate orală acută:	LD 50 (Șobolan): > 5.000 mg/kg

AVOIL VS/LT

Toxicitate inhalatorie acută:	LC 50 (RȘobolan) 8h: > 553 ppm
Toxicitate cutanată acută:	LD 50 (Iepure): > 5.000 mg/kg
11.2. Corozivitate	
Piele:	N.a.
Ochi:	N.a.
11.3. Iritabilitate primară	
Piele:	N.a.
Ochi:	N.a.
11.4. Nocivitate	
Ingestie:	N.a.
Inhalare:	Substanța sau amestecul este cunoscut pentru riscul de toxicitate provocat prin aspirare umană sau trebuie să fie luat în considerare, la fel ca și în cazul în care se produce un pericol de toxicitate prin aspirare umană
11.5. Sensibilitate	
Piele:	Poate provoca o reacție alergică a pielii
Ochi:	N.a.

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Substanța	<i>Fatty acids, C18 unsat, reaction products with diethylenetriamine</i> CAS No. 1226892-43-8
Toxicitate în apă:	LC50 (Pești) 96 h: 0,19 mg/l EC50 (Crustacee-Dafnii) 48 h: 0,18 mg/l EC50 (Alge) 72 h: 0,477 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
Substanța	<i>(2 - methoxymethylethoxi) Propanol</i> CAS No. 34590-94-8
Toxicitate în apă:	LC 50 (Pești) 96 h: > 10.000 mg/l LC 50 (Crustacee-Dafnii) 48 h: 1.919 mg/l EC 50 (Alge) 72 h: > 969 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	N.a.
12.3. Potențial de Bioacumulare	
Alte informații:	- <i>Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei</i> : aerobi, 17-50%, Timp de expunere: 28 z - <i>(2 - methoxymethylethoxi) Propanol</i> : 75%, timpul de expunere: 28 z, - <i>Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei</i> : Nu este de așteptat să apară bioacumulare (log Pow <= 3). Această substanță nu este considerată a fi persistentă, nici din punct de vedere al bioacumulării, nici din punct de vedere toxic (PBT)., Această substanță nu este considerată ca fiind foarte persistentă și nici un potențial de bioacumulare (vPvB)
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	Amestecul este foarte toxic pentru mediul acvatic cu efecte pe termen lung

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Eliminați în conformitate cu directivele europene privind deșeurile și reziduurile chimice periculoase. Nu contaminați apele și canalele de scurgere cu produsul chimic sau recipientul folosit. Containerele sunt periculoase chiar și atunci când sunt goale.
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	N.a.
Alte recomandări:	Goliți conținutul rămas. Îndepărtați produsul nefolosit. Containerele goale trebuie să fie colectate la un centru autorizat pentru reciclare sau eliminare. A nu se refolosi containerele goale. A nu se arde sau a nu se utiliza o flacără de tăiere.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	UN3265
Norme de transport ONU	ADR: CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S. (Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei)
Clasa (clasele) de pericol pentru transport	8
Grupul de ambalare:	III
Denumirea oficială a transportului	N.a.
Cod de restricție a accesului în tunel	N.a.
14.2. Transport Maritim (IMDG)	
Număr ONU	UN3265
Norme de transport ONU	MARITIM INTERNAȚIONAL MĂRFURI PERICULOASE: CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S. (Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei)
Număr EMS	N.a.
Clasa (clasele) de pericol pentru transport	8
Grupul de ambalare:	III
Poluant marin:	N.a.
Denumirea oficială a transportului	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Număr ONU	UN3265
Norme de transport ONU	ASOCIAȚIA INTERNAȚIONALĂ DE TRANSPORT AERIAN - CARGO / PASAGERI: CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S. (Acizi grași, C18 nesat, produse de reacție ale dietilentriaminei)
Clasa (clasele) de pericol pentru transport	8
Etichetă	N.a.
Grupul de ambalare:	III
Denumirea oficială a transportului	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu este reglementat
Codul IBC:	N.a.

**15. INFORMAȚII DE REGLEMENTARE****15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.**

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr.1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;

HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;

REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr.1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiei de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pateritoriu România.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deseuri de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.
HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.
HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.
Cod deseu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie
LD50: median lethal dose - doză letală medie
NOEC: no observable effect concentration – concentrația fără efect observat
PNEC: predicted no-effect concentration - concentrația fără efect prevăzut
PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice
vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative
TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore
TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt
TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații

Fraze de pericol utilizate în secțiunile anterioare

H304 – Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii

H314: Provoacă arsuri grave ale pielii și lezarea ochilor.

H317: Poate provoca o reacție alergică a pielii.

H410: Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

R65 – Nociv: poate provoca afecțiuni pulmonare în caz de înghițire.

R36/38 – Iritant pentru ochi și pentru piele

Fraze de precauție/ siguranța utilizate în secțiunile anterioare

P261: Evitați să inspirați praful/fumul/gazul/ceața/vaporii/spray-ul.

P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței.

P301 + 310: ÎN CAZ DE ÎNGHIȚIRE: sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.

P303+P361+P353: ÎN CAZ DE CONTACT CU PIELEA (sau părul): scoateți imediat toată îmbrăcăminte contaminată. Clătiți pielea cu apă/faceți duș.

P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S23: A nu se inspira gazul/fumul.vaporii (termenul(ii) corespunzător(i) se specifică de către producător)

S 26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul.

S28: După contactul cu pielea, spălați imediat cu apă din abundență, cu produsul corespunzător specificat de producător.

S36/37/39: Purtați echipament de protecție corespunzător, mănuși și mască de protecție pentru ochi / față

**AVA S.p.A.**Sediu legal: Via Salaria 1313/c
00138 Roma
Italia**FIȘĂ CU DATE DE SECURITATE**

În conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

CALCIUM CHLORIDE 34-36% - LIQ.

1. IDENTIFICAREA SUBSTANȚEI / AMESTECULUI ȘI A SOCIETĂȚII / ÎNTREPRINDERII		
1.1. Element de identificare a produsului		
Denumire produs:	CALCIUM CHLORIDE 34-36% - LIQ.	
1.2. Utilizări relevante identificate ale substanței sau amestecului și utilizări contraindicate		
Utilizare:	Aditiv pentru workover si completion	
1.3. Detalii privind furnizorul fișei cu date de securitate		
Identificarea companiei producătoare		
Nume:	Ava S.p.A.	
Adresă:	Via Salaria 1313/C	
Oraș/Țară:	00138 ROMA (Italia)	
Număr de telefon:	+39 06 885611386 / +39 06 885611324 / +39 06 8856111

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
SUBSTANȚA / AMESTECUL ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS07	Irit. Ocul. 2 H319: Provoacă iritație severă a ochilor
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
	Xi - iritant	Xi - iritant R36: Iritant pentru ochi
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	 GHS07	Irit. Ocul. 2 H319: Provoacă iritație severă a ochilor
Fraze de precauție:	P264: Spălați-vă bine pe mâini după utilizare. P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței. P337+P313: Dacă iritarea ochilor persistă: consultați medicul. P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:		Xi – iritant R36: Iritant pentru ochi
Sfaturi de siguranță:	S22: A nu se inspira praful. S24: Evitați contactul cu pielea	
Eliminarea:	S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos.	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII	
3.1. Proprietăți chimice ale substanței sau amestecului	
Compoziție:	Amestec
Conținut:	În conformitate cu tabelul următor
Formula moleculară:	---
Number ONU	---
Numărul EC:	---
Numărul CAS:	---
Numărul REACH:	---

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Calcium Chloride REACH No. 01- 2119494219- 28-XXXX	10043-52-4	233-140-8	34-36%	Irit. ocul. 2	 GHS07	H319
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Calcium Chloride	10043-52-4	233-140-8	34-36%	Xi - iritant		R36

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Sunați medicului dumneavoastră. Între timp, scoateți persoana la aer curat, la distanța de locul pacientului. În caz de respirație neregulată sau oprirea respirației, administrați respirație artificială, luați măsurile de precauție adecvate pentru salvator.
După contactul cu pielea:	Scoateți toată îmbrăcămintea contaminată imediat și faceți un dus. Consultați un medic imediat. Spălați îmbrăcămintea înainte de reutilizare.
După contactul cu ochii:	Spălați imediat ușor cu multă apă timp de cel puțin 15 ' și chemați medicul. În caz de dificultate la deschiderea pleoapelor, spălați ochiul cu un analgezic.
După înghițire:	Clătiți gura. Administrați să bea apă în cantități cât mai mari posibil, dacă pacientul este conștient. Chemati medicul imediat. Nu induceți vomă.
Alte informații:	- - -
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i această Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	- - -

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu utilizați mijloacele de stingere corespunzătoare pentru focul inconjurator
Mijloace de stingere corespunzătoare:	Pulbere, spuma, CO2, apă pulverizată
Mijloace de stingere necorespunzătoare:	Niciunul în mod specific
Riscuri care derivă din ardere (produse de descompunere termică periculoși):	Produsul nu este nici inflamabil, nici combustibil. În caz de incendiu, se pot elibera vapori de acid clorhidric și clor
Echipamente speciale de stingere a	Cască cu vizieră, îmbrăcăminte ignifugă, mănuși de lucru, aparat de respirație

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

incendiilor	
Altele:	Pulverizati apă pentru a răci containerele, pentru a preveni descompunerea produsului și eliberarea de substanțe potențial periculoase pentru sănătate. Purați întotdeauna echipament de protecție complet. Colectați apa folosită la stingere, care nu trebuie să fie evacuată în sistemul de canalizare. Eliminați apa contaminată folosită pentru stingere și resturile după incendiu, în conformitate cu reglementările în vigoare.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Eliminați toate sursele de aprindere din zona în care a avut loc scurgerea. În caz de ceață, asigurați protecție respiratorie. Opiți scurgerea dacă este sigur să faceți acest lucru. Nu manipulați containere deteriorate sau produsul scurs înainte de îmbrăcarea unui echipament de protecție adecvat
Proceduri de urgență:	Îndepărtați persoanele neprotejate. Asigurați ventilație adecvată
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Împiedicați intrarea produsului în sistemul de canalizare, apa de suprafață, apele subterane și zonele învecinate
Metode de limitare a poluarii	Absorbiți scurgerile cu un material absorbant inert (nisip, vermiculit, pamant diatomit). Colectați cea mai mare parte a materialului rămas și depozitați-l în mod corespunzător, în containere etichetate corespunzător pentru eliminare. Asigurați ventilația adecvată a zonei afectate de pierderile de produs. Eliminarea materialului contaminat trebuie să se facă în conformitate cu normele în vigoare
Informații suplimentare:	Eliminați apa de spălare contaminată în conformitate cu reglementările locale

7. MANIPULARE ȘI DEPOZITARE

7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Nu mâncați și beți în timpul lucrului. A nu se inspira praful. Evitați contactul cu pielea și ochii. Folosiți sistem de ventilație localizat.
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Soluțiile de clorură de calciu pot favoriza coroziuni în puncte a unor oțeluri. Dacă este posibil, depozitați produsul în ambalajul original, etichetat în mod corespunzător și bine închis
Specificațiile zonei de depozitare:	Pastrati în containere într-o zonă rece, bine ventilată, la distanță de surse de căldură sau alte surse de aprindere
Specificațiile recipientilor:	Utilizați containere/recipiente din metal (fier) sau PVC.
Incompatibilități:	Agenti de oxidare și puternici reducători
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Aditivi pentru workover și completion

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanța		Calcium Chloride CAS No. 10043-52-4
TLV _{Ceiling} :		- - -
TLVTWA:		Inhalat: efect acut local = 10mg/m3 (muncitori) Efecte cronice = 5mg/m3 local (muncitori)
TLV _{STEL} :		- - -
Limita biologică:		Lipsit de o valoare limită de expunere profesională
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Asigurați o bună aerisire la locul de muncă prin aspirație locală eficientă sau aerisire prin ventilație
8.2.2. Măsurile de protecție individuală, precum echipamentul de protecție personală.		Ventilație forțată, stație de spălare ochi în apropiere. În cazul în care operațiunile de lucru nu permit menținerea concentrației produsului sub valorile limită de expunere la locul de muncă, purtați echipament de protecție adecvat pentru tractul respirator
Protecția individuală	Respiratorie:	Utilizați masca de protecție respiratorie cu filtru de tip B.
	Ochi	Ochelari de protecție ermetici
	Maini	Mănuși de protecție categoria I PVC, neopren sau cauciuc nitril.
	Corp	Îmbrăcăminte de protecție completă (salopeta).
8.3. Controlul expunerii mediului		
Variante de expunere		- - -

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Lichid clar
Aspect:	Lichid clar
Culoare:	Incolor
Miros:	Inodor
Prag olfactiv:	N.a.
9.2. Informații pentru sănătate, siguranță și mediu	
pH (10 g/l) la 20 °C:	7-8
Punct de topire:	782 ° C (se referă la o clorură de calciu solidă)
Punct de fierbere:	1935°C
Punct de aprindere:	> 60°C
Inflamabilitate (solid, gaz):	Nu este inflamabil
Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	Nu este explozibil
Limita de inflamabilitate superioară:	Nu este inflamabil
Limita inferioară de inflamabilitate:	Nu este inflamabil
Presiunea de vapori 20°C:	<10Pa
Densitatea la 20 °C:	2,15 gr/cm ³
Densitatea vrac:	500-600 Kg/cm ³
Densitatea relativă:	2,15 gr/cm ³
Densitatea de vapori :	N.a.
Rata de evaporare:	N.a.

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

Greutatea specifica (20°C):	Calcium chloride solid: 2.15 g/cm ³ Calcium Chloride 26-38% solutie: 1240g / l
Solubilitate în apă (20°C):	740 g/l
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	Soluțiile de clorură de calciu pot favoriza coroziunea în "în puncte" pentru unele oțeluri. Nu există riscuri particulare de reacție cu alte substanțe în condiții normale de utilizare
10.2. Stabilitate chimică	
Materiale incompatibile:	Agenți puternici, reducători și oxidanți
Posibilitatea de reacții periculoase:	În condiții normale de utilizare și depozitare nu sunt previzibile reacții periculoase.
10.3. Produși de descompunere periculoși	
Alte informații:	N.a.

11. INFORMAȚII TOXICOLOGICE	
11.1. Toxicitate Acută	
Toxicitatea substanței	
Toxicitate orală acută:	LD50 (Șobolani): 2301 mg/kg
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	DL50 (Iepure) : >5000mg/kg
11.2. Corozivitate	
Piele:	N.a.
Ochi:	N.a.
11.3. Iritabilitate primară	
Piele:	Nu este iritant (iepure).
Ochi:	Puternic iritant pentru ochi (iepure)
11.4. Nocivitate	
Ingestie:	N.a.
Inhalare:	N.a.
11.5. Sensibilitate	
Piele:	Contactul repetat sau prelungit cu pielea poate cauza dermatite
Ochi:	N.a.

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	CL50 (Pesti) 96h: 4630mg/l EC50 (Daphnia magna) 48h: 2400mg/l EC50 (Alge) 48h: 2900mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	N.a.
12.3. Potenția Bioacumulativ	
Alte informații:	Nu se aplica pentru substanțe anorganice
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Reziduurile de produs trebuie considerate deșeuri periculoase speciale, se vor elimina în conformitate cu reglementările locale
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Considerați ambalajele contaminate ca deșeuri periculoase de produs periculos. Eliminați în conformitate cu reglementările locale
Alte recomandări:	- - -

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Norme de transport ONU	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Denumirea oficială a transportului	N.a.
Cod de restricție în galerie/tunel	N.a.
14.2. Transport Maritim (IMDG)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Numarul EMS	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Poluant marin:	N.a.
Denumirea oficială a transportului	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Clasa IACO/ATA	N.a.

**- CALCIUM CHLORIDE 34-36% - LIQ. -**

Eticheta	N.a.
Grupul de ambalare:	N.a.
Denumirea oficiala a transportului	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE**15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.**

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr.1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr.

1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
<i>Indicarea de pericole specifice pentru om și mediul înconjurător:</i>		
SUBSTANȚA / AMESTECUL NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Fraze de precauție:		
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Sfaturi de siguranță::	S22: A nu se inspira praful.	
Eliminarea:		
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Amestec					
Conținut:	În conformitate cu tabelul următor					
Formula moleculară:	---					
Numărul EC:	---					
Numărul CAS:	---					
Numărul ONU:	---					
Numărul REACH:	---					
3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
---	---	---	---	---	---	---

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	N.a.

**- GRANULAR F-M-C -**

După contactul cu pielea:	N.a.
După contactul cu ochii:	N.a.
După înghițire:	N.a.
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respect următoarele instrucțiuni:
Mijloace de stingere corespunzătoare:	Produse de stingere standard
Mijloace de stingere necorespunzătoare:	N.a.
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	N.a.
Echipamente speciale de stingere a incendiilor	N.a.
Altele	N.a.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Niciunul
Proceduri de urgență:	Niciuna
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Niciunul
Metode de limitare a poluarii	Îndepărtați cu matura sau cu un sistem vidat
Informații suplimentare:	Niciuna

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Nu există reglementări specifice
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Nu există reglementări specifice
Specificațiile zonei de depozitare:	Nu există reglementări specifice
Specificațiile recipientilor:	Nu există reglementări specifice
Incompatibilități:	Nu sunt disponibile
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Material de reducere a pierderilor de circulație pentru fluidele de foraj

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 **privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.**

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.

HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

**- GRANULAR F-M-C -**

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C: Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de precauție / siguranța utilizate în secțiunile anterioare**

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S22: A nu se inspira praful.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
<i>Indicarea de pericole specifice pentru om și mediul înconjurător:</i>		
SUBSTANȚA / AMESTECUL NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Fraze de precauție:	P260: Nu inspirați praful/fumul/gazul/ceața/vaporii/spray-ul.	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Sfaturi de siguranță::	S22: A nu se inspira praful.	
Eliminarea:	---	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTĂ						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Amestec					
Conținut:	În conformitate cu tabelul următor					
Formula moleculară:	---					
Numărul EC:	---					
Numărul CAS:	---					
Numărul ONU:	---					
Numărul REACH:	---					
3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Carbonat de calciu REACH No. 01- 211948679518-XXXX	471-34-1	207-439-9	90/100%	---	---	---

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Scoateți imediat persoana afectată afară, la aer proaspăt în caz de inhalare accidentală de praf sau fum prin supraincalzire sau ardere. Dacă simptomele persista solicitați sfatul unui medic.
După contactul cu pielea:	Se vor scoate hainele și încălțăminte imediat. Spălați zona afectată cu apă și săpun.
După contactul cu ochii:	Irigați ușor cu apă curată. Solicitați asistență medicală. Scoateți lentilele de contact. Protejați ochiul care nu este afectat.
După înghițire:	Clătiți imediat și repetați gura cu apă. Dacă este necesar solicitați asistență medicală
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i această Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați instrucțiunile.
Mijloace de stingere corespunzătoare:	Se vor folosi metode de stingere care sunt adecvate condițiilor locale și mediului înconjurător.
Mijloace de stingere necorespunzătoare:	N.a.
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Niciunul
Echipamente speciale de stingere a incendiilor	În caz de incendiu, utilizați aparatul respirator și echipament de protecție.
Recomandări destinate pompierilor:	- - -

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Nu generați praf
Proceduri de urgență:	N.a.
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	N.a.
Metode de limitare a poluării	Mătura și lopata. Păstrați în recipiente adecvate, închise pentru eliminarea reziduurilor
Informații suplimentare:	N.a.

7. MANIPULARE ȘI DEPOZITARE		
7.1. Precauții pentru manipularea în condiții de securitate		
Precauții pentru manipulare în condiții de securitate:	Sistem de ventilație adecvată în locurile unde se formează praf.	
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități		
Condiții de depozitare:	A se păstra la loc uscat	
Specificațiile zonei de depozitare:	A se depozita într-un loc uscat și bine ventilat,	
Specificațiile recipientilor:	Păstrați recipientul închis ermetic	
Incompatibilități:	Depozitați la distanță de de acizi	
7.3. Utilizare finală specifică:		
Utilizări finale specifice:	Material de reducere a pierderilor de circulație pentru fluidele de foraj	
8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control (Limite de expunere)		
Substanța	Carbonat de calciu CAS No. 471-34-1	
TLV _{Ceiling} :	---	
TLV _{TWA} :	PNOS- Pulberi poluare (particule inhalabile): TLV-TWA = 10 mg/m ³ PNOS- Pulberi poluare (particule respirabile): TLV-TWA = 3.0 mg/m ³	
TLV _{STEL} :	---	
Limita biologică:	---	
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Se recomandă ventilație generală.
8.2.2. Măsuri de protecție individuală, precum echipamentul de protecție personală.		Stație de spălare ochi în apropiere.
Protecția individuală	Respiratorie:	Atunci când va confrunțați cu concentrații peste limita de expunere trebuie să utilizați aparat respirator certificate corespunzătoare. Mască cu un filtru de particule P2
	Ochi	Ochelari de protecție.
	Maini	Mănuși
	Corp	Îmbrăcăminte de protecție
8.3. Controlul expunerii mediului		
Variante de expunere	---	
9. PROPRIETĂȚI FIZICE ȘI CHIMICE		
9.1. Informații generale		
Forma:	Solid	
Aspect:	Pulbere	
Culoare:	Alba	
Miros:	Caracteristic	
Prag olfactiv:	N.a.	
9.2. Informații pentru sănătate, siguranță și mediu		
pH (10 g/l) la 25 °C:	8.5-9.5 g/l	
Punct de topire:	>800°C	
Punct de fierbere:	N.a.	
Punct de aprindere:	Produsul nu este inflamabil.	

**- INTASOL F-M-C -**

Inflamabilitate (solid, gaz):	Produsul nu este inflamabil.
Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	Nu se aplica
Densitatea la 20 °C:	2.6-2.8 g/cm ³
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	N.a.
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	0,014 g/l
Coeficientul de distribuție (n-octanol):	POW: < 1
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE**10.1. Reactivitate**

Condiții care trebuie evitate:	Produsul este stabil în condiții normale de depozitare
--------------------------------	--

10.2. Stabilitate chimică

Materiale incompatibile:	Acizi tari
Posibilitatea de reacții periculoase:	Reacționează cu acizi cu eliberare de dioxid de carbon (CO ₂), care poate mobiliza oxigenul în aer, în spații închise

10.3. Produși de descompunere periculoși

Alte informații:	Niciuna
------------------	---------

11. INFORMAȚII TOXICOLOGICE**11.1. Toxicitate Acută****Amestec toxic**

Toxicitate orală acută:	LD50 (Sobolan): >5000 mg/kg
Toxicitate inhalatorie acută:	N.a.
Toxicitate cutanată acută:	N.a.

11.2. Corozivitate

Piele:	N.a.
Ochi:	N.a.

11.3. Iritabilitate primară

Piele:	Conform criteriilor de clasificare ale Uniunii Europene, produsul nu este considerat a fi iritant pentru piele
Ochi:	Conform criteriilor de clasificare ale Uniunii Europene, produsul nu este considerat a fi iritant pentru ochi

11.4. Nocivitate

Ingestie:	N.a.
Inhalare:	N.a.

11.5. Sensibilitate

Piele:	Nu există efecte nocive așteptate.
--------	------------------------------------

**- INTASOL F-M-C -**

Ochi:	Nu există efecte nocive așteptate.
-------	------------------------------------

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	CL50 (Pesti) 96h: >10000 mg/l CE50 (Dafnii) 48h: >1000 mg/l CE50 (Alge) 72h: >200 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	N.a.
12.3. Potențial de Bioacumulare	
Alte informații:	Nu există efecte adverse așteptate.
12.4. Mobilitate în sol	
Alte informații:	Nu există efecte adverse așteptate.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Consultați o firmă autorizată pentru eliminare în conformitate cu reglementările locale. Nu deversați în sistemul de canalizare sau în mediul înconjurător, eliminați la un punct autorizat de colectare a deșeurilor
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Goliți conținutul ramas
Alte recomandări:	Manipulați în conformitate cu reglementările locale și naționale.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Normele de transport ONU:	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Clasa IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în

	transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE**15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.**

Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)

Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

Regulament (CE) nr. 1907/2006 (REACH)

Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.

Reglementări naționale:

Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;

HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;

REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr. 1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiei de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;
OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;
HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.
HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deseuri de ambalaje.
HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.
HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.
HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.
Cod deseuri ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

**- INTASOL F-M-C -**

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de precauție utilizate în secțiunile anterioare**

P260: Nu inspirați praful/fumul/gazul/ceața/vaporii/spray-ul.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S22: A nu se inspira praful.

SECȚIUNEA 2: Identificarea pericolelor

Clasificarea substanței sau amestecului

MSDS Numar:100000101140

1/11

Aditiv Soltex® E

Versiunea 1.3

Data reviziei 28-03-2014-28

REGULAMENTUL (CE) No 1272/2008

Nu este o substanță periculoasă sau un amestec periculos conform Regulamentului (CE) No 1272/2008.

Clasificare după directive (67/548/EEC, 1999/45/EC)

Nu este o substanță periculoasă sau un amestec periculos conform –Directivelor CE 67/548/EEC or 1999/45/EC.

Elemente de etichetare**Etichetare (REGULAMENTUL (CE) No 1272/2008)**

Nu este o substanță periculoasă sau un amestec periculos conform Regulamentului (CE) No 1272/2008.

SECȚIUNEA 3: Compoziție/Informații privind componenții

Sinonime : Aditiv pentru noriul de foraj
Inhibitor pentru șist

Formula Moleculară : UVCB

Nu conține componenți periculoși conform GHS. :

Remarci : Nu conține componenți periculoși conform GHS.

SECȚIUNEA 4: MĂSURI DE PRIM AJUTOR

Informații generale : Nu sunt cunoscute pericole care să necesite
măsurile de prim ajutor speciale.

După inhalare : Dacă se găsește o persoană inconștientă, se plasează aceasta în
poziția de recuperare și se solicită ajutor medical. Dacă
simptomele persistă, sunați un medic..

După contactul cu ochii : Scoateți lentilele de contact. Solicitați asistență medicală dacă
iritarea persistă. Protejați ochiul sănătos..

După înghițire : Păstrați traiectul respirator curat. Niciodată nu dați ceva pe gură unei
persoane inconștiente. Solicitați asistență medicală dacă
simptomele persistă..

SECȚIUNEA 5: MĂSURI DE COMBATERE A INCENDIILOR

Punct de inflamabilitate : N e a p l i c a b i l

Temperatură de autoaprindere: Nu sunt date disponibile

Echipamente speciale de stingere a incendiilor: Purtați echipament de protecție corespunzător
pentru stingerea incendiilor care să includă și
dispozitiv pentru respirat

Altele : În caz de incendiu respectați, urmați instrucțiunile pentru incendii ale substanțelor
chimice. Utilizați măsurile de stingere care sunt corespunzătoare
circumstanțelor locale și mediului înconjurător.

FIȘA CU DATE DE SECURITATE	
Aditiv Soltex® E	
Versiunea 1.3	Data reviziei 28-03-2014-28
Măsurile de prevenire: Asigurați ventilare corespunzătoare în zonele unde se formează praf	
SECȚIUNE 6: MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
<p>Precauții personale, : Evitați formarea prafului.</p> <p>Precauții pentru mediul înconjurător: Dacă produsul contaminează râurile și lacurile sau scurgerile, informații autoritățile respective.</p> <p>Metode de curățare a poluării: Păstrați produsul în ambalaje închise și potrivite pentru eliminare. Curățați podelele și obiectele contaminate ținând cont de reglementările de mediu. Ridicați cantitățile pierdute și eliminați-le fără a crea praf. Adunați cu o mătură și ridicați cu lopata. Păstrați în containere închise în vederea eliminării.</p>	
SECȚIUNE 7: MANIPULARE ȘI DEPOZITARE	
MANIPULARE	
Precauții pentru manipulare în condiții de securitate	: Pentru protecția personală a se vedea secțiunea 8. Nu mâncați și nu beți în timpul lucrului..
Recomandări pentru protecția față de incendii și explozii	: Asigurați ventilația corespunzătoare acolo unde se formează praf.
DEPOZITARE	
<p>Condiții de depozitare : Instalațiile electrice și materialele utilizate trebuie să fie conforme cu standardele de securitate tehnologică..</p> <p>Specificații referitoare la depozitare: Nu sunt menționate materiale specifice.</p>	
SECȚIUNE 8: CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ	
<p>DNEL : Utilizare finală: muncitori Calea de expunere: contact cu pielea Potențiale efecte asupra sănătății: efecte cronice, efecte sistemice Valoare: 14,3 mg/kg</p> <p>DNEL : Utilizare finală: muncitori Calea de expunere: inhalare Potențiale efecte asupra sănătății: efecte cronice, efecte sistemice Valoare: 25,2 mg/m³</p> <p>PNEC : Apă de mare Valoare: 0,12 mg/kg</p> <p>PNEC : Sediment marin: Valoare: 0,097 mg/kg</p>	
Măsurile tehnice:	
<p>A se lua în considerare potențialele pericole ale acestui amestec (a se vedea Secțiunea 2), limitele de expunere aplicabile, activitățile și alte substanțe de la locul de muncă, atunci când se proiectează modul de ținere sub control al tehnologiei și se alege echipamentul de protecție individual. Dacă modulele de ținere sub control al tehnologiei sau practicile de lucru nu sunt adecvate pentru a preveni expunerea la concentrații periculoase ale acestui amestec, se recomandă echipamentele de protecție individuale enumerate mai jos. Utilizatorul ar trebui să citească și să înțeleagă toate instrucțiunile și limitările furnizate o dată cu echipamentele de protecție, de obicei, furnizată pentru o perioadă limitată de timp sau în anumite circumstanțe</p>	
MSDS Number:100000101140	3/11

Aditiv Soltex® E

Versiunea 1.3

Data reviziei 28-03-2014-28

Echipamentul de protecție personală

Protecție Respiratorie: Purtați un aparat de respirat care furnizează aer aprobat NIOSH – pentru spațiul USA sau certificat CE – pentru spațiul UE, dacă ventilația sau ale măsuri de control tehnologic sunt corespunzătoare pentru a asigura un conținut minim de oxigen de 19,5% v/v la presiune normală.

Protecție Maini: Adecvarea pentru locuri de muncă specifice ar trebui discutată cu furnizorii de mănuși de protecție. A se avea în vedere instrucțiunile referitoare permeabilitatea și timpul de străpungere al acestora comunicat de producători. De asemenea, atenție trebuie acordată și condițiilor locale de utilizare a mănușilor, respectiv pericolele de tăiere, abraziune și timpul de contact. Mănușile ar trebui eliminate și schimbate dacă există orice indicație referitoare la degradarea acestora fizică sau chimică.

Protecție Ochi: Ochelari de protecție. Sticlă cu apă pentru spălarea ochilor.

Protecție Corp și piele : Îmbrăcați după cum este cazul: alegeți o protecție corporală corespunzătoare cantității și concentrației substanței periculoase de la locul de muncă. Purtați o îmbrăcăminte protectivă ușoară.

Măsurile de igienă: practica generală industrială referitoare la igienă. Pentru detalii suplimentare, a se vedea scenariile de expunere din anexa.

SECȚIUNE 9: PROPRIETĂȚI FIZICE ȘI CHIMICE**Informații despre proprietățile fizice și chimice de bază**

Aspect

Stare fizică : Solid
 Culoare : maro închis, negru
 Miros : inodor

Date de securitate

Punct de inflamabilitate : N / A
 Limita inferioară de explozie : N / A
 Limita superioară de explozie : N / A
 Temperatura de autoaprindere: Nu sunt date disponibile
 Formula Moleculară : UVCB
 pH : N / A
 Punct/interval de fierbere: N / A
 Presiune de vapori: N / A
 Densitate relativă: 1,4 - 1,6
 Solubilitate în apă: parțial solubil
 Densitatea relativă a vaporilor: N / A

Soltex® E Additive

Toxicitatea pentru reproducere : Specie: șobolan
Sex: mascul și femelă
Calea de expunere: oral
Doza: 0, 250, 500, 1000 mg/kg
Timp de Expunere: 43-54 zile
Număr de expuneri: zilnic
Metoad: OECD Guideline 422
NOAEL Părinți: 1.000 mg/kg
NOAEL F1: 1.000 mg/kg

Soltex® E Additive**Toxicitatea pentru Dezvoltare**

: Specie: șobolan
Calea de expunere: oral
Doza: 0, 250, 500, 1000 mg/kg
Număr de expuneri: zilnic
Timp de Expunere: 54 zile
NOAEL Teratogenicitate: 1.000 mg/kg
NOAEL Maternală: 1.000 mg/kg

Evaluarea toxicologică :**Soltex® E Additive****Efecte CMR effects**

: *Carcinogenicitate*: Nu sunt date disponibile
Mutagenicitate: Încercările pe culturi de bacterii sau pe celule de mamifere nu au arătat efecte mutagenice.
Teratogenicitate: Încercările pe animale nu au arătat nici un efect asupra dezvoltării fetale
Toxicitate Reproductivă: Încercările pe animale nu au arătat nici un efect asupra fertilității.

SECȚIUNE 12: INFORMAȚII ECOTOXICOLOGICE**Efecte asupra Ecotoxicității****Toxicitate la pești**

: LC50 (pești): > 240 mg/l
Timp de expunere: 96 h
Specie: *Scophthalmus maximus* (calcan)
Metoda de încercare: semi-statică: OECD Test Guideline 203

Toxicitate la daphnia și al alte nevertebrate acvatice: LC50(nevertebrate) : 380 mg/l

Timp de expunere: 48 h
Specie: *Acartia tonsa* (Marine Copepod)
Metoda de încercare: statică

Toxicitate la alge : EC50(alge): 240 mg/l

Timp de expunere: 72 h
Specie: *Skeletonema costatum* (Algă marină)
Metoda de încercare: statică

Alte informații:: Nu se așteaptă ca acest amestec să fie dăunător organismelor acvatice.

SECȚIUNE 13: CONSIDERAȚII PRIVIND ELIMINAREA

Aceste informații din acest SDS se referă numai la produs așa cum este transportat. A se utiliza materialul pentru scopul intenționat sau a se recicla dacă este posibil. Acest material, dacă ar trebui să fie eliminat, ar putea să îndeplinească criteriile de deșeu periculos așa cum sunt definite în EPA la RCRA (40 CFR 261) sau al altor reglementări naționale sau locale. Ar putea fi necesare măsurarea unor caracteristici fizice și examinarea detaliată pentru componenții obișnuiți. Dacă acest material este clasificat ca fiind periculos, legile federale solicită eliminarea la un furnizor licențiat pentru preluarea deșeurilor periculoase.

Ambalaje contaminate : Ambalajele goale ar trebui duse la un depozit aprobat pentru manipularea deșeurilor în vederea reciclării sau eliminării.

Pentru detalii suplimentare, a se vedea Scenariile de expunere din zona de anexe

SECȚIUNE 14: INFORMAȚII REFERITOARE LA TRANSPORT

Informațiile despre transport prezentate aici se referă numai la transportul în vrac și se poate să nu fie aplicabile pentru transportul în ambalaje (a se vedea definiția din reglementare).

Consultați reglementările pentru mărfuri periculoase corespunzătoare pentru transportul intern sau internațional cele mai potrivite pentru modul de ambalare și cantitatea aferentă pentru informații suplimentare referitoare la cerințe pentru transport (de exemplu denumiri tehnice sau nume etc). Valoarea punctului de inflamabilitate al materialului din SDS poate varia ușor comparativ cu valoarea înscrisă în documentele însoțitoare..

US DOT (MINISTRUL DE TRANSPORT AL SUA)

Nu sunt mărfuri periculoase în conformitate cu reglementările în transport conform regulilor acestei agenții.

IMO / IMDG (TRANSPORT MARITIM)

Nu sunt mărfuri periculoase în conformitate cu reglementările în transport conform regulilor acestei agenții

IATA (TRANSPORT AERIAN)

Nu sunt mărfuri periculoase în conformitate cu reglementările în transport conform regulilor acestei agenții.

ADR (TRANSPORT RUTIER)

Nu sunt mărfuri periculoase în conformitate cu reglementările în transport conform regulilor acestei agenții.

RID (TRANSPORT FERROVIAR (EUROPE))

Nu sunt mărfuri periculoase în conformitate cu reglementările în transport conform regulilor acestei agenții.

Modificările semnificative față de ediția precedentă sunt indicate pe margine. Această versiune înlocuiește toate versiunile anterioare.

Informațiile din această SDS se referă numai la produsul așa cum este transportat.

Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale. Aceste informații oferite sunt destinate ca îndrumare pentru manipularea, utilizarea, procesarea, depozitarea și eliminarea în siguranță a acestui produs și nu trebuie considerate ca fiind o garanție sau o specificație de calitate.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

CMR - Cancerigen, mutagen sau toxic pentru reproducere

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOAEL: no observed adverse effect level – nivelul la care nu se observă vreun efect advers

NOEL: No observed effect level – nivelul la care nu se observă vreun efect

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

DNEL: nivel calculat fără efect

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours -

Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea

prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

UVCB – Unknown or Variable Composition, Complex Product or Biological Material – Compoziție Necunoscută sau Variabilă, Produs Complex sau Material Biologic

WHMIS Workplace Hazardous Materials Information System – Sistem de Informații despre materialele periculoase la locul de muncă

MSDS Număr:100000101140

FIȘA CU DATE DE SECURITATE

Aditiv Soltex® E

Versiunea 1.3

Data reviziei 28-03-2014-28

Anexa

1. Ttlu scurt al scenariului de expunere: **Utilizarea în domeniul forajului si producției de petrol și gaze**

-

Principalele grupuri de utilizatori **SU 3: Utilizatori industriali:** utilizeaza substanțele chimice așa cum sunt sau le prepară pe amplasamentele industriale.

Sector de utilizare : **SU2b:** Industriile Offshore

Process category : **PROC4:** Se utilizează pentru realizarea loturilor și în alte procese (sinteze), situații în care există posibilitatea de expunere

Categoria de emisii în mediu: **ERC4:** Uz industrial al unor aditivi pentru utilizarea în procese și produse, nu devin părți de articole

Informații ulterioare: Operații de producție și foraj in domeniul petrolier (inclusiv curățarea noroaielor de foraj și a sondei) Inclusiv materiale de transfer, formulări la locul de muncă, activități exploatare a sondei, ale camerei de amestec și activități specifice de mentenanță.

2.1 Scenariu de contribuție la controlarea expunerii mediului în ERC4: Uz industrial al unor aditivi pentru utilizarea în procese și produse, nu devin părți de articole

Proprietățile produsului

Remarci substanța este o UVCB complexa.

Alte condiții date care afectează expunerea mediului

Utilizare/emisie continua

Condiții și măsuri tehnice / Măsuri organizaționale

Remarci : Nu este aplicabil

Condiții și măsuri referitoare la uzinele de tratare a canalizării orășenești

Remarci : Nu este aplicabil deoarece nu există nici o emisie în apa uzată.

Condiții și măsuri referitoare la tratarea externă a deșeurilor pentru eliminare

Tratarea deșeurilor : Noroaiele de foraj sunt reciclate și reutilizate

Condiții și măsuri referitoare la recuperarea externă a deșeurilor

Remarci : Noroaiele de foraj sunt reciclate și reutilizate

2.2 Scenariu de contribuție la controlarea expunerii lucrătorilor în: PROC4: Se utilizează pentru realizarea loturilor și în alte procese (sinteze), situații în care există posibilitatea de expunere

Proprietățile produsului

Remarci substanța este o UVCB complexa

Starea (la utilizare) : solid, cu grad de prăfuire scăzut

Frecvența și durata de de utilizare

Frecvența de utilizare : 3 ore/zi

Alte condiții de utilizare care afectează expunerea lucrătorilor

FISA TEHNICA DE SECURITATE

(Generic EU)

conform directivei CE 1907/2006

Versiune: 3

Data revizuirii: 03 februarie 2009

1. IDENTIFICAREA SUBSTANTEI / PREPARARI SI A SOCIETATII / INTREPRINDERII

Denumirea produsului: **SALTBOND* II Additive D80A**

Codul produsului: **D080A**

Identificarea Companiei/Intermediarului

Schlumberger
Pesetastraat 40
2991 XT Barendrecht, The Netherlands
+31 10 2923201
vollebregt1@slb.com

Telefon în caz de urgență: USA: +1-281-595-3518 (24hr)

Folosirea substanței/preparare: Folosit ca aditiv de betonare în aplicațiile pe baza de ulei.

2. IDENTIFICAREA PERICOLELOR

Necunoscut

Indicații de pericol: Produsul nu este periculos conform Directivei 1999/45/EC.

Cele mai importante riscuri

Pericol pentru mediu
înconjurător: Necunoscut.

3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE

Pentru textul complet al frazelor R menționate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare: Se va ieși la aer curat.

Contact cu pielea: Se va clăti cu apă.

Contact cu ochii: Se va clăti cu multă apă. Dacă simptomele persistă se va chema un medic.

Ingerare: Se va clăti gura. Se va consulta un medic dacă este nevoie.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:

se va folosi un produs chimic uscat, CO₂, apa pulverizata sau spuma de "alcool".

Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate: Necunoscut.

Echipament de protectie special pentru pompieri:

Purtati haine de protectie in caz de incendiu si evitati sa inhalati vapori.

Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:

Nimic previzibil în mod normal.

6. MĂSURI IMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:

Se va folosi echipament de protecție individual. Vezi de asemenea secțiunea 8.

Măsuri de prevedere pentru mediu:

Se vor preveni scăpări sau scurgeri ulterioare. Nu se va permite ca materialul să contamineze pânza de apă freatică.

Metode de curățire:

Se va absorbi cu un absorbant inert. Se va zăgăzui. Produsul va fi colectat în recipiente speciale pentru evacuare. După curățire se vor elimina urmele folosind apă.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:
Măsuri de prevedere la manipulare:

Nu sunt necesare precauții speciale.
Nu sunt necesare precauții speciale.

Depozitare:

Măsuri tehnice/Condiții de depozitare:

Nu sunt necesare condiții speciale de depozitare.

Cerinte ambalare:

Container din otel sau polipropilena cu densitate ridicata (HDPE).

Produse incompatibile:

Agenți oxidanți

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce expunerea:	Nu sunt necesare măsuri tehnice speciale de protecție
Protectie respiratorie:	Nu este necesar în mod normal nici un fel de echipament respirator individual.
Protecția mâinilor:	Mănuși din cauciuc.
Protecția ochilor:	Se recomanda sa se poarte ochelari cand se folosesc substante chimice.
Protecția pielii și a corpului:	Curatati hainele. Se va scoate și se va spăla îmbrăcămintea contaminată, înainte de a se refolosi.

Control al expunerii referitoare la protecția mediului înconjurător

Limita(e) de expunere profesională(e)

9. PROPRIETĂȚI FIZICO-CHIMICE

Informații generale

Formă:	lichid
Miros:	dulceag
Culoare:	maro închis

Informatii importante despre securitatea sanatatii si a mediului

pH:	7 - 8
Punct/domeniu de fierbere:	101 °C
Punct de aprindere:	nu strălucește.
Caracteristici explozive:	
Informatii explozie - sensibilitatea la impactul mecanic:	Nu se aplică
Informatii explozie - sensibilitatea la descarcarea statica	Nu se aplică
Limita de inflamabilitate în aer:	
inferioară:	Nu se aplică
superioară:	Nu se aplică
Proprietăți de întreținere a arderii:	nici unul
Densitate relativă:	1.2 (@ 20°C)
Solubilitate:	
Solubilitate în apă:	solubil.
Solubilitate în grăsimi:	insolubil.
Distribuire coeficient (n-octanol/apa):	Nu există informații disponibile.
Vâscozitate:	50 mPa.s
Densitatea de vapori:	> 1 (Aer = 1.0)
Presiune de vapori:	similar apei.

Viteză de evaporare: similar apei.

Informații suplimentare

Punct/categorie de topire: 1 °C

10. STABILITATE ȘI REACTIVITATE

Stabilitate: Stabil în condițiile de depozitare recomandate

Condiții de evitat: Necunoscut.

Materiale de evitat: Agenți oxidanți

Produsi de descompunere potențial periculoși: Cand sunt incalziti puternic sau arsi,. Oxizi de carbon. Oxizi de sulf.

Polimerizare riscanta: Nu se produce o polimerizare periculoasa.

11. INFORMAȚII TOXICOLOGICE

Efecte locale

Piele: Nu se asteapta niciun efect.

Ochii: Poate provoca o usoara iritatie.

Inhalare: Nu se asteapta niciun efect.

Ingerare: Nu se asteapta niciun efect.

Sensibilizare - piele Nu se stie daca provoaca reactii alergice.

Sensibilizare - plaman Nu se stie daca provoaca reactii alergice

Pericol cronic pentru sănătate

efecte cancerigene: Necunoscut.

efecte mutagene: Nu se stie daca provoaca daune genetice transmisibile.

teratogen: Nu se stie daca provoaca defecte la nastere sau daca are efect daunator asupra dezvoltarii fatului.

Toxicitate în ceea ce privește reproducerea: Nu se stie daca afecteaza negativ functiile sau organele de reproducere.

Efectul substantei asupra unui organ (tinta): Necunoscut.

12. INFORMAȚII ECOLOGICE

Ecotoxicitate

Informatii legate de componente

13. CONSIDERAȚII RELATIVE LA ELIMINARE

Deșeuri provenind de la reziduuri / produse neutilizate:

Conform cu reglementările locale și naționale.

Ambalaje contaminate:

Containerele goale trebuie puse la dispoziția uzinelor de reciclare locale pentru a fi reciclate, recuperate sau eliminate.

Numărul deșeurii conform cu CED:

Conform codului european de deșeuri (CED), codul deșeurii nu se referă la produs ca atare, ci la modul de aplicare al acestuia
Următoarele coduri ale deșeurilor sunt numai sugestii:
07 07 99 - deșeuri neprevăzute în
16 03 06 - deșeuri organice altele decât cele menționate în 16 03 05

14. INFORMAȚII PRIVIND TRANSPORTUL

Numar UN nici unul
Nume corect de expediere: nu este reglementat.

ADR/RID
Clasa: nu este reglementat

IMDG/IMO
Clasa de pericol: nu este reglementat

ICAO/IATA
Clasa de pericol: nu este reglementat

15. INFORMAȚII PRIVIND REGLEMENTĂRILE SPECIFICE APLICABILE

în conformitate cu legislația în vigoare

Indicații de pericol:

- Produsul nu este periculos conform Directivei 1999/45/EC

Fraza(e) indicând R (risc):

nici unul

Frază(e) S:

Ingrijiti corespunzator si mentineti curatenia

Inventarieri internationale

Acest produs respecta cerintele EINECS/ELINCS.

Împreună cu această scrisoare primiți și noile versiuni ale fișelor de protecția și securitatea muncii care vor înlocui versiunile precedente

Se va controla dacă trebuie luate măsuri conform cu directiva 94/33/EC pentru protecția tinerei:

Acest produs a fost declarat în CEE în conformitate cu Articolul 8 al Directivei CE 67/548

IDENTIFICAREA PERICOLELOR****Indicații de pericol:** Xi - Iritant.**Cele mai importante riscuri** Iritant pentru ochi și pentru piele.**Riscuri de sanatate:** Poate fi usor iritant daca este inghitit.**Pericol pentru mediu înconjurător:** Portiunea organica din acest material nu este biodegradabila.**3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE**

Componente	Nr. CAS	Nr.CE.	Greutate %- Categori e	Clasificare
Phosphoric acid	7664-38-2	231-633-2	5 - 10	C;R34
Pentasodium EDTMP	7651-99-2	231-615-4	5 - 10	Xi;R36/38

Pentru textul complet al frazelor R mentionate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare:	Se va ieși la aer curat.
Contact cu pielea:	Se va spala imediat cu sapun si multa apa, scotând toate hainele si încălțăminte contaminată. Apelați la îngrijire medicală.
Contact cu ochii:	Clătiți imediat ochii cu apa timp de 15 minute ținând ploapele deschise. Apelați la îngrijire medicală.
Ingerare:	NU se va induce stare de vomă. Consumați cantități mari de lapte (de preferat) sau apă. Apelați la îngrijire medicală imediat.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	Nu este necesar. Folosiți mijloace de stingere corespunzătoare pentru materialul înconjurător.
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Necunoscut.
Echipament de protecție special pentru pompieri:	Folosiți masca de respirație în spațiile închise. Purtați haine de protecție în caz de incendiu și evitați să inhalați vapori.
Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:	Phosphorus oxides. Când sunt încălzite puternic sau arse, oxizii de carbon și aburii organici dăunători sunt eliberați.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Se va evita contactul cu pielea și ochii. Se va folosi echipament de protecție individual.
Măsuri de prevedere pentru mediu:	Se vor preveni scăpări sau scurgeri ulterioare.
Metode de curățire:	Se va zăgăzui. Se va neutraliza folosind lapte de var sau sodă și se va îndepărta cu multă apă. Puneți în containere corespunzătoare pentru dispunere.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:
Măsuri de prevedere la manipulare:

Nu sunt necesare precauții speciale.
Se va evita contactul cu pielea și ochii. Se va folosi echipament de protecție individual.

Depozitare:

Măsuri tehnice/Condiții de depozitare:	Depozitati in zone bine aerisite protejate de lumina directa a soarelui.
Cerinte ambalare:	Cutie sau bidon din polipropilena de densitate ridicata (HDPE).
Produse incompatibile:	Baze

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Măsuri inginerice pentru a reduce expunerea: Mentineti concentratiile din aer sub limitele de expunere

Protectie respiratorie: Nu este necesar în mod normal nici un fel de echipament respirator individual.

Protectia mâinilor: Manusi impermeabile fabricate din PNC

Protectia ochilor: Ochelari de protectie perfect adecvați.

Protectia pielii și a corpului: Șorț rezistent la produse chimice.

Control al expunerii referitoare la protectia mediului înconjurător

Inhalarea de praf poate provoca sufocări, o senzație de apăsare în piept, dureri în gât și tuse.**Pericol pentru mediu
înconjurător:** nici unul.**Principalele riscuri fizice:** Fin când este umed. praf.**3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE**

Componente	Nr. CAS	Nr. CE.	Greutate %- Categori e	Clasificare
Sulfonated organic polymer		Listed	40 - 70	-
Glucoside polymer		Listed	15 - 40	-

Pentru textul complet al frazelor R menționate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare:	Se va ieși la aer curat. Apelați la îngrijire medicală dacă apare iritație.
Contact cu pielea:	Se va clăti cu apă.
Contact cu ochii:	Se va clăti imediat cu multă apă, inclusiv sub pleoape. Se va consulta un medic dacă este nevoie.
Ingerare:	Se va clăti gura. Se va consulta un medic dacă este nevoie. Niciodată nu se va încerca să se forțeze o persoană inconstientă să înghită.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	Abur de apă, Spuma de alcool, CO2, Chimicale uscate.
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Jet de apă puternic. Fin când este umed.
Echipament de protecție special pentru pompieri:	Purtați haine de protecție în caz de incendiu și evitați să inhalați vapori. Folosiți masca de respirație în spațiile închise.
Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:	Praful suspendat poate prezenta un risc de explozie de praf.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Se va evita formarea de praf. Nu se va inhala praful.
Măsuri de prevedere pentru mediu:	Se va preveni deversarea produsului în sistemul de canalizare. Nu va fi eliberat în mediul înconjurător.
Metode de curățire:	Se va mătura și se va introduce folosind un fărâș în containere adecvate pentru a fi eliminat. Se va evita formarea de praf. După curățire se vor elimina urmele folosind apă.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:	Se va evita formarea de praf.
Măsuri de prevedere la manipulare:	Se va asigura ventilație adecvată. Praful poate forma un amestec exploziv în aer.

Depozitare:

Măsuri tehnice/Condiții de depozitare:	Pastrati materialul uscat.
Cerinte ambalare:	Ambalaj anti-umezeala.
Produse incompatibile:	Agenți oxidanți

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce expunerea: Se va asigura ventilație adecvată

Protectie respiratorie: Nu este necesar în mod normal nici un fel de echipament respirator individual. În cazul unei ventilații insuficiente se va folosi echipament respirator adecvat. Masti adecvate continând filtre de particule P1 (Normele Europene 143).

Protecția mâinilor: Mănuși din cauciuc.

Protecția ochilor: Ochelari de protecție perfect adecvați.

Protecția pielii și a corpului: Curatati hainele.

Control al expunerii referitoare la protecția mediului înconjurător

9. PROPRIETĂȚI FIZICO-CHIMICE**Informații generale**

Formă:	pulbere
Miros:	dulceag / dulce
Culoare:	roșu maroniu

Informatii importante despre securitatea sanatatii si a mediului

pH:	aproximativ 8
concentratie pH	650 g/l
Punct/domeniu de fierbere:	Nu se aplică.
Punct de aprindere:	nu strălucește.
Caracteristici explozive:	
Informatii explozie - sensibilitatea la impactul mecanic:	nici unul

Informatii explozie - sensibilitatea la descarcarea statica	nici unul
Limita de inflamabilitate în aer:	
inferioară:	Nu se aplică
superioară:	Nu se aplică
Proprietăți de întreținere a arderii:	nici unul
Densitate relativă:	1.3 (@ 20°C)
Greutate volumetrică:	nedeterminat.
Solubilitate:	
Solubilitate în apă:	parțial solubil.
Solubilitate în grăsimi:	insolubil.
Distribuire coeficient (n-octanol/apa):	Vezi de asemenea secțiunea 12
Vâscozitate:	Nu se aplică.
Densitatea de vapori:	Nu se aplică.
Presiune de vapori:	Nu se aplică.
Viteză de evaporare:	Nu se aplică.

Informații suplimentare

Punct/categorie de topire:	Descompusi
-----------------------------------	------------

10. STABILITATE ȘI REACTIVITATE

Stabilitate:	Stabil.
Condiții de evitat:	Pastrati materialul uscat.
Materiale de evitat:	Agenți oxidanți
Prođuși de descompunere potențial periculoși:	Cand sunt incalziti puternic sau arsi, oxizii de carbon si aburii organici daunatori sunt eliberati. Oxizi de sulf.
Polimerizare riscanta:	Nu se produce o polimerizare periculoasa.

11. INFORMAȚII TOXICOLOGICE

Efecte locale

Piele:	Nu se asteapta niciun efect.
Ochii:	Poate provoca iritatie mecanica.
Inhalare:	Inhalarea de praf poate provoca sufocări, o senzație de apăsare în piept, dureri în gât și tuse.
Ingerare:	Nu este un mijloc de expunere. Nu se asteapta niciun efect.
Sensibilizare - piele	Nu se stie daca provoaca reactii alergice.
Sensibilizare - plaman	Nu se stie daca provoaca reactii alergice

**Pericol cronic pentru
sănătate**

efecte cancerigene:	Necunoscut.
efecte mutagene:	Nu se stie daca provoaca daune genetice transmisibile.
teratogen:	Nu se stie daca provoaca defecte la nastere sau daca are efect daunator asupra dezvoltarii fatului.

Toxicitate în ceea ce privește reproducerea: Nu se stie daca afecteaza negativ functiile sau organele de reproducere.

Efectul substantei asupra unui organ (tinta): Necunoscut.

12. INFORMAȚII ECOLOGICE

Ecotoxicitate

Toxicitate acvatică: Toxicitate redusa la peste.

Informatii legate de componente*Sulfonated organic polymer*

Bioacumulare: Nu se bioacumulează
Persistenta / degradabilitate: Dificil biodegradabil

Glucoside polymer

Bioacumulare: Nu poate bioacumula datorita greutatii moleculare ridicate
Persistenta / degradabilitate: Ușor biodegradabil
Informații suplimentare: Indicată în lista PLONOR la OSPAR

13. CONSIDERAȚII RELATIVE LA ELIMINARE

Deșeuri provenind de la reziduuri / produse neutilizate: Se va evacua drept deșeu special în conformitate cu reglementările locale și naționale.

Ambalaje contaminate: Trimiteti sacose goale pentru pamant sanitar. Transmiteti alte tipuri de containere nefolosibile datorita gauririi sau deteriorarii si pamant sanitar daca regulamentele locale nu interzic acest lucru.

Numărul deșeurului conform cu CED: Conform codului european de deșeuri (CED), codul deșeurului nu se refera la produs ca atare, ci la modul de aplicație al acestuia
Următoarele coduri ale deșurilor sunt numai sugestii:
16 03 06 - deseuri organice altele decat cele mentionate in 16 03 05

14. INFORMAȚII PRIVIND TRANSPORTUL

Numar UN nici unul
Nume corect de expediere: nu este reglementat.

FISA TEHNICA DE SECURITATE

(Generic EU)

în conformitate cu Reglementările UE No. 1907/2006

Versiune: 3

Data revizuirii: 13 septembrie 2011

1. IDENTIFICAREA SUBSTANTEI / PREPARARI SI A SOCIETATII / INTREPRINDERII

Denumirea produsului: **Low Temperature Dispersant D185**

Codul produsului: **D185**

Identificarea Companiei/Intermediarului

Schlumberger
Pesetastraat 40
2991 XT Barendrecht, The Netherlands
+31 10 2923201
vollebregt1@slb.com

Telefon în caz de urgență: USA: +1-281-595-3518 (24hr)

Folosirea substanței/preparare: Folosit ca aditiv de betonare în aplicațiile pe baza de ulei.

2. IDENTIFICAREA PERICOLELOR

Indicații de pericol: Produsul nu este periculos conform Directivei 1999/45/EC.

Cele mai importante riscuri Necunoscut

Pericol pentru mediu
înconjurător: Conform rezultatelor testelor de biodegradabilitate acest produs nu este ușor biodegradabil.

3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE

Componente	Nr. CAS	Nr.CE.	Greutate % - Categorie	Clasificare
Aliphatic acid copolymer		Listed	10 - 30	

Pentru textul complet al frazelor R menționate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare: Se va ieși la aer curat.

Contact cu pielea: Se va spăla cu apă și săpun.

Contact cu ochii: Se va (vor) spăla imediat ochiul(i) cu multă apă.

Ingerare: Se va clăti gura. Niciodată nu se va încerca să se forțeze o persoană inconștientă să înghită.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului: Compatibil pentru toate tipurile.

Produse pentru stingerea incendiului ce nu pot fi folosite Nu există informații disponibile din motive de securitate:

Echipament de protecție special pentru pompieri: Purtați haine de protecție în caz de incendiu și evitați să inhalați vapori. Folosiți masca de respirație în spațiile închise.

Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate: Descompunerea termică provoacă o degajare de gaze și vapori iritanți. Oxizi de carbon.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale: Nu sunt necesare precauții speciale. Vezi de asemenea secțiunea 8.

Măsuri de prevedere pentru mediu: Se vor preveni scăpări sau scurgeri ulterioare.

Metode de curățire: Se va zăgăzui. Se va absorbi scurgerea cu ajutorul unui material inert (spre exemplu nisip sau pământ) și apoi se va pune într-un container de deseuri chimice.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:

Măsuri de prevedere la manipulare:

Nu sunt necesare precauții speciale.

Nu sunt necesare precauții speciale. Vezi de asemenea secțiunea 8.

Depozitare:

Măsuri tehnice/Condiții de depozitare:

Cerinte ambalare:

Produse incompatibile:

Nu sunt necesare condiții speciale de depozitare.

Cutie sau bidon din polipropilena de densitate ridicată (HDPE).

Nimic previzibil în mod normal

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce expunerea: Nu sunt necesare măsuri tehnice speciale de protecție

Protectie respiratorie: Nu este necesar în mod normal nici un fel de echipament respirator individual.

Protecția mâinilor: Mănuși din cauciuc., ,, PNC

Protecția ochilor: Se recomanda sa se poarte ochelari cand se folosesc substante chimice.

Protecția pielii și a corpului: Curatati hainele.

Control al expunerii referitoare la protecția mediului înconjurător

Telefon în caz de urgență: USA: +1-281-595-3518 (24hr)

Folosirea substanței/preparare: Folosit ca aditiv de betonare în aplicațiile pe baza de ulei.

2. IDENTIFICAREA PERICOLELOR

Indicații de pericol: Xi - Iritant.

Cele mai importante riscuri

Fraza(e) indicând R (risc): Risc de leziuni oculare grave.

Riscuri de sanatate: Poate fi nociv prin ingerare. Poate fi usor iritant pentru piele.

Principalele riscuri fizice: Oxidant usor.

3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE

Componente	Nr. CAS	Nr.CE.	Greutate % - Categorie	Clasificare
Inorganic nitrogen compound #1		Listed	10 - 30	O;R8 Xi;R41
Inorganic nitrogen compound #2		Listed	10 - 30	O;R8
Aliphatic alcohol		Listed	1 - 5	Xn;R22
2,2'-methyliminodiethanol	105-59-9	203-312-7	1 - 5	Xi;R36
Inorganic bromine compound		Listed	1 - 5	Xi;R38

Pentru textul complet al frazelor R mentionate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare:	Se va ieși la aer curat. Apelati la îngrijire medicala daca apare iritatie.
Contact cu pielea:	Se va spala imediat cu sapun si multa apa, scotând toate hainele si încaltamintea contaminate. Apelati la îngrijire medicala daca apare iritatie.
Contact cu ochii:	Clatiti imediat ochii cu apa timp de 15 minute tinand ploapele deschise. Apelati la îngrijire medicala.
Ingerare:	Se va clăti gura. Apelati la îngrijire medicala daca apare iritatie. Daca sunt inghitite mai multe grame, este necesar ajutorul medical.
Indicații pentru medici:	Metemoglobinemia poate aparea daca materialul este absorbit in corp.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	Folositi mijloace de stingere corespunzatoare pentru materialul inconjurator.
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Necunoscut.
Echipament de protectie special pentru pompieri:	Purtati haine de protectie in caz de incendiu si evitati sa inhalati vapori. Folositi masca de respiratie in spatiile inchise.
Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:	Descompunerea termica provoaca o degajare de gaze si vapori iritanti.

6. MĂSURI IMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Se va evita contactul cu ochii. Nu atingeti de piele sau haine. Spalati cu apa din abundenta dupa folosire. Vezi de asemenea secțiunea 8.
Măsuri de prevedere pentru mediu:	Se vor preveni scăpări sau scurgeri ulterioare. Nu va fi lasat sa intre în apele curgatoare.
Metode de curățire:	Se va zăgăzui. Se va absorbi cu un absorbant inert. Puneti in containere corespunzatoare pentru dispunere. Vezi de asemenea secțiunea 13.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:	Nu sunt necesare precații speciale.
--	-------------------------------------

Măsuri de prevedere la manipulare:

Se va evita contactul cu ochii. Se va ține departe de lumina directă a soarelui. Evitati contactele cu hainele, substantele organice sau alte materiale combustibile. Nu depozitati sau transportati langa materiale corozive, materiale flamabile/combustibile, sau agenti reductori. Nu permiteti lichidului sa se ebaporeze. Materialul uscat este un oxidant puternic.

Depozitare:**Măsuri tehnice/Condiții de depozitare:**

Depozitati departe de materiale combustibile. Depozitati in zone bine aerisite protejate de lumina directa a soarelui. Se vor păstra containerele ermetic închise, într-un loc uscat, rece și bine ventilat.

Cerinte ambalare:

Cutie sau bidon din polipropilena de densitate ridicata (HDPE).

Produse incompatibile:

Acizi tari, Baze tari, Agenți reducători, Substante organice, Vezi de asemenea secțiunea 10

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce expunerea: Se va asigura ventilație adecvată, Controlati sursa

Protectie respiratorie:

Nu este necesar în mod normal nici un fel de echipament respirator individual. În cazul unei ventilații insuficiente se va folosi echipament respirator adecvat.

Protecția mâinilor:

Mănuși impermeabile , Nitril

Protecția ochilor:

Ochelari de protecție perfect adecvați.

Protecția pielii și a corpului:

Șorț rezistent la produse chimice.

Control al expunerii referitoare la protecția mediului înconjurător

Punct/categorie de topire:	< -21 °C
-----------------------------------	----------

10. STABILITATE ȘI REACTIVITATE

Stabilitate:	Stabil în condițiile de depozitare recomandate
Condiții de evitat:	Căldura. Nu permiteți lichidului să se evaporeze. Materialul uscat este un oxidant puternic.
Materiale de evitat:	Acizi, Baze, Agenți reducători, Substanțe organice
Prođuși de descompunere potențial periculoși:	Amoniac. oxizi de azot (Nox). Oxizi de carbon.
Polimerizare riscantă:	Nu se produce o polimerizare periculoasă.

11. INFORMAȚII TOXICOLOGICE**Efecte locale**

Piele:	Poate provoca o ușoară iritație.
Ochii:	Risc de leziuni oculare grave. Iritant. Poate provoca durere, înroșeală, disconfort.

Inhalare:	Nu se asteapta niciun efect.
Ingerare:	Inghiterea unor cantitati mari poate fi daunatoare.
Sensibilizare - piele	Nu se stie daca provoaca reactii alergice.
Sensibilizare - plaman	Nu se stie daca provoaca reactii alergice
<u>Pericol cronic pentru sănătate</u>	
efecte cancerigene:	Necunoscut.
efecte mutagene:	Nu se stie daca provoaca daune genetice transmisibile.
teratogen:	Nu se stie daca provoaca defecte la nastere sau daca are efect daunator asupra dezvoltarii fatului.
Toxicitate în ceea ce privește reproducerea:	Nu se stie daca afecteaza negativ functiile sau organele de reproducere.

Sfârșitul Normelor de Tehnica și Securitatea Muncii

FISA TEHNICA DE SECURITATE

(Generic EU)

în conformitate cu Reglementările UE No. 1907/2006

Versiune: 2

Data revizuirii: 08 august 2011

1. IDENTIFICAREA SUBSTANȚEI / PREPARĂRII ȘI A SOCIETĂȚII / INTREPRINDERII

Denumirea produsului: **Antifoaming Agent D206**

Codul produsului: **D206**

Identificarea Companiei/Intermediarului

Schlumberger
Pesetastraat 40
2991 XT Barendrecht, The Netherlands
+31 10 2923201
vollebregt1@slb.com

Telefon în caz de urgență: USA: +1-281-595-3518 (24hr)

Folosirea substanței/preparare: Folosit ca aditiv de betonare în aplicațiile pe baza de ulei.

2. IDENTIFICAREA PERICOLELOR

Indicații de pericol: Produsul nu este periculos conform Directivei 1999/45/EC.

Cele mai importante riscuri

Riscuri de sănătate: Poate fi ușor iritant pentru ochii.

Pericol pentru mediu
înconjurător: Necunoscut.

Principalele riscuri fizice: Fin.

3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE

Componente	Nr. CAS	Nr. CE.	Greutate % - Categorie	Clasificare
Silicane derivative		Listed	10 - 30	

Pentru textul complet al frazelor R menționate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare: Se va ieși la aer curat.

Contact cu pielea: Se va clăti cu apă.

Contact cu ochii:	Se va clăti cu multă apă. Apelati la ingrijire medicala daca apare iritatie.
Ingerare:	Se va clăti gura. Niciodată nu se va încerca să se forțeze o persoană inconștientă să înghită. Apelati la ingrijire medicala.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	se va folosi un produs chimic uscat, CO2, apa pulverizata sau spuma de "alcool".
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Jet de apă puternic.
Echipament de protectie special pentru pompieri:	Purtati haine de protectie in caz de incendiu si evitati sa inhalati vapori. Folositi masca de respiratie in spatiile inchise.
Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:	Cand sunt incalziti puternic sau arsi, oxizii de carbon, oxizii de sulf, oxizii de nitrogen , amoniacul si aburii organici daunatori sunt eliberati. Oxizi de sulf.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Nu sunt necesare precauții speciale. Se va purta echipament de protecție corespunzător. Vezi de asemenea secțiunea 8.
Măsuri de prevedere pentru mediu:	Se vor preveni scăpări sau scurgeri ulterioare. Large spills released to the environment may disturb the natural chemical balance of soil/fresh water.
Metode de curățire:	Se va zăgăzui. Se va absorbi cu un absorbant inert. Puneti in containere corespunzatoare pentru dispunere. După curățire se vor elimina urmele folosind apă.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:	Nu sunt necesare precauții speciale.
Măsuri de prevedere la manipulare:	Se va purta echipament de protecție corespunzător. Vezi de asemenea secțiunea 8.

Depozitare:

Măsuri tehnice/Condiții de depozitare:	Nu se va îngheța. Se vor păstra containerele ermetic închise, într-un loc uscat, rece și bine ventilat. Se va ține departe de lumina directă a soarelui.
Cerinte ambalare:	Cutie sau bidon din polipropilena de densitate ridicata (HDPE).

Produse incompatibile:

Agenți oxidanți

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce Se va asigura ventilație adecvată expunerea:

Protectie respiratorie: Nu este necesar în mod normal nici un fel de echipament respirator individual.

Protecția mâinilor: Manusi impermeabile fabricate din PNC

Protecția ochilor: Ochelari de protecție.

Protecția pielii și a corpului: Curatati hainele.

Control al expunerii referitoare la protecția mediului înconjurător

Limita(e) de expunere profesională(e)

Componente	SUA			EU	
	TWA / C	STEL	Piele	8 Hour TWA	STEL
Silicane derivative	nici unul	nici unul		nici unul	nici unul

9. PROPRIETĂȚI FIZICO-CHIMICE

Informații generale

Formă: lichid
Miros: nici unul
Culoare: lăptos, alb

Informatii importante despre securitatea sanatatii si a mediului

pH: 7 - 8
Punct/domeniu de fierbere: 100 °C
Punct de aprindere: nu strălucește.

Caracteristici explozive:

Informatii explozie - sensibilitatea la impactul mecanic: nici unul

Informatii explozie - sensibilitatea la descarcarea statica nici unul

Limita de inflamabilitate în aer:

inferioară: Nu se aplică

superioară: Nu se aplică

Proprietăți de întreținere a arderii:

Densitate relativă: nici unul

Solubilitate:

Solubilitate în apă: dispersabil.

Solubilitate în grăsimi: insolubil.

Distribuire coeficient

Vezi de asemenea secțiunea 12

(n-octanol/apa):

Vâscozitate:	~ 100 mPa.s (@ 25 °C)
Densitatea de vapori:	nu există date.
Presiune de vapori:	2.3 kPa (@ 20°C)
Viteză de evaporare:	nu există date.

Informații suplimentare

Punct/categorie de topire:	~ 0 °C
----------------------------	--------

10. STABILITATE ȘI REACTIVITATE

Stabilitate:	Stabil în condițiile de depozitare recomandate.
Condiții de evitat:	Înghețare. Căldura.
Materiale de evitat:	Acizi tari și baze tari, Agenți oxidanți
Produsi de descompunere potențial periculoși:	Când sunt încălziti puternic sau arși, oxizii de carbon, oxizii de sulf, oxizii de nitrogen , amoniacul și aburii organici daunatori sunt eliberați. Silicon oxide.
Polimerizare riscantă:	Nu se produce o polimerizare periculoasă.

11. INFORMAȚII TOXICOLOGICE

Efecte locale

Piele:	Nu se aștepta niciun efect.
Ochii:	Poate fi ușor iritant.
Inhalare:	Nu este un mijloc de expunere.
Ingerare:	Nu se aștepta niciun efect.
Sensibilizare - piele	Nu se știe dacă provoacă reacții alergice.
Sensibilizare - plaman	Nu se știe dacă provoacă reacții alergice

Pericol cronic pentru sănătate

efecte cancerigene:	Necunoscut.
efecte mutagene:	Nu se știe dacă provoacă daune genetice transmisibile.
teratogen:	Nu se știe dacă provoacă defecte la naștere sau dacă are efect daunator asupra dezvoltării fătului.
Toxicitate în ceea ce privește reproducerea:	Nu se știe dacă afectează negativ funcțiile sau organele de reproducere.
Efectul substanței asupra unui organ (tintă):	Necunoscut.

12. INFORMAȚII ECOLOGICE

Ecotoxivitate

Informatii legate de componente

Silicane derivative

Bioacumulare:

Nu se bioacumulează

Persistenta / degradabilitate:

Nu este biodegradabil

Toxicitate crustaceu:

48h LC50= 175 mg/l (Acartia tonsa)

13. CONSIDERAȚII RELATIVE LA ELIMINARE

Deșeuri provenind de la reziduuri Conform cu reglementările locale și naționale.
/ produse neutilizate:

Ambalaje contaminate:

Containerele goale trebuie puse la dispoziția uzinelor de reciclare locale pentru a fi reciclate, recuperate sau eliminate.

Numărul deșeurilor conform cu CED:

Conform codului european de deșeuri (CED), codul deșeurilor nu se referă la produs ca atare, ci la modul de aplicație al acestuia
Următoarele coduri ale deșeurilor sunt numai sugestii:
06 08 99 - deșeuri neprevăzute în

2.1 Clasificarea substanței sau a amestecului

Clasificarea în conformitate cu (CE) nr 1272/2008

Pericole pentru sănătate

Corodarea/iritarea pielii	Categoria 2
Iritații/leziuni oculare grave	Categoria 1
Toxicitate asupra unui organ ținta specific (o singura expunere)	Categoria 3

Pericole pentru mediul înconjurător Neclasificat

Pericole Fizice Neclasificat

2.2 Elemente pentru etichetă

**Cuvânt de avertizare**

PERICOL

Fraze de pericol

H315 - Provoacă iritarea pielii

H318 - Provoacă leziuni oculare grave

H335 - Poate provoca iritarea căilor respiratorii

Fraze de precauție - UE (§28, 1272/2008)

P260 - Nu inspirați praful

P262 - Evitați orice contact cu ochii, pielea sau îmbrăcămintea

P305 + P351 + P338 - ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți

P304 + P340 - ÎN CAZ DE INHALARE: transportați victima la aer liber și mentineți-o în stare de repaus, într-o poziție confortabilă pentru respirație

P302 + P350 - ÎN CAZ DE CONTACT CU PIELEA: spălați ușor cu multă apă și săpun

P315 - Consultați imediat medicul

Frazele de precauție suplimentare

P264 - După manipulare, spălați fața, mâinile și orice suprafață de piele expusă

P271 - A se utiliza numai în aer liber sau în spații bine ventilate

P332 + P313 - În caz de iritare a pielii: consultați medicul

P362 - Scoateți îmbrăcămintea contaminată și spălați-o înainte de reutilizare

P403 + P233 - A se depozita într-un spațiu bine ventilat. Păstrați recipientul închis etanș

P501 - Eliminați conținutul/recipientul la o stație de eliminare a deșeurilor autorizată

Clasificare conforma cu Directivele UE 67/548/CEE sau 1999/45/CE**Indicație de pericol**

Comentarii

În conformitate cu articolul 6 alineatul (3) 1999/45/CE este eliminat, clasificarea de ciment ca R43, deoarece efectul de sensibilizare a bazei de ciment pe crom (VI) au fost adăugate pentru a controla nivelul de sensibilizante crom solubil (VI) la mai puțin de 2 mg/kg (0,0002%) din greutatea totală uscată a cimentului gata de utilizare. Produsul conține alte ingrediente care nu contribuie la clasificarea generală.

4. Măsuri de prim ajutor

4.1 Descrierea masurilor de prim-ajutor

Inhalare	Daca este inhalat, se scoate din zona de la aer curat. Solicitați asistența medicală dacă iritarea căilor respiratorii se dezvoltă sau dacă respirația devine dificilă.
Ingerare	Clătiți gura. Nu provocați vomă decât la recomandarea unui medic. Nu administrați nimic pe cale orală unei persoane inconștiente. Apelați la îngrijire medicală dacă apare iritație.
Contact cu pielea	Se va spala imediat cu sapun si multa apa, scotând toate hainele si încălțăminte contaminată. Solicitați imediat asistență medicală dacă apar simptome.
Contact cu ochii	Se va îndepăra lentila de contact. Spălați imediat ochii cu multa apa în timp ce ridicați pleoapele. Continuați să clătiți pentru cel puțin 15 minute. Solicitați asistența medicală dacă orice stare de disconfort persista.

4.2 Cele mai importante simptome și efecte, atât acute, cât și întârziate

Sfaturi generale	Gravitatea simptomelor descrise variază în funcție de concentrația și durata expunerii. În cazul în care apar simptomele descrise, victima trebuie dusă la spital cât mai repede.
Simptome principale	
Inhalare	Vă rugăm să consultați secțiunea 11. Informații toxicologice pentru mai multe informații.
Ingerare	Vă rugăm să consultați secțiunea 11. Informații toxicologice pentru mai multe informații.
Contact cu pielea	Vă rugăm să consultați secțiunea 11. Informații toxicologice pentru mai multe informații.

Contact cu ochii

Vă rugăm să consultați secțiunea 11. Informații toxicologice pentru mai multe informații.

4.3 Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare**Indicații pentru medici**

Tratați simptomatic.

5. Măsuri de combatere a incendiilor**5.1 Mijloace de stingere a incendiilor****Mijloace de stingere corespunzătoare**

Produsul în sine nu arde, Folosiți mijloace de stingere corespunzătoare pentru materialul înconjurător.

Mijloace de stingere care nu trebuie utilizate din motive de securitate

Niciuna cunoscută.

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză**Măsuri de precauție contra incendiului și exploziei**

Niciuna cunoscută.

Produse de combustie periculoase

Descompunerea termică provoacă o degajare de gaze și vapori iritanți, Reacționează cu acidul hidrofluoric (HF) formând gaz toxic (SiF₄).

5.3 Recomandări destinate pompierilor**Echipament special de protecție pentru pompieri**

Ca și în orice incendiu, se va purta un aparat respirator autonom și echipament de protecție complet.

Proceduri speciale de stingere a incendiilor

Containerele aflate în apropierea focului trebuie îndepărtate imediat și racite cu apă.

6. Măsuri de luat în caz de dispersie accidentală**6.1 Precauții personale, echipament de protecție și proceduri de urgență**

Se va folosi echipament de protecție individual. Vedeți de asemenea secțiunea 8. Evitați inhalarea prafului; în cazul în care sunt expuse la praf concentrație mare, zona pleacă imediat. Se va evita contactul cu pielea și ochii.

6.2 Precauții pentru mediul înconjurător

Produsul nu va fi lăsat să intre în sistemul de canalizare, cursurile de apă sau în pământ.

Controlul expunerii mediului

Evitați dispersarea în mediu. Autoritățile locale trebuie avizate dacă nu pot fi izolate deversările semnificative.

6.3 Metode și material pentru izolarea incendiilor și pentru curățenie**Metode pentru izolare**

Împiedicați scurgerea sau deversarea în continuare, dacă o puteți face în siguranță. Preveniți formarea norului de praf.

Metode pentru curățenie

Evitați generarea sau inhalarea prafului. Măturați și puneți cu lopata în containere corespunzătoare în vederea eliminării. După curățare, spălați urmele cu apă.

6.4 Trimiteri către alte secțiuni

Vezi Secțiunea 13 pentru informații suplimentare.

7. Manipularea și depozitarea

7.1 Precauții pentru manipularea în condiții de securitate

Manipularea

A se manipula în conformitate cu practicile de igienă industrială și de siguranță. Evitați contactul cu pielea și ochii. Se va evita formarea de praf.

Măsuri de igienă

Utilizați bune practici de lucru și de igienă personală, pentru a evita expunerea. Când utilizați nu fumeze, sa manânce sau sa bea. Spălați-va pe mâini și pe fața înainte de pauze și imediat după manipularea produsului.

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Măsuri tehnice/Măsuri de prevedere Asigurați o ventilație adecvată. Mențineți concentrațiile din aer sub limitele de expunere. Se va prevedea o ventilație prin evacuare corespunzătoare în locurile unde se formează praf.

Depozitarea

Păstrați containerele închise ermetic, într-un loc uscat, răcoros și bine ventilat. Se va ține departe de lumina directă a soarelui. Căldură. A se proteja de umiditate. Depozitați departe de incompatibile, Acizi Aluminiu sub formă de pulbere. Agenți oxidanți.

Clasă de depozitare

Depozit chimic.

Material de ambalare

Folositi doar containere construite special. Ambalaj anti-umezeala

7.3 Utilizari finale specifice

Vezi de asemenea secțiunea 1.2.

8. Controale ale expunerii/protecția personală

8.2 Controale ale expunerii

Întregul echipament de protecție personală (EPP) chimic trebuie selectat pe baza unei evaluări care să ia în considerare atât pericolele chimice prezente cât și riscul de expunere la acele pericole. Recomandările de mai jos privind EPP se bazează pe o evaluare a pericolelor chimice asociate cu acest produs. În cazul în care acest produs este utilizat în amestec cu alte produse sau lichide, pot fi create pericole suplimentare și pot fi necesare evaluări suplimentare ale riscului. Riscul de expunere și necesitatea de protecție respiratorie variază de la un loc de muncă la altul și trebuie evaluat de către utilizator în fiecare situație.

Masuri inginerice pentru a reduce expunerea

Asigurați o ventilație adecvată, mai ales în zonele închise. Mențineți concentrațiile din aer sub limitele de expunere.

Echipament personal de protecție

Protecția ochilor	Ochelari de protecție perfect adecvați.
Protecția mâinilor	Cauciuc, Neopren, PNC.
Protecția respirației	Aparatului respirator trebuie să fi purtat dacă este expus la praf, Măști adecvate conținând filtre de particule P3 (Normele Europene 143).
Protecția pielii și a corpului	Purtați echipamentul adecvat de protecție personală pentru a preveni contactul cu pielea, De spălare a ochilor și duș de urgență trebuie să fie disponibile la locul de muncă.

9. Proprietățile fizice și chimice

9.1 Informații privind proprietățile fizice și chimice de bază

Stare fizică	Solidă
Aspect	Pulbere
Miros	Niciunul
Culoare	Gri

10. Stabilitate și reactivitate

10.1 Reactivitate

Reacționează cu acidul hidrofluoric (HF) formând gaz toxic (SiF₄).

10.2 Stabilitate chimică

Stabil în condiții de temperatură normală și utilizare conform recomandărilor.

10.3 Posibilitate de Reacții Periculoase

Polimerizare periculoasă

Nu apare polimerizarea periculoasă.

10.4 Condiții de evitat

A se proteja de umiditate. Evitați lumina soarelui puternic.

10.5 Materiale incompatibile

Acizi. Aluminii sub formă de pulbere. Agenți oxidanți.

10.6 Produși de descompunere periculoși

Vedeți de asemenea secțiunea 5.2.

11. Informații toxicologice

11.1 Informații privind efectele toxicologice

Toxicitate acută

Inhalare

Poate fi nociv în caz de inhalare. Iritant pentru sistemul respirator. Poate provoca simptome de alergii sau astm sau dificultăți de respirație în caz de inhalare. Inhalarea repetată sau prelungită a prafului de siliciu cristalin poate provoca rani întârziate ale plămânului, și alte boli inclusiv silicoza și cancer la plămâni.

Contact cu ochii

Risc de leziuni oculare grave.

Contact cu pielea

Iritant pentru piele. Contactul repetat sau prelungit cu pielea poate provoca reacții alergice la persoanele susceptibile.

Ingerare Iritant, poate provoca durere sau disconfort la gura, gât și stomac. Ingestia poate cauza iritație gastrointestinală, greață, vomă și diaree.

Toxicitate acută .

Componentă	LD50 Oral	LD50 Dermic	LC50 Inhalare
Portland Cement Clinker	Nu există date disponibile	Nu există date disponibile	Nu există date disponibile
Cuart	= 500 mg/kg (Rat)	Nu există date disponibile	Nu există date disponibile
Sulfuric acid, calcium salt	> 3000 mg/kg (Rat)	Nu există date disponibile	Nu există date disponibile

Sensibilizare Poate provoca sensibilizare la persoanele susceptibile.

Efecte mutagene Acest produs nu conține nici mutagene cunoscute sau suspectate.

Cancerogenitatea Praful cu bioxid de siliciu cristalin este menționat de IARC în Grupul 1 cunoscut drept cauza a cancerului de plămâni la oameni, dacă este inhalat.

Toxicitate pentru reproducere Niciuna cunoscută.

Caile de expunere Inhalare. Contact cu pielea. Contact cu ochii.

Caile de intrare Inhalare.

Toxicitate asupra unui organ țintă specific (o singură expunere) Categoria 3

Toxicitate asupra unui organ țintă specific (expunere repetată) Neclasificat.

Efecte asupra unui organ țintă Plămâni.

Pericol prin aspirare Nici un risc de produs ca furnizat.

12. Informații ecologice

12.1 Toxicitate

Componentele produsului nu sunt clasificate drept periculoase pentru mediul înconjurător. Totuși, acest lucru nu exclude posibilitatea ca deversări frecvente sau în cantități mari să aibă un efect nociv asupra mediului înconjurător.

Toxicitatea pentru alge

Vezi informațiile componenta de mai jos.

Toxicitatea pentru pești

Vezi informațiile componenta de mai jos.

Toxicitatea față de dafnia și alte nevertebrate acvatice

Vezi informațiile componenta de mai jos.

Componentă	Toxicitatea pentru pești	Toxicitatea pentru alge	Toxicitatea față de dafnia și alte nevertebrate acvatice

Sulfuric acid, calcium salt	2980 mg/L LC50 (Lepomis macrochirus) = 96 h 1970 mg/L LC50 (Pimephales promelas) = 96 h	Nu există informații disponibile	3200 mg/L EC50 (Nitscheria linearis) = 120 h

12.2 Persistență și degradabilitate

Nu este cazul - Produs chimic anorganic.

12.3 Potențial de bioacumulare

Nu este cazul - Produs chimic anorganic.

12.4 Mobilitate în sol

Mobilitate

Nu există informații disponibile.

12.5 Rezultatele evaluării PBT și vPvB

Neclasificata drept PBT/vPvB dupa criteriile UE actuale.

12.6 Alte efecte adverse.

Niciuna cunoscută.

13. Considerații privind eliminarea

13.1 Metode de tratare a deșeurilor

Deșeuri provenind de la reziduuri / produse neutilizate Se va elimina în conformitate cu reglementările locale.

Ambalaje contaminate

Containerele goale trebuie puse la dispoziția uzinelor de reciclare locale pentru a fi reciclate, recuperate sau eliminate.

De eliminare a deșeurilor EWC Nu

În conformitate cu Catalogul european al deșeurilor, codurile deșeurilor nu sunt specifice produsului, dar aplicații specifice. Codurile de deșeuri trebuie atribuite de către utilizator pe baza aplicației pentru care a fost utilizat produsul. Următoarele coduri ale deșeurilor sunt numai sugestii: Numărul deșeurilor conform cu CED: 16 03 03

Preparat de către	Global Chemical Regulatory Compliance (GCRC) , Beilin Li
Data revizuirii	08/Sep/2014
Versiune	1

Textul frazelor R mentionate la articolul 3

R41 - Risc de leziuni oculare grave

R43 - Poate provoca o sensibilizare în contact cu pielea

R37/38 - Iritant pentru sistemul respirator și pentru piele

R48/20 - Nociv: pericol de efecte grave asupra sănătății la expunere prelungită prin inhalare

Textul complet al Frazelor H la care se face referire în secțiunile 2 și 3

H315 - Provoacă iritarea pielii

H318 - Provoacă leziuni oculare grave

H335 - Poate provoca iritarea căilor respiratorii

H317 - Poate provoca o reacție alergică a pielii

Clauză de exonerare

The information contained herein is considered in good faith as reliable of the date issued and is based upon on measurements, tests or data derived from supplier's own study or furnished by others. In providing this MSDS information, Supplier makes no express or implied warranties as to the information or product; merchantability or fitness of purpose; any express or implied warranty; or non-infringement of intellectual property rights; and supplier assumes no responsibility for any direct, special or consequential damages, results obtained, or the activities of others. To the maximum extent permitted by law, supplier's warranty obligations and buyer's sole remedies are as stated in separate agreement between the parties.

FISA TEHNICA DE SECURITATE

(Generic EU)

în conformitate cu Reglementările UE No. 1907/2006

Versiune: 3

Data revizuirii: 06 iunie 2012

1. IDENTIFICAREA SUBSTANTEI / PREPARARI SI A SOCIETATII / INTREPRINDERII

Denumirea produsului: **GASBLOK* LT D500**

Codul produsului: **D500**

Identificarea Companiei/Intermediarului

Schlumberger Technical Services
1, Rue Henri Becquerel
92142 Clamart, France
Tel: +33 1 4537 2123
Email: SDS@slb.com

Telefon în caz de urgență: USA: +1-281-595-3518 (24hr)

Folosirea substanței/preparare: Folosit ca aditiv de betonare în aplicațiile pe baza de ulei.

2. IDENTIFICAREA PERICOLELOR

Indicații de pericol: Xi - Iritant.

Cele mai importante riscuri

Riscuri de sanatate: Poate cauza sensibilizare prin contact cu pielea.

Pericol pentru mediu

înconjurător: Necunoscut.

3. COMPOZIȚIA/INFORMAȚII DESPRE INGREDIENTE

Componente	Nr. CAS	Nr.CE.	Greutate % - Categorie	Clasificare
Organic polymer		Listed	1 - 5	-
Amine polymer		Listed	1 - 5	-
Hexahydro-1,3,5-tris(2-hydroxyethyl)-sym-triazine	4719-04-4	225-208-0	0.1 - 1	T;R23 Xn;R22-R43

Pentru textul complet al frazelor R menționate în acest paragraf, se va consulta paragraful 16

4. MĂSURI DE PRIM AJUTOR

Inhalare: Nu este un mijloc de expunere. Se va ieși la aer curat.

Contact cu pielea:	Se vor scoate imediat hainele și încălțăminte contaminată. Se va spăla imediat cu apă și săpun. Apelați la îngrijire medicală dacă apare iritație.
Contact cu ochii:	Clătiți imediat ochii cu apă timp de 5 minute ținând pleoapele deschise. Apelați la îngrijire medicală dacă apare iritație.
Ingerare:	Se va clăti gura. Apelați la îngrijire medicală dacă apare iritație.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	Folositi mijloace de stingere corespunzatoare pentru materialul inconjurator.
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Necunoscut.
Echipament de protectie special pentru pompieri:	Purtati haine de protectie in caz de incendiu si evitati sa inhalati vapori. Folositi masca de respiratie in spatiile inchise.
Riscuri speciale de expunere apar chiar de la substanța sau preparat, produșii lui de ardere sau gazele eliberate:	Cand sunt incalziti puternic sau arsi, oxizii de carbon si aburii organici daunatori sunt eliberati.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Se va purta echipament de protecție corespunzător. Vezi de asemenea secțiunea 8.
Măsuri de prevedere pentru mediu:	Nu va fi eliberat în mediul înconjurător.
Metode de curățire:	Se va absorbi scurgerea cu ajutorul unui material inert (spre exemplu nisip sau pământ) și apoi se va pune într-un container de deseuri chimice. După curățire se vor elimina urmele folosind apă.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:	Nu sunt necesare precauții speciale.
Măsuri de prevedere la manipulare:	Nu sunt necesare precauții speciale.

Depozitare:

Măsuri tehnice/Condiții de depozitare:	Nu se va îngheța. Se va păstra la temperaturi între 1°C și 1°C.
Cerinte ambalare:	Cutie sau bidon din polipropilena de densitate ridicată (HDPE).
Produse incompatibile:	Agenți oxidanți

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Întregul echipament de protecție personală (EPP) chimic trebuie selectat pe baza unei evaluări care să ia în considerare atât pericolele chimice prezente cât și riscul de expunere la acele pericole. Recomandările de mai jos privind EPP se bazează pe o evaluare a pericolelor chimice asociate cu acest produs. În cazul în care acest produs este utilizat în amestec cu alte produse sau lichide, pot fi create pericole suplimentare și pot fi necesare evaluări suplimentare ale riscului. Riscul de expunere și necesitatea de protecție respiratorie variază de la un loc de muncă la altul și trebuie evaluat de către utilizator în fiecare situație.

Masuri inginerice pentru a reduce Se va asigura ventilație adecvată expunerea:

Protecție respiratorie: Nu este necesar în mod normal nici un fel de echipament respirator individual.

Protecția mâinilor: Manusi impermeabile fabricate din, Cauciuc

Protecția ochilor: Se recomanda sa se poarte ochelari cand se folosesc substante chimice.

Protecția pielii și a corpului: Curatati hainele.

Control al expunerii referitoare la protecția mediului înconjurător

Limita(e) de expunere profesională(e)

Componente	SUA			EU

9. PROPRIETĂȚI FIZICO-CHIMICE

Informații generale

Formă: lichid
Miros: nici unul
Culoare: verde

Informatii importante despre securitatea sanatatii si a mediului

pH: 7
Punct/domeniu de fierbere: 100 °C
Punct de aprindere: nu strălucește.

Caracteristici explozive:

Informatii explozie - sensibilitatea la impactul mecanic: Nu se aplică

Informatii explozie - sensibilitatea la descarcarea statica Nu se aplică

Limita de inflamabilitate în aer:
inferioară:

Nu se aplică

superioară:	Nu se aplică
Proprietăți de întreținere a arderii:	nici unul
Densitate relativă:	1 (@ 20°C)
Solubilitate:	
Solubilitate în apă:	solubil.
Solubilitate în grăsimi:	insolubil.
Distribuire coeficient (n-octanol/apa):	Vezi de asemenea secțiunea 12
Vâscozitate:	3000 mPa.s
Densitatea de vapori:	> 1 (Aer = 1.0)
Presiune de vapori:	2.3 kPa (@ 20°C)
Viteză de evaporare:	Nu există informații disponibile.

Informații suplimentare

Punct/categorie de topire:	nu există date.
----------------------------	-----------------

10. STABILITATE ȘI REACTIVITATE

Stabilitate:	Stabil.
Condiții de evitat:	înghețare.
Materiale de evitat:	Agenți oxidanți
Prođuși de descompunere potențial periculoși:	Cand sunt incalziti puternic sau arsi, oxizii de carbon, oxizii de sulf, oxizii de nitrogen , amoniacul si aburii organici daunatori sunt eliberati.
Polimerizare riscanta:	nici unul.

11. INFORMAȚII TOXICOLOGICE

Efecte locale

Piele:	Poate cauza sensibilizare prin contact cu pielea.
Ochii:	Poate fi usor iritant.
Inhalare:	Nu se asteapta niciun efect.
Ingerare:	Nu este un mijloc de expunere. Nu se asteapta niciun efect.
Sensibilizare - piele	Poate cauza sensibilizare prin contact cu pielea.

Pericol cronic pentru sănătate

efecte cancerigene:	Necunoscut.
efecte mutagene:	Nu se stie daca provoaca daune genetice transmisibile.
teratogen:	Nu se stie daca provoaca defecte la nastere sau daca are efect daunator asupra dezvoltarii fatului.

Toxicitate în ceea ce privește reproducerea: Nu se știe dacă afectează negativ funcțiile sau organele de reproducere.

Componente	LD50 / LC50
Amine polymer	- = 100 g/kg (Oral LD50; Rat)
Hexahydro-1,3,5-tris(2-hydroxyethyl)-sym-triazine	- > 2 g/kg (Dermal LD50; Rat) = 763 mg/kg (Oral LD50; Rat)

4. MĂSURI DE PRIM AJUTOR

Inhalare:	Se va ieși la aer curat. Apelați la îngrijire medicală dacă apare iritație. În caz de indispoziție.
Contact cu pielea:	Se va spăla imediat cu săpun și multă apă, scotând toate hainele și încălțăminte contaminată. Apelați la îngrijire medicală dacă apare iritație.
Contact cu ochii:	Clătiți imediat ochii cu apă timp de 15 minute ținând ploapele deschise. Apelați la îngrijire medicală.
Ingerare:	Se va clăti gura. Apelați la îngrijire medicală.

5. MĂSURI DE COMBATERE A INCENDIILOR

Produse recomandate pentru stingerea incendiului:	Produsul în sine nu arde. Folosiți mijloace de stingere corespunzătoare pentru materialul înconjurător.
Produse pentru stingerea incendiului ce nu pot fi folosite din motive de securitate:	Necunoscut.
Echipament de protecție special pentru pompieri:	Se vor folosi metode de stingere adecvate condițiilor locale și mediului înconjurător.
Riscuri speciale de expunere apar chiar de la substanță sau preparat, produșii lui de ardere sau gazele eliberate:	Necunoscut.

6. MĂSURI ÎMPOTRIVA PIERDERILOR ACCIDENTALE

Măsuri de prevedere individuale:	Nu atingeți de piele sau haine. Spălați cu apă din abundență după folosire. Se va purta echipament de protecție corespunzător. Vezi de asemenea secțiunea 8.
Măsuri de prevedere pentru mediu:	Se va preveni deversarea produsului în sistemul de canalizare. Prevenirea patrunderii în canalizări.
Metode de curățire:	Se va mătura și se va introduce folosind un fărâș în containere adecvate pentru a fi eliminate. Vezi de asemenea secțiunea 13.

7. MANIPULARE ȘI DEPOZITARE

Manipulare:

Măsuri tehnice/Măsuri de prevedere:	Se va asigura ventilație adecvată. Se va prevedea o ventilație prin evacuare corespunzătoare în locurile unde se formează praf.
Măsuri de prevedere la manipulare:	Se va evita formarea de praf. Se va purta echipament de protecție corespunzător. Vezi de asemenea secțiunea 8.

Depozitare:

Măsuri tehnice/Condiții de depozitare:	Pastrati materialul uscat.
Cerinte ambalare:	Sacosa de hartie (minimum 3 straturi), sau alte containere industriale realizate pentru pudra si materiale granulate.
Produse incompatibile:	Acizi

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

Masuri inginerice pentru a reduce Ventilare locala, Mentineti concentratiile din aer sub limitele de expunere expunerea:

Protectie respiratorie:	Măști adecvate conținând filtre de particule P3 (Normele Europene 143).
Protectia mâinilor:	Mănuși impermeabile, Mănuși din cauciuc.
Protectia ochilor:	Ochelari de protecție perfect adecvați.
Protectia pielii și a corpului:	Curatati hainele.

Control al expunerii referitoare la protecția mediului înconjurător

Limita(e) de expunere profesională(e)

Componente	SUA			EU	
	TWA / C	STEL	Piele	8 Hour TWA	STEL
Portland cement	1 mg/m ³	nici unul		nici unul	nici unul

9. PROPRIETĂȚI FIZICO-CHIMICE**Informații generale**

Formă:	pulbere
Miros:	nici unul
Culoare:	gri

Informatii importante despre securitatea sanatatii si a mediului

pH:	11 - 13
concentratie pH	(10% solutie)
Punct/domeniu de fierbere:	Nu se aplică.
Punct de aprindere:	Nu se aplică.
Caracteristici explozive:	
Informatii explozie - sensibilitatea la impactul mecanic:	nici unul
Informatii explozie - sensibilitatea la descarcarea statica	nici unul
Limita de inflamabilitate în aer:	
inferioară:	Nu se aplică

superioară:	Nu se aplică
Proprietăți de întreținere a arderii:	nu există date
Densitate relativă:	~ 3
Greutate volumetrică:	nedeterminat.
Solubilitate:	
Solubilitate în apă:	Miscible cu apa.
Solubilitate în grăsimi:	insolubil.
Distribuire coeficient (n-octanol/apa):	Nu se aplică.
Vâscozitate:	Nu se aplică.
Densitatea de vapori:	Nu se aplică.
Presiune de vapori:	Nu se aplică.
Viteză de evaporare:	Nu se aplică.

Informații suplimentare

Punct/categorie de topire:	Nu se aplică.
----------------------------	---------------

10. STABILITATE ȘI REACTIVITATE

Stabilitate:	Stabil în condițiile de depozitare recomandate
Condiții de evitat:	Se va proteja de umezeală.
Materiale de evitat:	Acizi
Prođuși de descompunere potențial periculoși:	Necunoscut.
Polimerizare riscantă:	Nu se produce o polimerizare periculoasă.

11. INFORMAȚII TOXICOLOGICE

Efecte locale

Piele:	Iritant; poate provoca durere, roseata, dermatita.
Ochii:	Risc de leziuni oculare grave. Irritație gravă a ochilor.
Inhalare:	Iritant. Inhalarea de praf poate provoca sufocări, o senzație de apăsare în piept, dureri în gât și tuse.
Ingerare:	Nu este un mijloc de expunere. Poate provoca o usoara iritatie.
Sensibilizare - piele	Nu se stie daca provoaca reactii alergice.
Sensibilizare - plaman	Nu se stie daca provoaca reactii alergice

Pericol cronic pentru sănătate

efecte cancerigene:	Necunoscut.
efecte mutagene:	Nu se stie daca provoaca daune genetice transmisibile.

teratogen:	Nu se stie daca provoaca defecte la nastere sau daca are efect daunator asupra dezvoltarii fatului.
Toxicitate în ceea ce privește reproducerea:	Nu se stie daca afecteaza negativ functiile sau organele de reproducere.
Efectul substantei asupra unui organ (tinta):	Ochii. Piele. Aparatul respirator.

12. INFORMAȚII ECOLOGICE

Ecotoxicitate

Informatii legate de componente

Portland cement

Bioacumulare:	Nu se aplică
Persistenta / degradabilitate:	Nu se aplică
Informații suplimentare:	Indicat in lista PLONOR la OSPAR

13. CONSIDERAȚII RELATIVE LA ELIMINARE

Deșeuri provenind de la reziduuri / produse neutilizate: Conform cu reglementările locale și naționale

Ambalaje contaminate:	Trimiteti sacose goale pentru pamant sanitar. Transmiteti alte tipuri de containere nefolosibile datorita gauririi sau deteriorarii si pamant sanitar daca regulamentele locale nu interzic acest lucru.
Numărul deșeului conform cu CED:	Conform codului european de deșeuri (CED), codul deșeului nu se refera la produs ca atare, ci la modul de aplicație al acestuia Următoarele coduri ale deșurilor sunt numai sugestii: 16 03 03 - deseuri anorganice care contin substante periculoase

14. INFORMAȚII PRIVIND TRANSPORTUL

Numar UN	nici unul
Nume corect de expediere:	nu este reglementat.

ADR/RID

Clasa:	nu este reglementat
---------------	---------------------

IMDG/IMO

Clasa de pericol:	nu este reglementat
--------------------------	---------------------

ICAO/IATA

14. INFORMAȚII PRIVIND TRANSPORTUL

Clasa de pericol: nu este reglementat

15. INFORMAȚII PRIVIND REGLEMENTĂRILE SPECIFICE APLICABILE

în conformitate cu legislația în vigoare

conține: Portland cement.

Indicații de pericol:

- Xi - Iritant

Fraza(e) indicând R (risc):

R41 - Risc de leziuni oculare grave.

R37/38 - Iritant pentru sistemul respirator și pentru piele.

Frază(e) S:

- S22 - A nu inspira praful.
- S26 - În cazul contactului cu ochii, se spala imediat cu multă apă și se consulta un specialist.
- S46 - În caz de înghițire, a se consulta imediat medicul și a se arăta ambalajul sau eticheta.
- S24/25 - Evitati contactul cu pielea și ochii.
- S36/37/39 - Purtați echipament de protecție corespunzător, manusi și masca de protecție pentru ochi/față.

Inventarieri internaționale

Acest produs respecta cerințele EINECS/ELINCS.

**Împreună cu această scrisoare primiți și noile versiuni ale fișelor de protecția și
securitatea muncii care vor înlocui versiunile precedente**

Textul frazelor R menționate la articolul 3

- R41 - Risc de leziuni oculare grave.
- R43 - Poate cauza sensibilizare prin contact cu pielea.
- R37/38 - Iritant pentru sistemul respirator și pentru piele.

Cauza reviziei:

8. CONTROLUL EXPUNERII/PROTECȚIE PERSONALA

2. Identificarea pericolelor**2.1 Clasificarea substantei sau a amestecului****REGULAMENT (CE) Nr. 1272/2009**

Vatamarea Severa a Ochilor / Iritarea Ochilor	Categoria 2 - H319
---	--------------------

Clasificare conform Directivelor UE 67/548/CEE sau 1999/45/CE.

Pentru textul complet al Fazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

Clasificare Xi - Iritant.

Fraze de Risc R36 Iritant pentru ochi.

2.2 Elemente pentru eticheta

Pictograme de Pericol

Cuvant de Semnal

Avertisment

Propozitii de Pericol

H319 - Cauzeaza iritarea serioasa a ochilor

Propozitii de Atentionare - UE (§28, 1272/2008)

P264 - Spalati bine fata, manile si orice piele expusa dupa manipulare

P280 - Purtati protectie pentru ochi/protectie pentru fata

P305 + P351 + P338 - LA CONTACT CU OCHII: Clatiti cu atentie cu apa timp de mai multe minute. Scoateti lentilele de contact, daca exista si este usor de facut. Continuati clatirea

P337 + P313 - Daca iritatiea ochilor persista: Cereti asistenta/ingrijiri medicale

Contine

Substante

Clorura de amoniu

Numar CAS

12125-02-9

2.3 Alte pericole

Nu se cunoaste nimic.

3. Compozitie/informatii privind componentii

Substante	EINECS	Numar CAS	Procentul	Clasificare CEE	Clasificarea Substantelor conform UE - CLP	Nr. REACH
Clorura de amoniu	235-186-4	12125-02-9	5 - 10%	Xn; R22 Xi; R36	Acute Tox. 4 (H302) Eye Irrit. 2 (H319)	Nu sunt date disponibile

Pentru textul complet al Fazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

4. Masuri de prim ajutor

4.1 Descrierea masurilor de prim ajutor

Inhalare

La inhalare, mutati persoana la aer proaspat. Cereti asistenta medicala daca apare iritatie respiratorie sau respiratia devine dificila.

Ochi

In caz de contact, sau este suspectat contactul, spalati ochii imediat cu multa apa timp de cel putin 15 minute si cereti ingrijiri medicale imediat dupa spalare.

Piele

In caz de contact, spalati imediat pielea cu mult sapun si apa timp de cel putin 15 minute. Cereti ingrijiri medicale.

Inghitire

Nu induceti voma. Diluati incet cu 1-2 pahare de apa sau lapte si cereti asistenta medicala. Niciodata nu administrati ceva pe gura unei persoane inconstiente.

4.2 Cele mai importante simptome si efecte, atât acute, cât si întârziate

Poate provoca iritatiea ochilor

4.3 Indicatii privind orice fel de asistenta medicala imediata si tratamentele speciale necesare**Notes to Physician**

Treat symptomatically

5. Masuri de combatere a incendiilor**5.1 Mijloace de stingere a incendiilor****Mijloace Adecvate de Stingere a Incendiilor**

Apa sub forma de ceata, dioxid de carbon, spuma, substanta chimica uscata.

Mijloace de combatere a incendiilor ce nu trebuie folosite, din motive de siguranta.

Nimic cunoscut

5.2 Pericole speciale cauzate de substanta sau amestecul în cauza**Pericole de Expunere Speciale**

Descompunerea în foc poate produce gaze toxice.

5.3 Recomandari destinate pompierilor**Echipament Special de Protectie pentru Pompieri**

Echipament complet de protectie si aparat respirator autonom necesar pentru pompieri.

6. Masuri de luat în caz de dispersie accidentala**6.1 Precautii personale, echipament de protectie si proceduri de urgenta**

Utilizati echipament de protectie corespunzator.

Consultati Sectiunea 8 pentru informatii suplimentare

6.2 Precautii pentru mediul înconjurator

Preveniti intrarea în canalizari, canale navigabile sau zone joase.

6.3 Metode si material pentru izolarea incendiilor si pentru curatenie

Izolati deversarea si opriti scurgerea unde este posibil în siguranta. Izolati deversarea cu nisip sau alte materiale inerte.

Strangeti si indepartati.

6.4 Trimiteri catre alte sectiuni

Consultati Sectiunea 8 si 13 pentru informatii suplimentare

7. Manipularea ti Depozitarea**7.1 Precautii pentru manipularea în conditii de securitate**

Evitati inspirarea vaporilor. Spalati mainile dupa utilizare. Evitati contactul cu ochii, pielea sau îmbracamintea. Spalati îmbracamintea contaminata înainte de reutilizare

Hygiene Measures

Se va manipula conform normelor de igiena industriale ?i a normelor de securitate

7.2 Conditii de depozitare în conditii de securitate, inclusiv eventuale incompatibilitati

Depozitati departe de substante bazice. Depozitati în spatii reci, bine aerisite. Pastrati recipientul închis când nu este folosit.

7.3 Utilizare finala specifica (utilizari finale specifice)**Scenariu de Expunere** Nu sunt informatii disponibile**Alte Instructiuni** Nu sunt informatii disponibile**8. Controale ale expunerii/protectia personala****8.1 Parametri de control****Exposure Limits**

Concentratia Predictibila Fara Efect (PNEC)

Nu sunt informatii disponibile.

8.2 Controale ale expunerii

Controlul Procesului

Utilizati intr-o zona bine ventilata. Trebuie utilizata ventilatie de evacuare locala in zone fara o buna ventilatie transversala.

Echipament de protectie personala

Protectie Respiratorie

Masca de gaze pentru vapori organici/gaze acide cu filtru praf/ceata.

Protectia Mainilor.

Manusi de cauciuc impermeabil.

Protectia Pielii

Sort de cauciuc.

Protectia Ochilor

Ochelari de protectie chimica; purtati deasemenea aparatoare pentru fata daca exista pericolul stropirii.

Alte Masuri de Precautie

Spalatoarele pentru ochi si dusurile de siguranta trebuie sa fie usor accesibile.

Environmental Exposure Controls Nu sunt informatii disponibile

9. Proprietatile fizice ti chimice

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
<i>Indicarea de pericole specifice pentru om și mediul înconjurător:</i>		
SUBSTANȚA / AMESTECUL NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
---	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Fraze de precauție:	P261: Evitați să inspirați praful/fumul/gazul/ceața/vaporii/spray-ul.	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:	---	NU ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI
Sfaturi de siguranță::	S23: A nu se inspira praful/fumul/gazul/ceața/vaporii/spray-ul/aburii. S24/25: Evitați contactul cu pielea și ochii.	
Eliminarea:		
2.3. Alte pericole		

**- AVAPOLY PGL -**

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII						
3.1. Proprietăți chimice ale substanței sau amestecului						
Compoziție:	Amestec					
Conținut:	În conformitate cu tabelul următor:					
Formula moleculară:	- - -					
Numărul EC:	- - -					
Numărul CAS:	- - -					
Numărul ONU:	- - -					
Numărul REACH:	- - -					
3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Acid Acetic 80 % REACH No. 01-2119475328-30-XXXX	64-19-7	200-580-7	1% - 3%	Inflam. Lich. 3	 GHS02	H226
				Cor. Cutanat 1A	 GHS05	H314
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Acid Acetic 80 % REACH No. 01-2119475328-30-XXXX	64-19-7	200-580-7	1% - 3%	Fara pictograma		R10
				C - coroziv		R35

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Mutați victima la aer și mențineți-o la-caldura și în stare de repaus. Dacă vă simțiți rău solicitați medicul imediat
După contactul cu pielea:	Spălați cu multă apă și săpun
După contactul cu ochii:	În cazul contactului cu ochii, clătiți imediat cu multă apă și adresați-vă unui medic.
După înghițire:	Nu induceți voma. SOLICITAȚI EXAMINARE MEDICALĂ IMEDIAT.
Alte informații:	N.a.
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	Niciuna
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	N.a.

**- AVAPOLY PGL -**

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu, respectați instrucțiunile.
Mijloace de stingere corespunzătoare:	Utilizati: apa, dioxid de carbon
Mijloace de stingere necorespunzătoare:	Niciunul în mod special
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Nu respirați gazele de explozie și de ardere
Echipamente speciale de stingere a incendiilor	Folositi aparat de respirat adecvat. Colectati separat apa contaminată folosită pentru a stinge focul. Aceasta nu va fi deversată în sistemul de canalizare. Dacă posibil din punct de vedere al siguranței, mutați containere intacte din zona de pericol imediat.
Recomandări destinate pompierilor:	N.a.

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Purtați echipament de protecție adecvat PPE (manusi, ochelari, îmbrăcăminte de protecție)
Proceduri de urgență:	Mutați persoanele neprotejate într-o zonă sigură.
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Nu permiteți să intre în sol / subsol. Preveniți scurgerile în apele de suprafață sau în sistemul de canalizare. Colectați apa de spălare contaminată și eliminați-o. În cazul scurgerilor/patrunderilor în cursurile de apă, sol sau canalizare, informați autoritățile responsabile. Materiale adecvate pentru preluare, absorbire: material absorbant, organic, nisip
Metode de limitare a poluării	Spălați cu apă din abundență
Informații suplimentare:	N.a.

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de siguranță	
Precauții pentru manipulare în condiții de siguranță:	Evitați contactul cu pielea și ochii, inhalarea de vapori și ceață. În timpul manipulării nu mâncați sau beți.
7.2. Precauții pentru depozitare în condiții de siguranță, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Ventilație corespunzătoare. Pastrati ambalajul ermetic închis. Pastrati la distanță de alimente, bautură și hrană pentru animale.
Specificațiile zonei de depozitare:	A se păstra în locuri răcoase și uscate
Specificațiile recipientilor:	Pastrati recipientul ermetic închis .
Incompatibilități:	Acizi tari și agenți oxidanți
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Stabilizator de șist pentru fluide de foraj

**- AVAPOLY PGL -**

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control (Limite de expunere)		
Substanța	Acetic acid 80% CAS No. 64-19-7	
TLV _{Ceiling} :	- - -	
TLV _{TWA} :	10 ppm	
TLV _{STEL} :	15 ppm	
Limita biologică:	- - -	
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Asigurați ventilație adecvată
8.2.2. Măsurile de protecție individuală, precum echipamentul de protecție personală.		Este necesară ventilație generală
Protecția individuală	Respiratorie:	În general nu este necesară.
	Ochi	În general nu este necesară. Manipulați în conformitate cu regulile de bună practică de lucru.
	Maini	Manusi
	Corp	În general nu este necesară.
8.3. Controlul expunerii mediului		
Variante de expunere		N.a.

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Lichid vascos
Aspect:	Lichid
Culoare:	Maro
Miros:	Nu este relevant
Prag olfactiv:	N.a.
9.2. Informații pentru sănătate, siguranță și mediu	
pH (10 g/l) 25°C:	8,5-10,5
Punct de topire:	N.d.
Punct de fierbere:	>90°C
Punct de aprindere:	150°C
Inflamabilitate (solid, gaz):	N.d.
Temperatura de autoaprindere:	N.d.
Temperatura de descompunere:	N.d.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	N.d.
Densitatea aparentă (20°C):	N.d.
Densitatea relativă:	De la 1,15 la 1,25 gr/cm3
Densitatea de vapori:	N.d.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	Miscibil
Coeficientul de distribuție (n-	N.a.

**- AVAPOLY PGL -**

octanol):	
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.

10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	Stabil în condiții normale.
10.2. Stabilitate chimică	
Materiale incompatibile:	Acizi tari și agenți de oxidare puternici
Posibilitatea de reacții periculoase:	Niciuna
10.3. Produși de descompunere periculoși	
Alte informații:	În caz de incendiu CO și CO ₂

11. INFORMAȚII TOXICOLOGICE	
11.1. Toxicitate Acută	
Toxicitatea substanței	Acetic acid 80% CAS No. 64-19-7
Toxicitate orală acută:	LD50 (Sobolan): 3310 mg/Kg
Toxicitate inhalatorie acută:	N.d.
Toxicitate cutanată acută:	LD50 (Iepure): 1060 mg/kg
11.2. Corozivitate	
Piele:	N.a.
Ochi:	N.a.
11.3. Iritabilitate primară	
Piele:	N.a.
Ochi:	N.a.
11.4. Nocivitate	
Ingestie:	N.a.
Inhalare:	N.a.
11.5. Sensibilitate	
Piele:	N.a.
Ochi:	N.a.

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Substanța	Acetic acid 80% CAS No. 64-19-7
Toxicitate în apă:	LC50 (Pesti) 96h: 75 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	Biodegradabil
12.3. Potențial de Bioacumulare	
Alte informații:	N.a.
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Rezultatele evaluării PBT și vPvB	
PBT:	Niciunul
vPvB:	Niciunul

**- AVAPOLY PGL -**

12.6. Alte efecte adverse	
Alte informații:	Niciuna

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Recuperati dacă este posibil. Consultați un centru autorizat pentru eliminare
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	Recuperati dacă este posibil. Consultați un centru autorizat pentru eliminare
Alte recomandări:	N.a.

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Normele de transport ONU:	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Clasa IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările aplicate în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	
Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei	
Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)	
Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)	
Regulament (CE) nr. 1907/2006 (REACH)	
Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.	
Reglementări naționale:	
Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului	

**- AVAPOLY PGL -**

substanțelor chimice.

Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase.

REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor

HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase;

HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase;

REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr. 1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiei de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 / 2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.

HG 1872/2006 pentru modificarea și completarea HG 621 / 2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este

**- AVAPOLY PGL -**

folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C: Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de pericol utilizate în secțiunile anterioare**

H226: - Lichid și vapori inflamabili.

H314: Provoacă arsuri grave ale pielii și lezarea ochilor

R10: Inflamabil

R 35: Provoacă arsuri grave

Fraze de precauție / siguranță utilizate în secțiunile anterioare

P261: Evitați să inspirați praful/fumul/gazul/ceața/vaporii/spray-ul.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S23: A nu se inspira praful/fumul/gazul/ceața/vaporii/spray-ul/aburii.

S24/25: Evitați contactul cu pielea și ochii.

FISA TEHNICA DE SECURITATE

in conformitate cu Regulamentul (CE) Nr. 453/2010

FR-66

2. IDENTIFICAREA PERICOLELOR

Clasificarea substantei sau amestecului

Clasificare conform Directivelor UE 67/548/CEE sau 1999/45/CE.

Pentru textul complet al Frazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

Simbol(uri)

Clasificare

Xi - Iritant.

Fraze de Risc

R36 Iritant pentru ochi.

Fraze de Siguranta

S26 In cazul contactului cu ochii, clatiti imediat cu apa din abundenta si cereti ingrijiri medicale.

S24/25 Evitati contactul cu pielea si ochii.

Consideratii asupra Pericolelor

Poate cauza iritarea ochilor. Poate fi daunator daca este inghitit.

3. COMPOZITIE / INFORMATII DESPRE INGREDIENTE

Substante	EINECS	Numar CAS	Procentul	Clasificare CEE	Clasificarea Substantelor conform UE - CLP	Nr. REACH
Distilate petroliere usoare, hidrotratate	265-149-8	64742-47-8	10 - 30%	Xn; R65, R66	Asp. Tox. 1 (H304) EUH066	01-2119484819-18

Pentru textul complet al Frazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

4. MASURI DE PRIM AJUTOR

Descrierea masurilor de prim ajutor

Inhalare

La inhalare, mutati persoana la aer proaspat. Daca nu respira, faceti respiratie artificiala, de preferat gura-la-gura. Daca respiratia este dificila, administrati oxigen. Cereti asistenta medicala.

Ochi

In caz de contact, sau este suspectat contactul, spalati ochii imediat cu multa apa timp de cel putin 15 minute si cereti ingrijiri medicale imediat dupa spalare.

Piele

Spalati cu sapun si apa. Cereti asistenta medicala daca iritatia persista Scoateti imbracamintea contaminat si spalati-o inainte de re folosire.

Inghitire

Cereti asistenta medicala! Daca se produce voma, tineti capul victimei mai jos decat coapsele pentru a preveni aspiratia.

Cele mai importante simptome si efecte, atat acute cat si intarziate

Poate cauza iritarea ochilor. Poate fi daunator daca este inghitit.

Indicarea oricarei asistente medicale imediate si tratamentul special necesar

Note pentru Medic

Tratati simptomatic

5. MASURI DE STINGERE A INCENDIILOR

Medii de stingere a incendiilor

Mijloace Adecvate de Stingere a Incendiilor

Apa sub forma de ceață, dioxid de carbon, spuma, substanța chimică uscată.

Mijloace de combatere a incendiilor ce nu trebuie folosite, din motive de siguranță.

Nimic cunoscut

Pericole specifice ce deriva din substanța sau amestec

Pericole de Expunere Speciale

Descompunerea în foc poate produce gaze toxice. Folosiți apă pulverizată pentru a răci suprafețele expuse la foc.

Sfaturi pentru pompieri

Echipament Special de Protecție pentru Pompieri

Echipament complet de protecție și aparat respirator autonom necesar pentru pompieri.

6. MASURI IN CAZ DE SCURGERI ACCIDENTALE

Precauții personale, echipament de protecție și proceduri de urgență

Utilizați echipament de protecție corespunzător.

Vezi Secțiunea 12 pentru informații suplimentare

Precauții legate de mediul inconjurător

Preveniți intrarea în canalizări, canale navigabile sau zone joase.

Metode și materiale pentru izolare și curățire

Izolați deversarea și opriți scurgerea unde este posibil în siguranță. Izolați deversarea cu nisip sau alte materiale inerte. Strangeti și îndepărtați.

Referință la alte secțiuni

Vezi Secțiunea 12 pentru informații suplimentare

7. MANEVRARE SI DEPOZITARE

Măsuri de Precauție pentru Manevrarea în Siguranță

Evitați contactul cu ochii, pielea sau îmbrăcămintea. Evitați inspirarea vaporilor. Spălați mâinile după utilizare. Spălați îmbrăcămintea contaminată înainte de reutilizare. Materialul este alunecos sub picior. Evitați inspirarea cetii.

Măsuri de Igienă

Manipulați în concordanță cu bunele practici de igienă și siguranță industrială

Condiții pentru depozitarea în siguranță, incluzând orice incompatibilități

Depozitați departe de agenți oxidanți. Pastrati recipientul închis când nu este folosit. Depozitați în locuri reci și uscate. Depozitați în spații bine aerisite. Nu lăsați să înghețe. Perioada maximă de stocare a produsului este de 6 luni.

Utilizare(i) finală specifică

Scenariu de Expunere

Nu sunt informații disponibile

Alte Instrucțiuni

Nu sunt informații disponibile

8. CONTROLUL EXPUNERII/PROTECTIE PERSONALA

Parametri de control

Substanțe	UE	UK	Olanda	Franta OEL	Germania MAK/TRK
Distilate petroliere usoare, hidrotratate	Nu este cazul	5 mg/m ³	Nu este cazul	Nu este cazul	Nu este cazul

Substanțe	Italia	Polonia	Ungaria	Republica Ceha	Danemarca
Distilate petroliere usoare, hidrotratate	Nu este cazul	Nu este cazul	Nu este cazul	Nu este cazul	Nu este cazul

Nivel Calculat Fara Efect (DNEL) Nu sunt informatii disponibile
Concentratia Predictibila Fara Efect (PNEC) Nu sunt informatii disponibile.

Controlul expunerii
Controlul Procesului

Utilizati intr-o zona bine ventilata. Trebuie utilizata ventilatie de evacuare locala in zone fara o buna ventilatie transversala.

Echipament de protectie personala

Protectie Respiratorie

Nu este necesar in mod normal. Dar daca sunt posibile expuneri semnificative, atunci este recomand urmatorul tip de aparat respirator:
 Masca de gaze pentru vapori organici.

Protectia Mainilor.

Manusi de cauciuc impermeabil.

Protectia Pielii

Sort de cauciuc.

Protectia Ochilor

Ochelari de protectie chimica; purtati deasemenea aparatoare pentru fata daca exista pericolul stropirii.

Alte Masuri de Precautie

Spalatoarele pentru ochi si dusurile de siguranta trebuie sa fie usor accesibile.

Controlul Expunerii Mediului Inconjurator

Nu sunt informatii disponibile

9. PROPRIETATI FIZICE SI CHIMICE

Oxidanti puternici.

Produse de Descompunere Periculoase

Oxizi de azot. Monoxid de carbon si dioxid de carbon. Clor.

11. INFORMATII TOXICOLOGICE

Informatii asupra Efectelor Toxicologice

Toxicitate Acuta

Inhalarea

Inhalarea de ceata sau vapori incalziti poate cauza iritarea cailor respiratorii.

Contactul cu Ochii

Poate cauza iritarea moderata a ochilor.

Contact cu Pielea

Poate cauza degresarea pielii la expunere prelungita.

Inghitire

Aspirarea in plamani poate cauza pneumonie chimica incluzand tuse, respiratie dificila, respiratie asmatica, tuse cu sange si pneumonie care poate fi fatala.

Efecte Cronice/Carcinogenicitate Nu sunt date disponibile care sa indice ca produsul sau componentele prezente in concentratie mai mare de 1% sunt pericole cronice pentru sanatate.

2. IDENTIFICAREA PERICOLELOR

Clasificarea substantei sau amestecului

Clasificare conform Directivelor UE 67/548/CEE sau 1999/45/CE.

Pentru textul complet al Frazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

Simbol(uri)

Clasificare

F - Foarte inflamabil.
T - Toxic.

Fraze de Risc

R20/21/22 Nociv prin inhalare, contact cu pielea si inghitire.

R39/23/24/25 Toxic: pericol de efecte ireversibile foarte serioase prin inhalare, contact cu pielea si inghitire.

R36/37/38 Iritant pentru ochi, sistemul respirator si piele.

Fraze de Siguranta

S7 Pastrati containerul inchis etans.

S16 Tineti departe de surse de aprindere - Fumatul interzis.

S26 In cazul contactului cu ochii, clatiti imediat cu apa din abundenta si cereti ingrijiri medicale.

S45 In caz de accident sau daca va simtiti rau, cereti imediat ingrijiri medicale.

S36/37 Purtati imbracaminte de protectie adecvata si manusi.

Consideratii asupra Pericolelor

Poate cauza iritarea ochilor, pielii si cailor respiratorii. Poate cauza dureri de cap, ameteala si alte efecte asupra sistemului nervos central. Poate fi fatal daca este inghitit. Poate cauza orbire. Poate fi absorbit prin piele. Supraexpunerea repetata poate cauza efecte asupra ficatului sau rinichilor. Inflamabil.

4. MASURI DE PRIM AJUTOR

Descrierea masurilor de prim ajutor

Inhalare	La inhalare, mutati persoana la aer proaspat. Daca nu respira, faceti respiratie artificiala, de preferat gura-la-gura. Daca respiratia este dificila, administrati oxigen. Cereti asistenta medicala.
Ochi	In caz de contact, sau este suspectat contactul, spalati ochii imediat cu multa apa timp de cel putin 15 minute si cereti ingrijiri medicale imediat dupa spalare.
Piele	In caz de contact, spalati imediat pielea cu mult sapun si apa timp de cel putin 15 minute. Cereti ingrijiri medicale. Scoateti imbracamintea contaminat si spalati-o inainte de refolosire.
Inghitire	Nu induceti voma. Diluati incet cu 1-2 pahare de apa sau lapte si cereti asistenta medicala. Niciodata nu administrati ceva pe gura unei persoane inconstiente.

Cele mai importante simptome si efecte, atat acute cat si intarziate

Poate cauza iritarea ochilor, pielii si cailor respiratorii. Poate cauza dureri de cap, ameteala si alte efecte asupra sistemului nervos central. Poate fi fatal daca este inghitit. Poate cauza orbire. Poate fi absorbit prin piele. Supraexpunerea repetata poate cauza efecte asupra ficatului sau rinichilor. Inflamabil.

Indicarea oricarei asistente medicale imediate si tratamentul special necesar

Note pentru Medic Tratati simptomatic

5. MASURI DE STINGERE A INCENDIILOR

Medii de stingere a incendiilor

Mijloace Adecvate de Stingere a Incendiilor

Dioxid de carbon, substanta chimica uscata, spuma.

Mijloace de combatere a incendiilor ce nu trebuie folosite, din motive de siguranta.

Nimic cunoscut

Pericole specifice ce deriva din substanta sau amestec

Pericole de Expunere Speciale

Se poate prinde de la caldura, scantei sau flacari. Folositi apa pulverizata pentru a raci suprafetele expuse la foc. Containerele inchise pot exploda in foc. Descompunerea in foc poate produce gaze toxice. Scurgerile catre canalizari pot cauza pericol de incendiu sau de explozie.

Sfaturi pentru pompieri

Echipament Special de Protectie pentru Pompieri

Echipament complet de protectie si aparat respirator autonom necesar pentru pompieri.

6. MASURI IN CAZ DE SCURGERI ACCIDENTALE

Precautii personale, echipament de protectie si proceduri de urgenta

Utilizati echipament de protectie corespunzator. Purtati aparat autonom de respiratie in zonele inchise.

Vezi Sectiunea 12 pentru informatii suplimentare

Precautii legate de mediul inconjurator

Preveniti intrarea in canalizari, canale navigabile sau zone joase.

Metode si materiale pentru izolare si curatire

Izolati deversarea si opriti scurgerea unde este posibil in siguranta. Indepartati sursele de aprindere si lucrati cu unelte anti-scanteie. Izolati deversarea cu nisip sau alte materiale inerte. Strangeti si indepartati.

Referinta la alte sectiuni

Vezi Sectiunea 12 pentru informatii suplimentare

7. MANEVRARE SI DEPOZITARE

Masuri de Precautie pentru Manevrarea in Siguranta

Evitati contactul cu ochii, pielea sau imbracamintea. Evitati inspirarea vaporilor. Spalati mainile dupa utilizare. Spalati imbracamintea contaminata inainte de reutilizare Legati la pamant si fixati containerele la transferarea dintr-un container in celalalt.

Masuri de Igiena

Manipulati in concordanta cu bunele practici de igiena si siguranta industriala

Conditii pentru depozitarea in siguranta, incluzind orice incompatibilitati

Depozitati departe de agenti oxidanti. Tineti departe de caldura, scantei si flacara deschisa. Pastrati recipientul inchis cand nu este folosit. Perioada maxima de stocare a produsului este de 60 luni.

Controlul expunerii

Controlul Procesului

Utilizati intr-o zona bine ventilata. Trebuie utilizata ventilatie de evacuare locala in zone fara o buna ventilatie transversala.

Echipament de protectie personala

Protectie Respiratorie

Aparat respirator autonom cu presiune pozitiva, daca este prezent metanolul.

Protectia Mainilor.

Manusi de cauciuc impermeabil.

Protectia Pielii

Sort de cauciuc.

Protectia Ochilor

Ochelari de protectie chimica; purtati deasemenea aparatoare pentru fata daca exista pericolul stropirii.

Alte Masuri de Precautie

Spalatoarele pentru ochi si dusurile de siguranta trebuie sa fie usor accesibile.

Controlul Expunerii Mediului Inconjurator

Oxidanti puternici.

Produse de Descompunere Periculoase

Amoniu. Oxizi de azot. Hidrocarburi. Monoxid de carbon si dioxid de carbon.

11. INFORMATII TOXICOLOGICE

Informatii asupra Efectelor Toxicologice

Toxicitate Acuta

Product Information	Based on the collective toxicity of product ingredients, the mixture should be considered to cause the following:
Inhalarea	Poate cauza iritarea cailor respiratorii. Poate cauza depresia sistemului nervos central incluzand dureri de cap, ameteala, somnolenta, lipsa de coordonare, timp de reactie incetinit, vorbire incoerenta, vartej si inconstienta.
Contactul cu Ochii	Cauzeaza iritarea severa a ochilor care poate distruge tesutul.
Contact cu Pielea	Poate cauza iritarea pielii. Poate fi absorbit prin piele si produce efecte similare cu cele cauzate prin inhalare si/sau inghitire. Poate cauza o reactie alergica a pielii.
Inghitire	Poate fi fatal sau cauza orbire daca este inghitit. Poate cauza depresia sistemului nervos central incluzand dureri de cap, ameteala, somnolenta, slabiciune musculara, lipsa de coordonare, timp de reactie incetinit, vedere incetosata, vorbire incoerenta, vartej, tremor si convulsii. Poate cauza leziuni ale ficatului si rinichilor.

Efecte Cronice/Carcinogenicitate Expunerea prelungita sau repetata poate cauza tulburari ale ochilor, sangelui, plamanilor, ficatului, rinichilor, inimii, sistemului nervos central si splinei.

11. INFORMATII TOXICOLOGICE

Evaluarea Sigurantei Chimice

Nu sunt informatii disponibile

Clasificarea substantei sau amestecului

Clasificare conform Directivelor UE 67/548/CEE sau 1999/45/CE.

Pentru textul complet al Frazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

Simbol(uri)**Clasificare**

F - Foarte inflamabil.
T - Toxic.

Fraze de Risc

R20/21/22 Nociv prin inhalare, contact cu pielea si inghitire.
R39/23/24/25 Toxic: pericol de efecte ireversibile foarte serioase prin inhalare, contact cu pielea si inghitire.
R36/37/38 Iritant pentru ochi, sistemul respirator si piele.

Fraze de Siguranta

S7 Pastrati containerul inchis etans.
S16 Tineti departe de surse de aprindere - Fumatul interzis.
S26 In cazul contactului cu ochii, clatiti imediat cu apa din abundenta si cereti ingrijiri medicale.
S45 In caz de accident sau daca va simtiti rau, cereti imediat ingrijiri medicale.
S36/37 Purtati imbracaminte de protectie adecvata si manusi.

Consideratii asupra Pericolelor

Poate cauza iritarea ochilor, pielii si cailor respiratorii. Poate cauza dureri de cap, ameteala si alte efecte asupra sistemului nervos central. Poate fi fatal daca este inghitit. Poate cauza orbire. Poate fi absorbit prin piele. Supraexpunerea repetata poate cauza efecte asupra ficatului sau rinichilor. Inflamabil.

16. ALTE INFORMATII**Textul integral al Frazelor R la care se face referire in Sectiunile 2 si 3**

F - Foarte inflamabil.

T - Toxic.

Xn - Nociv.

Xi - Iritant.

R11 Foarte inflamabil.

R22 Nociv prin inghitire.

R23/24/25 Toxic prin inhalare, contact cu pielea si inghitire.

R36/37/38 Iritant pentru ochi, sistemul respirator si piele.

R39/23/24 Toxic: pericol de efecte ireversibile foarte serioase prin inhalare si contact cu pielea.

2. IDENTIFICAREA PERICOLELOR**Clasificarea substantei sau amestecului**

Clasificare conform Directivelor UE 67/548/CEE sau 1999/45/CE.

Pentru textul complet al Fazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

2. IDENTIFICAREA PERICOLELOR

Simbol(uri)

Clasificare

Xi - Iritant.

Fraze de Risc

R36/37/38 Iritant pentru ochi, sistemul respirator si piele.

Fraze de Siguranta

S26 In cazul contactului cu ochii, clatiti imediat cu apa din abundenta si cereti ingrijiri medicale.

S45 In caz de accident sau daca va simtiti rau, cereti imediat ingrijiri medicale.

S1/2 Pastrati sub cheie si departe de accesul copiilor.

S36/37/39 Purtati imbracaminte de protectie adecvata, manusi si protectie pentru ochi/fata.

Consideratii asupra Pericolelor

Poate cauza arsuri ale ochilor, pielii si cailor respiratorii. Poate fi daunator daca este inghitit.

3. COMPOZITIE / INFORMATII DESPRE INGREDIENTE

Substante	EINECS	Numar CAS	Procentul	Clasificare CEE	Clasificarea Substantelor conform UE - CLP	Nr. REACH
Acid clorhidric	231-595-7	7647-01-0	10 - 30%	C; R34 Xi; R37	Skin Corr. 1B (H314) STOT SE 3 (H335)	Nu sunt date disponibile

Pentru textul complet al Frazelor R mentionate in aceasta Sectiune, vezi Sectiunea 16

4. MASURI DE PRIM AJUTOR

Descrierea masurilor de prim ajutor
Inhalare

La inhalare, mutati persoana la aer proaspat. Daca nu respira, faceti respiratie artificiala, de preferat gura-la-gura. Daca respiratia este dificila, administrati oxigen. Cereti asistenta medicala.

Ochi

In caz de contact, sau este suspectat contactul, spalati ochii imediat cu multa apa timp de cel putin 15 minute si cereti ingrijiri medicale imediat dupa spalare.

Piele

In caz de contact, spalati imediat pielea cu mult sapun si apa timp de cel putin 15 minute. Cereti ingrijiri medicale. Scoateti imbracamintea contaminat si spalati-o inainte de refolosire.

Inghitire

Nu induceti voma. Diluati incet cu 1-2 pahare de apa sau lapte si cereti asistenta medicala. Niciodata nu administrati ceva pe gura unei persoane inconstiente.

Cele mai importante simptome si efecte, atat acute cat si intarziate

Poate cauza arsuri ale ochilor, pielii si cailor respiratorii. Poate fi daunator daca este inghitit.

Indicarea oricarei asistente medicale imediate si tratamentul special necesar
Note pentru Medic

Tratati simptomatic

5. MASURI DE STINGERE A INCENDIILOR

Medii de stingere a incendiilor

Mijloace Adecvate de Stingere a Incendiilor

Apa sub forma de ceață, dioxid de carbon, spuma, substanța chimică uscată.

Mijloace de combatere a incendiilor ce nu trebuie folosite, din motive de siguranță.

Nimic cunoscut

Pericole specifice ce deriva din substanța sau amestec

Pericole de Expunere Speciale

Poate forma amestecuri explozive cu baze tari. Descompunerea în foc poate produce gaze toxice. Reacția cu oțelul sau alte anumite metale generează hidrogen gazos inflamabil. Nu permiteți scurgerilor să patrundă în cursurile de apă.

Sfaturi pentru pompieri

Echipament Special de Protecție pentru Pompieri

Echipament complet de protecție și aparat respirator autonom necesar pentru pompieri.

6. MASURI IN CAZ DE SCURGERI ACCIDENTALE

Precauții personale, echipament de protecție și proceduri de urgență

Utilizați echipament de protecție corespunzător.

Vezi Secțiunea 12 pentru informații suplimentare

Precauții legate de mediul inconjurător

Preveniți intrarea în canalizări, canale navigabile sau zone joase.

Metode și materiale pentru izolare și curățare

Izolați deversarea și opriți scurgerea unde este posibil în siguranță. Izolați deversarea cu nisip sau alte materiale inerte. Neutralizați la pH de 6-8. Strângeți și îndepărtați.

Referință la alte secțiuni

Vezi Secțiunea 12 pentru informații suplimentare

7. MANEVRARE SI DEPOZITARE

Măsuri de Precauție pentru Manevrarea în Siguranță

Spălați mâinile după utilizare. Evitați contactul cu ochii, pielea sau îmbrăcămintea. Evitați inspirarea vaporilor. Spălați îmbrăcămintea contaminată înainte de reutilizare

Măsuri de Igienă

Manipulați în concordanță cu bunele practici de igienă și siguranță industrială

Condiții pentru depozitarea în siguranță, incluzând orice incompatibilități

Depozitați departe de substanțe bazice. Depozitați în spații reci, bine aerisite. Pastrati recipientul închis când nu este folosit.

Utilizare(i) finală specifică

COMPANY IDENTIFICATION

NALCO EUROPE B.V.
Postbus 627
2300 AP Leiden, The Netherlands
TEL: 0031 71 5241100

LOCAL COMPANY IDENTIFICATION

Nalco Ltd.
P.O. BOX 11, WINNINGTON AVENUE
NORTHWICH, CHESHIRE, U.K. CW8 4DX
TEL: +44 (0)1606 74488

For Product Safety information please contact: msdseame@nalco.com

1.4 Emergency telephone number: +32-(0)3-575-5555 Trans-European

Date of Compilation/Revision: 02.05.2016
Version Number: 1.1

Section: 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Flammable liquid, Category 2	H225
Acute toxicity, Category 3	H331
Acute toxicity, Category 3	H311
Acute toxicity, Category 3	H301
Specific target organ toxicity - single exposure, Category 1	H370

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal Word : Danger

Hazard Statements : H225 Highly flammable liquid and vapour.
H331 Toxic if inhaled.

METHANOL

H311 Toxic in contact with skin.
H301 Toxic if swallowed.
H370 Causes damage to organs.

Supplemental Hazard Statements : EUH031 Contact with acids liberates toxic gas.

Precautionary Statements : **Prevention:**
P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
P260 Do not breathe dust/fume/gas/mist/vapours/spray.
Response:
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
Storage:
P405 Store locked up.

2.3 Other hazards

None known.

Section: 3. COMPOSITION/INFORMATION ON INGREDIENTS**3.1 Substances**

Chemical Name	CAS-No. EC-No. REACH No.	Concentration: [%]
Methanol	67-56-1 200-659-6 01-2119433307-44	90 - 100

Section: 4. FIRST AID MEASURES**4.1 Description of first aid measures**

If inhaled : Remove to fresh air.
Treat symptomatically.
Get medical attention immediately.

In case of skin contact : Wash off immediately with plenty of water for at least 15 minutes.
Use a mild soap if available.
Wash clothing before reuse.
Thoroughly clean shoes before reuse.
Get medical attention.

In case of eye contact : Rinse with plenty of water.
Get medical attention if symptoms occur.

If swallowed : Rinse mouth with water.

METHANOL

Do NOT induce vomiting.
Never give anything by mouth to an unconscious person.
Get medical attention immediately.

Protection of first-aiders : In event of emergency assess the danger before taking action.
Do not put yourself at risk of injury. If in doubt, contact emergency responders. Use personal protective equipment as required.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

Section: 5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media : Foam
Carbon dioxide
Dry powder
Other extinguishing agent suitable for Class B fires
For large fires, use water spray or fog, thoroughly drenching the burning material.

Unsuitable extinguishing media : Do NOT use water jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : Fire Hazard
Keep away from heat and sources of ignition.
Flash back possible over considerable distance.
Exposure to decomposition products may be a hazard to health.
Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

Hazardous combustion products : Decomposition products may include the following materials:
Carbon oxides

5.3 Advice for firefighters

Special protective equipment for firefighters : Use personal protective equipment.

Further information : Use water spray to cool unopened containers. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section: 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel : Ensure adequate ventilation.
Remove all sources of ignition.

METHANOL

Keep people away from and upwind of spill/leak.
Avoid inhalation, ingestion and contact with skin and eyes.
When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
Ensure clean-up is conducted by trained personnel only.
Refer to protective measures listed in sections 7 and 8.

Advice for emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

6.2 Environmental precautions

Environmental precautions : Do not allow contact with soil, surface or ground water.

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up : Eliminate all ignition sources if safe to do so.
Stop leak if safe to do so.
Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Flush away traces with water.
For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

6.4 Reference to other sections

See Section 1 for emergency contact information.
For personal protection see section 8.
See Section 13 for additional waste treatment information.

Section: 7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling : Open drum carefully as content may be under pressure. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Do not ingest. Keep away from fire, sparks and heated surfaces. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling. Use only with adequate ventilation.

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep away from heat and sources of ignition. Keep in a cool, well-ventilated place. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers.

METHANOL

Suitable material : The following compatibility data is suggested based on similar product data and/or industry experience: HDPE (high density polyethylene), Natural rubber, Carbon Steel C1018, Stainless Steel 304, Stainless Steel 316L

Unsuitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Aluminum

7.3 Specific end uses

Specific use(s) : SOLVENT

Section: 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**8.1 Control parameters**

Exposure guidelines have not been established for this product. However there may be exposure limits for the substance(s) for your country listed below.

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Methanol	67-56-1	TWA	200 ppm 266 mg/m ³	UKCOSSTD
		STEL	250 ppm 333 mg/m ³	UKCOSSTD

DNEL

Methanol	:	End Use: Workers Exposure routes: Dermal Potential health effects: short-term - systemic 40 mg/kg
		End Use: Workers Exposure routes: Dermal Potential health effects: Acute systemic effects Value: 40 mg/cm ²
		End Use: Workers Exposure routes: Inhalation Potential health effects: Acute systemic effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Inhalation Potential health effects: Acute local effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Dermal Potential health effects: Long-term systemic effects Value: 40 mg/cm ²
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term local effects Value: 260 mg/m ³

METHANOL

--	--	--

PNEC

Methanol	:	Fresh water Value: 154 mg/l
		Marine water Value: 15.4 mg/l
		Intermittent use/release Value: 1540 mg/l
		Sediment Value: 570.4 mg/kg
		Soil Value: 23.5 mg/kg
		Sewage treatment plant Value: 100 mg/l

8.2 Exposure controls**Appropriate engineering controls**

Effective exhaust ventilation system.

Maintain air concentrations below occupational exposure standards.

Individual protection measures

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

Eye/face protection (EN 166) : Safety goggles
Face-shield

Hand protection (EN 374) : Recommended preventive skin protection
Gloves
Viton
butyl-rubber
Breakthrough time: 1 – 4 hours
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection (EN 14605) : Wear suitable protective clothing.

Respiratory protection (EN 143, 14387) : When respiratory risks cannot be avoided or sufficiently limited by technical means of collective protection or by measures, methods or procedures of work organization, consider the use of certified respiratory protection equipment meeting EU requirements (89/656/EEC, 89/686/EEC), or equivalent, with filter type:AX

Environmental exposure controls

General advice : Consider the provision of containment around storage vessels.

METHANOL**Section: 9. PHYSICAL AND CHEMICAL PROPERTIES****9.1 Information on basic physical and chemical properties**

Appearance	: Liquid
Colour	: Colorless Clear
Odour	: Alcoholic
Flash point	: 14 °C Method: ASTM D 1310, open cup
pH	: no data available
Odour Threshold	: no data available
Melting point/freezing point	: FREEZING POINT: -23 °C, <
Initial boiling point and boiling range	: 64 °C (760 mm Hg) Method: ASTM D 86
Evaporation rate	: 5.9 (ether = 1)
Flammability (solid, gas)	: no data available
Upper explosion limit	: 36 V%
Lower explosion limit	: 7.3 V%
Vapour pressure	: 97 mm Hg (16 °C)
Relative vapour density	: 1.1 (Air = 1)
Relative density	: 0.79 (16 °C) ASTM D-1298
Density	: 0.79 g/cm ³
Solubility(ies)	
Water solubility	: completely soluble
Solubility in other solvents	: no data available
Partition coefficient: n-octanol/water	: no data available
Auto-ignition temperature	: 464 °C
Thermal decomposition temperature	: no data available
Viscosity	
Viscosity, dynamic	: 0.6 mPa.s (20 °C)
Viscosity, kinematic	: no data available
Explosive properties	: no data available
Oxidizing properties	: no data available

METHANOL

9.2 Other information

no data available

Section: 10. STABILITY AND REACTIVITY

10.1 Reactivity

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

10.5 Incompatible materials

Materials to avoid : Strong oxidizing agents
Strong acids
Alkali metals

10.6 Hazardous decomposition products

Hazardous decomposition products : Decomposition products may include the following materials:
Carbon oxides

Section: 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Information on likely routes of exposure : Inhalation, Eye contact, Skin contact

Toxicity

Product

Acute oral toxicity : There is no data available for this product.
Acute inhalation toxicity : There is no data available for this product.
Acute dermal toxicity : There is no data available for this product.
Skin corrosion/irritation : There is no data available for this product.

Serious eye damage/eye irritation : Result: Mild eye irritation

Respiratory or skin sensitization : There is no data available for this product.

Carcinogenicity : No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible

METHANOL

or confirmed human carcinogen by IARC.

Reproductive effects : No toxicity to reproduction
Germ cell mutagenicity : Contains no ingredient listed as a mutagen
Teratogenicity : There is no data available for this product.
STOT - single exposure : Causes damage to organs.
STOT - repeated exposure : There is no data available for this product.
Aspiration toxicity : No aspiration toxicity classification

Potential Health Effects

Eyes : Health injuries are not known or expected under normal use.
Skin : Toxic in contact with skin.
Ingestion : May cause blindness if swallowed. Toxic if swallowed.
Inhalation : Toxic if inhaled.
Chronic Exposure : Health injuries are not known or expected under normal use.

Experience with human exposure

Eye contact : No information available.
Skin contact : No information available.
Ingestion : No information available.
Inhalation : Respiratory irritation, Cough
Further information : no data available

Section: 12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity

Product

Environmental Effects : This product has no known ecotoxicological effects.
Environmental Effects - Acute aquatic toxicity Assessment : This product has no known ecotoxicological effects.
Environmental Effects - Chronic aquatic toxicity Assessment : This product has no known ecotoxicological effects.
Toxicity to fish : no data available
Toxicity to daphnia and other : no data available

METHANOL

aquatic invertebrates

Toxicity to algae : no data available

Components

Toxicity to fish : Methanol
96 h LC50: 15,400 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates : Methanol
48 h EC50: > 10,000 mg/l

Components

Toxicity to algae : Methanol
72 h EC50: 22,000 mg/l

Components

Toxicity to bacteria : Methanol
> 1,000 mg/l
Method: OECD Test Guideline 209

Components

Toxicity to fish (Chronic toxicity) : Methanol
8.3 d NOEC: 7,900 mg/l

12.2 Persistence and degradability

Product

Biodegradability : The organic portion of this preparation is expected to be readily biodegradable.

Biodegradation Assessment : The organic portion of this preparation is expected to be readily biodegradable.

Components

Biodegradability : Methanol
Result: Readily biodegradable.

12.3 Bioaccumulative potential

Product

Bioaccumulation : This preparation or material is not expected to bioaccumulate.

Components

Bioaccumulation : Methanol
Carp, Exposure time: 72 d, Bioconcentration factor (BCF): 1 - 4.5, Bioaccumulation is unlikely.

12.4 Mobility in soil

Product

METHANOL

The portion in water is expected to be soluble or dispersible.

12.5 Results of PBT and vPvB assessment

Product

Assessment : This substance is not considered to be persistent, bioaccumulating nor toxic (PBT)., This substance is not considered to be very persistent nor very bioaccumulating (vPvB).

12.6 Other adverse effects

No adverse effects expected.

Section: 13. DISPOSAL CONSIDERATIONS

Dispose of in accordance with the European Directives on waste and hazardous waste. Waste codes should be assigned by the user, preferably in discussion with the waste disposal authorities.

13.1 Waste treatment methods

Product : Where possible recycling is preferred to disposal or incineration.
If recycling is not practicable, dispose of in compliance with local regulations.
Dispose of wastes in an approved waste disposal facility.

Contaminated packaging : Dispose of as unused product.
Empty containers should be taken to an approved waste handling site for recycling or disposal.
Do not re-use empty containers.

Guidance for Waste Code selection : 16 03 05*- OFF SPECIFICATION BATCHES AND UNUSED PRODUCTS - Organic wastes containing dangerous substances. If this product is used in any further processes, the final user must redefine and assign the most appropriate European Waste Catalogue Code.

Section: 14. TRANSPORT INFORMATION

The shipper/consignor/sender is responsible to ensure that the packaging, labeling, and markings are in compliance with the selected mode of transport.

Land transport (ADR/ADN/RID)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3, 6.1
14.4 Packing group: II
14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.

Air transport (IATA)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3, 6.1
14.4 Packing group: II

METHANOL

14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.

Sea transport (IMDG/IMO)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3 , 6.1
14.4 Packing group: II
14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

Section: 15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
:

INTERNATIONAL CHEMICAL CONTROL LAWS

CANADA

The substance(s) in this preparation are included in or exempted from the Domestic Substance List (DSL).

UNITED STATES

The substances in this preparation are included on or exempted from the TSCA 8(b) Inventory (40 CFR 710)

NATIONAL REGULATIONS GERMANY

Water contaminating class : WGK 1
(Germany) Classification according VwVwS, Annex 4.

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out.

Section: 16. OTHER INFORMATION

Full text of H-Statements

H225 Highly flammable liquid and vapour.
H301 Toxic if swallowed.
H311 Toxic in contact with skin.
H331 Toxic if inhaled.
H370 Causes damage to organs.

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
Indicarea de pericole specifice pentru om și mediul înconjurător:		
SUBSTANȚA / AMESTECUL ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS07	Irit. Oc. 2 H 319: Provoacă o iritare gravă a ochilor.
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
	Xi - Iritant	R 36: Iritant pentru ochi
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	 GHS07	Irit. Oc. 2 H 319: Provoacă o iritare gravă a ochilor.
Fraze de precauție:	P264: Spălați-vă bine după utilizare. P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței. P337+P313: Dacă iritarea ochilor persistă: consultați medical. P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP)), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:		Xi - Iritant R 36: Iritant pentru ochi
Sfaturi de siguranță::	S 25: Evitați contactul cu ochii. S26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul.	
Eliminarea:	S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos.	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII	
3.1. Proprietăți chimice ale substanței sau amestecului	
Compoziție:	Substanța
Conținut:	În conformitate cu tabelul de mai jos
Formula moleculară:	---
Numărul EC:	---
Numărul CAS:	---
Numărul INDEX:	---
Numărul REACH:	---

**- SODIUM CABONATE – SODA ASH -**

3.2. Componenti periculoși						
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Carbonat de sodiu Sodium Carbonate REACH No. 01- 2119485498- 19-XXXX	497-19-8	207-838-8	100%	Irit. Oc. 2	 GHS07	H319
Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol
Carbonat de sodiu	497-19-8	207-838-8	100%	Xi – Iritant		R36

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Mutați persoana afectată la aer curat. Dacă simptomele persistă, consultați un medic.
După contactul cu pielea:	Se vor scoate imediat hainele contaminate și se va face un duș. Consultați un medic.
După contactul cu ochii:	Clătiți imediat cu multă apă pentru cel puțin 15 de minute și se va solicita ajutor medical imediat.
După înghițire:	Se va clăti gura cu apă. Se va administra pacientului să bea multă apă în cazul în care pacientul este conștient. Sunați imediat medicul dumneavoastră. Nu provocați vomă.
Alte informații:	---
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	N.a.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	---

5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați, urmați instrucțiunile.
Mijloace de stingere corespunzătoare:	Utilizați dioxid de carbon, spumă și pulbere.
Mijloace de stingere necorespunzătoare:	Niciunul
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Se pot emite vapori de monoxid de carbon
Echipamente speciale de stingere a incendiilor	Aparat de respirație și de îmbrăcăminte de protecție
Altele:	N.a.

**- SODIUM CABONATE – SODA ASH -**

6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ		
6.1. Precauții personale, echipament de protecție și proceduri de urgență		
Echipament de protecție:	Purtați echipament de protecție (mănuși, ochelari de protecție și îmbrăcăminte). În cazul în care exista praf din aer adoptati protecție respiratorie	
Proceduri de urgență:	N.a.	
6.2. Precauții pentru mediul înconjurător		
Medii de izolare:	Colectati mecanic. Pentru pulberi fine folosiți un aspirator	
Metode de limitare a poluarii	Eliminati restul de praf folosind jeturi de apă. Evitați formarea de praf. Asigurați ventilație corespunzătoare a zonei afectate	
Informatii suplimentare:	Împiedicați patrunderea produsului in sistemul de canalizare, apele de suprafață, în apele subterane și in zonele învecinate	
7. MANIPULARE ȘI DEPOZITARE		
7.1. Precauții pentru manipularea în condiții de securitate		
Precauții pentru manipulare în condiții de securitate:	Evitați formarea de praf. Asigurați ventilarea adecvată / aspirare la locul de locul de muncă în cazul în care se poate produce praf. Folositi echipament de protecție	
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități		
Condiții de depozitare:	Condiții normale de depozitare fără incompatibilități speciale	
Specificațiile zonei de depozitare:	Depozitați într-un loc uscat si bine ventilat	
Specificațiile recipientilor:	Păstra containerele ermetic închise, la temperatura camerei. Polietilena, plastic + PE	
Incompatibilități:	Depozitați la distanta de agenti de oxidare, acizi, halogeni	
7.3. Utilizare finală specifică:		
Utilizări finale specifice:	Stabilizator de PH si eliminador de calciu pentru fluidele de foraj	
8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Substanța	Carbonat de sodiu CAS No. 497-19-8	
TLV _{Celing} :	---	
TLV _{TWA} :	TWA = 10mg/m ³	
TLV _{STEL} :	---	
Limita biologică:	---	
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Asigirati ventilație adecvata
8.2.2. Măsuri de protecție individuală, precum echipamentul de protecție personală.		Ventilație recomandată
Protecția individuală	Respiratorie:	Folosiți protecție respiratorie adecvată
	Ochi	Ochelari de protecție cu ecrane laterale
	Maini	Purtați mănuși de protecție, PVC
	Corp	Echipament de protectie individual
8.3. Controlul expunerii mediului		
Variante de expunere	---	

**- SODIUM CABONATE – SODA ASH -**

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Pulbere cristalină
Aspect:	Solid
Culoare:	Alb, incolor
Miros:	Inodor
Prag olfactiv:	Nu este disponibil
9.2. Informații pentru sănătate, siguranță și mediu	
pH (100 g/l) la 25 °C:	11,4
Punct de topire:	851°C
Punct de fierbere:	N.a.
Temperatura de descompunere :	N.a.
Punct de aprindere:	N.a.
Inflamabilitate (solid, gaz):	N.a.
Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Greutate specifică:	500-600 Kg/m ³
Densitatea la 20 °C:	N.a.
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	N.a.
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	212 g/l
Solubilitatea:	N.a.
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea:	N.a.
9.3. Alte informații	
Alte informații:	N.a.
10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	În cazul expunerii la temperaturi ridicate poate produce produse de descompunere periculoase. În general stabil timp de 2 ani atunci când este păstrat la temperaturi care nu depășesc 25 ° C Evitați căldura și umiditatea
10.2. Stabilitate chimică	
Materiale incompatibile:	Acizi tari
Posibilitatea de reacții periculoase:	În condiții normale de utilizare și depozitare nu sunt previzibile reacții periculoase
10.3. Produși de descompunere periculoși	
Alte informații:	Descompunerea termică sau în caz de incendiu poate duce la produse periculoase de descompunere

**- SODIUM CABONATE – SODA ASH -**

11. INFORMAȚII TOXICOLOGICE	
11.1. Toxicitate Acută	
Toxicitatea Substanței	Carbonat de sodiu CAS No. 497-19-8
Toxicitate orală acută:	DL50 (Șobolan): 2800 mg/kg
Toxicitate inhalatorie acută:	CL50 (Șobolan): 2300 mg/m ³
Toxicitate cutanată acută:	DL50 (Iepure): > 2000 mg/kg
11.2. Corozivitate	
Piele:	Nu este iritant
Ochi:	Nu este iritant
11.3. Iritabilitate primară	
Piele:	N.a.
Ochi:	N.a.
11.4. Nocivitate	
Ingestie:	N.a.
Inhalare:	N.a.
11.5. Sensibilitate	
Piele:	N.a.
Ochi:	N.a.
12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Toxicitate în apă:	CL50 (Pești, 96h): 300 mg/l EC50 (Nevertebrate) 48h: 265 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Degradare abiotică:	N.a.
Degradare biologică:	N.a.
12.3. Potenția Bioacumulativ	
Alte informații:	N.a.
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	N.a.
12.6. Alte efecte adverse	
Alte informații:	N.a.
13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Recuperati dacă este posibil. Manipulați în conformitate cu reglementările locale și naționale
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	N.a.
Alte recomandări:	Manipulați în conformitate cu reglementările locale și naționale

**- SODIUM CABONATE – SODA ASH -**

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu este reglementat ca și un material periculos pentru transport.
Norme de transport ONU	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Pericol pentru mediu	N.a.
14.2. Transport Maritim (IMDG)	
Clasa IMDG:	Nu este reglementat ca și un material periculos pentru transport.
Poluant marin:	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Clasa ICAO	Nu este reglementat ca și un material periculos pentru transport.
Clasa IATA	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu este reglementat ca și un material periculos pentru transport.
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	
Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei	
Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)	
Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)	
Regulament (CE) nr.1907/2006 (REACH) Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.	
Reglementări naționale: Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice. Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase. REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase; HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase; REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006. Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008). REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH). Regulament 552/2009 de modificare a anexei XVII din Regulamentul (CE) nr.1907/2006 – REACH privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase HG 735/2006 privind limitarea emisiei de compuși organici volatili. HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

Alte informații

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei

**- SODIUM CABONATE – SODA ASH -**

fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C: Threshold limit value – Ceiling - Valoarea prag limită – maximă

16.4. Alte informații**Fraze de pericol utilizate în secțiunile anterioare**

H 319: Provoacă o iritare gravă a ochilor

R 36: Iritant pentru ochi

Fraze de precauție / siguranța utilizate în secțiunile anterioare

P264: Spălați-vă bine după utilizare.

P280: Purtați mănuși de protecție / îmbracămințe de protecție / echipament de protecție a ochilor / echipament de protecție a feței.

P337+P313: Dacă iritarea ochilor persist: consultați medical.

P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.

P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.

S25: Evitați contactul cu ochii.

S26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul.

S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos.

4. Măsuri de prim ajutor**4.1 Descrierea măsurilor de prim ajutor**

- Dacă se inhalează : Se va avea grijă ca persoana să aibă aer proaspăt.
Este necesară respirație artificială sau oxigen.
Dacă simptomele persistă se va chema un medic.
- În caz de contact cu pielea : În caz de contact se va clăti imediat pielea cu multă apă.
Se vor scoate hainele și încălțăminte contaminată.
Se va chema un medic dacă iritația crește sau persistă.
- În caz de contact cu ochii : Se vor clăti imediat ochii timp de cel puțin 15 minute. Se va da asistență medicală.
Se va îndepăra lentila de contact.
- Dacă este ingerat : Niciodată nu se va încerca să se forțeze o persoană inconștientă să înghită.
Se va curăța gura cu apă și se va bea apoi multă apă.
NU se va induce stare de vomă.
Se va chema un medic.
În caz de apariție a vomei, capul trebuie ținut în jos, pentru ca voma să nu pătrundă în plămâni.

4.2 Cele mai importante simptome și efecte, atât acute, cât și întârziate

- Riscuri : Dacă vă simțiți rău, consultați un medic (îi arătați dacă este posibil eticheta).

4.3 Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare

Defoamer AF340

Revizia (data):: 01.08.2013

Data tipăririi 30.04.2014

Tratament : Nu s-au făcut recomandări, dar primul ajutor poate fi totuși necesar în cazul expunerii, inhalării sau ingestiei accidentale la acest agent chimic. Dacă aveți îndoieli, SOLICITAȚI IMEDIAT ASISTENȚA MEDICALĂ!

5. Măsurile de combatere a incendiilor**5.1 Mijloace de stingere a incendiilor**

Mijloace de stingere corespunzătoare : Se vor folosi metode de stingere adecvate condițiilor locale și mediului înconjurător.
Spumă rezistentă la alcool
Bioxid de carbon (CO₂)
Produs chimic uscat
Spumă ce formează un film apos (AFFF).

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Riscuri specifice în timpul luptei împotriva incendiilor : Inflamabil sau combustibil, poate fi aprins de căldură, scântei sau flăcări.

Produse de descompunere periculoase : În caz de incendiu se pot forma produse de descompunere periculoase, cum ar fi:
Oxizi de carbon.

5.3 Recomandări destinate pompierilor

echipamentelor speciale de protecție pentru pompieri : Se va folosi echipament de protecție individual.
În cazul unui incendiu, se va purta un aparat respirator autonom.

Informații suplimentare : În cazul unui incendiu și/sau explozie nu se va inhala fumul.
Se va sta într-un loc situat împotriva vântului/ se va sta la distanță de sursă. Jetul de apă poate fi folosit pentru a răci containerele nedeschise. Se va evita ca apa de extincție contaminată să intre în sistemul de canalizare și în apele curgătoare.

6. Măsurile de luat în caz de dispersie accidentală**6.1 Precauții personale, echipament de protecție și proceduri de urgență**

Măsurile de precauție pentru protecția personală : A se vedea măsurile de protecție din capitolele 7 și 8.
Se va asigura ventilație adecvată.
Se va folosi protecția respiratorie indicată în caz că limita de expunere profesională este depășită și/sau în caz de eliberare de produs (praf).
Se va evita inhalarea, ingerarea și contactul cu pielea și ochii.
Se va îndepărta orice sursă de aprindere.

6.2 Precauții pentru mediul înconjurător

Precauții pentru mediul înconjurător : Nu se va permite să intre în contact cu solul, apele de suprafață sau freatice.

6.3 Metode și material pentru izolarea incendiilor și pentru curățenie

Metodele de curățare : Opriti scurgerea, dacă acest lucru se poate face în siguranță.
Eliminați toate sursele de aprindere, dacă acest lucru se poate face în siguranță.
Se va strânge și se va colecta materialul împrăștiat cu ajutorul

Defoamer AF340

Ver: 1.0

Revizia (data):: 01.08.2013

Data tipăririi 30.04.2014

unui material absorbant necombustibil, (spre exemplu nisip, pământ, kieselgur, vermiculit) și va fi depozitat într-un container pentru eliminare conform cu reglementările locale-naționale în vigoare (a se vedea capitolul 13).
Se va culege și se va transfera în containere etichetate corespunzător.
Nu se va deversa în apele de suprafață sau în sistemul de canalizare.

6.4 Trimiteri către alte secțiuni

Pentru protecția individuală a se vedea paragraful 8.
A se vedea secțiunea 13 pentru informații despre eliminarea deșeurilor.

7. Manipularea și depozitarea**7.1 Precauții pentru manipularea în condiții de securitate**

Sfaturi de manipulare în condiții de securitate : Se va evita inhalarea, ingerarea și contactul cu pielea și ochii.
Se va folosi numai cu o ventilație adecvată/protecție personală adecvată.
În cazul unei ventilații insuficiente, a se purta un echipament de respirație corespunzător.
Se va verifica faptul că locurile de spălare a ochilor și dușurile de protecție sunt amplasate în apropierea locului de muncă.
Fumatul, mâncatul și băutul sunt interzise în spațiul de utilizare.

Măsurile de protecție împotriva incendiului și a exploziei : Se va ține departe de flăcări neprotejate, suprafețe fierbinți sau surse de aprindere.
Se vor lua măsurile necesare pentru a evita descărcările statice de electricitate (ce pot provoca aprinderea vaporilor organici).
Se va folosi numai echipament antideflagrant.

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Cerințe pentru spațiile de depozitare și containere : Se va păstra containerul ermetic închis, într-un loc uscat și bine ventilat.

7.3 Utilizare finală specifică (utilizări finale specifice)

Utilizările identificate ale acestui produs sunt menționate la Secțiunea 1.2.

8. Controale ale expunerii/ protecția personală**8.1 Parametri de control**

Componente	Nr. CAS	Tipul valorii	Parametri de control	Adus la zi	Bază
*** Common Name Missing ***	63148-62-9	TWA	60 mg/m3	2006-10-13	RO OEL
		STEL	80 mg/m3	2006-10-13	RO OEL

Măsuri de ordin tehnic

Sistem de ventilație de evacuare eficient

Echipamentul individual de protecție

- Protecția respirației : În cazul unei ventilații insuficiente, a se purta un echipament de respirație corespunzător.
Aparat respirator cu filtru pentru vapori organici
- Protecția mâinilor : Purtați mănuși de protecție.
Mănuși din neopren.
Vă rugăm să respectați instrucțiunile referitoare la permeabilitatea și timpul de străpungere ce sunt furnizate de către fabricantul de mănuși. Se vor lua de asemenea în considerație condițiile locale specifice în care produsul este folosit, cum ar fi pericolul de tăiere, erodare, precum și timpul de contact.
Timpul de penetrare prin mănușă nu este determinat pentru acest produs. Se vor schimba des mănușile.
Se va folosi o cremă protectoare foarte grasă după curățarea pielii.
- Protecția ochilor : Ochelari de protecție cu ecrane laterale.
Ochelari de protecție.
- Protecția pielii și a corpului : Îmbrăcămintă de protecție.
- Măsuri de igienă : Se va evita contactul cu pielea, ochii și îmbrăcămintea.
Se vor spăla mâinile înainte de pauze și la sfârșitul programului de lucru.
Se vor spăla mâinile înainte de a mânca, bea sau fuma.
Se va manipula conform normelor de igienă industriale și a normelor de securitate.

Controlul expunerii mediului

- Indicații generale : Nu se va permite să intre în contact cu contact cu solul, apele de suprafață sau freatice.

9. Proprietățile fizice și chimice**9.1 Informații privind proprietățile fizice și chimice de bază**

- Aspect : lichid
- Culoare : Transparent.
- Miros : nedeterminat
- Pragul de acceptare a mirosului : nedeterminat
- pH : 6 - 8
- unctul de topire : nedeterminat
- Punctul de fierbere : nedeterminat
- Punctul de aprindere : ca. 71 °C, Pensky-Martens.
- Viteza de evaporare : nedeterminat
- Inflamabilitatea (solid, gaz) : nedeterminat

Data tipăririi 30.04.2014

Limită inferioară de explozie	: < 0,01 %(V)
Limită superioară de explozie	: 7 %(V)
Presiunea de vapori	: < 0,1 hPa, 20 °C
Densitatea de vapori relativă	: ca. 1, Air = 1
Densitatea relativă	: 0,8 - 0,83, 20 °C
Solubilitatea	: ulei
Coeficientul de partiție: n-octanol/apă	: log Pow: > 3
Temperatura de autoaprindere	: ca. 230 °C
Descompunere termică	: nedeterminat
Vâscozitate dinamică	: < 25 mPa.s, 20 °C
Vâscozitate cinematică	: nedeterminat
Proprietăți explozive	: nu se aplică
Proprietăți oxidante	: nedeterminat

9.2 Alte informații

Punct de curgere	: < -22 °C
------------------	------------

10. Stabilitate și reactivitate

10.1 Reactivitate

Nu se conoaște nici o reacție periculoasă în condiții normale de folosire.

10.2 Stabilitate chimică

Stabil în condiții normale.

10.3 Posibilitatea de reacții periculoase

Reacții potențial periculoase	: Irelevant
-------------------------------	-------------

10.4 Condiții de evitat

Condiții de evitat	: Căldură, flăcări și scântei.
--------------------	--------------------------------

10.5 Materiale incompatibile

Materiale de evitat	: Acizi tari. Baze tari. Agenți oxidanți puternici.
---------------------	---

10.6 Produși de descompunere periculoși

Produși de descompunere periculoși	: În caz de incendiu se pot forma produși de descompunere periculoși, cum ar fi: Oxizi de carbon.
------------------------------------	--

11. Informații toxicologice

11.1 Informații privind efectele toxicologice

Informații suplimentare	: nu există date
-------------------------	------------------

Defoamer AF340

Componente:**Hydrotreated light distillates :**

Toxicitate acută orală : LD50: > 15.000 mg/kg, șobolan

Informații suplimentare : Afecțiunile deja existente ale pielii pot fi agravate prin supraexpunerea la acest produs.

12. Informații ecologice**12.1 Toxicitate****Produs:**

Toxicitate pentru pești : nu există date

12.2 Persistență și degradabilitate**Produs:**

Biodegradare : Difícil biodegradabil.

Eliminare fizico-chimică : Acest produs este insolubil și plutește pe apă.

12.3 Potențial de bioacumulare**Produs:**

Biocumulare : nu există date

12.4 Mobilitate în sol

nu există date

12.5 Rezultatele evaluării PBT și vPvB

Neclasificată cirept PBTNPVB dup criteriile UE actuale.

12.6 Alte efecte adverse**Produs:**

Informații ecologice adiționale : nu se aplică

13. Considerații privind eliminarea**13.1 Metode de tratare a deșeurilor**

Produs : În cazul în care este posibilă reciclarea, aceasta este preferată eliminării sau incinerării.
Dacă reciclarea nu este posibilă, se va elimina în conformitate cu reglementările locale.
Codul deșeurilor trebuie atribuit de către utilizator, de preferat în acord cu autoritățile responsabile pentru eliminarea deșeurilor.

COMENTARII PRIVIND COMPOZIȚIA

Datele sunt prezentate conform cu ultimele directive ale CE. This product is not allowed for use in North Sea

4 MĂSURI DE PRIM AJUTOR

INHALARE

Mutați imediat persoana expusă la aer. Dacă există probleme de respirație, asigurați respirația artificială/oxigen. Solicitați asistență medicală dacă orice stare de disconfort persistă.

INGERARE

NU INDUCEȚI VOMA! Dați imediat de băut câteva pahare de apă sau lapte dacă victima este complet conștientă. Nu dați nimic de băut victimei dacă este în stare de inconștiență. În caz de vomă, mențineți capul sub nivelul trunchiului astfel încât conținutul stomacului să nu pătrundă în plămâni. Solicitați asistență medicală.

CONTACT CU PIELEA

Îndepărtați imediat îmbrăcămintea contaminată și spălați pielea cu apă și săpun. Solicitați imediat asistență medicală dacă simptomele apar după spălare.

CONTACTUL CU OCHII

Asigurați-vă că ați îndepărtat lentilele de contact din ochi înainte clătire. Spălați imediat ochii cu multă apă în timp ce ridicați pleoapele. Continuați să clătiți pentru cel puțin 15 minute. Solicitați asistență medicală dacă orice stare de disconfort persistă.

5 MĂSURI DE STINGERE A INCENDIILOR

MIJLOACE DE STINGERE A INCENDIILOR

Jet de apă pulverizată, pulbere uscată sau dioxid de carbon. Nu folosiți jetul de apă drept material de stingere pentru că acesta va extinde focul.

EB-8796**PROCEDURI SPECIALE DE URMAT ÎN CAZ DE INCENDIU**

Containerele aflate în apropierea focului trebuie îndepărtate imediat și răcite cu apă. Păstrați apa scursă din sistemul de canalizare și din surse de apă. Îndiguiți pentru a asigura controlul apei.

PERICOLELE SPECIALE

Incendiul sau temperaturile ridicate duc la: Monoxid de carbon (CO). Dioxid de carbon (CO₂).

ECHIPAMENTUL DE PROTECȚIE ÎN CAZ DE INCENDIU:

În caz de incendiu folosiți aparate de respirat independente și îmbrăcăminte de protecție completă.

6 MĂSURI ÎN CAZUL PIERDERILOR ACCIDENTALE**MĂSURILE DE PRECAUȚIE PERSONALE**

Evitați contactul cu pielea și ochii. Evitați inhalarea de vapori și aerosoli pulverizați. Purtați îmbrăcăminte de protecție precum este descris în secțiunea 8 din fișa tehnică de securitate.

MĂSURILE DE PRECAUȚIE PENTRU MEDIU

Nu permiteți NICI o contaminare a mediului înconjurător. Nu deversați în sistemele de canalizare, cursurile de apă sau în pământ. Scurgerile sau deversările necontrolate în apele curgătoare trebuie anunțate IMEDIAT Agenției pentru Mediu sau altor organisme abilitate.

METODELE DE CURĂȚARE

Stingeți toate sursele de combustie. Evitați scânteele, flăcările, căldura și fumatul. Ventilați. Absorbiți în vermiculită, nisip uscat sau pământ și depozitați în containere. Colectați materialul deversat în containere, sigilați bine și trimiteți pentru evacuare în conformitate cu reglementările locale.

7 MANIPULARE ȘI DEPOZITARE**MĂSURI DE PRECAUȚIE LA UTILIZARE**

EVITAȚI ORICE FEL DE CONTACT! Evitați inhalarea de vapori și aburi de pulverizare. Evitați scurgerile, contactul cu pielea și cu ochii.

MĂSURI DE PRECAUȚIE LA DEPOZITARE

Depozitați în containerul original bine închis, într-un loc uscat, răcoros și bine ventilat. Evitați contactul cu agenți oxidanți. A se feri de căldură, scântei și flacără deschisă. A se proteja de lumină, inclusiv de acțiunea directă a razelor soarelui.

8 CONTROLUL EXPUNERII/PROTECȚIE PERSONALĂ

Denumire	STD	8 ore		Termen Scurt - 15 Min		Observații
1,2,4-TRIMETHYLBENZENE		20 ppm	100 mg/m ³			
NAPHTHALENE		9,5 ppm	50 mg/m ³			

ECHIPAMENT DE PROTECȚIE**MĂSURI TEHNICE**

Asigurați ventilație locală sau generală pentru o evacuare adecvată.

PROTECȚIA RESPIRAȚIEI

Se recomandă folosirea echipamentului de respirație cu filtru combinat de tip A2/P2. Container cu gaz (gaze acide). La lucrul în spații închise sau prost ventilate, trebuie folosită protecția respiratorie cu aducție de aer.

PROTECȚIA MĂINILOR

Folosiți mănuși de protecție confecționate din: Nitril. Se va avea în vedere faptul că lichidul poate penetra mănușile. Se recomandă schimbarea frecventă.

PROTECȚIA OCHILOR

Purtați ochelari de protecție ficși, omologați, dacă există probabilitate de împrăscare.

ALTE MĂSURI DE PROTECȚIE

Purtați îmbrăcăminte corespunzătoare pentru a preveni orice posibilitate de contact cu pielea. Asigurați facilități pentru spălarea ochilor și dușuri de siguranță.

MĂSURI DE IGIENĂ

Îndepărtați imediat orice îmbrăcăminte care se udă sau se contaminează. Schimbați zilnic îmbrăcăminte de lucru dacă există orice posibilitate de contaminare. Spălați-vă pe mâini după manipulare. Spălați-vă la sfârșitul fiecărei ture și înainte de a mânca, fuma sau utiliza toaleta.

9 PROPRIETĂȚI FIZICE ȘI CHIMICE

EB-8796

ASPECT	Lichid clar
CULOAREA	Maro deschis
MIROS	hidrocarburi aromatice
SOLUBILITATEA	Insolubil în apă
DENSITATEA RELATIVĂ	0,923 g/ml 20 °C
VÂSCOZITATEA	5 - 25 cps 20 °C
PUNCTUL DE APRINDERE (°C)	66 °C RI (recipient închis)

10 STABILITATE ȘI REACTIVITATE**STABILITATE**

Stabil în condiții de temperatură normală și utilizare conform recomandărilor.

CONDIȚII DE EVITAT

Evitați căldura, flăcările și alte surse de combustie. Evitați expunerea la temperaturi ridicate sau la lumina solară directă.

MATERIALE DE EVITAT

Substanțe puternic oxidante.

11 INFORMAȚII TOXICOLOGICE**INHALARE**

Inhalarea vaporilor poate provoca somnolență și amețeală.

INGERARE

Nociv: poate provoca leziuni pulmonare prin înghițire. Dacă materialul vomat conținând solvenți ajunge în plămâni, poate provoca pneumonie.

CONTACT CU PIELEA

Expunerea repetată poate provoca uscarea sau crăparea pielii. Acționează ca agent degresiv asupra pielii. Poate provoca fisurarea pielii și eczeme.

CONTACTUL CU OCHII

Iritant pentru ochi. Pulverizarea și vaporii în ochi pot provoca iritare și senzații de usturime.

ALTE EFECTE ASUPRA SĂNĂTĂȚII

Carcinogen Categoria 3. Risc potențial de cancer.

CALEA DE INTRARE

Inhalare: Ingerare. Contact cu pielea și/sau ochii.

12 INFORMAȚII ECOLOGICE**ECOTOXICITATEA**

Toxic pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic.

MOBILITATEA

Produsul este insolubil în apă și se va împrăști pe suprafața apei.

POTENȚIALUL BIOACUMULATOR

Produsul conține substanțe potențial bio-acumulante.

DEGRADABILITATEA

Produsul este biodegradabil.

13 CONSIDERAȚII PRIVIND ELIMINAREA**METODE DE ELIMINARE**

Recuperați sau reciclați, dacă este util. Evacuarea deșeurilor se face în conformitate cu cerințele autorităților locale.

CLASA DE REZIDUURI

Codul European definitiv pentru acest produs depinde de utilizarea finală a acestuia. Cod EWC: 07 01 04. Deșeu cu numărul: 7152. Deșeu organic fără halogen.

14 INFORMAȚII PRIVIND TRANSPORTUL

R36	Iritant pentru ochi.
R22	Nociv prin înghițire.
R65	Nociv: poate provoca afecțiuni pulmonare prin înghițire.
R40	Posibil efect cancerigen, dovezi insuficiente.
R51/53	Toxic pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic.

DECLARAȚIE

Fișa tehnică de securitate se distribuie independent de vânzarea produsului. Deși s-au depus toate eforturile pentru descrierea cât mai corectă a acestui produs, anumite date au fost obținute din surse dincolo de supravegherea noastră directă. Nu putem face afirmații categorice privind certitudinea sau deplinătatea acesteea; prin urmare, clientul o poate consulta pe propria răspundere. Nu s-a făcut nici un efort pentru a cenzura sau ascunde aspectele nefavorabile legate de acest produs. Deoarece nu putem anticipa sau controla condițiile în care acest produs poate fi utilizat, nu aducem nici o garanție că măsurile de precauție pe care le-am sugerat vor fi adecvate pentru toate persoanele și/sau toate situațiile. Este de datoria fiecărui utilizator al acestui produs să respecte prevederile legilor aplicabile privind folosirea și eliminarea acestui produs. Se pot oferi informații suplimentare, la cerere, pentru a veni în ajutorul utilizatorului; totuși, nu oferim garanție exprimată sau implicită și nici nu ne luăm vreo responsabilitate legată de acest produs sau datele incluse aici.

FISA CU DATE DE SECURITATE

in conformitate cu Regulamentul (CE) Nr. 453/2010

DFS-XFL

Data Reviziei: 23-sep.-2015

Numarul Reviziei: 2

SECTIUNEA 1: Identificarea substantei/amestecului si a societatii/intreprinderii

1.1. Element de Identificare a Produsului

Product Name DFS-XFL
Cod de identificare interna HM008124

1.2. Utilizari relevante identificate ale substantei sau amestecului si utilizari contraindicate

Utilizari Recomandate Aditiv
Sector de utilizare SU2 - Minerit (inclusiv exploatare maritima)
Categorii de proces PROC4 - Utilizare in proces discontinuu si alte procese (sinteze) in care apare posibilitatea expunerii
PROC8b - Transfer de substanta sau preparate (incarcare/descarcare) din/in vase recipiente/mari in cadrul unitatilor specializate
PROC15 - Utilizare ca reactiv de laborator

Categorie/categorii de eliberare în mediul înconjurător ERC2 - Formularea preparatelor (amestecuri) ERC4 - Utilizarea industrială a auxiliarelor de procesare în cadrul proceselor si produselor, care nu devin componente ale articolelor ERC6a - Utilizare industrială ce are ca rezultat fabricarea altei substante (utilizarea intermediarilor) ERC6b - Utilizarea industrială a auxiliarelor de procesare reactive ERC6d - Utilizarea industrială a regulatorilor de proces pentru procesele de polimerizare din productia rasinilor, cauciucurilor si polimerilor

1.3. Detalii privind furnizorul fisei cu date de securitate

Halliburton Energy Services
Halliburton House, Howemoss Place
Kirkhill Industrial Estate
Dyce
Aberdeen, AB21 0GN
Marea Britanie

www.halliburton.com

SECTIUNEA 2: Identificarea pericolelor

2.1. Clasificarea substantei sau a amestecului Regulamentul (CE) nr. 1272/2008

Lezarea grava/iritarea ochilor	Categoria 2 - H319
--------------------------------	--------------------

2.2. Elemente pentru eticheta

Pictograme de pericol

Cuvant de Semnal

Avertisment

Fraze de Pericol

H319 - Provoaca o iritare grava a ochilor

Propozitii de Atentionare

P264 - Spalati bine fata, manile si orice piele expusa dupa manipulare

P280 - Purtati manusi de protectie/imbracaminte de protectie/protectie pentru ochi/protectie pentru fata

P305 + P351 + P338 - LA CONTACT CU OCHII: Clatiti cu atentie cu apa timp de mai multe minute. Scoateti lentilele de contact, daca exista si este usor de facut. Continuati clatirea.

P337 + P313 - Daca iritatiea ochilor persista: Cereti asistenta/ingrijiri medicale

Contine

Substante

Persulfat de sodiu

Clorura de calciu, dihidrat

Tiosulfat de sodiu

Numar CAS

7775-27-1

10035-04-8

7772-98-7

2.3. Alte pericole

Acest amestec nu contine nicio substanta considerata a fi persistenta, bioacumulatoare, nici toxica (PBT).

Acest amestec nu contine nicio substanta considerata a fi foarte persistenta, nici foarte bioacumulatoare (vPvB).

SECTIUNEA 3: Compozitie/informatii privind componentii

3.2. Amestecuri

Amestec

Substante	EINECS	Numar CAS	Procentul	Clasificarea Substantelor conform UE - CLP	Nr. înreg. REACH
Persulfat de sodiu	231-892-1	7775-27-1	0.1 - 1%	Acute Tox. 4 (H302) Skin Irrit. 2 (H315) Eye Irrit. 2 (H319) Resp. Sens. 1 (H334) Skin Sens. 1 (H317) STOT SE 3 (H335) Ox. Sol. 3 (H272)	01-2119495975-15
Clorura de calciu, dihidrat	233-140-8	10035-04-8	30 - 60%	Eye Irrit. 2 (H319)	01-2119494219-28
Tiosulfat de sodiu	231-867-5	7772-98-7	1 - 5%	Nu este cazul	Nu exista date disponibile

Pentru textul complet al Frazelor H mentionate in aceasta Sectiune, vezi Sectiunea 16

SECTIUNEA 4: Masuri de prim ajutor

4.1. Descrierea masurilor de prim ajutor

Inhalare	La inhalare, mutati persoana la aer proaspat. Cereti asistenta medicala daca apare iritatie respiratorie sau respiratia devine dificila.
Ochi	In caz de contact, spalati ochii imediat cu multa apa timp de cel putin 15 minute si cereti ingrijiri medicale daca iritatie persista.
Piele	Spalati cu sapun si apa.
Inghitire	In conditii normale, nu sunt necesare procedurile de prim ajutor.

4.2. Cele mai importante simptome si efecte, atât acute cât si întârziate

Cauzeaza iritarea ochilor.

4.3. Indicatii privind orice fel de asistenta medicala imediata si tratamentele speciale necesare

Indicatii pentru medici Se va trata simptomatologic

SECTIUNEA 5: Masuri de combatere a incendiilor**5.1. Mijloace de stingere a incendiilor****Mijloace Adecvate de Stingere a Incendiilor**

Toate mijloacele standard de stingere a incendiilor

Mijloace de combatere a incendiilor ce nu trebuie folosite, din motive de siguranta.

Nimic cunoscut

5.2. Pericole speciale cauzate de substanta sau amestecul în cauza**Pericole speciale de expunere în caz de incendiu**

Nu se aplica

5.3. Recomandari destinate pompierilor**Echipament special de protectie pentru pompieri**

Echipament complet de protectie si aparat respirator autonom necesar pentru pompieri.

SECTIUNEA 6: Masuri de luat în caz de dispersie accidentala**6.1. Precautii personale, echipament de protectie si proceduri de urgenta**

Utilizati echipament de protectie corespunzator. Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Consultati Sectiunea 8 pentru informatii suplimentare

6.2. Precautii pentru mediul înconjurator

Preveniti intrarea in canalizari, canale navigabile sau zone joase.

6.3. Metode si material pentru izolarea incendiilor si pentru curatenie

Izolati deversarea si opriti scurgerea unde este posibil in siguranta. Izolati deversarea cu nisip sau alte materiale inerte. Strangeti si indepartati.

6.4. Trimiteri catre alte sectiuni

Consultati Sectiunea 8 si 13 pentru informatii suplimentare

SECTIUNEA 7: Manipularea si depozitarea**7.1. Precautii pentru manipularea în conditii de securitate**

Evitati contactul cu ochii, pielea sau imbracamintea. Evitati inspirarea vaporilor. Asigurati o ventilatie adecvata. Utilizati echipament de protectie corespunzator. Spalati mainile dupa utilizare. Spalati imbracamintea contaminata inainte de reutilizare

Masuri de igiena

Se va manipula conform normelor de igiena industriale si a normelor de securitate

7.2. Conditii de depozitare în conditii de securitate, inclusiv eventuale incompatibilitati

Depozitati departe de agenti oxidanti. Depozitati in spatii reci, bine aerisite. Pastrati recipientul inchis cand nu este folosit. Perioada maxima de stocare a produsului este de 24 luni.

7.3. Utilizare finala specifica (utilizari finale specifice)

Scenariu de expunere Nu exista informatii disponibile

Alte Instructiuni Nu exista informatii disponibile

SECTIUNEA 8: Controale ale expunerii/protectia personala**8.1. Parametri de control****Limite de expunere**

8.2. Controale ale expunerii**Controlul Procesului
Echipament de protectie personala**

Utilizati intr-o zona bine ventilata.

Daca masurile de control tehnic si practicile de lucru nu pot preveni expunerea excesiva, alegerea si utilizarea adecvata a echipamentului de protectie personala ar trebui realizate de catre un igienist industrial sau alt specialist, în functie de aplicatia specifica a acestui produs.

Protectie Respiratorie

In mod normal nu e necesar.

Protectia Mainilor.

Manusi de nitril.

Protectia Pielii	Nu este necesar in mod normal.
Protectia Ochilor	Purtati ochelari de siguranta sau ochelari de protectie impotriva expunerii.
Alte Masuri de Precautie	Nimic cunoscut.

Controlul expunerii mediului Do not allow material to contaminate ground water system

SECTIUNEA 10: Stabilitate si reactivitate

10.1. Reactivitate

Nu se estimeaza ca este reactive.

10.2. Stabilitate chimica

Stabil

10.3. Posibilitatea de reactii periculoase

Nu se va produce

10.4. Conditii de evitat

Nu s-a anticipat nimic.

10.5. Materiale incompatibile

Oxidanti puternici.

10.6. Produsi de descompunere periculosi

Oxizi de azot. Oxizi de fosfor. Monoxid de carbon si dioxid de carbon.

SECTIUNEA 11: Informatii toxicologice

11.1. Informatii privind efectele toxicologice

Toxicitate Acuta

Inhalarea

Poate cauza iritarea cailor respiratorii.

Contactul cu Ochii

Cauzeaza iritarea ochilor.

Contact cu Pielea

Poate cauza iritarea slaba a pielii.

Inghitire

Iritarea gurii, gatului si stomacului.

Efecte Cronice/Carcinogenicitate

Nu sunt date disponibile care sa indice ca produsul sau componentele prezente in concentratie mai mare de 0.1% sunt pericole cronice pentru sanatate.

Date toxicologice pentru componentele

12.2. Persistenta si degradabilitate

Substante	Numar CAS	Persistenta si degradabilitate
Persulfat de sodiu	7775-27-1	The methods for determining biodegradability are not applicable to inorganic substances.
Clorura de calciu, dihidrat	10035-04-8	The methods for determining biodegradability are not applicable to inorganic substances.
Tiosulfat de sodiu	7772-98-7	The methods for determining biodegradability are not applicable to inorganic substances.

12.3. Potential de bioacumulare

Substante	Numar CAS	Log Pow
Persulfat de sodiu	7775-27-1	Nu exista informatii disponibile
Clorura de calciu, dihidrat	10035-04-8	Nu exista informatii disponibile
Tiosulfat de sodiu	7772-98-7	Nu exista informatii disponibile

12.4. Mobilitate în sol

Substante	Numar CAS	Mobilitate în sol
Persulfat de sodiu	7775-27-1	Nu sunt informatii disponibile
Clorura de calciu, dihidrat	10035-04-8	Nu sunt informatii disponibile
Tiosulfat de sodiu	7772-98-7	Nu sunt informatii disponibile

12.5. Rezultatele evaluarii PBT si vPvB

Acest amestec nu contine nicio substanta considerata a fi persistenta, bioacumulatoare, nici toxica (PBT). Acest amestec nu contine nicio substanta considerata a fi foarte persistenta, nici foarte bioacumulatoare (vPvB).

Substante	Evaluare PBT si vPvB
Persulfat de sodiu	Nu se aplica
Clorura de calciu, dihidrat	Nu se aplica
Tiosulfat de sodiu	Nu se aplica

12.6. Alte efecte adverse**Informatii despre Efectele asupra Sistemului Endocrin**

Acest produs nu contine nicio substanta cunoscuta sau suspectata a avea efecte asupra sistemului endocrin.

SECTIUNEA 13: Consideratii privind eliminarea**13.1. Metode de tratare a deseurilor****Metode de eliminare**

Eliminarea deseurilor se va face in conformitate cu reglementarile federale, statale si locale.

Ambalaje Contaminate

Respectati toate reglementarile nationale sau locale.

SECTIUNEA 14: Informatii referitoare la transport

IMDG/IMO

Numarul ONU	Nerestricționat
Denumirea corecta ONU pentru expeditie	Nerestricționat
Clasa(e) de pericol la transport	Nu se aplica
Grupa de Ambalare:	Nu se aplica
Pericole pentru Mediul Înconjurător	Nu se aplica

RID

Numarul ONU	Nerestricționat

Annex to SDS					
Substante	Numar CAS	Categorii de proces	Categoria de deversari in mediul inconjurator	Categorie/categorii de produse	Sector de utilizare
Persulfat de sodiu	7775-27-1	PROC4; PROC8b; PROC15	ERC6a; ERC6b; ERC6d	-	SU2a; SU2b; SU3
Clorura de calciu, dihidrat	10035-04-8	PROC4; PROC8b; PROC15	ERC2; ERC4	-	SU2a; SU2b; SU3

Scenariu de expunere

Aplicarea de substante lichide în câmpuri petrolifere terestre/marine sau de substante solide/sub forma de pulbere în vrac.

1. Title Section

Utilizare

A se utiliza în procese discontinue, când apar situatii de posibila expunere.
Transfer de la nava de sprijin la instalatie.
Transfer din vrac/IBC (container de material în vrac)/butoi în depozitul de la amplasament, transfer în vederea prelucrării.
Transfer din canistra/bidon/conducta catre prelucrare. Esantionare si testare în interiorul amplasamentului, de ex. QC

Sector de utilizare

SU2a - Minerit (exclusiv exploatare maritima)
SU2b - Industrii offshore
SU3 - Utilizari industriale

Lucrator

Categorii de proces

PROC4 - Utilizare in proces discontinuu si alte procese (sinteze) in care apare posibilitatea expunerii
PROC8b - Transfer de substanta sau preparate (încarcare/descarcare) din/în vase recipiente/mari în cadrul unitatilor specializate
PROC15 - Utilizare ca reactiv de laborator

Categorie/categorii de produse

Nu se aplica

Categorii de articole

Nu se aplica

De mediu

Categorie/categorii de eliberare în mediul inconjurator

ERC2 - Formularea preparatelor (amestecuri)
ERC4 - Utilizarea industrială a auxiliarelor de procesare în cadrul proceselor si produselor, care nu devin componente ale articolelor
ERC6a - Utilizare industrială ce are ca rezultat fabricarea altei substante (utilizarea intermediarilor)
ERC6b - Utilizarea industrială a auxiliarelor de procesare reactive
ERC6d - Utilizarea industrială a regulatorilor de proces pentru procesele de polimerizare din productia rasinilor, cauciucurilor si polimerilor

2. Conditions of use affecting exposure

Controlul expunerii mediului

Substante	Controlul expunerii mediului
Clorura de calciu, dihidrat	Substanta nu este periculoasa pentru mediu.

Cantitate utilizata, frecventa si durata utilizarii (sau de la durata de exploatare)

Substante	Cantitatea zilnica pentru fiecare locatie	Tonaj anual la nivel de amplasament	Frecventa	Durata utilizarii
Persulfat de sodiu	-	40000	Eliberare continua.	300 d/y
Clorura de calciu, dihidrat	-	-	-	-

Conditii si masuri tehnice si organizatorice

Substante	Conditii si masuri tehnice si organizatorice
Persulfat de sodiu	Eliberarea substantei poate fi, practic, exclusa. Substanta este consumata complet în timpul reactiei chimice. În produsul final nu ramâne substanta nereactionata.
Clorura de calciu, dihidrat	Preveniti patrunderea în cursuri de ape, canalizari, subsoluri sau spatii închise.

Substante
Persulfat de sodiu
Clorura de calciu, dihidrat

4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES

Metoda de scalare

Pentru scalare, consultati: <http://www.ecetoc.org/tra>, ECETOC TRA worker v2.3, versiunea modificata.

Parametri de scalare

Un DU (Utilizator din aval) lucreaza în limitele stabilite de ES (scenariul de expunere) în cazul în care masurile propuse de gestionare a riscurilor, asa cum sunt descrise mai sus, sunt îndeplinite sau daca utilizatorul din aval poate demonstra pe cont propriu ca masurile implementate de gestionare a riscurilor sunt adecvate.

MATERIAL SAFETY DATA SHEET

(USA)

(Complies with USA OSHA 29 CFR 1910.1200 and ANSI Z 400.1)

Version: 3

Revision date: 10 August 2010

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

Product Code: L058
Product Name: Iron Stabilizer L58
Company Identification: Schlumberger Technology Corporation
110 Schlumberger Drive
Sugar Land, Texas 77478, USA
Telephone: 1-281-285-7873
Emergency Telephone Number: USA: +1-281-595-3518 (24hr)

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Main physical hazards: No classified physical hazards.
Main health hazards: May cause mechanical irritation to eyes. Inhalation of dust may cause shortness of breath, tightness of the chest, a sore throat and cough.
Other Information: Agitation may generate some dust. Suspended dust may present a dust explosion hazard.
Precautions: Avoid dust formation.
HMIS classification: Health: 0 Flammability: 1 Physical hazard: 0

Form: Powder

Color: White

Odor: None

Principle routes of exposure:

Eye contact. Skin contact. Respiratory system.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS-No	Weight %- Range
Sodium erythorbate	6381-77-7	60 - 100

4. FIRST AID MEASURES

Eye contact: Rinse with plenty of water. Seek medical attention if irritation occurs.
Skin contact: Rinse with water.
Ingestion: Obtain medical attention. Never give anything by mouth to an unconscious person.
Inhalation: Move to fresh air. Consult a physician if necessary.

5. FIRE-FIGHTING MEASURES

Fire hazard: Combustible material. Dust may form explosive mixture in air.

Flash point: Not applicable.
Autoignition temperature: No data available.
Flammability limits in air:
 Lower: No information available.
 Upper: No information available.
Oxidizing properties: None.

Suitable extinguishing media:
Water Fog, Alcohol Foam, CO2, Dry Chemical.

Extinguishing media which must not be used for safety reasons:
None known.

Special exposure hazards arising from the substance or preparation itself, its combustion products, or released gases:
When heated strongly or burned, oxides of carbon and harmful organic chemical fumes are released.

Special protective equipment for firefighters:
Wear protective fire fighting clothing and avoid breathing vapors. Use self-contained breathing apparatus in closed areas.

NFPA rating:
 Health: 0
 Flammability: 1
 Instability: 0
 Special: None

6. ACCIDENTAL RELEASE MEASURES

Main physical hazards: No classified physical hazards.
Other Information: Agitation may generate some dust. Suspended dust may present a dust explosion hazard.
Personal precautions: Wear suitable protective equipment.
Methods for cleaning up: Shovel into suitable container for disposal. After cleaning, flush away traces with water.
Environmental precautions: Prevent further leakage or spillage.

7. HANDLING AND STORAGE

Handling:
 Precautions: Avoid dust formation.
 Safe handling advice: Provide appropriate exhaust ventilation at places where dust is formed.
Technical measures/ storage conditions: Keep containers tightly closed in a dry, cool and well-ventilated place.
Packaging requirements: Polyethylene bag or drum with polyethylene liner.
Incompatible products: Oxidizing agents.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering measures to reduce exposure: Enclosure of the process. Ensure adequate ventilation. Other suitable methods.
Hygiene measures: Exercise reasonable care and cleanliness.

Respiratory protection: In case of insufficient ventilation, wear suitable respiratory equipment. If dust or mist is generated use NIOSH approved respirator with dust and mist protection (3M 8210).

Eye protection: Tightly fitting safety goggles.

Hand protection: Rubber or plastic gloves.

Skin and body protection: Clean, body-covering clothing.

Occupational Exposure Limits

Component	ACGIH - TLVs			OSHA - PELs		
	TWA / Ceiling	STEL	ACGIH - Skin	TWA / C	STEL	Final PELs - Skin
Sodium erythorbate	-	-	-	-	-	-

Particles Not Otherwise Regulated/Specified [PNOR or PNOS] (insoluble or poorly soluble):

- OSHA PEL's for Inert or Nuisance Dust are covered by PNOR limits: respirable fraction: 5 mg/m³; total dust 15 mg/m³.

- ACGIH PNOS Recommendations: airborne concentrations should be kept below 3 mg/m³, respirable particulate, and 10 mg/m³, inhalable particles.

9. PHYSICAL AND CHEMICAL PROPERTIES

Chemical characterization: Reducer

Fire hazard: Combustible material. Dust may form explosive mixture in air.

Form: Powder

Color: White

Odor: None

Odor threshold: Not applicable.

pH: 5.0 - 8.0

pH concentration: @ 50 g/l

Boiling point/range: Decomposes 200°C / 392 °F

Flash point: Not applicable.

Flammability limits in air:

Lower: No information available.

Upper: No information available.

Bulk density: No information available.

Melting point/range: No data available.

Decomposition temperature: 200 °C / 392 °F

Solubility:

Water solubility: 153 g/l (@ 25°C)

Fat solubility: Insoluble.

Partition coefficient (n-octanol/water): See also SECTION 12

Relative density: No information available

Vapor pressure: Not applicable.

Vapor density: Not applicable.

Viscosity: Not applicable.

Evaporation rate: Not applicable.

% Volatile (VOC): None.

10. STABILITY AND REACTIVITY

Stability:

Stable at normal conditions.

Conditions to avoid:

None known.

Incompatibility with other substances:

Oxidizers.

Hazardous decomposition products:

When heated strongly or burned, oxides of carbon and harmful organic chemical fumes are released.

Hazardous polymerization:

Hazardous polymerization does not occur.

Other Information:

Agitation may generate some dust. Suspended dust may present a dust explosion hazard.

11. TOXICOLOGICAL INFORMATION**PRODUCT TOXICOLOGICAL INFORMATION****Acute Health Hazard****Eye contact:**

May cause mechanical irritation.

Skin contact:

No effect expected. Prolonged or repeated contact may cause mild irritation.

Ingestion:

Accidental ingestion of small amounts is not expected to cause adverse effects. Swallowing large amounts may be harmful.

Inhalation:

Inhalation of dust may cause shortness of breath, tightness of the chest, a sore throat and cough.

Sensitization - lung:

Not known to cause allergic reaction.

Sensitization - skin:

Not known to cause allergic reaction.

Chronic Health Hazard**Carcinogenic effects:**

None known.

Mutagenic effects:

None known.

Teratogenic effects:

None known.

Reproductive toxicity:

None known.

Target organ effects:

No information available.

COMPONENT TOXICOLOGICAL INFORMATION

Component	Target Organ Effects	LD50 / LC50

NTP:	National Toxicology Program
NIOSH:	National Institute of Occupational Safety & Health
NIOSH-REL:	Recommended Exposure Limit
OSHA:	Occupational Safety & Health Administration
OSHA-PEL:	Permissible Exposure Limit
TSCA:	Toxic Substance Control Act (Inventory)

Occupational Exposure Limits indicators: TWA - Time Weighted Average; STEL - Short Term Limit; C - Ceiling Limit; units: [mg/m³]

ACGIH Notations:

"Skin" refers to the potential significant contribution to the overall exposure by the cutaneous route, including mucous membranes and the eyes, either by contact with vapors or by direct skin contact with the substance.

"A" notation indicates carcinogenicity as follows:

ACGIH classification: A1 - Confirmed Human Carcinogen; A2 - Suspected Human Carcinogen; A3 - Confirmed Animal Carcinogen with Unknown Relevance to Humans; A4 - Not Classifiable as a Human Carcinogen; A5 - Not suspected as a Human Carcinogen.

"SEN" refers to the potential for an agent to product sensitization as confirmed by human and animal data.

End of the Material Safety Data Sheet

Safety Data Sheet

(Compatible with ANSI Z400.1)

Version: 4

Revision date 07/Jun/2013

1. Identification of the substance/preparation and the company/undertaking

Product code	U066
Product name	Mutual Solvent U66
Use of the substance/preparation	For industrial use only. Solvent in oilfield applications.
Company identification	Schlumberger Technology Corporation 110 Schlumberger Drive Sugar Land, Texas 77478, USA Telephone: 1-281-285-7873
Emergency telephone number	USA: +1-281-595-3518 (24hr)

2. Hazards identification

Emergency Overview

Warning

Main physical hazards	combustible liquid.
Main health hazards:	Irritating to eyes and skin. Toxic by inhalation and in contact with skin. Toxic by ingestion. (Based on tests with laboratory animals). Inhalation of high vapor concentrations can cause CNS-depression and narcosis. aspiration hazard. Aspiration may cause pulmonary edema and pneumonitis.
Precautions	Keep away from heat, sparks, and flame. Keep container tightly closed. Avoid contact with the skin and the eyes. Do not breathe vapors or spray mist.
HMIS classification	Health 3 Flammability 2 Physical hazard 0

Physical State Liquid **Color** Colorless **Odor** Ether-like

Principle routes of exposure
Skin contact. Eye contact. Inhalation.

3. Composition/information on ingredients

Component	CAS-No	Weight % - range
2-butoxyethanol	111-76-2	60-100

4. First aid measures

Eye contact	Immediately flush eyes with water for 15 minutes while holding eyelids open. If symptoms persist, call a physician.
Skin contact	After contact with skin, wash immediately with plenty of soap and water for at least 15 minutes. If symptoms persist, call a physician.
Ingestion	Do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, minimize the risk of aspiration by properly positioning the affected person.
Inhalation	Move to fresh air. Obtain medical attention. If breathing has stopped, begin artificial respiration. Call a physician or Poison Control Centre immediately.

5. Fire-fighting measures

Fire hazard	combustible liquid.
Flash point	66 °C / 151 °F
Method	Pensky-Martens CC
Autoignition temperature	~ 240 °C / 464 °F
Flammability limits in air:	
Lower	1.1%
Upper	10.6%
Oxidizing properties	None.

Suitable extinguishing media

Extinguish with carbon dioxide, dry chemical, foam or waterspray.

Extinguishing media which must not be used for safety reasons

None known.

Special exposure hazards arising from the substance or preparation itself, its combustion products, or released gases

Combustible material. Thermal decomposition can lead to release of irritating gases and vapors.

Special protective equipment for firefighters

Wear protective fire fighting clothing and avoid breathing vapors. Use self-contained breathing apparatus in closed areas.

NFPA Rating

Health	3
Flammability	2
Instability	0
Special firefighting procedures	Cool fire-exposed containers using water spray.

6. Accidental release measures

Main physical hazards	combustible liquid.
Personal precautions	Keep away from heat, sparks, and flame. Do not breathe vapors or spray mist. Do not get on skin or clothing. Wash thoroughly after handling. Wear suitable protective equipment. See also section 8.

Methods for cleaning up Contain with dikes. Use explosion proof equipment to recover. Remove all sources of ignition. Soak up residual on inert absorbant (sand). Put in steel or plastic drum approved for flammables.

Environmental precautions Do not allow material to contaminate ground water system.

7. Handling and storage

Handling

Precautions

Keep away from heat, sparks, and flame. Keep container tightly closed. Avoid contact with the skin and the eyes. Do not breathe vapors or spray mist.

Safe handling advice

Wear suitable protective equipment.

Technical measures/ storage conditions

Keep away from direct sunlight.

Packaging requirements

Steel or high density polyethylene (HDPE) container approved for flammables. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded.

Incompatible products

Oxidizing agents.

8. Exposure controls/personal protection

All chemical Personal Protective Equipment (PPE) should be selected based on an assessment of both the chemical hazard present and the risk of exposure to those hazards. The PPE recommendations below are based on an assessment of the chemical hazards associated with this product. Where this product is used in a mixture with other products or fluids, additional hazards may be created and as such further assessment of risk may be required. The risk of exposure and need of respiratory protection will vary from workplace to workplace and should be assessed by the user in each situation.

Engineering measures to reduce exposure

Control the source. Enclosure of the process. Other suitable methods.

Hygiene measures

Avoid contact with the skin and the eyes. Do not breathe vapors or spray mist. Keep airborne concentrations below exposure limits.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment. Use respirator with organic vapor protection (A, brown).

Eye protection

Tightly fitting safety goggles.

Hand protection

Impervious gloves. Neoprene. PVC.

Skin and body protection

Chemical resistant apron.

Occupational exposure limits

Component	ACGIH - TLVs			OSHA - PELs		
	ACGIH TLV	STEL	Skin Notation	OSHA PEL	STEL	Final PELs - Skin

2-butoxyethanol	20 ppm	-	-	50 ppm TWA 240 mg/m ³ TWA	-	Listed
-----------------	--------	---	---	---	---	--------

Particles Not Otherwise Regulated/Specified [PNOR or PNOS] (insoluble or poorly soluble):

- OSHA PEL's for Inert or Nuisance Dust are covered by PNOR limits: respirable fraction: 5 mg/m³; total dust 15 mg/m³.
- ACGIH PNOS Recommendations: airborne concentrations should be kept below 3 mg/m³, respirable particulate, and 10 mg/m³, inhalable particles.

9. Physical and chemical properties

Chemical characterization	solvent.
Fire hazard	combustible liquid.
Physical State	Liquid
Color	Colorless
Odor	Ether-like
Odor threshold	No information available
pH	Not applicable
Boiling point/range	~ 170 °C / 338 °F
Flash point	66 °C / 151 °F
Method	Pensky-Martens CC.
Flammability limits in air:	
Lower	1.1%
Upper	10.6%
Bulk density	Not Applicable
Melting point/range	-70 °C / -94 °F
Decomposition temperature	> 242 °C / 468 °F
Solubility:	
Water solubility	Miscible with water.
Fat solubility	No information available
Partition coefficient (n-octanol/water)	See also section 12
Relative density	0.9 (@ 25°C)
Vapor pressure	0.1 kPa (@ 25°C)
Vapor density	4.1 (air = 1)
Viscosity	3 mPa.s (@ 25 °C)
Evaporation rate	No data available
% Volatile (VOC)	None

10. Stability and reactivity

Stability

Stable under recommended storage conditions.

Conditions to avoid

Keep away from heat, sparks, and flame.

Incompatibility with other substances

Oxidizers.

Hazardous decomposition products

When heated strongly or burned, oxides of carbon and harmful organic chemical fumes are released.

Hazardous polymerization

Hazardous polymerization does not occur.

11. Toxicological information

PRODUCT TOXICOLOGICAL INFORMATION

LD50/oral/rat = 470 mg/kg

Acute health hazard

Eye contact	Irritant. May cause pain, redness, discomfort.
Skin contact	Irritant; may cause pain, redness, dermatitis. Toxic in contact with skin. (Based on tests with laboratory animals).
Ingestion	Toxic by ingestion. (Based on tests with laboratory animals). aspiration hazard. Aspiration may cause pulmonary edema and pneumonitis.
Inhalation	Toxic by inhalation. (Based on tests with laboratory animals). May cause Central Nervous System (CNS) depression.
Sensitization - lung	Not known to cause allergic reaction.
Sensitization - skin	Not known to cause allergic reaction.
Toxicologically synergistic products	More severe effects if alcohol is consumed.

Chronic health hazard

Carcinogenic effects	Not known to cause cancer in humans.
Mutagenic effects	See COMPONENT TOXICOLOGICAL INFORMATION below.
Teratogenic effects	Not known to cause birth defects or have a deleterious effect on a developing fetus.
Reproductive toxicity	Not known to adversely affect reproductive functions and organs.
Target organ effects	See COMPONENT TOXICOLOGICAL INFORMATION below.

COMPONENT TOXICOLOGICAL INFORMATION

Component	Target organ effects	LD50 / LC50
2-butoxyethanol	liver, kidneys, lymphoid system, skin, blood, eyes, respiratory system, CNS, hematopoietic system	= 470 mg/kg (Oral LD50; Rat) = 2.21 mg/L (Inhalation LC50; Rat) 4 h = 2270 mg/kg (Dermal LD50; Rat) = 450 ppm (Inhalation LC50; Rat) 4 h

Component	IARC Group 1 or 2	ACGIH - Carcinogens	OSHA listed carcinogens	NTP
2-butoxyethanol	-	A3 - Confirmed animal carcinogen with unknown relevance to humans	-	-

Component	OTHER TOXICOLOGICAL INFORMATION
2-butoxyethanol	RTECS - Based on animal studies: Toxic by ingestion, inhalation, skin absorption. Dermal exposure produces central nervous system effects in laboratory animals. Inhalation of this chemical have been shown to produce effects on central nervous and lungs in laboratory animals. Spleen and lung effects were observed in laboratory animals after acute dermal exposure. Chronic toxicity hazard: may cause blood and liver damage, based on animal evidence. Effects of hemolysis of red blood cells were observed in animal studies also after acute exposure to 2-butoxyethanol by ingestion, inhalation or dermal exposure.

12. Ecological information

Product information

Aquatic toxicity This product has no known eco-toxicological effects. See component information below.

Component information

2-butoxyethanol

Bioaccumulation	Does not bioaccumulate
Persistence / degradability	Biodegradable.
Crustacean toxicity	48h LC50= 530 mg/l (Acartia tonsa)
Freshwater fish species data	2950 mg/L LC50 (Lepomis macrochirus) = 96 h 1490 mg/L LC50 (Lepomis macrochirus) = 96 h
Water flea data	= 1698 - 1940 mg/L (LC50; Daphnia magna) = 1720 mg/L (EC50; water flea)

13. Disposal considerations

Waste from residues / unused products

Treat as hazardous waste. Dispose of in accordance with local regulations.

Contaminated packaging

Dispose of in accordance with local regulations. If reusable containers are used, send them back to the product supplier, after the required rinsing.

14. Transport information

DOT

CERCLA RQ	Not Established
Packing size	< 119 gals
Proper shipping name	Not regulated
Label(s)	None required
Packing size	> 119 gals
UN/NA Number	NA 1993
Hazard class	Combustible liquid
Proper shipping name	NA 1993, Combustible liquid, n.o.s. (contains 2-butoxyethanol), PG III
Label(s)	None required

IMDG/IMO:

Shipping name	Not regulated
UN number	None

ICAO/IATA:

Shipping name	Not regulated
UN number	None

TDG (Canada):

Shipping name	Not regulated
PIN	None

Note 1:

For the applicable placard selection refer to the appropriate transport regulations; the selection may vary depending on the cargo size and categories of other hazardous materials in the cargo.

15. Regulatory information

International inventories

USA (TSCA)	Complies
IMPORTS, USA	No import volume restrictions.
Canada (DSL)	Complies
IMPORTS, Canada	No import volume restrictions.

2. Hazards Identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

Health hazards

Serious eye damage/eye irritation	Category 2
Specific target organ toxicity - Single exposure	Category 3

Environmental hazards Not classified

Physical Hazards

Flammable Liquids	Category 3
-------------------	------------

2.2 Label elements

Signal word

WARNING

Hazard statements

H319 - Causes serious eye irritation

H336 - May cause drowsiness or dizziness

H226 - Flammable liquid and vapor

Precautionary Statements - EU (§28, 1272/2008)

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking

P261 - Avoid breathing dust/fume/gas/mist/vapors/spray

P303 + P361 + P353 - IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower

P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

P312 - Call a POISON CENTER or doctor/physician if you feel unwell

P501 - Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable

Supplementary precautionary statements

P233 - Keep container tightly closed

P240 - Ground/bond container and receiving equipment

P241 - Use explosion-proof electrical/ ventilating/ lighting/ equipment

P242 - Use non-sparking tools

P243 - Take precautionary measures against static discharge

P264 - Wash face, hands and any exposed skin thoroughly after handling

P271 - Use only outdoors or in a well-ventilated area

P280 - Wear protective gloves/protective clothing and eye/face protection

P304 + P340 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing

P337 + P313 - If eye irritation persists: Get medical advice/attention

P378 - Use extinguishing powder for extinction

P403 + P233 - Store in a well-ventilated place. Keep container tightly closed

P403 + P235 - Store in a well-ventilated place. Keep cool

Contains

Propan-2-ol

2.3 Other hazards

Not classified as PBT/vPvB by current EU criteria

Australian statement of hazardous/dangerous nature

Classified as Hazardous according to the criteria of NOHSC.

HAZARDOUS SUBSTANCE. DANGEROUS GOODS.

3. Composition/information on ingredients

3.1 Substances

Not applicable

3.2 Mixtures

Chemical Name	EC No	CAS No	Weight-%	Regulation (EC) No 1272/2008	REACH registration number
Propan-2-ol	200-661-7	67-63-0	10-30	Flam. Liq. 2, (H225) STOT SE 3 (H336) Eye Irrit. 2 (H319)	01-2120063207-6 1-xxxx

Comments

The product contains other ingredients which do not contribute to the overall classification.

4. First aid measures

4.1 First aid measures

Inhalation	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
Ingestion	Rinse mouth. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person. Seek medical attention if irritation occurs.
Skin contact	Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Get medical attention if irritation persists.
Eye Contact	Promptly wash eyes with lots of water while lifting eye lids. Remove contact lenses, if worn. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.

4.2. Most important symptoms and effects, both acute and delayed

General advice	The severity of the symptoms described will vary dependant of the concentration and the length of exposure. If adverse symptoms develop, the casualty should be transferred to hospital as soon as possible.
----------------	--

Symptoms

Inhalation	Please see Section 11. Toxicological Information for further information.
Ingestion	Please see Section 11. Toxicological Information for further information.
Skin contact	Please see Section 11. Toxicological Information for further information.
Eye contact	Please see Section 11. Toxicological Information for further information.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	Treat symptomatically.
--------------------	------------------------

5. Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing media

Dry chemical, CO₂, water spray or alcohol-resistant foam.

Extinguishing media which must not be used for safety reasons

High volume water jet.

5.2. Special hazards arising from the substance or mixture**Unusual fire and explosion hazards**

FLAMMABLE LIQUID AND VAPOR. Vapors may travel to source of ignition and flash back.

Hazardous combustion products

Fire or high temperatures create: Carbon oxides (COx), Harmful organic chemical fumes.

5.3 Advice for firefighters**Special protective equipment for fire-fighters**

As in any fire, wear self-contained breathing apparatus and full protective gear.

Special Fire-Fighting Procedures

Containers close to fire should be removed immediately or cooled with water.

Hazchem code ADG

•3Y

6. Accidental release measures**6.1. Personal precautions, protective equipment and emergency procedures**

Evacuate personnel to safe areas. Remove all sources of ignition. Use personal protective equipment. See also section 8.

6.2 Environmental precautions

The product should not be allowed to enter drains, water courses or the soil.

Environmental exposure controls

Avoid release to the environment. Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and material for containment and cleaning up**Methods for containment**

Prevent further leakage or spillage if safe to do so. Dike far ahead of liquid spill for later disposal.

Methods for cleaning up

Take precautionary measures against static discharges. Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Use clean non-sparking tools to collect absorbed material. Ground and bond containers when transferring material. After cleaning, flush away traces with water.

6.4 Reference to other sections

See section 13 for more information.

7. Handling and storage**7.1 Precautions for safe handling****Handling**

Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin and eyes. Do not breathe vapors or spray mist. Avoid spills and splashing during use.

Hygiene Measures

Use good work and personal hygiene practices to avoid exposure. When using do not smoke, eat or drink. Wash hands and face before breaks and immediately after handling the product Remove contaminated clothing.

7.2 Conditions for safe storage, including any incompatibilities

Technical measures/precautions Ensure adequate ventilation. Keep airborne concentrations below exposure limits. Take precautionary measures against static discharges. Use spark-proof tools and explosion-proof equipment. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded.

Storage precautions Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from open flames, hot surfaces and sources of ignition. Keep away from direct sunlight. Avoid contact with: Strong acids. Strong bases Strong oxidizing agents Strong reducing agents.

Storage class Flammable liquid storage.

Packaging materials Use specially constructed containers only.

7.3 Specific end uses

See Section 1.2.

8. Exposure controls/personal protection**8.1 Control parameters**

Exposure limits No biological limit allocated

8.2 Exposure controls

All chemical Personal Protective Equipment (PPE) should be selected based on an assessment of both the chemical hazard present and the risk of exposure to those hazards. The PPE recommendations below are based on an assessment of the chemical hazards associated with this product. Where this product is used in a mixture with other products or fluids, additional hazards may be created and as such further assessment of risk may be required. The risk of exposure and need of respiratory protection will vary from workplace to workplace and should be assessed by the user in each situation.

Engineering Controls

Ensure adequate ventilation. Keep airborne concentrations below exposure limits.

Personal protective equipment

Eye protection	Use eye protection according to EN 166, designed to protect against liquid splashes. Tightly fitting safety goggles. Safety glasses with side-shields.
Hand protection	Wear chemically resistant gloves (tested to EN 374) in combination with 'basic' employee training Impervious gloves Nitrile Butyl Rubber Break through time >480 minutes Glove thickness >0.35 mm Be aware that liquid may penetrate the gloves. Frequent change is advisable.
Respiratory protection	In case of insufficient ventilation wear suitable respiratory equipment, Use respirator with organic vapor protection (A, brown), At work in confined or poorly ventilated spaces, respiratory protection with air supply must be used.
Skin and body protection	Wear suitable protective clothing, Eye wash and emergency shower must be available at the work place.

Hygiene Measures

Wash hands before breaks and immediately after handling the product, Remove and wash contaminated clothing before re-use.

9. Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	Liquid
Appearance	Aqueous solution
Odor	Alcohol
Color	Colorless
Odor threshold	Not applicable

<u>Property</u>	<u>Values</u>	<u>Remarks</u>
pH	5.5 - 8.5	
pH @ dilution		
Melting / freezing point	- 15 °C / 5 °F	
Boiling point/range	No information available	
Flash point	25 °C / 77 °F	
Evaporation rate (BuAc =1)	< 1

Molecular weight	No information available
VOC content(%)	No information available
Density	No information available

Comments

The data listed above are typical physical and chemical properties and should not be construed as product specification.

10. Stability and reactivity

10.1 Reactivity

Flammable liquid and vapor.

10.2 Chemical stability

Stable under normal temperature conditions and recommended use.

10.3 Possibility of Hazardous Reactions

Hazardous polymerization

Hazardous polymerization does not occur.

10.4 Conditions to avoid

Keep away from direct sunlight. Take precautionary measures against static charges. Keep away from open flames, hot surfaces and sources of ignition.

10.5 Incompatible materials

Strong acids. Strong bases. Strong oxidizing agents. Strong reducing agents.

10.6 Hazardous decomposition products

See Section 5.2.

11. Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Inhalation	May cause drowsiness or dizziness. Inhalation of vapors in high concentration may cause irritation of respiratory system.
Eye contact	Causes serious eye irritation.
Skin contact	Prolonged contact may cause redness and irritation.
Ingestion	Ingestion may cause stomach discomfort.
Unknown acute toxicity	Not applicable.

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Propan-2-ol	= 1870 mg/kg (Rat)	= 4059 mg/kg (Rabbit)	= 72600 mg/m ³ (Rat) 4 h

Sensitization This product does not contain any components suspected to be sensitizing.

Mutagenic effects This product does not contain any known or suspected mutagens.

Carcinogenicity This product does not contain any known or suspected carcinogens.

Reproductive toxicity This product does not contain any known or suspected reproductive hazards.

Routes of exposure Inhalation. Skin contact. Eye contact.

Routes of entry Inhalation. Skin contact. Eye contact.

Specific target organ toxicity - Single exposure Category 3

Specific target organ toxicity - Repeated exposure Not classified.

Target organ effects Central nervous system.

Aspiration hazard Not applicable.

12. Ecological information

12.1 Toxicity

The product component(s) are not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Toxicity to algae
See component information below.

Toxicity to fish
See component information below.

Toxicity to daphnia and other aquatic invertebrates

See component information below.

Chemical Name	Toxicity to fish	Toxicity to algae	Toxicity to daphnia and other aquatic invertebrates
Propan-2-ol	> 1400000 µg/L LC50 Lepomis macrochirus 96 h = 11130 mg/L LC50 Pimephales promelas 96 h = 9640 mg/L LC50 Pimephales promelas 96 h	> 1000 mg/L EC50 Desmodesmus subspicatus 96 h > 1000 mg/L EC50 Desmodesmus subspicatus 72 h	= 13299 mg/L EC50 Daphnia magna 48 h

12.2 Persistence and degradability

See component information below.

Chemical Name	Persistence and degradability
Propan-2-ol 67-63-0	Readily biodegradable

12.3 Bioaccumulative potential

See component information below.

Chemical Name	Bioaccumulation
Propan-2-ol 67-63-0	No bioaccumulation potential

12.4 Mobility in soil

Mobility

Soluble in water.

12.5 Results of PBT and vPvB assessment

Not classified as PBT/vPvB by current EU criteria.

12.6 Other adverse effects.

None known.

13. Disposal considerations

13.1 Waste treatment methods

Waste from residues / unused products

Dispose of in accordance with local regulations.

Contaminated packaging

Empty containers should be taken for local recycling, recovery or waste disposal.

EWG Waste Disposal No

According to the European Waste Catalog, Waste Codes are not product specific, but application specific Waste codes should be assigned by the user based on the application for which the product was used. The following Waste Codes are only suggestions: EWG waste disposal No: 16 05 08 16 10 01 - aqueous liquid wastes containing dangerous

substances 7152 Organic waste without halogen.

14. Transport information

14.1. UN number

UN/ID No. (ADR/RID/ADN/ADG)	UN1993
UN No. (IMDG/ANTAQ)	UN1993
UN No. (ICAO/ANAC)	UN1993

14.2. UN proper shipping name

FLAMMABLE LIQUID, N.O.S. (propan-2-ol)

14.3 Hazard class(es)

ADR/RID/ADN/ADG Hazard class	3
IMDG/ANTAQ Hazard class	3
ICAO/ANAC Hazard class/division	3

14.4 Packing group

ADR/RID/ADN/ADG Packing group	III
IMDG/ANTAQ Packing group	III
ICAO/ANAC Packing group	III

14.5 Environmental hazard

No

14.6 Special precautions

Hazard identification no (ADR)	30
EmS (IMDG)	F-E, S-E
Emergency Action Code (EAC)	•3Y
Tunnel restriction code	(D/E)
Hazchem code ADG	•3Y

14.7 Transport in bulk according to Annex I/II of MARPOL 73/78 and the IBC Code

Please contact SDS@slb.com for info regarding transport in Bulk.

15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Australian Standard for the Uniform Scheduling of Drugs and Poisons

No poisons schedule number allocated

Commission Regulation (EU) No 453/2010 of 20 May 2010 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC, including amendments.

This safety data sheet complies with the requirements of Regulation (EC) No. 1272/2008.

National Code of Practice for the Preparation of Material Safety Data Sheets 2nd Edition [NOHSC: 2011 (2003)].

National Occupational Health and Safety Commission's Approved Criteria for Classifying Hazardous Substances [NOHSC:1008 (2004) 3rd Edition].

National Occupational Health and Safety Commission's Exposure Standards for Atmospheric Contaminants in the occupational Environment [NOHSC:1003 (1995)].

Safe Work Australia.

Standard for the Uniform Scheduling of Drugs and Poisons (SUSDP).

ADG Code – Australian Dangerous Goods Code.

Occupational Safety and Health (Classification, Labelling and Safety Data Sheet of Hazardous Chemicals) Regulations 2013 [P.U.(A) 310/2013] (CLASS Regulations)

The Industry Code of Practice on Chemical Classification and Hazard Communication 2014 [P.U. (B) 128/2014] (ICOP)

International inventories

USA (TSCA)	Complies
European Union (EINECS and ELINCS)	Complies
Canada (DSL)	Does not comply
Philippines (PICCS)	Does not comply
Japan (ENCS)	Does not comply
China (IECSC)	Does not comply
Australia (AICS)	Complies
Korean (KECL)	Does not comply
New Zealand (NZIoC)	Does not comply

Europe - REACH

All products supplied from the European Economic Area (EEA) are compliant with the REACH Regulation EC 1907/2006. For products supplied from the EEA, Schlumberger and/or its suppliers have pre-registered and is registering all of the substances that it and/or its suppliers manufactures in or imports into the EEA that are subject to Title II of the REACH Regulation. All products supplied from outside the EEA are subject to REACH only if imported into the EEA. The importer of the products must comply with REACH for each imported substance. Contact REACH@slb.com for REACH information.

15.2 Chemical Safety Report

No information available

16. Other information

Prepared by	Global Regulatory Compliance - Chemicals (GRC - Chemicals) , Muriel Martin Beurel
Supersedes date	26-Jun-2017
Revision date	18-Oct-2017
Version	3
This SDS has been revised in the following section(s)	14, No changes with regard to classification have been made.

Full text of H-Statements referred to under sections 2 and 3

H319 - Causes serious eye irritation
H336 - May cause drowsiness or dizziness
H226 - Flammable liquid and vapor

Disclaimer

The information contained herein is considered in good faith as reliable of the date issued and is based upon on measurements, tests or data derived from supplier's own study or furnished by others. In providing this SDS information, Supplier makes no express or implied warranties as to the information or product; merchantability or fitness of purpose; any express or implied warranty; or non-infringement of intellectual property rights; and supplier assumes no responsibility for any direct, special or consequential damages, results obtained, or the activities of others. To the maximum extent permitted by law, supplier's warranty obligations and buyer's sole remedies are as stated in separate agreement between the parties.

MATERIAL SAFETY DATA SHEET

Issuing Date: 06-17-2013

Revision Date: 06-17-2013

Version 3

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

Product Code(s)	42175
Product Name	Stack-Magic ECO-F v2
Product Registration number	
Denmark	-
Norway	130020
Sweden	-

1.2. Relevant identified uses of the substance or mixture and uses advised against

Recommended use Hydraulic Fluid, water based

Uses advised against Any other purpose.

1.3. Details of the supplier of the safety data sheet

Manufacturer, Importer, Supplier

Mento AS
Kontinentalveien
Postboks 44
4098 Tananger
Norway

2. HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture

The preparation is classified as dangerous in accordance with Directive 1999/45/EC.

Symbol(s) Xn - Harmful

R43 - May cause sensitization by skin contact

R36/38 - Irritating to eyes and skin

R20/22 - Harmful by inhalation and if swallowed

2.2. Label Elements**Symbol(s)**

Xn - Harmful

Contains 2,2',2''-(Hexahydro-1,3,5-triazine-1,3,5-triyl)triethanol

**R-phrases(s)**

R43 - May cause sensitization by skin contact

R36/38 - Irritating to eyes and skin

R20/22 - Harmful by inhalation and if swallowed

S-phrases(s)

S24 - Avoid contact with skin

S37 - Wear suitable gloves

2.3. Other hazards

None

3. COMPOSITION/INFORMATION ON INGREDIENTS

3.2. Mixtures

Chemical Name	EC-No	CAS-No	Weight %	Classification (67/548)	Classification (Reg. 1272/2008)	REACH Registration Number

For the full text of the R-phrases mentioned in this Section, see Section 16

For the full text of the H-Statements mentioned in this Section, see Section 16.

Additional information

** Substances for which there are Community workplace exposure limits

4. FIRST AID MEASURES

4.1. Description of first-aid measures

General advice	Do not breathe dust/fume/gas/mist/vapors/spray. Do not get in eyes, on skin, or on clothing. When symptoms persist or in all cases of doubt seek medical advice.
Inhalation	Move to fresh air. If breathing is irregular or stopped, administer artificial respiration. Avoid direct contact with skin. Use barrier to give mouth-to-mouth resuscitation. Consult a physician.
Skin contact	Wash off immediately with plenty of water for at least 15 minutes. Remove and wash contaminated clothing before re-use. If symptoms persist, call a physician.
Eye contact	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Keep eye wide open while rinsing. Do not rub affected area. If eye irritation persists, consult a specialist.
Ingestion	Rinse mouth. Do not induce vomiting. If conscious, give 2 glasses of water. Get immediate medical attention.
Protection of First-aiders	Use personal protective equipment.

4.2. Most important symptoms and effects, both acute and delayed

Main Symptoms Itching, rash, Redness, Eye damage/irritation, Breathing difficulties, Gastrointestinal discomfort

4.3. Indication of immediate medical attention and special treatment needed

Notes to physician May cause sensitization of susceptible persons. Treat symptomatically. Ingestion, depending on the dose, can cause i.a. abnormal behaviour, unconsciousness, convulsions, respiratory paralysis, pulmonary oedemas, as well as damages to liver and kidneys and can lead, in the worst case, to death. A quick treatment of an ethylene-glycol intoxication, when necessary with haemodialysis, may reduce the toxic effects. Intravenous ethyl alcohol in sodium bicarbonate solution is an approved antitoxin.

5. FIRE-FIGHTING MEASURES

5.1. Extinguishing media**Suitable Extinguishing Media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment:: Use CO2, dry chemical, or foam, Water spray or fog.

Extinguishing media which shall not be used for safety reasons

None

5.2. Special hazards arising from the substance or mixture**Special Hazard**

Thermal decomposition can lead to release of irritating gases and vapors

Hazardous Decomposition Products

Thermal decomposition can lead to release of irritating gases and vapors

5.3. Advice for firefighters**Special protective equipment for fire-fighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear

6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Avoid contact with skin, eyes and clothing. Use personal protective equipment. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Advice for non-emergency personnel

Material can create slippery conditions.

Advice for emergency responders For personal protection see section 8

6.2. Environmental precautions

Do not flush into surface water or sanitary sewer system. Prevent further leakage or spillage if safe to do so. Prevent product from entering drains.

6.3. Methods and materials for containment and cleaning up

Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Dike to collect large liquid spills.

6.4. Reference to other sections

See Section 8/12/13 for additional information

7. HANDLING AND STORAGE

7.1. Precautions for safe handling

Avoid contact with skin, eyes and clothing. Remove and wash contaminated clothing before re-use. Do not eat, drink or smoke when using this product. Wear personal protective equipment. Do not breathe vapors or spray mist. Use only in area provided with appropriate exhaust ventilation. Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Technical measures/Storage conditions

Keep out of the reach of children. Keep containers tightly closed in a cool, well-ventilated place. Keep in properly labeled containers.

Recommended Shelf Life

No information available.

Incompatible Materials

Strong oxidizing agents, Strong acids, Strong bases

7.3. Specific end uses

Specific use(s) Hydraulic Fluid, water based

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Ethane-1,2-diol						35 mg/m ³

Consumers Systemic toxicity**Consumers Local effects****Predicted No Effect Concentration (PNEC)****8.2. Exposure controls****Engineering Measures**

Ensure adequate ventilation, especially in confined areas.

Personal protective equipment**Eye Protection**

Tightly fitting safety goggles

Hand Protection

Protective gloves. Barrier cream. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion.

Skin and body protection

Lightweight protective clothing. Apron. Impervious gloves. Long sleeved clothing.

Respiratory protection

When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.

Hygiene measures

When using, do not eat, drink or smoke. Provide regular cleaning of equipment, work area and clothing. Wear personal protective equipment. Avoid contact with skin, eyes and clothing. Remove and wash contaminated clothing before re-use. Avoid breathing vapors, mist or gas. Handle in accordance with good industrial hygiene and safety practice.

Environmental Exposure Controls Do not allow material to contaminate ground water system.
Thermal hazards None under normal use conditions

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

Physical state @20°C	liquid	Appearance	Red/Pink Fluorescent
Odor	amine-like	Odor Threshold	Not applicable
<u>Property</u>	<u>Values</u>		<u>Note</u>
pH	10		
Melting/freezing point	< -17 °C		
Boiling point/boiling range	No information available		
Flash Point	Not applicable		
Evaporation rate	No information available		
Flammability (solid, gas)	No information available		
Flammability Limits in Air			
upper flammability limit	No information available		
lower flammability limit	No information available		
Vapor pressure	No information available		
Vapor density	No information available		
Relative density	1.05		@ 15.5C
Water Solubility	Miscible		
Solubility in other solvents	No information available		
Partition coefficient: n-octanol/water	Not applicable		
Autoignition temperature	No information available		
Decomposition temperature	No information available		
Viscosity, kinematic	2.5 cSt @ 40 °C		ISO 3104 ISO 3105
Explosive properties	Not applicable		
Oxidizing Properties	Not applicable		
<u>Other information</u>			
Viscosity, kinematic (100°C)	No information available.		
Pour point	No information available.		

10. STABILITY AND REACTIVITY

10.1. Reactivity

None under normal use conditions

10.2. Chemical stability

Stable under normal conditions

10.3. Possibility of hazardous reactions

None under normal use conditions

10.4. Conditions to avoid

Do not freeze

10.5. Incompatible Materials

Strong oxidizing agents, Strong acids, Strong bases

10.6. Hazardous decomposition products

Thermal decomposition can lead to release of irritating gases and vapors

11. TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects

Product Information - Principle Routes of Exposure

Inhalation	Harmful by inhalation
Eye contact	Irritating to eyes; If the liquid is splashed into the eye, it can cause reversible irritation and damage
Skin contact	Irritating to skin; May cause sensitization by skin contact. Avoid contact with skin and clothing
Ingestion	Harmful if swallowed. Ingestion constitutes the main danger because of the toxicity of ethylene glycol. May cause adverse liver effects; May cause adverse kidney effects

Acute toxicity - Product Information

Harmful by inhalation; Harmful if swallowed.

Acute toxicity - Component Information

Chemical Name	LD50 Oral (Rat)	LD50 Dermal (Rat/Rabbit)	LC50 Inhalation
Ethane-1,2-diol	4000 mg/kg (Rat)	= 9530 µL/kg (Rabbit)	
2-Aminoethanol	1720 mg/kg (Rat)	= 1 mL/kg (Rabbit) = 1025 mg/kg (Rabbit)	
Neutralised 2-Aminoethanol	1720 mg/kg (Rat)		
2,2',2''-Nitrilotriethanol	4190 mg/kg (Rat)	> 16 mL/kg (Rat) > 2000 mg/kg (Rabbit)	

Irritation	Irritating to eyes and skin.
Corrosivity	None known.
Sensitization	May cause sensitization by skin contact
Repeated Dose Toxicity	None known
Carcinogenicity	None known
Mutagenicity	None known
Toxicity to Reproduction	None known

12.2. Persistence and degradability

Expected to be biodegradable.

12.3. Bioaccumulative potential

Does not bioaccumulate

Chemical Name	log Pow
Ethane-1,2-diol	-1.93
2-Aminoethanol	-1.91
2,2',2''-Nitrilotriethanol	-2.53

12.4. Mobility in soil

No information available

12.5. Results of PBT and vPvB assessment

No information available.

12.6. Other adverse effects

None known

13. DISPOSAL CONSIDERATIONS**13.1. Waste treatment methods****Waste from Residues / Unused Products**

Dispose of as hazardous waste in compliance with local and national regulations

Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. Observe all label precautions until container is cleaned, reconditioned or destroyed.

Other information

According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user based on the application for which the product was used.

14. TRANSPORT INFORMATION**14.1. UN-Number**

Not regulated

14.2. UN proper shipping name

Not regulated

14.3. Transport hazard class

Not regulated

14.4. Packing group

Not regulated

14.5. Environmental Hazards

None

14.6. Special precautions for users

None

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable

IMDG/IMO

Not regulated

ADR/RID Not regulated

ICAO/IATA Not regulated

15. REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Take note of Directive 2000/39/EC establishing a first list of indicative occupational exposure limit values .

Take note of Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work .

Take note of Dir 94/33/EC on the protection of young people at work.

This safety data sheet complies with the requirements of Regulation (EC) No. 1907/2006 & (EC) No. 1272/2008 & (EC) 1999/45. The classification detailed on this Safety Data Sheet refers to the neat material only. Dilution of the product may reduce the classification.

The Carriage of Dangerous Goods Regulations 2011.

Statutory Instruments: Control of Substances Hazardous to Health Regulations 2002. Chemicals (Hazard Information and Packaging) Regulations 2009.

Acts of Parliament: The Health and Safety at Work etc. Act 1974. Environment Protection Act 1990.

Regulation on classification, labeling. of hazardous chemicals (2002 changing 2005). Appendix VI to Regulation on classification, labeling etc. of hazardous chemicals (2002 changing 2010), list of hazardous substances (as amended). Guidelines for submission and declaration of hazardous waste (2009). Transport of dangerous goods: ADR, RID, IMDG and IATA. Administrative norms for pollution of the atmosphere, 2009.

Workplace exposure limits (EH40)

15.2. Chemical Safety Assessment

No information available

16. OTHER INFORMATION

Key or legend to abbreviations and acronyms used in the safety data sheet

T - Toxic

Xn - Harmful

C - Corrosive

Acute Tox. - Acute Toxicity

Skin Corr. - Skin Corrosion

Skin Sens. - Skin Sensitizer

STOT RE - Specific target organ systemic toxicity (repeated exposure)

Full text of R-phrases referred to under sections 2 and 3

R22 - Harmful if swallowed

R23 - Toxic by inhalation

R34 - Causes burns

R43 - May cause sensitization by skin contact

R20/22 - Harmful by inhalation and if swallowed

R20/21/22 - Harmful by inhalation, in contact with skin and if swallowed

R36/38 - Irritating to eyes and skin

Full text of H-Statements referred to under sections 2 and 3

H302 - Harmful if swallowed

H312 - Harmful in contact with skin

H314 - Causes severe skin burns and eye damage

H317 - May cause an allergic skin reaction

H330 - Fatal if inhaled

H332 - Harmful if inhaled

H373 - May cause damage to organs through prolonged or repeated exposure if swallowed

Exposure scenario

No information available

Issuing Date: 06-17-2013**Revision Date:** 06-17-2013**Revision Note** Not applicable.**Disclaimer**

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

SECȚIUNEA 1. IDENTIFICAREA SUBSTANȚEI/AMESTECULUI ȘI A SOCIETĂȚII/ÎNȚREPRINDERII

1.1 Element de identificare a produsului

Denumire comercială	:	Combustibil naval RMG 380 - max. 0,5% S
---------------------	---	---

1.2 Utilizări relevante identificate ale substanței sau amestecului și utilizări contraindicate

Utilizări relevante identificate

Utilizări relevante	:	Utilizarea la motoare de nave autorizate în acest scop.
Utilizări identificate conform raportului de securitate chimică (CSR)	:	<u>Producere</u> 01-Producerea substanței <u>Formulare sau reambalare</u> 02 Formularea și (re)ambalarea substanțelor și amestecurilor <u>Utilizare în spații industriale</u> 01a - Distribuția substanței 12a - Utilizare drept combustibil sau carburant: Industrial <u>Utilizare larg răspândită de către lucrători profesioniști</u> 12b - Utilizare drept combustibil sau carburant: Profesional

Pentru detalii privind utilizările, a se vedea Anexa

Restricții recomandate privind utilizarea

Utilizări contraindicate	:	Sunt contraindicate utilizările în scop profesional ale substanțelor din categoria combustibililor grei (HFO) în acoperiri, și aplicații rutiere și în construcții. Din motive care țin de protecția sănătății umane, aceste utilizări nu mai sunt susținute în dosarele de înregistrare.
--------------------------	---	---

1.3 Detalii privind furnizorul fișei cu date de securitate

Adresă completă Producător, importator, distribuitor	:	OMV Petrom S.A. Strada Coralilor Nr. 22 Sector 1 013329 București („Petrom City”) Romania
Telefon	:	+40 (0) 725 16 16 16
Adresa de e-mail a persoanei competente	:	info.msds@petrom.com

1.4 Număr de telefon care poate fi apelat în caz de urgență

+40 (0) 725 16 16 16	Linia de urgență / tarif normal / 24/7 / română / engleză
+40 21 318 36 06	Biroul pentru Regulamentul Sanitar Internațional și Informare Toxicologică / tarif normal; L-V; 8:00-15:00; limba română

SECȚIUNEA 2. IDENTIFICAREA PERICOLELOR

2.1 Clasificarea substanței sau a amestecului

Clasificare (Regulamentul (CE) Nr. 1272/2008)

Acute Tox. 4 H332, Carc. 1B H350, Repr. 2 H361d, STOT RE 2 H373, Aquatic Acute 1 H400, Aquatic Chronic 1 H410,
Pentru textul complet al frazelor de pericol H menționate în această Secțiune și metodele de clasificare, consultați Secțiunea 16.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

2.2 Elemente pentru etichetă

Etichetare (Regulamentul (CE) Nr. 1272/2008)

Pictograme de pericol :

Cuvânt de avertizare : Pericol

Fraze de pericol : H350 Poate provoca cancer.
H332 Nociv în caz de inhalare.
H361d Susceptibil de a dăuna fătului
H373 Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.
H410 Foarte toxic pentru viața acvatică având efecte de lungă durată.

Fraze de precauție : **Prevenire:**
P201 Procurați instrucțiuni speciale înainte de utilizare.
P260 Nu inspirați vaporii.
P273 Evitați dispersarea în mediu.
P280 Purtați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/ echipament de protecție a feței.
Intervenție:
P308 + P313 ÎN CAZ DE expunere sau de posibilă expunere: consultați medicul.
Eliminare:
P501 Eliminați conținutul/recipientele conform prevederilor legale în vigoare

Etichetare suplimentară:

EUH 066 Expunerea repetată poate provoca uscarea sau crăparea pielii.
Restrictionat la utilizari profesionale din cauza clasificării cancerigen, categoria 1B, cu excepția utilizărilor drept carburant/combustibil.

2.3 Alte pericole

Note : De regulă, produsul este prelucrat în stare încălzită (până la 90 °C).
Produsul este livrat și transportat la temperatura mai mică de 60 °C
Contactul cu acesta poate provoca arsuri.
Pericol ridicat de alunecare ca urmare a deversării accidentale a produsului.
Produsul nu conține constituenți PBT incluși în lista candidaților SVHC în concentrații mai mari de 0,1%.

SECȚIUNEA 3. COMPOZIȚIE/INFORMAȚII PRIVIND COMPONENTELE

3.1 Substanțe

Nu se aplică

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

3.2 Amestecuri

Natura chimică	hidrocarburi
----------------	--------------

Ingrediente periculoase

Denumirea substanței chimice	Număr Index Nr. CAS Nr. EINECS/Nr. ELINCS (Lista Europeană a Substanțelor Chimice Notificate) Număr de înregistrare	Clasificare (Regulamentul (CE) Nr. 1272/2008)	Concentrație [% m/m]
distilate sub vid (petrol), reziduuri de petrol	649-034-00-3 68955-27-1 273-263-4 01-2119489711-31-0030	Acute Tox. 4; H332 Repr. 2; H361d Carc. 1B; H350 STOT RE 2; H373 Aquatic Acute 1; Factor de multiplicare = 1; H400 Aquatic Chronic 1; Factor de multiplicare = 1; H410	30,00 - 100,00

Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Nu reprezintă specificație a produsului / procente greutate max. posibile
Pentru textul complet al frazelor de pericol H menționate în această Secțiune și metodele de clasificare, consultați Secțiunea 16.

SECȚIUNEA 4. MĂSURI DE PRIM AJUTOR

4.1 Descrierea măsurilor de prim ajutor

Indicații generale	: Întotdeauna evaluați condițiile de securitate de la fața locului, înainte de a încerca să salvați victimele și a acorda primul ajutor. Este necesară protecția proprie a persoanelor care acordă măsurile de prim ajutor. Întotdeauna solicitați ajutor, înainte de a ajuta victima.
Inhalare	: După inhalarea accidentală a vaporilor, persoana (persoanele) afectată (afectate) trebuie transportată (transportate) la aer curat. Mențineți victima la căldură și în poziție de repaus. Dacă victima este conștientă, așezați-o în poziția de recuperare. (în poziție verticală sau înclinat ușor în față în poziție șezând). Dacă victima este inconștientă și nu respiră: asigurați-vă că nu există obstrucții ale respirației și dispuneți administrarea respirației artificiale de către personal instruit. Dacă este necesar, aplicați masaj cardiac extern și cereți sfatul medicului. Dacă victima este inconștientă și respiră: așezați-o în poziția de recuperare. Administrați oxigen dacă este necesar. Solicitați asistență medicală dacă respirația continuă să fie dificilă. Dacă se suspectează inhalarea de H ₂ S (hidrogen sulfurat): Personalul salvator trebuie să poarte măști de oxigen, centură și frânghie de siguranță și să respecte procedurile de salvare. Transportați victima la aer curat cât mai repede posibil. Inițiați imediat respirația artificială dacă respirația s-a oprit. Poate fi utilă administrarea de oxigen. Solicitați sfatul medicului pentru tratamentul ulterior.
Contact cu pielea	: Îndepărtați îmbrăcămintea contaminată, încălțămintea contaminată și eliminați-le în siguranță. Spălați zona afectată cu apă și săpun. (10 până la 15 minute). Nu utilizați niciodată benzină, kerosen sau alți solvenți pentru spălarea pielii contaminate. Solicitați îngrijire medicală dacă apare iritația, inflamarea sau înroșirea pielii. Atunci când utilizați echipamente de înaltă presiune, se poate produce injectarea produsului. Dacă se produc leziuni la presiuni mari, solicitați imediat asistență medicală profesionistă. Nu așteptați să apară simptomele. În cazul arsurilor termice minore, răcoriți arsura. Țineți zona arsă sub un jet de apă rece timp de cel puțin cinci minute sau până când durerea scade în intensitate. Trebuie evitată hipotermia corpului. Nu aplicați gheață pe arsură. Îndepărtați cu atenție hainele neaderente. NU încercați să îndepărtați porțiuni de îmbrăcăminte lipite de pielea arsă, ci tăiați în jurul acestora. Cereți sfatul medicului în toate cazurile de arsuri grave.
Contact cu ochii	: După contactul cu ochii clătiți timp de 10-15 minute, ținând pleoapele deschise cu jet de apă sau cu soluție din recipientul pentru spălarea ochilor. Îndepărtați lentilele de contact, dacă sunt prezente și sunt ușor de scos. Continuați clătirea. Dacă se produc și persistă iritații, vedere încețoșată sau umflături, solicitați recomandări medicale de la un specialist. Dacă produsul fierbinte este împrăștiat în ochi, acesta trebuie răcit imediat pentru a disipa căldura sub un jet de apă rece. Asigurați imediat un consult și un tratament medical specializat pentru victimă.
Ingerare, Absorbție substanță în plămâni	: Nu induceți vomă. Solicitați asistență medicală. Clătiți gura cu apă dacă persoana este complet conștientă și solicitați imediat asistență medicală. Nu administrați nimic pe gură unei persoane inconștiente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

4.2 Cele mai importante simptome și efecte, atât acute cât și întârziate

Simptome	: Iritarea căilor respiratorii din cauza expunerii excesive la fum, ceață sau expunerea la vapori. Piele uscată, iritație în cazul expunerii repetate sau prelungite. Ușoară iritație oculară (nespecific). Poate cauza arsuri în caz de contact cu produsul la temperaturi înalte. Prin ingestie se preconizează puține simptome sau niciun simptom. În acest caz, s-ar putea produce greață și diaree.
Efecte	: Prin inhalare: iritația nasului și a tractului respirator. În caz de contact cu pielea: poate provoca iritație ușoară. În caz de contact cu ochii: poate provoca iritație reversibilă ușoară.

4.3 Indicații privind orice fel de asistență medicală imediată și tratamente speciale necesare

Tratament	: Dacă este necesar, solicitați spitalizarea persoanei. După înghițirea unor cantități mai mari de 1-2 ml/kg greutate corporală este necesară administrarea de cărbune activ (aproximativ 50 g) și spitalizarea persoanei. În cazul unei stări puternice de agitație, este necesară sedarea persoanei (la indicația medicului).
------------------	---

SECȚIUNEA 5. MĂSURI DE COMBATERE A INCENDIILOR

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare	: Dacă focarul de incendiu este mic: pulbere de stingere, spumă (numai personal special instruit) aeromecanică sau bioxid de carbon. Ceață de apă (numai personal special instruit); Alte gaze inerte (în conformitate cu reglementările); Nisip sau pământ. În cazul unui focar de incendiu extins: spumă
Mijloace de stingere necorespunzătoare	: Nu utilizați jeturi de apă directe pe produsul ce arde; ar putea provoca împrăștierea și răspândirea focului. Se va evita utilizarea simultană de spumă și apă pe aceeași suprafață deoarece apa distruge spuma.

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Pericol specific din cauza substanței sau amestecului, din cauza produselor de combustie sau din cauza gazelor generate prin ardere.	: Această substanță plutește și se poate reaprinde la suprafața apei. Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Combustia incompletă poate genera un amestec complex de particule solide și lichide aeropurtate și gaze, inclusiv monoxid de carbon, H ₂ S, SO _x (oxizi de sulf) sau acid sulfuric și compuși organici și anorganici neidentificați.
---	--

5.3 Recomandări destinate pompierilor

Echipament special de protecție	: În cazul unui incendiu de proporții sau în spațiile închise și insuficient aerisite, purtați îmbrăcăminte de protecție ignifugă și chimică completă și un aparat de respirat autonom (SCBA) cu o mască pentru întreaga față acționat în modul de presiune pozitivă.
--	---

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Informații suplimentare	:	Răcirea imediată a recipientelor și a ambalajelor din apropiere cu apă pulverizată, și, dacă este posibil, îndepărtarea acestora din zona de pericol. Reziduurile de ardere și apa contaminată utilizată la stingerea incendiilor trebuie eliminate conform prevederilor impuse de autoritățile locale.
-------------------------	---	---

SECȚIUNEA 6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Precauții pentru personal	:	<p>Se acționează din aceeași direcție cu direcția vântului (atenție la schimbarea direcției vântului). Identificarea și închiderea zonei de pericol. Atunci când se suspectează sau se demonstrează prezența unor cantități periculoase de H₂S în jurul produsului vărsat, pot fi justificate acțiuni suplimentare sau speciale, inclusiv restricționări ale accesului, utilizarea de echipamente speciale de protecție, proceduri speciale și instruirea personalului. Țineți personalul neimplicat la distanță de zona deversării. Alertați personalul de urgență. Aerisirea corespunzătoare a încăperilor contaminate. Evitați contactul direct cu materialul eliberat. Exceptând deversările de mică amploare: Fezabilitatea oricăror acțiuni trebuie întotdeauna evaluată și avizată, dacă este posibil, de o persoană competentă instruită responsabilă cu gestionarea situației de urgență. În cazul unei emisii de ampolare, alertați locuitorii aflați în direcția de bătaie a vântului. Eliminați toate sursele de aprindere dacă acest lucru prezintă siguranță (de exemplu, electricitate, scântei, incendii, flăcări intermitente). Echipament de protecție individuală pentru situații de urgență. Deversări de mică amploare: hainele de lucru antistatice normale sunt, de obicei, suficiente. Deversări de ampolare: costum pentru întregul corp din material antistatic și rezistent la substanțe chimice. dacă este necesar, termorezistent și izolat termic.</p> <p>Mănuși de lucru care asigură rezistență adecvată la substanțe chimice, în special la hidrocarburi aromatice. Notă: mănușile din PVA (alcool polivinilic) nu sunt impermeabile și nu sunt potrivite pentru utilizare în caz de urgență. Dacă este posibil sau se anticipează contactul cu produsul fierbinte, mănușile trebuie să fie termorezistente și izolate termic.</p> <p>Protecție respiratorie: O mască de protecție obișnuită sau pentru întreaga față cu filtru(e) de compuși organici (și, după caz, de H₂S). se poate utiliza un aparat de respirat autonom (SCBA) în funcție de extinderea deversării și de gradul prognozat de expunere. Dacă situația nu poate fi evaluată complet sau dacă este posibilă lipsa oxigenului, trebuie utilizate doar aparate SCBA. Cască de protecție. Încălțăminte de protecție antistatică nederapantă. Dacă este necesar, termorezistente. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii.</p>
---------------------------	---	--

6.2 Precauții pentru mediul înconjurător

Precauții pentru mediul înconjurător	:	<p>Etanșarea punctului de scurgere. Prevenirea scurgerii în canalizare, în apele de suprafață și în apa din pânza freatică prin realizarea unor diguri din nisip, respectiv pământ sau prin alte măsuri de îndiguire. În cazul unei scurgeri în apele de suprafață, în rețeaua de canalizare sau pe/în sol este necesară informarea autorităților competente. Lăsați produsul fierbinte să se răcească natural. Deversările de ampolare pot fi acoperite atent cu spumă, dacă este disponibilă, pentru a limita riscul de incendiu. Nu utilizați jeturi directe. Asigurați ventilația adecvată în interiorul clădirilor sau în spații închise. Absorbiți produsul vărsat cu materiale necombustibile adecvate.</p>
--------------------------------------	---	--

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

6.3 Metode și materiale pentru izolarea incendiilor și pentru curățenie

Procedee adecvate pentru curățare sau absorbție sau izolare	:	Aspirarea /evacuarea prin pompare a cantităților mari. Colectarea cantităților reziduale cu materiale absorbante neinflamabile, de exemplu nisip, pământ sau liant pentru ulei, respectiv îndiguirea acestora. Colectarea deșeurilor în containere etichetate adecvat pentru deșeuri periculoase și eliminarea ulterioară conform normelor și legislației în vigoare. În caz de contaminare a solului, îndepărtați solul contaminat și tratați în conformitate cu reglementările locale. Utilizarea agenților de dispersie trebuie avizată de un expert și, dacă este necesar, aprobată de autoritățile locale.
Procedee neadecvate pentru curățare sau absorbție sau izolare	:	Fără date disponibile

6.4 Trimitere la alte secțiuni

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

SECȚIUNEA 7. MANIPULARE ȘI DEPOZITARE

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări pentru manipularea în condiții de securitate	:	Procurați instrucțiuni speciale înainte de utilizare. Asigurați-vă că toate reglementările relevante privind facilitățile de manipulare și depozitare a produselor inflamabile sunt respectate. Trebuie efectuată o evaluare specifică a riscurilor de inhalare cauzate de prezența H ₂ S în spațiile libere din rezervoare, spațiile închise, reziduurile de produse, deșeurile din rezervoare și apele reziduale, precum și a diseminărilor accidentale pentru a putea determina măsurile de control potrivite situației locale. Se va utiliza numai în echipamente închise. Aspirarea vaporilor la locul de emisie. În spațiile libere ale rezervoarelor de depozitare a produsului se poate acumula hidrogen sulfurat (H ₂ S), putând atinge concentrații potențial periculoase. Dacă este posibil, se va face aerisirea încăperii la nivelul solului. Evitarea contactului cu pielea, cu ochii și cu îmbrăcămintea. Trebuie luate măsuri de protecție pentru a evita arsurile cutanate în timpul manipulării produsului fierbinte. Utilizați echipamente individuale de protecție adecvate după cum este necesar. Evitați scurgerea produsului. A se utiliza și depozita doar în exterior sau într-un spațiu bine aerisit.
Recomandări de prevenire a incendiului și a exploziei	:	Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. Aveți grijă la acumularea în puțuri și spațiile închise. A nu se inspira aburi/ceață/vapori. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Adoptați măsuri împotriva încărcării electrostatice. Luați măsuri de precauție împotriva electricității statice. Containere, rezervoare și echipamente de transfer/colectare legate la pământ/fixate Legați la centura de împământare toate echipamentele de lucru utilizate. A se feri de sursele de aprindere.

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Cerințe pentru spațiile de depozitare și containere	: Disponerea zonei de depozitare, construcția rezervoarelor, echipamentele și procedurile de operare trebuie să respecte legislația europeană, națională sau locală relevantă. Instalațiile de depozitare trebuie proiectate cu împrejurimi adecvate pentru a preveni poluarea solului și apelor în caz de scurgeri sau deversări. Recipientele vor fi păstrate închise etanș și într-un loc bine ventilat. Este permisă numai utilizarea unor recipiente staționare autorizate. Toate rezervoarele și echipamentele se vor lega la centura de împământare. Depozitați într-un spațiu corespunzător. De regulă este necesară existența unui spațiu de depozitare etanșat și rezistent. Materiale recomandate: Pentru containere sau căptușeala containerelor folosiți oțel cu conținut scăzut de carbon (moale) sau oțel inoxidabil. Materiale nepotrivite: Anumite materiale sintetice pot fi nepotrivite pentru containere sau căptușeala containerelor, în funcție de specificațiile și utilizarea materialului. Compatibilitatea trebuie verificată împreună cu producătorul. Containerele goale pot conține reziduuri de produse combustibile. Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.
Informații suplimentare asupra condițiilor de depozitare	: Evitarea efectului termic. A se feri de sursele de aprindere. Curățarea, inspectarea și întreținerea structurii interne a rezervoarelor de depozitare trebuie efectuate doar de personal calificat și echipat corespunzător, conform prevederilor din reglementările naționale, locale sau ale companiei. În spațiile libere ale rezervoarelor de depozitare a produsului se poate acumula hidrogen sulfurat (H ₂ S), putând atinge concentrații potențial periculoase. Înainte de a pătrunde în rezervoarele de depozitare și de a iniția orice operațiune într-o zonă închisă, verificați conținutul de oxigen, nivelul de hidrogen sulfurat (H ₂ S) și inflamabilitatea din atmosferă.
Măsuri de protecție în cazul depozitării în comun	: A nu se depozita împreună cu substanțe periculoase explozive, gaze, alte substanțe periculoase potențial explozive, substanțe periculoase puternic oxidante, azotat de amoniu și produse care conțin azotat de amoniu, peroxizi organici și substanțe periculoase auto-reactive, substanțe infecțioase sau substanțe radioactive. Restricții la depozitarea împreună cu substanțe periculoase piroforice sau care se autoîncălzesc, substanțe periculoase care degajă gaze inflamabile în contact cu apa sau substanțe periculoase oxidante. Ca urmare a normelor specifice de depozitare și din cauza caracteristicilor speciale ale substanțelor/amestecurilor dintr-un depozit, în urma evaluării riscurilor, pot rezulta și alte limitări (restricții).

7.3 Utilizare finală specifică (utilizări finale specifice)

Instrucțiuni legate de utilizări specifice	: Se va utiliza numai în scopurile prevăzute/relevante. Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Nu se cunosc date

Valori limită biologice pentru componenți

Nu se cunosc date

DNEL/DMEL pentru produs

Utilizare finală: Muncitor, efecte sistemice la expunere acută
Rute de expunere: inhalare;
Valoare: 4716,8 mg/m³
DNEL, Cel mai sensibil criteriu: Toxicitate acută (inhalare)

Utilizare finală: Muncitor, efecte sistemice, pe termen lung
Rute de expunere: piele;
Valoare: 0,065 mg/kg/zi
DNEL, Cel mai sensibil criteriu: Dezvoltare / Toxicitate teratogenă

Utilizare finală: Muncitor, efecte sistemice la expunere pe termen lung
Rute de expunere: inhalare;
Valoare: 0,18 mg/m³
DNEL, Cel mai sensibil criteriu: Dezvoltare / Toxicitate teratogenă

PNEC pentru produs

apă, ape reziduale, sol, sediment
Nu pot fi atribuite valori unice PNEC, deoarece produsul este un amestec de substanțe UVCB constituite din hidrocarburi.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

8.2 Controale ale expunerii

Se va utiliza numai în scopurile prevăzute/relevante., Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Măsuri generale de protecție

Măsuri de igienă	:	Asigurați-vă că sunt instituite măsuri de administrare adecvate. Evitarea contactului cu ochii, cu pielea și cu îmbrăcămintea. Hainele contaminate cu produs trebuie schimbate imediat și curățate înainte de reutilizare.
-------------------------	---	--

Echipament personal de protecție

Protecție respiratorie	:	Când se produc vapori: utilizați protecție respiratorie cu filtru A pentru gaz, culoare caracteristică maro (A1 până la 0,1 vol%, A2 până la 0,5 vol%, A3 până la 1 vol%). În cazul unor concentrații ridicate și în situația în care nu există informații suficiente, se va utiliza numai aparat pentru protecția respirației autonom (izolant).
Protecția mâinilor	:	<p>În practică, durata de utilizare a mănușilor recomandate pentru protecția împotriva substanțelor chimice poate fi mai redusă decât timpul de penetrare determinat conform normelor EN 374 din cauza numărului mare de factori de influență (de exemplu temperatură, sarcină mecanică). În cazul unui posibil contact cu mâinile, a se purta mănuși de protecție rezistente împotriva pătrunderii lichidelor. Atenție la alegerea mănușilor potrivite când lucrați cu produse, țevi etc., fierbinți!</p> <p>Material: Nitril; Timpul de penetrare: 480 min Grosimea materialului: 0,40 mm Metodă de verificare: EN 374</p> <p>Material: Viton; Timpul de penetrare: 480 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Butil; Timpul de penetrare: 120 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Policloropren; Timpul de penetrare: 60 min Grosimea materialului: 0,60 mm Metodă de verificare: EN 374</p>
Protecția ochilor / feței	:	În cazul în care există pericol de stropire se vor utiliza ochelari cu protecție integrală sau mască de protecție. În caz contrar, ochelari de siguranță cu protecție laterală.
Protecția corpului	:	Utilizarea, în toate cazurile, de îmbrăcăminte rezistentă la foc și antistatică pe termen lung. Cască de protecție. Încălțăminte de protecție antistatică nederapantă.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Controlul expunerii mediului

Controlul expunerii mediului	:	Se va utiliza numai în echipamente închise. Dacă există risc de expunere, trebuie asigurată extracția/ventilația adecvată. Respectarea valorilor limită cu privire la emisii, dacă este cazul, asigurând o ventilație cu evacuare a aerului (dacă este necesar). În cazul unui transport în recipiente care nu prezintă siguranță împotriva fisurării, se recomandă utilizarea de containere exterioare corespunzătoare. A se vedea și Secțiunea 6 " Măsuri de luat în caz de dispersie accidentală ".
-------------------------------------	---	--

8.3 Informații suplimentare

În situația concretă de utilizare, ca urmare a evaluării individuale de pericol poate fi necesară utilizarea de echipamente diferite de protecție a persoanei.

SECȚIUNEA 9. PROPRIETĂȚI FIZICE ȘI CHIMICE

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect	:	lichid
Stare de agregare	:	lichid
Culoare	:	maro-negru
Miros	:	tipic
Prag de acceptare a mirosului	:	Miros perceptibil

Caracteristica	Valori	Metodă	Notă
pH			nu se aplică
punct de topire/punct de congelare	$\leq 30\text{ }^{\circ}\text{C}$	ISO 3016	punct de curgere
interval de fierbere			Nedeterminat
Punct de inflamabilitate	$> 60\text{ }^{\circ}\text{C}$	EN ISO 2719	
Viteză de evaporare			nu se aplică
Tranziție de fază solid/gaz			---
Limită inferioară de explozie	cca. 0,6 %(V)		Date literatura

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

SECȚIUNEA 11. INFORMAȚII TOXICOLOGICE

11.1 Informații privind efectele toxicologice

Toxicitate acută

Efect oral acut	: LD50 șobolan, mascul/femelă Doză: > 4.320 mg/kg Metodă: OECD 401 Substanță de test: 64741-62-4
Efect acut la inhalare	: LC50 șobolan, mascul/femelă Doză: 4100 mg/m3/ 4 o Metodă: EPA OTS 798.1150 Substanță de test: 64741-62-4
Efect acut cutanat	: LD50 iepure, mascul/femelă Doză: > 2.000 mg/kg Metodă: OECD 434 Substanță de test: 64741-62-4
Alte efecte acute	: Nu sunt disponibile date relevante
Alte efecte	: Expunerea repetată poate provoca uscarea sau crăparea pielii.

Corodarea/iritarea pielii

Iritația pielii	: Piele de iepure Rezultat: nu este iritant Metodă: EU Method B.4 Substanță de test: 64741-57-7
-----------------	--

Lezarea gravă/iritarea ochilor

Iritația ochilor	: Ochi de iepure Rezultat: nu este iritant Metodă: EU Method B.5 Substanță de test: 64741-57-7
------------------	---

Sensibilizarea căilor respiratorii sau a pielii

sensibilizare	: Test Buehler Piele de cobai Clasificare: nu provoacă sensibilizare Metodă: EU Method B.6 Substanță de test: 64741-62-4
---------------	--

Mutagenitatea celulelor germinative

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Genotoxicitate în vitro	: Testul Ames modificat Rezultat: pozitiv Metodă: OECD 471 Substanță de test: 64741-62-4
Genotoxicitate în vivo	: Încercare micronucleară (clastogenicitate) Substanță de test: 64741-62-4 Metodă: EU Method B.12 Rezultat: negativ
Evaluare toxicologică / Mutagenitatea celulelor germinative	: nu există criterii de clasificare pentru mutagenitate

Cancerogenitatea

Efect cancerigen	: dermic, șoarece Substanță de test: 64741-62-4 Metodă: OECD 451 NOAEL Doză: 0,1% (mascul)
Evaluare toxicologică / Cancerogenitatea	: Poate cauza cancer.

Toxicitate pentru reproducere

Toxicitate pentru reproducere/fertilitate	: Conform coloanei II din Anexa X REACH, studiul nu trebuie realizat dacă substanța este cunoscută a fi genotoxic-cancerigenă și sunt adoptate măsuri adecvate de management al riscurilor.
Toxicitate pentru dezvoltare/teratogenicitate	: Mod de aplicare: piele; șobolan Substanță de test: 64741-62-4 Metodă: EPA OTS 798.4900 NOAEL: Doză 0,05 mg/kg/zi
Evaluare toxicologică / Toxicitate pentru dezvoltare/teratogenicitate Toxicitate pentru reproducere/fertilitate	: Pe baza componentelor, produsul este clasificat drept toxic pentru reproducere, Nu există criterii de clasificare pentru fertilitate Pe baza datelor disponibile, produsul este clasificat ca teratogen.

Toxicitate asupra unui organ țintă specific - expunere unică

Toxicitate asupra unui organ țintă specific - expunere unică	: concludent, dar insuficient pentru clasificare
---	--

Toxicitate asupra unui organ țintă specific - expunere repetată

Efecte în cazul expunerii repetate sau de lungă durată	: Poate provoca leziuni ale organelor în caz de expunere prelungită sau repetată. Organe țintă: sânge, timus, ficat
---	--

Pericol prin aspirare

Toxicitate prin aspirare	: Fără risc de aspirație
---------------------------------	--------------------------

Efecte neurologice

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Efecte narcotice	:	nici unul cunoscut
------------------	---	--------------------

Evaluare toxicologică /

Efecte acute	:	Produsul se clasifică ca fiind nociv la inhalare.
Sensibilizare	:	Conform datelor disponibile, produsul nu se clasifică ca fiind un produs cu efecte de sensibilizare.
Toxicitate la doză repetată	:	Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.

11.2 Informații suplimentare

Alte informații	:	Expunerea repetată poate provoca uscarea sau crăparea pielii.
-----------------	---	---

SECȚIUNEA 12. INFORMAȚII ECOLOGICE

12.1 Toxicitatea

Toxicitate acută

Toxicitate acută la pești	:	LL50 Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 79 mg/l Durată de expunere: 96 o Substanță de test: 68476-33-5 Metodă: OECD 203
Toxicitate acută în cazul nevertebratelor acvatice	:	EL50 Specii: Daphnia magna (Purici de apă mari) Doză: 0,22 mg/l Durată de expunere: 48 o Substanță de test: 64741-61-3 Metodă: OECD 202
Toxicitatea pentru alge și plantele acvatice	:	EL50 Specii: Pseudokirchneriella subcapitata Doză: 0,28 - 0,37 mg/l Durată de expunere: 72 o Substanță de test: 64741-61-3 Metodă: OECD 201

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Toxicitate la microorganisme	: LL50 Specii: Tetrahymena pyriformis Doză: > 1.000 mg/l Durată de expunere: 72 o Substanță de test: păcură grea Metodă: QSAR
Toxicitate pentru organismele edafice	: nu există date
Toxicitate în cazul plantelor terestre	: nu există date
Toxicitate asupra altor organisme terestre (care nu sunt mamifere)	: NOAEL Specii: Anas platyrhynchos Doză: 20000 mg/kg/zi Durată de expunere: 22 Săpt. Substanță de test: titei North Slope expus la intemperii (WEVC) Metodă: OECD 206

Toxicitate cronică

Toxicitate pentru pești (Toxicitate cronică)	: NOEL (mortalitate) Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 0,1 mg/l Durată de expunere: 28 z Substanță de test: păcură grea Metodă: QSAR
Toxicitate la daphnia și alte nevertebrate acvatic. (Toxicitate cronică)	: NOEL (Reproducere) Specii: Daphnia magna Doză: 0,27 mg/l Durată de expunere: 21 z Substanță de test: păcură grea Metodă: QSAR
Acvatică acută	: Conform datelor eco-toxicologice, produsul este clasificat ca fiind foarte toxic pentru organisme acvatic.
Acvatică cronică	: Pe baza datelor ecotoxicologice, produsul este considerat periculos pentru mediu, cu efecte îndelungate.
Date de toxicitate în sol	: nu există date
Alte organisme relevante din punct de vedere al mediului	: nu există date

12.2 Persistență și degradabilitate

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Persistență, Biodegradare	:	Metodă: Model computerizat Petrorisk Combustibilii petrolieri grei sunt rezistenți la hidroliză, deoarece nu conțin un grup funcțional reactiv din punct de vedere hidrolitic. Mai mult, aceștia nu suferă fotoliză în apă sau sol.
---------------------------	---	--

12.3 Potențial de bioacumulare

Bioacumulare	:	Nu sunt disponibile date relevante, Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. , Testele standard pentru acest efect sunt destinate pentru substanțe mono-component și nu sunt adecvate pentru această substanță complexă. , Cu toate acestea, acest efect a fost calculat pentru structurile hidrocarburilor reprezentative (model PETRORISK). , Valorile estimate pentru BCF sunt în general supra-conservative, întrucât nu este luată în considerare biotransformarea. , Prin urmare, este posibil ca expunerile indirecte și estimările de risc prognozate conform PETRORISK să fie supraestimate. Potențial de bioacumulare (Coeficient de partiție (n-octanol/apă)): nu există date
--------------	---	---

12.4 Mobilitate în sol

Mobilitate	:	Note: Nu lăsați produsul să fie eliberat necontrolat în mediu.
Transport între diferite medii	:	Nu sunt informații relevante disponibile. Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. Testele standard pentru acest efect sunt destinate pentru substanțe mono-component și nu sunt adecvate pentru această substanță complexă. Cu toate acestea, acest efect este caracterizat prin utilizarea relațiilor cantitative structura-activitate pentru structurile hidrocarburilor reprezentative (model PETRORISK).
Capacitate de eliminare fizico-chimică	:	Acest produs este insolubil în apă și plutește la suprafața acesteia. Poate fi separat mecanic, în stații de tratare a apelor uzate.

12.5 Rezultate ale evaluării PBT și vPvB

Rezultate ale evaluării PBT și vPvB	:	Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. , Informații suplimentare relevante pentru evaluarea PBT a acestei substanțe sunt necesare. , Unele eșantioane ale acestei substanțe pentru care sunt disponibile date analitice, conțin constituenți PBT/vPvB incluși în lista candidaților SVHC în concentrații mai mari de 0,1%. , Nu au fost identificate alte structuri de hidrocarburi reprezentative care să satisfacă criteriile PBT / vPvB.
-------------------------------------	---	---

12.6 Alte efecte adverse

Efecte asupra stațiilor de epurare	:	Conform datelor modelului QSAR referitor la categoria combustibililor petrolieri grei, produsul nu are efecte toxice acute față de microorganismele din instalațiile de tratare a apelor reziduale (LL50>1000 mg/l). Cu toate acestea, există posibilitatea unor efecte cronice față de microorganisme (NOEL 15 mg/l).
Alte efecte adverse	:	Nu evacuați hidrocarburi lichide în sistemul de canalizare, cursuri de apă și pe sol. În caz de accident, contactați echipele speciale de intervenție și anunțați autoritățile locale competente.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

SECȚIUNEA 13. CONSIDERAȚII PRIVIND ELIMINAREA

13.1 Metode de tratare a deșeurilor

Instrucțiuni privind eliminarea deșeurilor de produs	:	Reziduurile de produs vor fi eliminate conform prevederilor legale.
Instrucțiuni privind eliminarea deșeurilor de ambalaj	:	În măsura în care produsul a fost livrat în ambalaj, de preferat, ambalajele goale vor fi refolosite sau, dacă nu există această posibilitate, vor fi transportate la un punct de valorificare / eliminare finală a deșeurilor periculoase.
Codul deșeurilor conform Catalogului european al deșeurilor în cazul utilizării conform Secțiunii 1:		
Cod deșeu de produs	:	13 07 03* alți combustibili (inclusiv amestecuri)
Cod deșeu de ambalaj	:	15 01 10* ambalaje care conțin reziduuri de substanțe periculoase sau sunt contaminate cu substanțe periculoase

13.2 Informații suplimentare

Codul de deșeu depinde de originea deșeurilor și, în situații individuale, poate diferi de informațiile de mai sus.

Legislația privind eliminarea deșeurilor de produs:

Legea nr 211/2011 privind regimul deșeurilor, cu modificările și completările ulterioare ;

HG 235/2007 privind gestionarea uleiurilor uzate;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 349/2005 privind depozitarea deșeurilor, cu modificările și completările ulterioare;

HG 856/2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase, cu modificările și completările ulterioare;

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

Legislația pentru deșeurile de ambalaje:

Ordinul nr. 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deseuri de ambalaje;

Legea nr. 249/2015 privind modalitatea de gestionare a ambalajelor și deșeurilor de ambalaje, cu modificările și completările ulterioare.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S

Informații suplimentare

Produsul este transportat, depozitat și prelucrat la temperaturi mai mici de 100 °C.

La cerere, producătorul vă oferă informații suplimentare referitoare la clasificarea produsului pentru transport.

SECȚIUNEA 15. INFORMAȚII DE REGLEMENTARE

15.1 Regulamente/legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispoziții comunitare privind protecția sănătății și a mediului

Directiva 2010/75/UE privind emisiile industriale (prevenirea și controlul integrat al poluării) - Capitolul V - Dispoziții speciale aplicabile instalațiilor și activităților care utilizează solvenți organici.	:	Produsul nu face obiectul directivei COV dacă se utilizează în scopurile prevăzute (vezi secțiunea 1.2).
Regulamentul (CE) nr. 1907/2006, Anexa XVII	:	nr. 28 Substanțe cancerigene din categoria 1A, respectiv 1 sau categoria 1B, respectiv 2;
Directiva 2012/18/UE a Parlamentului European și a Consiliului din 4 iulie 2012 privind controlul pericolelor de accidente majore care implică substanțe periculoase, de modificare și ulterior de abrogare a Directivei 96/82/CE a Consiliului (SEVESO III).	:	Anexă I, Partea 1: E1 Periculoase pentru mediul acvatic în categoria acut 1 sau cronic 1. Anexa I Partea 2: 34. Produse petroliere și carburanți alternativi. (d) păcură

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Directiva 92/85/CEE a Consiliului din 19 octombrie 1992 privind introducerea de măsuri pentru promovarea îmbunătățirii securității și a sănătății la locul de muncă în cazul lucrătoarelor gravide, care au născut de curând sau care alăptează [a zecea directivă specială în sensul articolului 16 alineatul (1) din Directiva 89/391/CEE]	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.
Directiva 94/33/CE a Consiliului din 22 iunie 1994 privind protecția tinerilor la locul de muncă	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.

Alte reglementări:

Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006, cu modificările și completările ulterioare.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase, cu modificările și completările ulterioare;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă, cu modificările și completările ulterioare;

Regulamentul (CE) nr. 1907/2006 privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), cu modificările și completările ulterioare.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006

Legea 319/2006 privind Securitatea și sănătatea în muncă, cu modificările și completările ulterioare;

HG 1218/2006 privind stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici, cu modificările și completările ulterioare;

OUG 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) 1.907/2006, cu modificările și completările ulterioare.

Legea nr.59/2016 privind controlul asupra pericolelor de accident major în care sunt implicate substanțe periculoase.

OUG 96/2003 privind protecția maternității la locul de muncă, cu modificările și completările ulterioare.

HG 600/2007 privind protecția tinerilor la locul de muncă, cu modificările și completările ulterioare

Hotărârea nr. 893/2006 pentru modificarea Hotărârii Guvernului nr. 1.593/2002 privind aprobarea Planului național de pregătire, răspuns și cooperare în caz de poluare marină cu hidrocarburi.

15.2 Evaluarea securității chimice

S-a efectuat evaluarea privind siguranța chimică, în cadrul procesului de înregistrare REACH a substanțelor componente. S-a confirmat faptul, că în caz de controlare a componentei principale ca substanță primară se poate asigura controlul corespunzător și pentru celelalte componente ale amestecului. În consecință, în Anexă sunt listate scenariile de expunere elaborate pentru componenta principală. Pentru scenariile de expunere relevante, consultați Anexa.

SECȚIUNEA 16. ALTE INFORMAȚII

Textul integral al frazelor de pericol H menționate la Secțiunile 2 și 3

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Acute Tox.	Toxicitate acută
Aquatic Acute	Toxicitate acvatică acută
Aquatic Chronic	Toxicitate acvatică cronică
Asp. Tox.	Pericol de aspirare
Carc.	Carcinogenicitate
Flam. Liq.	Lichide inflamabile
Repr.	Toxicitate reproductivă
Skin Irrit.	Corodarea/Iritarea pielii
STOT RE	Toxicitate asupra unui organ țintă specific - expunere repetată
H226	Lichid și vapori inflamabili.
H304	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H315	Provoacă iritarea pielii.
H332	Nociv în caz de inhalare.
H350	Poate provoca cancer.
H361d	Susceptibil de a dăuna fătului
H373	Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.
H400	Foarte toxic pentru viața acvatică.
H410	Foarte toxic pentru viața acvatică având efecte de lungă durată.

Anexă

Scenariile de expunere pentru cele mai frecvente utilizari sunt enumerate mai jos. Dacă este necesar, se pot furniza la cerere și alte scenarii de expunere.

1. Titlu scurt al Scenariului de expunere: 01-Producerea substanței

Stadiul ciclului de viață	: M: Producere
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC1: Producerea substanței
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 1.1.v1
Procese, sarcini, activități acoperite	: Producerea substanței. Include transferurile de material, depozitarea, prelevarea de eșantioane, activitățile de laborator asociate, întreținerea și încărcarea (inclusiv în vapoare/barje, vehicule de transport combinat rutier/feroviar și containere pentru materiale în vrac).

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC1, Producerea substanței

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofoba.
Tonaj pentru utilizare regională	: 2,7 10E6 t/an
Fracțiune de tonaj UE utilizată în regiune:	: 0,2
Fracțiune din tonajul regional utilizat la nivel local:	: 1,0
Tonaj anual la amplasament (tone/an)	: 2,7 10E6
Tonaj zilnic maxim la amplasament	: 9,1 10E6 kg/zi
MSafe (tonaj maxim permis la amplasament)	: 1,17 10E7 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Frecvența și durata folosirii

Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,001 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,010 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 90,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de >= (%): 89,2 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Preveniți descărcarea substanței nedizolvate în sau recuperați-o din apele reziduale de la amplasament. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Debitul efluentului în stația de tratare a apelor reziduale : 10.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : În timpul producției nu sunt generate reziduuri/deșeuri de substanță/material.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : În timpul producției nu sunt generate reziduuri/deșeuri de substanță/material.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC1** : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Productie chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC15** : Utilizare ca reactiv de laborator

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid
- Presiune de vapori : Lichid, presiune de vapori la STP. < 0,5 kPa
- Note : Operațiunea se desfășoară la temperatură ridicată (> 20°C peste temperatura ambiantă), Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Cantitatea folosită

nu se aplică :

Frecvența și durata folosirii

Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS2 Eșantionarea procesului + OC9 în aer liber

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS2 Eșantionarea procesului + OC9 în aer liber

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS2 Eșantionarea procesului + OC9 în aer liber

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

1. Titlu scurt al Scenariului de expunere: 01a - Distribuția substanței

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC4: Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC5: Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol ERC6a: Utilizarea unui intermediar ERC6b: Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC6c: Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC6d: Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoriea Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 1.1b.v1
Procese, sarcini, activități acoperite	: Încărcarea în vrac (incluzând încărcarea în nave maritime/barje, vagoane de cale ferată/autocisterne și containere intermediare de transport în vrac) și reambalarea (incluzând canistre și recipiente mici) a substanței/materialului, inclusiv eșantionarea, depozitarea, descărcarea și activitățile de laborator asociate. Nu include emisiile din timpul transportului.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC4, Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC5, Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol
ERC6a, Utilizarea unui intermediar
ERC6b, Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC6c, Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC6d, Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Cantitatea folosită

Note : Substanța este un produs UVCB complex. Preponderent hidrofoba.

Tonaj pentru utilizare regională : 1,7 10E6 t/an

Fracțiune de tonaj UE utilizată în regiune: : 0,1

Fracțiune din tonajul regional utilizat la nivel local: : 0,002

Tonaj anual la amplasament (tone/an) : 3,4 10E3

Tonaj zilnic maxim la amplasament (kg/zi): : 3,4 10E4

MSafe (tonaj maxim permis la amplasament) : 4,73 10E4 kg/zi

Note : Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă : 100 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce : 10

Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,01 %

Aer

Factor de emisie sau de eliberare/degajare: : 0,001 %

Apă

Factor de emisie sau de eliberare/degajare: : 0,001 %

Sol

Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 90,0 %

apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de >= (%): 0 %

apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %

Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de toxicitatea secundară a elementului terestru. Nu este necesară tratarea secundară a apelor reziduale.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate

Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m3/d

Eficiență (Stație de tratare a apelor reziduale) : 90,1 %

Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1 : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2 : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3 : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC15 : Utilizare ca reactiv de laborator

Caracteristici produs

Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).

Formă fizică (în momentul folosirii) : Lichid

Presiune de vapori : Lichid, presiune de vapori la STP. < 0,5 kPa

Note : Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Cantitatea folosită

Neaplicabil :

Frecvența și durata folosirii

Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS2 Eșantionarea procesului + OC9 în aer liber

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS137 Eșantionarea produselor

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS2 Eșantionarea procesului + OC9 în aer liber

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS137 Eșantionarea produselor

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS2 Eșantionarea procesului + OC9 în aer liber

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS137 Eșantionarea produselor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

- PROC15** : Utilizare ca reactiv de laborator

Caracteristici produs

Concentrația substanței în amestec/articol	Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
Formă fizică (în momentul folosirii)	: Lichid
Presiune de vapori	: Lichid, presiune de vapori la STP. < 0,5 kPa
Note	: Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Canitatea folosită

Neaplicabil :

Frecvența și durata folosirii

Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS137 Eșantionarea produselor

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului. Asigurați-vă că operațiunea este efectuată în spațiu exterior (în aer liber).

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor. Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri.

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS137 Eșantionarea produselor

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS8 Transferuri în canistre/în loturi

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutătoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS137 Eșantionarea produselor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

1. Titlu scurt al Scenariului de expunere: 12a - Utilizare drept combustibil sau carburant: Industrial

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC16: Utilizarea combustibililor
Categorie de eliberare în mediu	: ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 7.12a.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea ca și / ori în combustibil sau carburant (sau aditivi sau componente de aditivi pentru combustibil sau carburant) și include activități asociate cu transferul, utilizarea, întreținerea echipamentelor și manipularea deșeurilor acestora.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofobă.
Tonaj pentru utilizare regională	: 1,3 10E5 t/an
Fracțiune de tonaj UE utilizată în regiune:	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 1
Tonaj anual la amplasament	: 1,3 10E5 t/an
Tonaj zilnic maxim la amplasament	: 4,4 10E5 kg/zi
MSafe (tonaj maxim permis la amplasament)	: 5,70 10E5 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 300 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
Factor de diluare locală în apă de mare	: 100

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,5 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 95,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de >= (%): 89,2 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC2** : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid
- Presiune de vapori : Lichid, presiune de vapori la STP. < 5 hPa
- Note : Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Frecvența și durata folosirii

- Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luati în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Reduceți la minimum expunerea folosind măsuri precum sisteme închise, unități specializate și ventilație de evacuare generală/locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați/spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS502 Descărcarea închisă a materialelor în vrac

OC9 în exterior

Transferați prin linii/conducte închise.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS117 Utilizarea echipamentelor de filtrare a materialelor solide

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră)

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis. Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră)

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS15 Expuneri generale (sisteme închise).

Factori de mediu neinfluențați de managementul riscurilor

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,01 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberare/degajare din proces de utilizare cu dispersie largă. Factorii de eliberare/degajare pentru aer și sol se referă exclusiv la utilizarea regională.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: nu se aplică:

apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%):
0 %

apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%):
0 %

Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de oameni prin expunere indirectă (în principal, ingerare). Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare., Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului., Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC1** : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

Concentrația substanței în amestec/articol	Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
Formă fizică (în momentul folosirii)	: Lichid
Presiune de vapori	: Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa
Note	: Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Frecvența și durata folosirii

Note	: Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)
------	---

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS502 Descărcarea închisă a materialelor în vrac

Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră). Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră). Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS507 Alimentare cu carburanți

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Curățați imediat substanțele/materialele scurse/vărsate. Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS502 Descărcarea închisă a materialelor în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS8 Transferuri în canistre/în loturi

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS507 Alimentare cu carburanți

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS502 Descărcarea închisă a materialelor în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS507 Alimentare cu carburanți

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Product Name: EXXONMOBIL JET A-1
Revision Date: 22 Oct 2019
Page 1 of 14

SAFETY DATA SHEET

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

PRODUCT

Product Name: EXXONMOBIL JET A-1
Product Description: Hydrocarbons and Additives
Product Code: 708126-00
Intended Use: Aviation fuel

COMPANY IDENTIFICATION

Supplier:	EXXON MOBIL CORPORATION 22777 Springwoods Village Parkway Spring, TX 77389 USA	
24 Hour Health Emergency		609-737-4411
Transportation Emergency Phone		800-424-9300 or 703-527-3887 CHEMTREC
Product Technical Information		800-662-4525
MSDS Internet Address		www.exxon.com , www.mobil.com

SECTION 2 HAZARDS IDENTIFICATION

This material is hazardous according to regulatory guidelines (see (M)SDS Section 15).

CLASSIFICATION:

Flammable liquid: Category 3.
Skin irritation: Category 2. Specific target organ toxicant (central nervous system): Category 3. Aspiration toxicant: Category 1.

LABEL:

Pictogram:

Signal Word: Danger

Hazard Statements:

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 2 of 14

H226: Flammable liquid and vapor. H304: May be fatal if swallowed and enters airways. H315: Causes skin irritation. H336: May cause drowsiness or dizziness.

Precautionary Statements:

P210: Keep away from heat/sparks/open flames/hot surfaces. -- No smoking. P233: Keep container tightly closed. P240: Ground / bond container and receiving equipment. P241: Use explosion-proof electrical, ventilating, and lighting equipment. P242: Use only non-sparking tools. P243: Take precautionary measures against static discharge. P261: Avoid breathing mist / vapours. P264: Wash skin thoroughly after handling. P271: Use only outdoors or in a well-ventilated area. P273: Avoid release to the environment. P280: Wear protective gloves and eye / face protection. P301 + P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. P302 + P352: IF ON SKIN: Wash with plenty of soap and water. P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P312: Call a POISON CENTER or doctor/physician if you feel unwell. P331: Do NOT induce vomiting. P332 + P313: If skin irritation occurs: Get medical advice/ attention. P362 + P364: Take off contaminated clothing and wash it before reuse. P370 + P378: In case of fire: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish. P391: Collect spillage. P403 + P235: Store in a well-ventilated place. Keep cool. P405: Store locked up. P501: Dispose of contents and container in accordance with local regulations.

Contains: Kerosine (petroleum)

Other hazard information:

HAZARD NOT OTHERWISE CLASSIFIED (HNOC): None as defined under 29 CFR 1910.1200.

PHYSICAL / CHEMICAL HAZARDS

Material can accumulate static charges which may cause an ignition. Material can release vapors that readily form flammable mixtures. Vapor accumulation could flash and/or explode if ignited.

HEALTH HAZARDS

High-pressure injection under skin may cause serious damage. May be irritating to the eyes, nose, throat, and lungs. Breathing of high vapor concentrations may cause dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness.

ENVIRONMENTAL HAZARDS

Expected to be toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

NFPA Hazard ID:	Health: 2	Flammability: 2	Reactivity: 0
HMIS Hazard ID:	Health: 2	Flammability: 2	Reactivity: 0

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

Name	CAS#	GHS Hazard Codes
------	------	------------------

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 3 of 14

		Concentration*	
Kerosine (petroleum)	8008-20-6	> 99 %	H226, H304, H336, H315, H401, H411

Hazardous Constituent(s) Contained in Complex Substance(s) required for disclosure

Name	CAS#	Concentration*	GHS Hazard Codes
ETHYL BENZENE	100-41-4	0.1 - 1%	H225, H304, H332, H373, H401, H412
NAPHTHALENE	91-20-3	< 1%	H228(2), H302, H351, H400(M factor 1), H410(M factor 1)

* All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

As per paragraph (i) of 29 CFR 1910.1200, formulation is considered a trade secret and specific chemical identity and exact percentage (concentration) of composition may have been withheld. Specific chemical identity and exact percentage composition will be provided to health professionals, employees, or designated representatives in accordance with applicable provisions of paragraph (i).

SECTION 4 FIRST AID MEASURES

INHALATION

Immediately remove from further exposure. Get immediate medical assistance. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Give supplemental oxygen, if available. If breathing has stopped, assist ventilation with a mechanical device.

SKIN CONTACT

Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

Seek immediate medical attention. Do not induce vomiting.

NOTE TO PHYSICIAN

If ingested, material may be aspirated into the lungs and cause chemical pneumonitis. Treat appropriately.

PRE-EXISTING MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY EXPOSURE

Contains hydrocarbon solvent/petroleum hydrocarbons; skin contact may aggravate an existing dermatitis.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 4 of 14

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Unusual Fire Hazards: Flammable. Hazardous material. Firefighters should consider protective equipment indicated in Section 8. Vapors are flammable and heavier than air. Vapors may travel across the ground and reach remote ignition sources causing a flashback fire danger.

Hazardous Combustion Products: Aldehydes, Incomplete combustion products, Oxides of carbon, Smoke, Fume, Sulfur oxides

FLAMMABILITY PROPERTIES

Flash Point [Method]: >38°C (100°F) [ASTM D-93]

Flammable Limits (Approximate volume % in air): LEL: 0.7 UEL: 5.0

Autoignition Temperature: 250°C (482°F) [ASTM E659]

SECTION 6

ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

PROTECTIVE MEASURES

Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required due to toxicity or flammability of the material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

For emergency responders: Respiratory protection: half-face or full-face respirator with filter(s) for organic vapor and, when applicable, H₂S, or Self Contained Breathing Apparatus (SCBA) can be used depending on the size of spill and potential level of exposure. If the exposure cannot be completely characterized or an oxygen deficient atmosphere is possible or anticipated, SCBA is recommended. Work gloves that are resistant to aromatic hydrocarbons are recommended. Note: gloves made of polyvinyl acetate (PVA) are not water-resistant and are not suitable for emergency use. Chemical goggles are recommended if splashes or contact with eyes is possible. Small spills: normal antistatic work clothes are usually adequate. Large spills: full body suit of chemical resistant, antistatic material is recommended.

SPILL MANAGEMENT

Land Spill: Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop leak if you can do it without risk. All equipment used when handling the product must be grounded. Do not touch or walk through spilled material. Prevent entry into waterways, sewer, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Use clean non-sparking tools to collect absorbed material. Large Spills: Water spray may reduce vapor; but may not prevent ignition in closed spaces.

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 5 of 14

Water Spill: Stop leak if you can do it without risk. Eliminate sources of ignition. Warn other shipping. If the Flash Point exceeds the Ambient Temperature by 10 degrees C or more, use containment booms and remove from the surface by skimming or with suitable absorbents when conditions permit. If the Flash Point does not exceed the Ambient Air Temperature by at least 10C, use booms as a barrier to protect shorelines and allow material to evaporate. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

SECTION 7

HANDLING AND STORAGE

HANDLING

Avoid all personal contact. Do not siphon by mouth. Do not use as a cleaning solvent or other non-motor fuel uses. For use as a motor fuel only. It is dangerous and/or unlawful to put fuel into unapproved containers. Do not fill container while it is in or on a vehicle. Static electricity may ignite vapors and cause fire. Place container on ground when filling and keep nozzle in contact with container. Do not use electronic devices (including but not limited to cellular phones, computers, calculators, pagers or other electronic devices, etc.) during safety critical tasks, such as bulk fuel loading or unloading operations, or in storage areas where vapors may be present, unless the devices are certified intrinsically safe by an approved national testing agency and to the safety standards required by national and/or local laws and regulations. Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). Use proper bonding and/or ground procedures. However, bonding and grounds may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Static Accumulator: This material is a static accumulator. A liquid is typically considered a nonconductive, static accumulator if its conductivity is below 100 pS/m (100×10^{-12} Siemens per meter) and is considered a semiconductive, static accumulator if its conductivity is below 10,000 pS/m. Whether a liquid is nonconductive or semiconductive, the precautions are the same. A number of factors, for example liquid temperature, presence of contaminants, anti-static additives and filtration can greatly influence the conductivity of a liquid.

STORAGE

The type of container used to store the material may affect static accumulation and dissipation. Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Store in a cool, well-ventilated area. Storage containers should be grounded and bonded. Fixed storage containers, transfer containers and associated equipment should be grounded and bonded to prevent accumulation of static charge.

SECTION 8

EXPOSURE CONTROLS / PERSONAL PROTECTION

Product Name: EXXONMOBIL JET A-1
Revision Date: 22 Oct 2019
Page 6 of 14

EXPOSURE LIMIT VALUES

Exposure limits/standards (Note: Exposure limits are not additive)

Substance Name	Form	Limit / Standard			NOTE	Source
ETHYL BENZENE		TWA	435 mg/m ³	100 ppm	N/A	OSHA Z1
ETHYL BENZENE		TWA	20 ppm		N/A	ACGIH
Kerosine (petroleum)	Stable Aerosol.	TWA	5 mg/m ³		Skin	ExxonMobil
Kerosine (petroleum)	Vapor.	TWA	200 mg/m ³		Skin	ExxonMobil
Kerosine (petroleum) [as total hydrocarbon vapor]	Non-Aerosol	TWA	200 mg/m ³		Skin	ACGIH
NAPHTHALENE		TWA	50 mg/m ³	10 ppm	N/A	OSHA Z1
NAPHTHALENE		TWA	10 ppm		Skin	ACGIH

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

Biological limits

Substance	Specimen	Sampling Time	Limit	Determinant	Source
ETHYL BENZENE	Creatinine in urine	End of shift	0.15 g/g	Sum of mandelic acid and phenylglyoxylic acid	ACGIH BELs (BEIs)
NAPHTHALENE	No Biological Specimen provided	End of shift	Not Assigned	1-Naphthol, with hydrolysis + 2-Naphthol, with hydrolysis	ACGIH BELs (BEIs)

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

Use explosion-proof ventilation equipment to stay below exposure limits.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Half-face filter respirator

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 7 of 14

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Chemical resistant gloves are recommended. If contact with forearms is likely wear gauntlet style gloves.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

Chemical/oil resistant clothing is recommended.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9	PHYSICAL AND CHEMICAL PROPERTIES
------------------	---

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION

Physical State: Liquid

Color: Pale Yellow

Odor: Petroleum/Solvent

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 °C): 0.775 - 0.83

Density (at 15 °C): 750 kg/m³ (6.26 lbs/gal, 0.75 kg/dm³) - 860 kg/m³ (7.18 lbs/gal, 0.86 kg/dm³) [ASTM D4052]

Flammability (Solid, Gas): N/A

Flash Point [Method]: >38°C (100°F) [ASTM D-93]

Flammable Limits (Approximate volume % in air): LEL: 0.7 UEL: 5.0

Autoignition Temperature: 250°C (482°F) [ASTM E659]

Boiling Point / Range: > 200°C (392°F) [EN ISO 3405]

Decomposition Temperature: N/D

Vapor Density (Air = 1): N/D

Vapor Pressure: < 0.133 kPa (1 mm Hg) at 20 °C [EN 13016-1]

Evaporation Rate (n-butyl acetate = 1): N/D

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): > 3.5

Solubility in Water: Negligible

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 8 of 14

Viscosity: 1.1 cSt (1.1 mm²/sec) at 40 °C
Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: -47°C (-53°F) - -40°C (-40°F)

Melting Point: N/A

SECTION 10 STABILITY AND REACTIVITY

REACTIVITY: See sub-sections below.

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Avoid heat, sparks, open flames and other ignition sources.

MATERIALS TO AVOID: Alkalies, Halogens, Strong Acids, Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

INFORMATION ON TOXICOLOGICAL EFFECTS

Hazard Class	Conclusion / Remarks
Inhalation	
Acute Toxicity: (Rat) 4 hour(s) LC50 > 5000 mg/m3 (Vapor)	Minimally Toxic. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 403
Irritation: No end point data for material.	Elevated temperatures or mechanical action may form vapors, mist, or fumes which may be irritating to the eyes, nose, throat, or lungs.
Ingestion	
Acute Toxicity (Rat): LD50 > 5000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 420
Skin	
Acute Toxicity (Rabbit): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 402
Skin Corrosion/Irritation (Rabbit): Data available.	Irritating to the skin. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 404
Eye	
Serious Eye Damage/Irritation (Rabbit): Data available.	May cause mild, short-lasting discomfort to eyes. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 405
Sensitization	
Respiratory Sensitization: No end point data for material.	Not expected to be a respiratory sensitizer.
Skin Sensitization: Data available.	Not expected to be a skin sensitizer. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 406
Aspiration: Data available.	May be fatal if swallowed and enters airways. Based on physico-chemical properties of the material.

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 9 of 14

Germ Cell Mutagenicity: Data available.	Not expected to be a germ cell mutagen. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 471 475 476 478 479
Carcinogenicity: Data available.	Not expected to cause cancer. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 451
Reproductive Toxicity: Data available.	Not expected to be a reproductive toxicant. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 414 421
Lactation: No end point data for material.	Not expected to cause harm to breast-fed children.
Specific Target Organ Toxicity (STOT)	
Single Exposure: No end point data for material.	May cause drowsiness or dizziness.
Repeated Exposure: Data available.	Not expected to cause organ damage from prolonged or repeated exposure. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 410 412

TOXICITY FOR SUBSTANCES

NAME	ACUTE TOXICITY
ETHYL BENZENE	Inhalation Lethality: 4 hour(s) LC50 17.8 mg/l (Vapor) (Rat); Oral Lethality: LD50 3.5 g/kg (Rat)
NAPHTHALENE	Inhalation Lethality: 4 hour(s) LC50 > 0.4 mg/l (Max attainable vapor conc.) (Rat); Oral Lethality: LD50 533 mg/kg (Mouse)

OTHER INFORMATION

For the product itself:

Vapor/aerosol concentrations above recommended exposure levels are irritating to the eyes and respiratory tract, may cause headaches, dizziness, anesthesia, drowsiness, unconsciousness and other central nervous system effects including death.

Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may cause chemical pneumonitis or pulmonary edema. Repeated co-exposure to monoaromatic hydrocarbons contained in this product in excess of recognized occupational exposure limits and noise levels in excess of 85 dB(A) may increase the risk of hearing impairment.

Jet fuel: Some jet fuels have potential in mice to suppress indicators of immune system functionality. The relevance of these effects to humans is uncertain.

Contains:

Kerosene: Carcinogenic in animal tests. Lifetime skin painting tests produced tumors, but the mechanism is due to repeated cycles of skin damage and restorative hyperplasia. This mechanism is considered unlikely in humans where such prolonged skin irritation would not be tolerated. Did not cause mutations In vitro. Inhalation of vapors did not result in reproductive or developmental effects in laboratory animals. Inhalation of high concentrations in animals resulted in respiratory tract irritation, lung changes and some reduction in lung function. Non-sensitizing in animal tests.

NAPHTHALENE: Exposure to high concentrations of naphthalene may cause destruction of red blood cells, anemia, and cataracts. Naphthalene caused cancer in laboratory animal studies, but the relevance of these findings to humans is uncertain.

ETHYLBENZENE: Caused cancer in laboratory animal studies. The relevance of these findings to humans is uncertain.

SECTION 12**ECOLOGICAL INFORMATION**

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

ECOTOXICITY

Material -- Expected to be toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

MOBILITY

Majority of components -- Highly volatile, will partition rapidly to air. Not expected to partition to sediment and wastewater solids.

Majority of components -- Low potential to migrate through soil.

PERSISTENCE AND DEGRADABILITY**Biodegradation:**

Material -- Expected to be inherently biodegradable

Atmospheric Oxidation:

Majority of components -- Expected to degrade rapidly in air

BIOACCUMULATION POTENTIAL

Majority of components -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

ECOLOGICAL DATA**Ecotoxicity**

Test	Duration	Organism Type	Test Results
Aquatic - Acute Toxicity	48 hour(s)	Daphnia magna	EL50 1 - 100 mg/l: data for similar materials
Aquatic - Acute Toxicity	96 hour(s)	Oncorhynchus mykiss	LL50 1 - 100 mg/l: data for similar materials
Aquatic - Acute Toxicity	72 hour(s)	Pseudokirchneriella subcapitata	EL50 1 - 100 mg/l: data for similar materials

Aquatic - Chronic Toxicity	72 hour(s)	Pseudokirchneriella subcapitata	NOELR 1 - 10 mg/l: data for similar materials

Persistence, Degradability and Bioaccumulation Potential

Media	Test Type	Duration	Test Results
Water	Ready Biodegradability	28 day(s)	Percent Degraded < 60 : similar material

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products.

REGULATORY DISPOSAL INFORMATION

RCRA Information: Disposal of unused product may be subject to RCRA regulations (40 CFR 261). Disposal of the used product may also be regulated due to ignitability, corrosivity, reactivity or toxicity as determined by the Toxicity Characteristic Leaching Procedure (TCLP). Potential RCRA characteristics: IGNITABILITY.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

SECTION 14 TRANSPORT INFORMATION**LAND (DOT)**

Proper Shipping Name: FUEL, AVIATION, TURBINE ENGINE

Hazard Class & Division: 3

ID Number: 1863

Packing Group: III

Marine Pollutant: Yes

SECTION 15	REGULATORY INFORMATION
-------------------	-------------------------------

OSHA HAZARD COMMUNICATION STANDARD: This material is considered hazardous in accordance with OSHA HazCom 2012, 29 CFR 1910.1200.

Listed or exempt from listing/notification on the following chemical inventories: AICS, DSL, ENCS, IECSC, KECI, PICCS, TCSI, TSCA

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302

CERCLA: This material is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Contact local authorities to determine if other reporting requirements apply.

SARA (311/312) REPORTABLE GHS HAZARD CLASSES: Aspiration Hazard, Flammable (gases, aerosols, liquids, or solids), Skin Corrosion or Irritation, Specific Target Organ toxicity (single or repeated exposure)

SECTION 16	OTHER INFORMATION
-------------------	--------------------------

WARNING: Cancer - www.P65Warnings.ca.gov. Chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm are created by the combustion of this product.

This warning is given to comply with California Health and Safety Code 25249.6 and does not constitute an admission or a waiver of rights.

N/D = Not determined, N/A = Not applicable

KEY TO THE H-CODES CONTAINED IN SECTION 3 OF THIS DOCUMENT (for information only):

H225: Highly flammable liquid and vapor; Flammable Liquid, Cat 2
H226: Flammable liquid and vapor; Flammable Liquid, Cat 3
H228(2): Flammable solid; Flammable Solid, Cat 2
H302: Harmful if swallowed; Acute Tox Oral, Cat 4
H304: May be fatal if swallowed and enters airways; Aspiration, Cat 1
H315: Causes skin irritation; Skin Corr/Irritation, Cat 2
H332: Harmful if inhaled; Acute Tox Inh, Cat 4
H336: May cause drowsiness or dizziness; Target Organ Single, Narcotic
H351: Suspected of causing cancer; GHS Carcinogenicity, Cat 2
H373: May cause damage to organs through prolonged or repeated exposure; Target Organ, Repeated, Cat 2
H400: Very toxic to aquatic life; Acute Env Tox, Cat 1
H401: Toxic to aquatic life; Acute Env Tox, Cat 2
H410: Very toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 1
H411: Toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 2
H412: Harmful to aquatic life with long lasting effects; Chronic Env Tox, Cat 3

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

Composition: Component Table information was modified.

Product Name: EXXONMOBIL JET A-1

Revision Date: 22 Oct 2019

Page 14 of 14

Section 04: First Aid Inhalation information was modified.

Section 06: Accidental Release - Spill Management - Land information was modified.

Section 07: Handling and Storage - Handling information was modified.

Section 12: information was modified.

Section 14: Special Provisions information was modified.

Section 16: HCode Key information was modified.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, re-publication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Regulation (EC) No 1272/2008

Skin Corrosion/Irritation	Category 2 - H315
Serious Eye Damage/Irritation	Category 1 - H318
Acute Aquatic Toxicity	Acute 1 - H400
Chronic Aquatic Toxicity	Chronic 1 - H410
Flammable liquids.	Category 3 - H226

2.2. Label Elements

Hazard Pictograms

Signal Word:

Danger

Hazard Statements:

H226 - Flammable liquid and vapor

H315 - Causes skin irritation

H318 - Causes serious eye damage

H410 - Very toxic to aquatic life with long lasting effects

Precautionary Statements:

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P273 - Avoid release to the environment

P280 - Wear protective gloves/protective clothing/eye protection/face protection

P302 + P352 - IF ON SKIN: Wash with plenty of water.

P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

P310 - Immediately call a POISON CENTER or doctor/physician

Contains

Substances

Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated

Benzene sulfonic acid, dodecyl-, sodium salt

Hexylene glycol

Isopropanol

CAS Number

119345-03-8

25155-30-0

107-41-5

67-63-0

2.3. Other Hazards

This mixture contains no substance considered to be persistent, bioaccumulating nor toxic (PBT).

This mixture contains no substance considered to be very persistent nor very bioaccumulating (vPvB).

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Mixture

For the full text of the H-phrases mentioned in this Section, see Section 16

SECTION 4: First aid measures

4.1. Description of first aid measures

Inhalation	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
Eyes	Immediately flush eyes with large amounts of water for at least 30 minutes. Seek prompt medical attention.
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes. Get medical attention. Remove contaminated clothing and laundry before reuse.
Ingestion	Do NOT induce vomiting. Give nothing by mouth. Obtain immediate medical attention.

4.2. Most important symptoms and effects, both acute and delayed

Causes severe eye irritation which may damage tissue. Causes skin irritation.

4.3. Indication of any immediate medical attention and special treatment needed

Notes to Physician Treat symptomatically

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable Extinguishing Media

Water fog, carbon dioxide, foam, dry chemical.

Extinguishing media which must not be used for safety reasons

None known.

5.2. Special hazards arising from the substance or mixture

Special exposure hazards in a fire

May be ignited by heat, sparks or flames Use water spray to cool fire exposed surfaces. Closed containers may explode in fire. Decomposition in fire may produce harmful gases. Do not allow runoff to enter waterways.

5.3. Advice for firefighters

Special protective equipment for firefighters

Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use appropriate protective equipment. Wear self-contained breathing apparatus in enclosed areas. Remove sources of ignition. Avoid breathing vapors. Avoid contact with skin, eyes and clothing. See Section 8 for additional information

6.2. Environmental precautions

Prevent from entering sewers, waterways, or low areas.

6.3. Methods and material for containment and cleaning up

Isolate spill and stop leak where safe. Remove ignition sources and work with non-sparking tools. Contain spill with sand or other inert materials. Scoop up and remove.

SAFETY DATA SHEET

NEA-96M

according to Regulation (EC) No. 453/2010

Revision Date: 28-Sep-2017
Preparation Date 28-Sep-2017

Revision Number: 15
Internal ID Code HM003212

6.4. Reference to other sections

See Section 8 and 13 for additional information.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Use appropriate protective equipment. Remove sources of ignition. Avoid contact with eyes, skin, or clothing. Avoid breathing vapors. Ensure adequate ventilation. Wash hands after use. Launder contaminated clothing before reuse. Ground and bond containers when transferring from one container to another.

Hygiene Measures

Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Store away from oxidizers. Store away from acids. Store in a cool well ventilated area. Keep from heat, sparks, and open flames. Keep container closed when not in use. Product has a shelf life of 24 months.

7.3. Specific end use(s)

Exposure scenario No information available

Other Guidelines No information available

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Exposure Limits

8.2. Exposure controls

Engineering Controls

Use in a well ventilated area. Local exhaust ventilation should be used in areas without good cross ventilation.

Personal protective equipment

If engineering controls and work practices cannot prevent excessive exposures, the selection and proper use of personal protective equipment should be determined by an industrial hygienist or other qualified professional based on the specific application of this

SAFETY DATA SHEET

NEA-96M

according to Regulation (EC) No. 453/2010

Revision Date: 28-Sep-2017
Preparation Date 28-Sep-2017

Revision Number: 15
Internal ID Code HM003212

product.

Respiratory Protection	Organic vapor respirator with a dust/mist filter. (A2P2/P3)
Hand Protection	Impervious rubber gloves.
Skin Protection	Full protective chemical resistant clothing.
Eye Protection	Chemical goggles; also wear a face shield if splashing hazard exists.
Other Precautions	Eyewash fountains and safety showers must be easily accessible.

Environmental Exposure Controls No information available

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Physical State: Liquid	Color: Amber
Odor: Alcohol	Odor Threshold: No information available

<u>Property</u>	<u>Values</u>
<u>Remarks/ - Method</u>	
pH:	7-9
Freezing Point / Range	No data available
Melting Point / Range	No data available
Boiling Point / Range	No data available
Flash Point	30 °C / 86 °F
Flammability (solid, gas)	No data available
Upper flammability limit	No data available
Lower flammability limit	No data available
Evaporation rate	No data available
Vapor Pressure	No data available
Vapor Density	No data available
Specific Gravity	1.04
Water Solubility	Soluble in water
Solubility in other solvents	No data available
Partition coefficient: n-octanol/water	No data available
Autoignition Temperature	No data available
Decomposition Temperature	No data available
Viscosity	No data available
Explosive Properties	No information available
Oxidizing Properties	No information available

9.2. Other information

VOC Content (%) No data available

SECTION 10: Stability and reactivity

10.1. Reactivity

Not expected to be reactive.

10.2. Chemical stability

Stable

10.3. Possibility of hazardous reactions

Will Not Occur

10.4. Conditions to avoid

None anticipated

10.5. Incompatible materials

Strong oxidizers. Strong acids.

10.6. Hazardous decomposition products

Oxides of sulfur. Carbon monoxide and carbon dioxide.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Acute Toxicity

Inhalation

May cause respiratory irritation. May cause central nervous system depression including headache, dizziness, drowsiness, incoordination, slowed reaction time, slurred speech,

SAFETY DATA SHEET

NEA-96M

according to Regulation (EC) No. 453/2010

Revision Date: 28-Sep-2017
Preparation Date 28-Sep-2017

Revision Number: 15
Internal ID Code HM003212

Eye Contact Skin Contact Ingestion

giddiness and unconsciousness.
Causes severe eye irritation
Causes skin irritation.
May be harmful if swallowed. May cause central nervous system depression including headache, dizziness, drowsiness, muscular weakness, incoordination, slowed reaction time, fatigue blurred vision, slurred speech, giddiness, tremors and convulsions.

Chronic Effects/Carcinogenicity

No data available to indicate product or components present at greater than 0.1% are chronic health hazards.

Toxicology data for the components

Substances	CAS Number	LD50 Oral	LD50 Dermal	LC50 Inhalation
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	1000 > LD50 < 2000 mg/kg (Rat)	> 1000 mg/kg (Rabbit) (similar substance)	No data available
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	438 mg/kg (Rat) 1080 mg/kg (Rat) (similar substance)	No data available	No data available
Hexylene glycol	107-41-5	4700 mg/kg-bw (rat)	12,236 mg/kg-bw (rabbit)	LC50 > saturated vapour (rat, 8h)
Isopropanol	67-63-0	5840 mg/kg-bw (rat)	12870 mg/kg-bw (rabbit)	72.6 mg/L (Rat, 4h, vapor)

Substances	CAS Number	Skin corrosion/irritation
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Skin, rabbit: Causes moderate skin irritation.
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Causes moderate skin irritation. (similar substances)
Hexylene glycol	107-41-5	Causes mild skin irritation (Rabbit) Non-irritating to the skin
Isopropanol	67-63-0	Non-irritating to the skin (Rabbit)

Substances	CAS Number	Serious eye damage/irritation
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Eye, rabbit: Causes moderate eye irritation
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Causes severe eye irritation which may damage tissue. (similar substances)
Hexylene glycol	107-41-5	Causes eye irritation. (Rabbit)
Isopropanol	67-63-0	Causes moderate eye irritation (Rabbit)

Substances	CAS Number	Skin Sensitization
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Did not cause sensitization on laboratory animals (guinea pig) (similar substances)
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Did not cause sensitization on laboratory animals Patch test on human volunteers did not demonstrate sensitization properties (similar substances)
Hexylene glycol	107-41-5	Did not cause sensitization on laboratory animals (guinea pig)
Isopropanol	67-63-0	Did not cause sensitization on laboratory animals (guinea pig)

Substances	CAS Number	Respiratory Sensitization
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	No information available
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available
Hexylene glycol	107-41-5	No information available
Isopropanol	67-63-0	No information available

Substances	CAS Number	Mutagenic Effects
Benzene, 1,1'-oxybis, tetrapropylene derivatives,	119345-03-8	In vitro tests did not show mutagenic effects In vivo tests did not show mutagenic effects. (similar substances)

SAFETY DATA SHEET

NEA-96M

according to Regulation (EC) No. 453/2010

Revision Date: 28-Sep-2017
Preparation Date 28-Sep-2017

Revision Number: 15
Internal ID Code HM003212

sulfonated		
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	In vitro tests did not show mutagenic effects In vivo tests did not show mutagenic effects. (similar substances)
Hexylene glycol	107-41-5	In vitro tests did not show mutagenic effects
Isopropanol	67-63-0	In vitro tests did not show mutagenic effects. In vivo tests did not show mutagenic effects.

Substances	CAS Number	Carcinogenic Effects
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Did not show carcinogenic effects in animal experiments (similar substances)
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Did not show carcinogenic effects in animal experiments (similar substances)
Hexylene glycol	107-41-5	No information available
Isopropanol	67-63-0	Did not show carcinogenic effects in animal experiments

Substances	CAS Number	Reproductive toxicity
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Animal testing did not show any effects on fertility. Did not show teratogenic effects in animal experiments. (similar substances)
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Animal testing did not show any effects on fertility. Did not show teratogenic effects in animal experiments. (similar substances)
Hexylene glycol	107-41-5	Animal testing did not show any effects on fertility. Did not show teratogenic effects in animal experiments.
Isopropanol	67-63-0	Animal testing did not show any effects on fertility.

Substances	CAS Number	STOT - single exposure
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	No significant toxicity observed in animal studies at concentration requiring classification. (similar substances)
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available
Hexylene glycol	107-41-5	No significant toxicity observed in animal studies at concentration requiring classification.
Isopropanol	67-63-0	May cause headache, dizziness, and other central nervous system effects.

Substances	CAS Number	STOT - repeated exposure
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	No significant toxicity observed in animal studies at concentration requiring classification. (similar substances)
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No significant toxicity observed in animal studies at concentration requiring classification. (similar substances)
Hexylene glycol	107-41-5	No significant toxicity observed in animal studies at concentration requiring classification.
Isopropanol	67-63-0	No significant toxicity observed in animal studies at concentration requiring classification. (similar substances)

Substances	CAS Number	Aspiration hazard
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	No information available
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	Not applicable
Hexylene glycol	107-41-5	No information available Not applicable
Isopropanol	67-63-0	Not applicable

SECTION 12: Ecological information

12.1. Toxicity

Substances	CAS Number	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Toxicity to Invertebrates
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	EC50 (72h) > 100 mg/L (Pseudokirchnerella subcapitata) (similar)	LC50 (96h) 0.47 mg/L (Pimphales promelas) (similar substance)	No information available	EC50 (48h) 2.3 mg/L (Daphnia magna) (similar substance)

SAFETY DATA SHEET

Internal ID Code HM003212

		substance)	NOEC (32d) 0.0125 mg/L (Pimphales promelas) (similar substance)		
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available	LC50 (96h) 10.8 mg/L (Onchorhynchus mykiss) LC50 (96h) 7.133 mg/L (Onchorhynchus kisutch) NOEC (28d) 1 mg/L (Lepomis macrochirus) (similar substance) NOEC (72d) 0.23 mg/L (Salmo gairdneri)	No information available	EC50 (48h) 6.3 - 7.5 mg/L (Daphnia magna) NOEC (21d) 1.18 mg/L (Daphnia magna) (similar substance)
Hexylene glycol	107-41-5	EC50 (72 h) 8682.73 mg/L (Skeletonema costatum)	LC50 (96 h) >1800 mg/L (Scophthalmus maximus)	Inhibitory Concentration (10d) > 1000 mg/L (Pseudomonas aeruginosa)	LC50 (48 h) 6615.38 mg/L (Acartia tonsa) EC50 (48 h) 2800 mg/L (Ceriodaphnia reticulata)
Isopropanol	67-63-0	EC50 (72h) > 1000 mg/L (Desmodesmus subspicatus) EC50 (7d) 1800 mg/L (Scenedesmus quadricauda)	LC50 (96h) 9640 mg/L (Pimephales promelas) LC50 (7d) 7060 mg/L (Poecilia reticulata)	TT (16h) 1050 mg/L (Pseudomonas putida)	EC50 (48h) 13,299 mg/L (Daphnia magna) EC50 (24h) > 10,000 mg/L (Daphnia magna)

12.2. Persistence and degradability

Substances	CAS Number	Persistence and Degradability
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	Not readily biodegradable
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available
Hexylene glycol	107-41-5	Readily biodegradable (60% @ 14d)
Isopropanol	67-63-0	Readily biodegradable (53% @ 5d)

12.3. Bioaccumulative potential

Substances	CAS Number	Log Pow
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	3.3
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available
Hexylene glycol	107-41-5	Log Pow =0
Isopropanol	67-63-0	0.05

12.4. Mobility in soil

Substances	CAS Number	Mobility
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	119345-03-8	No information available
Benzene sulfonic acid, dodecyl-, sodium salt	25155-30-0	No information available
Hexylene glycol	107-41-5	No information available
Isopropanol	67-63-0	No information available

12.5. Results of PBT and vPvB assessment

This mixture contains no substance considered to be persistent, bioaccumulating nor toxic (PBT). This mixture contains no substance considered to be very persistent nor very bioaccumulating (vPvB).

Substances	PBT and vPvB assessment
Benzene, 1,1'-oxybis, tetrapropylene derivatives, sulfonated	Not PBT/vPvB
Benzene sulfonic acid, dodecyl-, sodium salt	Not PBT/vPvB
Hexylene glycol	Not PBT/vPvB
Isopropanol	Not PBT/vPvB

12.6. Other adverse effects

Endocrine Disruptor Information

This product does not contain any known or suspected endocrine disruptors

SECTION 13: Disposal considerations

SAFETY DATA SHEET

NEA-96M

according to Regulation (EC) No. 453/2010

Revision Date: 28-Sep-2017
Preparation Date 28-Sep-2017

Revision Number: 15
Internal ID Code HM003212

13.1. Waste treatment methods

Disposal methods

Contaminated Packaging

Disposal should be made in accordance with federal, state, and local regulations.
Follow all applicable national or local regulations.

SECTION 14: Transport information

IMDG/IMO

UN Number UN1993
UN proper shipping name: Flammable Liquid, N.O.S. (Contains Isopropanol)
Transport Hazard Class(es): 3
Packing Group: III
Environmental Hazards: Marine Pollutant (Benzene, 1,1'-oxybis-, tetrapropylene derivs., sulfonated)

RID

UN Number UN1993
UN proper shipping name: Flammable Liquid, N.O.S. (Contains Isopropanol)
Transport Hazard Class(es): 3
Packing Group: III
Environmental Hazards: Marine Pollutant

ADR

UN Number UN1993
UN proper shipping name: Flammable Liquid, N.O.S. (Contains Isopropanol)
Transport Hazard Class(es): 3
Packing Group: III
Environmental Hazards: Marine Pollutant

IATA/ICAO

UN Number UN1993
UN proper shipping name: Flammable Liquid, N.O.S. (Contains Isopropanol)
Transport Hazard Class(es): 3
Packing Group: III
Environmental Hazards: Marine Pollutant (Benzene, 1,1'-oxybis-, tetrapropylene derivs., sulfonated)

14.1. UN Number UN1993

14.2. UN proper shipping name: Flammable Liquid, N.O.S. (Contains Isopropanol)

14.3. Transport Hazard Class(es): 3

14.4. Packing Group III

14.5. Environmental Hazards: Marine Pollutant

14.6. Special Precautions for User None

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

International Inventories

EINECS (European Inventory of Existing Chemical Substances)

This product does not comply with EINECS

US TSCA Inventory

All components listed on inventory or are exempt.

Canadian Domestic Substances List (DSL)

All components listed on inventory or are exempt.

Legend

SAFETY DATA SHEET

NEA-96M

TSCA - United States Toxic Substances Control Act Section 8(b) Inventory
EINECS/ELINCS - European Inventory of Existing Commercial Chemical Substances/EU List of Notified Chemical Substances
DSL/NDL - Canadian Domestic Substances List/Non-Domestic Substances List

Germany, Water Endangering WGK 2: Hazard to waters.
Classes (WGK)

15.2. Chemical safety assessment

No information available

SECTION 16: Other information

Full text of H-Statements referred to under sections 2 and 3

H225 - Highly flammable liquid and vapor
H226 - Flammable liquid and vapor
H302 - Harmful if swallowed
H315 - Causes skin irritation
H318 - Causes serious eye damage
H319 - Causes serious eye irritation
H336 - May cause drowsiness or dizziness
H400 - Very toxic to aquatic life
H410 - Very toxic to aquatic life with long lasting effects
H412 - Harmful to aquatic life with long lasting effects

Key or legend to abbreviations and acronyms used in the safety data sheet

bw – body weight
CAS – Chemical Abstracts Service
CLP – REGULATION (EC) No 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on Classification, Labelling and Packaging of substances and mixtures
EC – European Commission
EC10 – Effective Concentration 10%
EC50 – Effective Concentration 50%
EEC – European Economic Community
ErC50 – Effective Concentration growth rate 50%
IBC Code – International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk
LC50 – Lethal Concentration 50%
LD50 – Lethal Dose 50%
LL0 – Lethal Loading 0%
LL50 – Lethal Loading 50%
MARPOL – International Convention for the Prevention of Pollution from Ships
mg/kg – milligram/kilogram
mg/L – milligram/liter
NIOSH – National Institute for Occupational Safety and Health
NOEC – No Observed Effect Concentration
NTP – National Toxicology Program
OEL – Occupational Exposure Limit
PBT – Persistent Bioaccumulative and Toxic
PC – Chemical Product category
PEL – Permissible Exposure Limit
ppm – parts per million
PROC – Process category
REACH – REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals
STEL – Short Term Exposure Limit
SU – Sector of Use category

2

This safety data sheet complies with the requirements of Regulation (EC) No. 453/2010

Disclaimer Statement

This information is furnished without warranty, expressed or implied, as to accuracy or completeness. The information is obtained from various sources including the manufacturer and other third party sources. The information may not be valid under all conditions nor if this material is used in combination with other materials or in any process. Final determination of suitability of any material is the sole responsibility of the user.

End of Safety Data Sheet

Revision Number: 15
NEA-96M

Revision Date: 28-Sep-2017

Annex to SDS					
Substances	CAS Number	Process categories	Environmental release category	Product category(ies)	Sector of uses
Isopropanol	67-63-0	PROC4; PROC8b; PROC15	ERC2; ERC4	-	SU2a; SU2b

Exposure Scenario

Application of bulk onshore/offshore oilfield liquid or solid/powder.

1. Title Section

Use

Use in batch process where opportunities for exposure arise.
Transfer from support vessel to installation.
Transfer from bulk/ IBC/ drum to on-site storage, transfer to process.
Transfer from pot/tin/tube to process. On-site sampling and testing e.g. QC

Sector of uses

SU2a - Mining, (without offshore industries)
SU2b - Offshore industries

Worker

Process categories

PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
PROC8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC15 - Use as a laboratory reagent

Product category(ies)

Not applicable

Article categories

Not applicable

Environmental

Environmental release category(ies)

ERC2 - Formulation of preparations (mixtures)
ERC4 - Industrial use of processing aids in processes and products, not becoming part of articles

2. Conditions of use affecting exposure

Control of environmental exposure

Amount used, frequency and duration of use (or from service life)

Substances	Daily Amount Per Site	Annual site tonnage	Frequency	Duration of use
Isopropanol	-	-	-	-

Technical and organisational conditions and measures

Substances	Technical and organisational conditions and measures
Isopropanol	Prevent entry into waterways, sewers, basements or confined areas.

Conditions and measures related to sewage treatment plant

Substances	Conditions and measures related to sewage treatment plant
Isopropanol	No information available

Conditions and measures related to treatment of waste (including article waste)

Substances	Conditions and measures related to treatment of waste (including article waste)
Isopropanol	Dispose of contents/container in accordance with local/regional/national/international regulations.

Other conditions affecting environmental exposure

Substances	Receiving surface water flow m3/d	Degradation
Isopropanol	-	53% @ 5d

Control of Worker Exposure

Product (article) characteristics

Physical State:	Liquid
Vapor Pressure	No information available
Dustiness	Not applicable

Substances	Limit the substance content in the product to
Isopropanol	100%

Amount used (or contained in articles), frequency and duration of use/exposure

Substances	Amounts used (daily)	Covers daily exposures up to (hours/day)	Frequency (days/year)
Isopropanol	-	8	-

Technical and organisational conditions and measures

Substances	Technical and organisational conditions and measures
Isopropanol	Use with local exhaust ventilation. PROC4: Avoid spillage when withdrawing pump. PROC8b: Use in closed batch process (synthesis or formulation).

Conditions and measures related to personal protection, hygiene and health evaluation

Substances	Conditions and measures related to personal protection, hygiene and health evaluation
Isopropanol	Use suitable eye protection. Wear suitable gloves tested to EN374. Refer to section 8 of the SDS.

Other conditions affecting workers exposure

Substances	Other conditions affecting workers exposure
Isopropanol	Assumes use at not more than 20°C above ambient temperature (unless stated differently).

Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Substances	Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply
Isopropanol	Wash hands after use. Launder contaminated clothing before reuse.

3. Exposure estimation and reference to its source

Environmental release and exposure

Substances	Environmental release and exposure
Isopropanol	Not applicable

Worker exposure

Substances	Worker exposure
Isopropanol	No information available

4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES

Scaling method	For scaling see: http://www.ecetoc.org/tra , ECETOC TRA worker v2.3, modified version.
Scaling parameters	The DU works inside the boundaries set by the ES if either the proposed risk management measures as described above are met or the downstream user can demonstrate on his own that his implemented risk management measures are adequate.

SAFETY DATA SHEET

according to Regulation (EC) No. 453/2010

FE-1A ACIDIZING COMPOSITION

Revision Date: 04-Oct-2016

Revision Number: 43

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product Identifier

Product Name FE-1A ACIDIZING COMPOSITION
Internal ID Code HM000680

1.2. Relevant identified uses of the substance or mixture and uses advised against

Recommended Use Additive
Sector of uses Refer to the Annex for a listing of uses.
Process categories PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
PROC15 - Use as a laboratory reagent
PROC8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
Environmental release category(ies) ERC1 - Manufacture of substances

1.3. Details of the supplier of the safety data sheet

Halliburton Energy Services
Halliburton House, Howemoss Place
Kirkhill Industrial Estate
Dyce
Aberdeen, AB21 0GN
United Kingdom

www.halliburton.com

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Regulation (EC) No 1272/2008

Acute Oral Toxicity	Category 4 - (H302)
Acute inhalation toxicity - vapor	Category 3 - (H331)
Skin Corrosion/Irritation	Category 1 A - (H314)
Serious Eye Damage/Irritation	Category 1 - (H318)
Specific Target Organ Toxicity - (Single Exposure)	Category 3 - (H335)
Flammable liquids.	Category 3 - H226

2.2. Label Elements

Hazard Pictograms

Signal Word:

Danger

Hazard Statements:

H226 - Flammable liquid and vapor
H314 - Causes severe skin burns and eye damage
H302 - Harmful if swallowed
H331 - Toxic if inhaled
H335 - May cause respiratory irritation

Precautionary Statements:

P210 - Keep away from heat/sparks/open flames/hot surfaces. - No smoking
P280 - Wear protective gloves/protective clothing/eye protection/face protection
P301 + P330 + P331 - IF SWALLOWED: rinse mouth. Do NOT induce vomiting
P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower
P304 + P340 - IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

Contains

Substances

Acetic anhydride
Acetic acid

CAS Number

108-24-7
64-19-7

2.3. Other Hazards

This mixture contains no substance considered to be persistent, bioaccumulating nor toxic (PBT).
This mixture contains no substance considered to be very persistent nor very bioaccumulating (vPvB).

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Mixture

Substances	EINECS	CAS Number	PERCENT (w/w)	EU - CLP Substance Classification	REACH Reg. No
Acetic anhydride	203-564-8	108-24-7	60 - 100%	Acute Tox. 4 (H302) Acute Tox. 3 (H331) Skin Corr. 1B (H314) Eye Corr. 1 (H318) STOT SE 3 (H335) Flam. Liq. 3 (H226)	01-2119486470-36
Acetic acid	200-580-7	64-19-7	30 - 60%	Skin Corr. 1A (H314) Eye Corr. 1 (H318) STOT SE 3 (H335) Flam. Liq. 3 (H226)	01-2119475328-30

For the full text of the H-phrases mentioned in this Section, see Section 16

SECTION 4: First aid measures

4.1. Description of first aid measures

Inhalation	If inhaled, move victim to fresh air and seek medical attention.
Eyes	Immediately flush eyes with large amounts of water for at least 30 minutes. Seek prompt medical attention.
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 30 minutes and remove contaminated clothing, shoes and leather goods immediately. Get medical attention immediately. Remove contaminated clothing and laundry before reuse. Destroy or properly dispose of contaminated shoes.
Ingestion	Do NOT induce vomiting. Give nothing by mouth. Obtain immediate medical attention.

4.2. Most important symptoms and effects, both acute and delayed

Causes severe eye irritation which may damage tissue. Causes severe skin irritation with tissue destruction. May cause respiratory irritation. Harmful if swallowed. Toxic if inhaled.

4.3. Indication of any immediate medical attention and special treatment needed

Notes to Physician Treat symptomatically

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable Extinguishing Media

Carbon dioxide, dry chemical, foam.

Extinguishing media which must not be used for safety reasons

Water must not be used with open containers.

5.2. Special hazards arising from the substance or mixture

Special exposure hazards in a fire

May be ignited by heat, sparks or flames. Closed containers may explode in fire. Decomposition in fire may produce harmful gases. Reaction with water may be highly exothermic.

5.3. Advice for firefighters

Special protective equipment for firefighters

Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Remove sources of ignition. Use appropriate protective equipment. Avoid breathing vapors. Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Evacuate all persons from the area.

See Section 8 for additional information

6.2. Environmental precautions

Prevent from entering sewers, waterways, or low areas.

6.3. Methods and material for containment and cleaning up

Isolate spill and stop leak where safe. Contain spill with sand or other inert materials. Neutralize to pH of 6-8. Scoop up and remove.

6.4. Reference to other sections

See Section 8 and 13 for additional information.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Remove sources of ignition. Avoid contact with eyes, skin, or clothing. Avoid breathing vapors. Ensure adequate ventilation. Wash hands after use. Launder contaminated clothing before reuse. Ground and bond containers when transferring from one container to another. Use appropriate protective equipment.

Hygiene Measures

Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Store away from alkalis. Store away from oxidizers. Store away from water. Keep from heat, sparks, and open flames. Keep

7.3. Specific end use(s)

Please refer to the attached Annex for a listing of exposure scenarios.

No information available

8.2. Exposure controls**Engineering Controls**

Use in a well ventilated area. Local exhaust ventilation should be used in areas without good cross ventilation.

Personal protective equipment

If engineering controls and work practices cannot prevent excessive exposures, the selection and proper use of personal protective equipment should be determined by an industrial hygienist or other qualified professional based on the specific application of this product.

Respiratory Protection

Organic vapor/acid gas respirator.

Hand Protection

Impervious rubber gloves.

Skin Protection

Rubber boots Full protective chemical resistant clothing.

Eye Protection

Chemical goggles; also wear a face shield if splashing hazard exists.

Other Precautions

Eyewash fountains and safety showers must be easily accessible.

Environmental Exposure Controls Do not allow material to contaminate ground water system

SECTION 9: Physical and chemical properties**9.1. Information on basic physical and chemical properties****Physical State:** Liquid**Color:** Clear colorless**Odor:** Pungent acrid**Odor Threshold:** No information availablePropertyValuesRemarks/ - Method**pH:**

< 2

Freezing Point / Range

-9 °C

Melting Point / Range

No data available

Boiling Point / Range

126 °C / 259 °F

Flash Point

39 °C / 103 °F PMCC

Flammability (solid, gas)

No data available

Explosive Properties

No information available

Oxidizing Properties

No information available

9.2. Other information**VOC Content (%)**

No data available

SECTION 10: Stability and reactivity**10.1. Reactivity**

Not expected to be reactive.

10.2. Chemical stability

Stable

10.3. Possibility of hazardous reactions

Will Not Occur

10.4. Conditions to avoid

Keep away from heat, sparks and flame. Do not allow water to get into container because of violent reaction.

10.5. Incompatible materials

Strong alkalis. Strong oxidizers. Reacts with water.

10.6. Hazardous decomposition products

Carbon monoxide and carbon dioxide.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Acute Toxicity

Inhalation

Toxic by inhalation. Causes severe respiratory irritation.

Eye Contact

Causes severe eye burns.

Skin Contact

Causes severe burns.

Ingestion

Harmful if swallowed. Causes burns of the mouth, throat and stomach.

Chronic Effects/Carcinogenicity

Prolonged, excessive exposure may cause erosion of the teeth.

Toxicology data for the components

Substances	CAS Number	LD50 Oral	LD50 Dermal	LC50 Inhalation
Acetic anhydride	108-24-7	630 mg/kg bw (rat)	4000 mg/kg bw (rabbit)	4.1 mg/L (rat, vapor, 4h)
Acetic acid	64-19-7	No data available	1060 mg/kg-bw (rabbit)	11.4 mg/L (rat, 4 h, vapor)

Substances	CAS Number	Skin corrosion/irritation
Acetic anhydride	108-24-7	Corrosive to skin
Acetic acid	64-19-7	Corrosive to skin Extremely corrosive and destructive to tissue Skin, rabbit:

Substances	CAS Number	Serious eye damage/irritation
Acetic anhydride	108-24-7	Causes severe eye burns
Acetic acid	64-19-7	Corrosive to eyes Eye, rabbit: Causes serious eye damage

Substances	CAS Number	Skin Sensitization
Acetic anhydride	108-24-7	Not regarded as a sensitizer.
Acetic acid	64-19-7	Not regarded as a sensitizer.

Substances	CAS Number	Respiratory Sensitization
Acetic anhydride	108-24-7	No information available
Acetic acid	64-19-7	No information available

Substances	CAS Number	Mutagenic Effects
Acetic anhydride	108-24-7	In vitro tests did not show mutagenic effects. In vivo tests did not show mutagenic effects.
Acetic acid	64-19-7	In vivo tests did not show mutagenic effects. In vitro tests did not show mutagenic effects.

Substances	CAS Number	Carcinogenic Effects
Acetic anhydride	108-24-7	No information available
Acetic acid	64-19-7	Did not show carcinogenic effects in animal experiments

Substances	CAS Number	Reproductive toxicity
Acetic anhydride	108-24-7	Not a confirmed teratogen or embryotoxin.
Acetic acid	64-19-7	Did not show teratogenic effects in animal experiments. Animal testing did not show any effects on fertility.

Substances	CAS Number	STOT - single exposure
Acetic anhydride	108-24-7	May cause respiratory irritation.
Acetic acid	64-19-7	May cause respiratory irritation.

Substances	CAS Number	STOT - repeated exposure
Acetic anhydride	108-24-7	Not applicable due to corrosivity of the substance.
Acetic acid	64-19-7	Not applicable due to corrosivity of the substance.

Substances	CAS Number	Aspiration hazard
Acetic anhydride	108-24-7	Not applicable
Acetic acid	64-19-7	Not applicable

SECTION 12: Ecological information

12.1. Toxicity

Substances	CAS Number	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Toxicity to Invertebrates
Acetic anhydride	108-24-7	EC50 (72 h) >300.82 mg/L (Skeletonea costatum) EC50 (72 h) >300.82 mg/L (Skeletonea costatum)	LC50 (96 h) >300.82 mg/L (Danio rerio)	NOEC (16h) 1150 mg/L (Pseudomonas putida) (similar substance)	LC50 (24) 55 mg/L (Daphnia magna)
Acetic acid	64-19-7	EC50 (72 h) =55.22 mg/L (Anabaena) (Effect concentrations in the aquatic environment are attributable to a change in pH value.)	LC50 (96 h) =75 mg/L (Lepomis macrochirus) LC50 (96 h) =251 mg/L (Gambusia affinis) (Effect concentrations in the aquatic environment are attributable to a change in pH value.)	NOAEC (16 h) =1150 mg/L (Pseudomonas putida)	EC50 (48 h) =65 mg/L (Daphnia magna) (Effect concentrations in the aquatic environment are attributable to a change in pH value.)

12.2. Persistence and degradability

Readily biodegradable

Substances	CAS Number	Persistence and Degradability
Acetic anhydride	108-24-7	Readily biodegradable (96% @ 20d)
Acetic acid	64-19-7	Readily biodegradable (99% @ 7d)

12.3. Bioaccumulative potential

Does not bioaccumulate.

Substances	CAS Number	Log Pow
Acetic anhydride	108-24-7	LogPow -0.5774
Acetic acid	64-19-7	Log Kow =-0.17

12.4. Mobility in soil

Substances	CAS Number	Mobility
Acetic anhydride	108-24-7	KOC = 1.339 (Calculated)
Acetic acid	64-19-7	No information available

12.5. Results of PBT and vPvB assessment

This mixture contains no substance considered to be persistent, bioaccumulating nor toxic (PBT). This mixture contains no substance considered to be very persistent nor very bioaccumulating (vPvB).

Substances	PBT and vPvB assessment
Acetic anhydride	Not PBT/vPvB
Acetic acid	Not PBT/vPvB

12.6. Other adverse effects

Endocrine Disruptor Information

This product does not contain any known or suspected endocrine disruptors

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Disposal methods

Disposal should be made in accordance with federal, state, and local regulations. Incineration recommended in approved incinerator according to federal, state, and local regulations. Substance should NOT be deposited into a sewage facility.

Contaminated Packaging

Follow all applicable national or local regulations. Contaminated packaging may be disposed of by: rendering packaging incapable of containing any substance, or treating packaging to remove residual contents, or treating packaging to make sure the residual contents are no longer hazardous, or by disposing of packaging into commercial waste collection.

SECTION 14: Transport information

UN Number	UN2920
UN proper shipping name:	Corrosive Liquid, Flammable, N.O.S. (Contains Acetic Anhydride, Acetic Acid)
Transport Hazard Class(es):	8 (3)
Packing Group:	II
Environmental Hazards:	Not applicable

RID

UN Number	UN2920
UN proper shipping name:	Corrosive Liquid, Flammable, N.O.S. (Contains Acetic Anhydride, Acetic Acid)
Transport Hazard Class(es):	8 (3)
Packing Group	II
Environmental Hazards:	Not applicable

ADR

UN Number	UN2920
UN proper shipping name:	Corrosive Liquid, Flammable, N.O.S. (Contains Acetic Anhydride, Acetic Acid)
Transport Hazard Class(es):	8 (3)
Packing Group	II
Environmental Hazards:	Not applicable

IATA/ICAO

UN Number	UN2920
UN proper shipping name:	Corrosive Liquid, Flammable, N.O.S. (Contains Acetic Anhydride, Acetic Acid)
Transport Hazard Class(es):	8 (3)
Packing Group:	II
Environmental Hazards:	Not applicable

14.1. UN Number UN2920**14.2. UN proper shipping name:** Corrosive Liquid, Flammable, N.O.S. (Contains Acetic Anhydride, Acetic Acid)**14.3. Transport Hazard Class(es):** 8 (3)**14.4. Packing Group** II**14.5. Environmental Hazards:** Not applicable**14.6. Special Precautions for User** None**14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code** Not applicable**SECTION 15: Regulatory information****15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture****International Inventories**

EINECS (European Inventory of Existing Chemical Substances)	This product, and all its components, complies with EINECS
US TSCA Inventory	All components listed on inventory or are exempt.
Canadian Domestic Substances List (DSL)	All components listed on inventory or are exempt.

Legend**TSCA** - United States Toxic Substances Control Act Section 8(b) Inventory**EINECS/ELINCS** - European Inventory of Existing Commercial Chemical Substances/EU List of Notified Chemical Substances**DSL/NDL** - Canadian Domestic Substances List/Non-Domestic Substances List**Germany, Water Endangering Classes (WGK)** WGK 1: Low hazard to waters.**15.2. Chemical safety assessment**

Yes

SECTION 16: Other information**Full text of H-Statements referred to under sections 2 and 3**

H226 - Flammable liquid and vapor

H302 - Harmful if swallowed

H314 - Causes severe skin burns and eye damage
H318 - Causes serious eye damage
H331 - Toxic if inhaled
H335 - May cause respiratory irritation

Key or legend to abbreviations and acronyms used in the safety data sheet

bw – body weight
CAS – Chemical Abstracts Service
CLP – REGULATION (EC) No 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on Classification, Labelling and Packaging of substances and mixtures
EC – European Commission
EC10 – Effective Concentration 10%
EC50 – Effective Concentration 50%
EEC – European Economic Community
ErC50 – Effective Concentration growth rate 50%
IBC Code – International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk
LC50 – Lethal Concentration 50%
LD50 – Lethal Dose 50%
LL0 – Lethal Loading 0%
LL50 – Lethal Loading 50%
MARPOL – International Convention for the Prevention of Pollution from Ships
mg/kg – milligram/kilogram
mg/L – milligram/liter
NIOSH – National Institute for Occupational Safety and Health
NOEC – No Observed Effect Concentration

FE-1A ACIDIZING COMPOSITION

Annex to SDS					
Substances	CAS Number	Process categories	Environmental release category	Product category(ies)	Sector of uses
Acetic acid	64-19-7	PROC4; PROC8b; PROC15	ERC1	-	SU2a; SU2b; SU3

Exposure Scenario

Application of bulk onshore/offshore oilfield liquid or solid/powder.

1. Title Section**Use**

Use in batch process where opportunities for exposure arise.
 Transfer from support vessel to installation.
 Transfer from bulk/ IBC/ drum to on-site storage, transfer to process.
 Transfer from pot/tin/tube to process. On-site sampling and testing e.g. QC

Sector of uses

SU2a - Mining, (without offshore industries)
 SU2b - Offshore industries

Worker**Process categories**

PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
 PROC15 - Use as a laboratory reagent
 PROC8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities

Product category(ies)

Not applicable

Article categories

Not applicable

Environmental**Environmental release category(ies)** ERC1 - Manufacture of substances**2. Conditions of use affecting exposure****Control of environmental exposure**

Amount used, frequency and duration of use (or from service life)

Substances	Daily Amount Per Site	Annual site tonnage	Frequency	Duration of use
Acetic acid	-	-	-	-

Technical and organisational conditions and measures

Substances	Technical and organisational conditions and measures
Acetic acid	Prevent entry into waterways, sewers, basements or confined areas.

Conditions and measures related to sewage treatment plant

Substances	Conditions and measures related to sewage treatment plant
Acetic acid	No information available

Conditions and measures related to treatment of waste (including article waste)

Substances	Conditions and measures related to treatment of waste (including article waste)
Acetic acid	Dispose of contents/container in accordance with local/regional/national/international regulations.

Other conditions affecting environmental exposure

Substances	Receiving surface water flow m3/d	Degradation
Acetic acid	-	99% @ 7d

Control of Worker Exposure

Product (article) characteristics

Physical State:	Liquid
Vapor Pressure	11.7
Dustiness	Not applicable

Substances	Limit the substance content in the product to
Acetic acid	25%

Amount used (or contained in articles), frequency and duration of use/exposure

Substances	Amounts used (daily)	Covers daily exposures up to (hours/day)	Frequency (days/year)
Acetic acid	-	8	260

Technical and organisational conditions and measures

Substances	Technical and organisational conditions and measures
Acetic acid	Use in closed batch process (synthesis or formulation). Provide a basic standard of general ventilation (3 to 5 air changes per hour). General exposure (open systems): Avoid carrying out activities involving exposure for more than 4 hours. Ensure operation is undertaken outdoors. Sample via a closed loop or other system to avoid exposure. PROC8b: Ensure material transfers are under containment or extract ventilation. Transfer via enclosed lines. Retain drain downs in sealed storage pending disposal or for subsequent recycle. Locate bulk storage outdoors. PROC15: Provide a basic standard of general ventilation (10 to 15 air changes per hour). Avoid carrying out activities involving exposure for more than 1 hour. Handle in a fume cupboard or under extract ventilation.

Conditions and measures related to personal protection, hygiene and health evaluation

Substances	Conditions and measures related to personal protection, hygiene and health evaluation
Acetic acid	Use suitable eye protection. Wear suitable gloves tested to EN374. Refer to section 8 of the SDS.

Other conditions affecting workers exposure

Substances	Other conditions affecting workers exposure
Acetic acid	PROC4 + PROC8b: Indoor and outdoor use. Assumes process temperature up to 25 °C. PROC15: Indoor use.

Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Substances	Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply
Acetic acid	Wash hands after use. Launder contaminated clothing before reuse.

3. Exposure estimation and reference to its source

Environmental release and exposure

Substances	Environmental release and exposure
Acetic acid	When the recommended risk management measures (RMMs) and operational conditions (OCs) are observed, exposures are not expected to exceed the predicted DNELs and the resulting risk characterization ratios are expected to be less than 1.

Worker exposure

Substances	Route of exposure and type of effects	Exposure estimate PROC4	Assessment Method	RCR
Acetic acid	Long-term exposure - Local effects, Inhalation mg/m ³	8.40	Used ECETOC TRA model.	0.84

4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES

Scaling method

For scaling see: <http://www.ecetoc.org/tra>, ECETOC TRA worker v2.3, modified version.

Scaling parameters

The DU works inside the boundaries set by the ES if either the proposed risk management measures as described above are met or the downstream user can demonstrate on his own that his implemented risk management measures are adequate.

SAFETY DATA SHEET

Product Trade Name: 15% FE ACID - DOUBLE STRENGTH

Revision Date: 29-Apr-2015

Revision Number: 6

1. Identification

1.1. Product Identifier

Product Trade Name: 15% FE ACID - DOUBLE STRENGTH
Synonyms None
Chemical Family: Acid
Internal ID Code HM005788

1.2 Recommended use and restrictions on use

Application: Acid
Uses advised against No information available

1.3 Manufacturer's Name and Contact Details

Manufacturer/Supplier

Halliburton Energy Services, Inc.
P.O. Box 1431
Duncan, Oklahoma 73536-0431
Telephone: 1-281-871-6107

Halliburton Group Canada
645 - 7th Ave SW Suite 1800
Calgary, AB, T2P 4G8, Canada
Telephone: 1-403-231-9300

Prepared By Chemical Stewardship
Telephone: 1-281-871-6107
e-mail: fdunexchem@halliburton.com

1.4. Emergency telephone number:

Emergency Telephone Number 1-866-519-4752 or 1-760-476-3962 (accessible 24 hours a day / 7 days a week)
Global Incident Response Access Code: 334305
Contract Number: 14012

2. Hazards Identification

2.1 Classification in accordance with paragraph (d) of §1910.1200

Skin Corrosion / Irritation	Category 1 B - H314
Serious Eye Damage/Irritation	Category 1 - H318
Corrosive to Metals.	Category 1 - H290
Substances/mixtures corrosive to metal	Category 1 - H290

2.2. Label Elements

Hazard Pictograms

Signal Word: Danger

Hazard Statements
 H290 - May be corrosive to metals
 H314 - Causes severe skin burns and eye damage
 H318 - Causes serious eye damage

Precautionary Statements

Prevention
 P234 - Keep only in original packaging.
 P260 - Do not breathe dust/fume/gas/mist/vapors/spray
 P264 - Wash face, hands and any exposed skin thoroughly after handling
 P280 - Wear protective gloves/protective clothing/eye protection/face protection
 P280 - Wear protective gloves/protective clothing
 P280 - Wear eye protection/face protection

Response
 P301 + P330 + P331 - IF SWALLOWED: rinse mouth. Do NOT induce vomiting
 P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
 P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
 P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
 P310 - Immediately call a POISON CENTER or doctor/physician
 P363 - Wash contaminated clothing before reuse
 P390 - Absorb spillage to prevent material damage
 P304 + P340 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing

Storage
 P405 - Store locked up

Disposal
 P406 - Store in corrosive resistant container with a resistant inner liner.
 P501 - Dispose of contents/container in accordance with local/regional/national/international regulations

2.3 Hazards not otherwise classified

None known

3. Composition/information on Ingredients

Substances	CAS Number	PERCENT (w/w)	GHS Classification - US
Hydrochloric acid	7647-01-0	10 - 30%	Skin Corr. 1A (H314) Eye Corr. 1 (H318) STOT SE 3 (H335) Met. Corr. 1 (H290)
Acetic anhydride	108-24-7	1 - 5%	Acute Tox. 4 (H302) Acute Tox. 3 (H331) Skin Corr. 1B (H314) Eye Corr. 1 (H318) STOT SE 3 (H335) Flam. Liq. 3 (H226)

The exact percentage (concentration) of the composition has been withheld as proprietary.

4. First Aid Measures

4.1. Description of first aid measures

Inhalation	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
Eyes	In case of contact, immediately flush eyes with plenty of water for at least 30 minutes. Remove contact lenses after the first 5 minutes and continue washing. Seek immediate medical attention/advice. Suitable emergency eye wash facility should be immediately available
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 30 minutes and remove contaminated clothing, shoes and leather goods immediately. Get medical attention immediately. Remove contaminated clothing and laundry before reuse.
Ingestion	Do NOT induce vomiting. Give nothing by mouth. Obtain immediate medical attention.

4.2 Most important symptoms/effects, acute and delayed

Causes severe skin irritation with tissue destruction. Causes severe eye irritation which may damage tissue.

4.3. Indication of any immediate medical attention and special treatment needed

Notes to Physician Treat symptomatically.

5. Fire-fighting measures

5.1. Extinguishing media

Suitable Extinguishing Media

Water fog, carbon dioxide, foam, dry chemical.

Extinguishing media which must not be used for safety reasons

None known.

5.2 Specific hazards arising from the substance or mixture

Special exposure hazards in a fire

Decomposition in fire may produce harmful gases. Reaction with steel and certain other metals generates flammable hydrogen gas. Do not allow runoff to enter waterways.

5.3 Special protective equipment and precautions for fire-fighters

Special protective equipment for firefighters

Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use appropriate protective equipment.
See Section 8 for additional information

6.2. Environmental precautions

Prevent from entering sewers, waterways, or low areas.

6.3. Methods and material for containment and cleaning up

Isolate spill and stop leak where safe. Contain spill with sand or other inert materials. Neutralize to pH of 6-8. Scoop up and remove.

7. Handling and storage

7.1. Precautions for safe handling**Handling Precautions**

Avoid contact with eyes, skin, or clothing. Avoid breathing vapors. Wash hands after use. Launder contaminated clothing before reuse.

Hygiene Measures

Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities**Storage Information**

Store away from alkalis. Store in a cool well ventilated area. Keep container closed when not in use.

8. Exposure Controls/Personal Protection**8.1 Occupational Exposure Limits**

Substances	CAS Number	OSHA PEL-TWA	ACGIH TLV-TWA
Hydrochloric acid	7647-01-0	Not applicable	Ceiling: 2 ppm
Acetic anhydride	108-24-7	TWA: 5 ppm TWA: 20 mg/m ³	TWA: 1 ppm STEL: 3 ppm

8.2 Appropriate engineering controls**Engineering Controls**

Use in a well ventilated area. Local exhaust ventilation should be used in areas without good cross ventilation.

8.3 Individual protection measures, such as personal protective equipment**Personal Protective Equipment**

If engineering controls and work practices cannot prevent excessive exposures, the selection and proper use of personal protective equipment should be determined by an industrial hygienist or other qualified professional based on the specific application of this product.

Respiratory Protection

Acid gas respirator.

Hand Protection

Impervious rubber gloves.

Skin Protection

Full protective chemical resistant clothing.

Eye Protection

Chemical goggles; also wear a face shield if splashing hazard exists.

Other Precautions

Eyewash fountains and safety showers must be easily accessible.

9. Physical and Chemical Properties**9.1. Information on basic physical and chemical properties**

Physical State: Liquid

Color

Clear colorless

Odor: Pungent acrid

Odor

No information available

Threshold:

Property

Values

Remarks/ - Method

Lower flammability limit

3%

Evaporation rate

No data available

Vapor Pressure	No data available
Vapor Density	No data available
Specific Gravity	1.07
Water Solubility	Miscible with water
Solubility in other solvents	No data available
Partition coefficient: n-octanol/water	No data available
Autoignition Temperature	332 °C / 630 °F
Decomposition Temperature	No data available
Viscosity	No data available
Explosive Properties	No information available
Oxidizing Properties	No information available

9.2. Other information

VOC Content (%)	No data available
-----------------	-------------------

10. Stability and Reactivity**10.1. Reactivity**

Not expected to be reactive.

10.2. Chemical stability

Stable

10.3. Possibility of hazardous reactions

Will Not Occur

10.4. Conditions to avoid

None anticipated

10.5. Incompatible materials

Strong alkalis.

10.6. Hazardous decomposition products

Flammable hydrogen gas. Chlorine. Hydrogen sulfide.

11. Toxicological Information**11.1 Information on likely routes of exposure**

Principle Route of Exposure Eye or skin contact, inhalation.

11.2 Symptoms related to the physical, chemical and toxicological characteristics**Acute Toxicity**

Inhalation	Causes severe respiratory irritation.
Eye Contact	Causes severe eye irritation May cause eye burns.
Skin Contact	Causes severe skin irritation. May cause skin burns on prolonged contact.
Ingestion	Causes burns of the mouth, throat and stomach.

Chronic Effects/Carcinogenicity Prolonged, excessive exposure may cause erosion of the teeth.

11.3 Toxicity data**Toxicology data for the components**

Substances	CAS Number	LD50 Oral	LD50 Dermal	LC50 Inhalation
Hydrochloric acid	7647-01-0	No data available	No data available	No data available
Acetic anhydride	108-24-7	630 mg/kg bw (rat)	4000 mg/kg bw (rabbit)	4.1 mg/L (rat, vapor, 4h)

Substances	CAS Number	Skin corrosion/irritation
Hydrochloric acid	7647-01-0	Causes severe burns
Acetic anhydride	108-24-7	Corrosive to skin
Substances	CAS Number	Serious eye damage/irritation
Hydrochloric acid	7647-01-0	Causes severe burns
Acetic anhydride	108-24-7	Causes severe eye burns
Substances	CAS Number	Skin Sensitization
Hydrochloric acid	7647-01-0	Did not cause sensitization on laboratory animals (guinea pig)
Acetic anhydride	108-24-7	Not regarded as a sensitizer.
Substances	CAS Number	Respiratory Sensitization
Hydrochloric acid	7647-01-0	No information available
Acetic anhydride	108-24-7	No information available
Substances	CAS Number	Mutagenic Effects
Hydrochloric acid	7647-01-0	In vitro tests did not show mutagenic effects.
Acetic anhydride	108-24-7	In vitro tests did not show mutagenic effects. In vivo tests did not show mutagenic effects.
Substances	CAS Number	Carcinogenic Effects
Hydrochloric acid	7647-01-0	No data of sufficient quality are available.
Acetic anhydride	108-24-7	No information available
Substances	CAS Number	Reproductive toxicity
Hydrochloric acid	7647-01-0	Embryo and fetotoxicity has been observed in female rats exposed to maternally toxic levels of hydrogen chloride (450 mg/m ³ , 1hr.). When tested at maternally toxic doses, no adverse effects on fertility, teratogenicity, or development were observed.
Acetic anhydride	108-24-7	Not a confirmed teratogen or embryotoxin.
Substances	CAS Number	STOT - single exposure
Hydrochloric acid	7647-01-0	May cause respiratory irritation.
Acetic anhydride	108-24-7	May cause respiratory irritation.
Substances	CAS Number	STOT - repeated exposure
Hydrochloric acid	7647-01-0	No significant toxicity observed in animal studies at concentration requiring classification.
Acetic anhydride	108-24-7	Not applicable due to corrosivity of the substance.
Substances	CAS Number	Aspiration hazard
Hydrochloric acid	7647-01-0	Not applicable
Acetic anhydride	108-24-7	Not applicable

12. Ecological Information

12.1. Toxicity

Substance Ecotoxicity Data

Substances	CAS Number	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Toxicity to Invertebrates
Hydrochloric acid	7647-01-0	No information available	LC50 282 mg/L (Gambusia affinis) LC50 20.5 mg/L (Lepomis macrochirus) LC50 (96h) 3.25 – 3.5 (pH) (Lepomis macrochirus)	EC50 (3h) >= 5 and <= 5.5 (pH) (Activated sludge, domestic)	EC50 (48 h) 4.92 mg/L (Daphnia magna)
Acetic anhydride	108-24-7	EC50 (72 h) >300.82 mg/L (Skeletonema costatum) EC50 (72 h) >300.82 mg/L (Skeletonema costatum)	LC50 (96 h) >300.82 mg/L (Danio rerio)	NOEC (16h) 1150 mg/L (Pseudomonas putida) (similar substance)	LC50 (24) 55 mg/L (Daphnia magna)

12.2. Persistence and degradability

Substances	CAS Number	Persistence and Degradability
Hydrochloric acid	7647-01-0	The methods for determining biodegradability are not applicable to inorganic substances.
Acetic anhydride	108-24-7	Readily biodegradable (96% @ 20d)

12.3. Bioaccumulative potential

Substances	CAS Number	Bioaccumulation
Hydrochloric acid	7647-01-0	-2.65
Acetic anhydride	108-24-7	LogPow -0.5774

12.4. Mobility in soil

Substances	CAS Number	Mobility
Hydrochloric acid	7647-01-0	No information available
Acetic anhydride	108-24-7	KOC = 1.339 (Calculated)

12.5 Other adverse effects

No information available

13. Disposal Considerations**13.1. Waste treatment methods**

Disposal methods Disposal should be made in accordance with federal, state, and local regulations.
Contaminated Packaging Follow all applicable national or local regulations.

14. Transport Information**US DOT**

UN Number UN3264
UN proper shipping name: Corrosive Liquid, Acidic, Inorganic, N.O.S. (Contains Hydrochloric Acid, Acetic Anhydride)
Transport Hazard Class(es): 8
Packing Group: II

Key or legend to abbreviations and acronyms used in the safety data sheet

bw – body weight
CAS – Chemical Abstracts Service
d - day
EC50 – Effective Concentration 50%
ErC50 – Effective Concentration growth rate 50%
h - hour
LC50 – Lethal Concentration 50%
LD50 – Lethal Dose 50%
LL50 – Lethal Loading 50%
mg/kg – milligram/kilogram
mg/L – milligram/liter
mg/m³ - milligram/cubic meter
mm - millimeter
mmHg - millimeter mercury
NIOSH – National Institute for Occupational Safety and Health
NTP – National Toxicology Program
OEL – Occupational Exposure Limit
PEL – Permissible Exposure Limit
ppm – parts per million
STEL – Short Term Exposure Limit
TWA – Time-Weighted Average
UN – United Nations
w/w - weight/weight

New Zealand: 111

Identification of Substances or Preparation

Product Trade Name: SODIUM BROMIDE BRINE
Synonyms: None
Chemical Family: Salt
UN Number: None
Dangerous Goods Class: None
Subsidiary Risk: None
Hazchem Code: None Allocated
Poisons Schedule: None Allocated
Application: Additive

Prepared By Chemical Compliance
Telephone: 1-580-251-4335
e-mail: fdunexchem@halliburton.com

2. COMPOSITION/INFORMATION ON INGREDIENTS

Substances	CAS Number	PERCENT	Australia NOHSC	New Zealand WES	ACGIH TLV-TWA
Sodium bromide	7647-15-6	30 - 60%	Not applicable	Not applicable	Not applicable

Non-Hazardous Substance to Total of 100%

3. HAZARDS IDENTIFICATION

Hazard Overview	May cause eye and skin irritation. May cause headache, dizziness, and other central nervous system effects. May be harmful if swallowed. Repeated overexposure may cause liver and kidney effects.
Risk Phrases	R36 Irritating to eyes.
HSNO Classification	Not Determined

4. FIRST AID MEASURES

Inhalation	If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult give oxygen. Get medical attention.
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes. Get medical attention. Remove contaminated clothing and launder before reuse.
Eyes	In case of contact, or suspected contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention immediately after flushing.
Ingestion	Do not induce vomiting. Slowly dilute with 1-2 glasses of water or milk and seek medical attention. Never give anything by mouth to an unconscious person.
Notes to Physician	Not Applicable

5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media	All standard fire fighting media
Extinguishing media which must not be used for safety reasons	None known.
Special Exposure Hazards	Decomposition in fire may produce toxic gases.
Special Protective Equipment for Fire-Fighters	Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautionary Measures	Use appropriate protective equipment.
Environmental Precautionary Measures	Prevent from entering sewers, waterways, or low areas.
Procedure for Cleaning / Absorption	Isolate spill and stop leak where safe. Contain spill with sand or other inert materials. Scoop up and remove.

7. HANDLING AND STORAGE

Handling Precautions	Avoid contact with eyes, skin, or clothing. Wash hands after use. Launder contaminated clothing before reuse.
-----------------------------	---

Storage Information

Store away from oxidizers. Store away from acids. Store in a cool, dry location. Keep container closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls	Use in a well ventilated area.
Respiratory Protection	Not normally needed. But if significant exposures are possible then the following respirator is recommended: Dust/mist respirator. (N95, P2/P3)
Hand Protection	Nitrile gloves.
Skin Protection	Normal work coveralls.
Eye Protection	Chemical goggles; also wear a face shield if splashing hazard exists.
Other Precautions	Eyewash fountains and safety showers must be easily accessible.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
Color:	Clear colorless
Odor:	Odorless
pH:	Not Determined
Specific Gravity @ 20 C (Water=1):	1.44 - 1.5
Density @ 20 C (kg/l):	1.5
Bulk Density @ 20 C (kg/m³):	Not Determined
Boiling Point/Range (C):	Not Determined
Freezing Point/Range (C):	Not Determined
Pour Point/Range (C):	Not Determined
Flash Point/Range (C):	Not Determined
Flash Point Method:	Not Determined
Autoignition Temperature (C):	Not Determined
Flammability Limits in Air - Lower (g/m³):	Not Determined
Flammability Limits in Air - Lower (%):	Not Determined
Flammability Limits in Air - Upper (g/m³):	Not Determined
Flammability Limits in Air - Upper (%):	Not Determined
Vapor Pressure @ 20 C (mmHg):	Not Determined
Vapor Density (Air=1):	Not Determined
Percent Volatiles:	Not Determined
Evaporation Rate (Butyl Acetate=1):	Not Determined
Solubility in Water (g/100ml):	Soluble
Solubility in Solvents (g/100ml):	Not Determined
VOCs (g/l):	Not Determined
Viscosity, Dynamic @ 20 C (centipoise):	Not Determined
Viscosity, Kinematic @ 20 C (centistokes):	Not Determined
Partition Coefficient/n-Octanol/Water:	Not Determined
Molecular Weight (g/mole):	Not Determined
Decomposition Temperature (C):	Not Determined

10. STABILITY AND REACTIVITY

Stability Data:	Stable
Hazardous Polymerization:	Will Not Occur
Conditions to Avoid	None anticipated

Incompatibility (Materials to Avoid)	Strong oxidizers.
Hazardous Decomposition Products	Carbon monoxide and carbon dioxide.
Additional Guidelines	Not Applicable

11. TOXICOLOGICAL INFORMATION

Principle Route of Exposure	Eye or skin contact, inhalation.
Symptoms related to exposure	
Inhalation	Vapors given off by heated product may be harmful. May cause respiratory irritation. May cause central nervous system depression including headache, dizziness, drowsiness, incoordination, slowed reaction time, slurred speech, giddiness and unconsciousness.
Skin Contact	May cause skin irritation.
Eye Contact	May cause eye irritation.
Ingestion	Harmful if swallowed. May cause central nervous system depression including headache, dizziness, drowsiness, muscular weakness, incoordination, slowed reaction time, fatigue blurred vision, slurred speech, giddiness, tremors and convulsions. May cause liver and kidney damage.
Aggravated Medical Conditions	Skin disorders. Central nervous system disorders.
Chronic Effects/Carcinogenicity	Repeated overexposure may cause liver and kidney effects.
Other Information	None known.
Toxicity Tests	
Oral Toxicity:	LD50: 3500 mg/kg (Rat)
Dermal Toxicity:	Not determined
Inhalation Toxicity:	Not determined
Primary Irritation Effect:	Not determined
Carcinogenicity	Not determined
Genotoxicity:	Not determined
Reproductive / Developmental Toxicity:	Not determined

12. ECOLOGICAL INFORMATION

Mobility (Water/Soil/Air)	Not determined
Persistence/Degradability	Not determined
Bio-accumulation	Not determined

Ecotoxicological Information

Acute Fish Toxicity:	Not determined
Acute Crustaceans Toxicity:	Not determined
Acute Algae Toxicity:	Not determined

Chemical Fate Information	Not determined
---------------------------	----------------

Other Information	Not applicable
-------------------	----------------

13. DISPOSAL CONSIDERATIONS

Disposal Method	Disposal should be made in accordance with federal, state, and local regulations.
-----------------	---

Contaminated Packaging	Follow all applicable national or local regulations.
------------------------	--

14. TRANSPORT INFORMATION

**AVA S.p.A.**Sediu legal: Via Salaria 1313/c
00138 Roma
Italia**FIȘĂ CU DATE DE SECURITATE**

În conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)

DEOXY DEHA

1. IDENTIFICAREA SUBSTANȚEI / AMESTECULUI ȘI A SOCIETĂȚII / ÎNTREPRINDERII		
1.1. Element de identificare a produsului		
Denumire produs:	DEOXY DEHA	
1.2. Utilizări relevante identificate ale substanței sau amestecului și utilizări contraindicate		
Utilizare:	Inhibitor de coroziune pentru fluide de foraj	
1.3. Detalii privind furnizorul fișei cu date de securitate		
Identificarea companiei producătoare		
Nume:	Ava S.p.A.	
Adresă:	Via Salaria 1313/C	
Oraș/Țară:	00138 ROMA (Italia)	
Număr de telefon:	+39 06 885611386 / +39 06 885611324 / +39 06 8856111	
Fax:	+39 06 8889363	
Număr de telefon care poate fi apelat în caz de urgență		
	+39 06 885611386	+39 06 885611324 +39 06 8856111
Adresa de e-mail a persoanei responsabile		
E-mail:	laboratorio.roma@newpark.com	
Importator / Distribuitor / Utilizator		
Nume:	S.C AVA EASTERN EUROPE D.F&S SRL	
Adresă:	Calea Floreasca nr. 60, et.9, cam.12, sector 1	
Oraș/Țară:	BUCUREȘTI / Romania	
Număr de telefon:	004 021 312 44 23; 021 312 28 72,	
Fax:	004 021 311 18 14	
Număr de telefon care poate fi apelat în caz de urgență		
	004 021 312 44 23 (între orele 9 ⁰⁰ - 17 ⁰⁰)	004 0752 01 25 88
Adresa de e-mail a persoanei responsabile		
E-mail:	aionescu@newpark.com	
1.4. Număr de telefon care poate fi apelat în caz de urgență		
Biroul RSI (Regulamentul Sanitar Internațional) și Informare Toxicologică, Institutul de Sănătate Publică		
Telefon de urgență	004 021 318 36 06 (apelabil între orele 8:00 – 15:00)	
E-mail:	mihaela.purcarea@insp.gov.ro	
Telefon de urgență 112

2. IDENTIFICAREA PERICOLELOR		
2.1. Clasificarea substanței sau a amestecului		
<i>Indicarea de pericole specifice pentru om și mediul înconjurător:</i>		
SUBSTANȚA / AMESTECUL ESTE CLASIFICAT CA FIIND PERICULOS ÎN CONFORMITATE CU URMĂTOARELE REGLEMENTĂRI		
Clasificarea conform Regulamentului (UE) nr. 1272/2008 - (CLP)		
	GHS07	Tox. Ac. 4 H312: Nociv în contact cu pielea H332: Nociv în caz de inhalare. Irit. Piele 2 H315: Provoacă iritarea pielii Irit. Oc. 2 H319: Provoacă o iritare gravă a ochilor STOT SE 3 H335: Poate provoca iritarea căilor respiratorii
Fără pictograma	Fara cuvânt de atenționare	Acvatic cronic 3 H412: Nociv pentru mediul acvatic cu efecte pe termen lung
Clasificarea conform Directivei 67/548/CEE (DPP), a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
	Xn - nociv	R20/21: Nociv prin inhalare și în contact cu pielea.
	Xi - iritant	R 36/37/38: Iritant pentru ochi, sistem respirator și pentru piele
	N – Periculos pentru mediu	R52/53: Nociv pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic.
2: IDENTIFICAREA PERICOLELOR		
2.2. Elemente pentru etichetă		
Etichetarea conform Regulamentului (UE) nr. 1272/2008 (CLP)		
Identificarea pericolelor:	 GHS07	Tox. Ac. 4 H312: Nociv în contact cu pielea H332: Nociv în caz de inhalare
		Irit. Piele 2 H315: Provoacă iritarea pielii
		Irit. Oc. 2 H319: Provoacă o iritare gravă a ochilor.
		STOT SE 3 H335: Poate provoca iritarea căilor respiratorii
	Fără pictograma	Acvatic cronic 3 H412: Nociv pentru mediul acvatic cu efecte pe termen lung
Fraze de precauție:	P261: Nu respirați praful/fumul/gazul/ceața/vaporii/spray-ul. P280: Purtați mănuși de protecție / îmbracămințe de protecție / echipament de protecție a ochilor / echipament de protecție a feței.	

**- DEOXY DEHA -**

	<p>P312: Sunați la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic, dacă nu vă simțiți bine.</p> <p>P362: Scoateți îmbrăcămintea contaminată și spălați-o înainte de reutilizare.</p> <p>P304 + P340: ÎN CAZ DE INHALARE: transportați victima la aer liber și mențineți-o în stare de repaus, într-o poziție confortabilă pentru respirație.</p> <p>P332 + P313: În caz de iritare a pielii, consultați medical.</p> <p>P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.</p>	
Eliminarea:	P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.	
Etichetarea conform Directivei 67/548/CEE (DPP) , a Directivei 1999/45/CE (DSP) și amendamentele, HG 1408/2008, HG 937/2010.		
Identificarea pericolelor:		Xn - nociv R20/21: Nociv prin inhalare și în contact cu pielea.
		Xi - iritant R 36/37/38: Iritant pentru ochi, sistem respirator și pentru piele
		N – Periculos pentru mediu R52/53: Nociv pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic.
Sfaturi de siguranță::	<p>S23: A nu se inspira gazul/fumul/vaporii/aerosolii/ (termenul(ii) corespunzător(i) se specific de producător).</p> <p>S26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul.</p> <p>S24/25: Evitați contactul cu pielea și ochii.</p> <p>S36/37: Purtați echipament de protecție corespunzător, mănuși și mască de protecție pentru ochi/față.</p>	
Eliminarea:	S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos.	
2.3. Alte pericole		

3. COMPOZIȚIE / INFORMAȚII PRIVIND COMPONENTII	
3.1. Proprietăți chimice ale substanței sau amestecului	
Compoziție:	Amestec
Conținut:	În conformitate cu tabelul următor
Formula moleculară:	- - -
Numărul EC:	- - -
Numărul CAS:	- - -
Numărul ONU	- - -
Numărul REACH:	- - -

- DEOXY DEHA -

3.2. Componenti periculoși

Nume	Nr. CAS	Nr. EC	Cantitate	Clasificare	Simbol	Fraze de pericol

4. MĂSURI DE PRIM AJUTOR	
4.1. Descrierea măsurilor de prim ajutor	
Informații generale	În acest caz de afecțiuni, solicitați asistență medicală. Arătați medicului această Fișă cu Date de Securitate.
După inhalare:	Dacă respirația este neregulată sau a încetat, administrați respirație artificială. Consultați imediat un medic și arătați-i ambalajul sau eticheta
După contactul cu pielea:	Scoateți imediat toate hainele contaminate. Spălați imediat cu apă curentă din abundență și, eventual, cu săpun, zone ale corpului care a venit în contact cu produsul, chiar dacă este doar o suspiciune
După contactul cu ochii:	În caz de contact cu ochii, clătiți cu apă pentru o durată suficientă de timp și cu pleoapele deschise, apoi consultați imediat un medic oftalmolog. Protejați ochiul intact
După înghițire:	Nu mâncați, nu beți și nu fumați în timpul utilizării. Dacă în caz de înghițire nu vă simțiți bine, contactați de urgență un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.
Alte informații:	---
4.2. Cele mai importante simptome și efecte, atât acute, cât și întârziate.	
Simptome	Nu sunt disponibile.
4.3. Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare.	
Supraveghere medicală:	Supravegherea medicală în timpul activității la locul de muncă nu este necesară. În caz de boală sau accident, consultați imediat un medic și arătați-i aceasta Fișă cu Date de Securitate.
Mijloace speciale de intervenție:	---
5. MĂSURI DE COMBATERE A INCENDIILOR	
5.1. Mijloace de stingere a incendiilor	
Măsuri de precauție în caz de incendiu:	În caz de incendiu respectați, urmați instrucțiunile.
Mijloace de stingere corespunzătoare:	Utilizați spumă, pulbere uscată sau CO2
Mijloace de stingere necorespunzătoare:	Niciuna în mod particular
Riscuri care derivă din ardere (produși de descompunere termică periculoși):	Nu inhalați gazele de explozie și de ardere. Arderea produce un fum greu.
Echipamente speciale de stingere a incendiilor	Folosiți un aparat de respirație adecvat
Altele:	Colectați separat apa contaminată folosită pentru a stinge focul. Nu va fi evacuată în sistemul de canalizare. Dacă este posibil în ceea ce privește siguranța, scoateți ambalaje nedeteriorate din zona de pericol imediat
6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ	
6.1. Precauții personale, echipament de protecție și proceduri de urgență	
Echipament de protecție:	Evitați contactul cu ochii și pielea. Scoateți toate hainele contaminate
Proceduri de urgență:	Nu respirați vaporii / ceața / gaz. Feriți-vă de acumulările de vapori care formează concentrații explosive. Vaporii se pot acumula în zonele joase. Scoateți persoane în zone de siguranță
6.2. Precauții pentru mediul înconjurător	
Medii de izolare:	Folosiți media absorbant, organic, nisip
Metode de limitare a poluarii	Nu permiteți infiltrarea în sol / subsol. Nu permiteți infiltrarea în apele de suprafață sau în sistemul de canalizare. În cazul accesului în cursurile de apă, sol sau în canalizare, informați autoritățile responsabile

**- DEOXY DEHA -**

Informații suplimentare:	Rețineți apa de spălare contaminată și eliminați-o conform regulamentelor
--------------------------	---

7. MANIPULARE ȘI DEPOZITARE	
7.1. Precauții pentru manipularea în condiții de securitate	
Precauții pentru manipulare în condiții de securitate:	Evitați contactul cu ochii și pielea, inhalarea de vapori și aburi. A nu se folosi recipientul gol înainte de a fi curățat. Înainte de operațiunile de transfer să vă asigurați că în recipiente nu există reziduuri materiale incompatibile. Hainele contaminate ar trebui să fie schimbate înainte de a intra la locurile de servit masa
7.2. Precauții pentru depozitare în condiții de securitate, inclusiv eventualele incompatibilități	
Condiții de depozitare:	Păstrați ambalajul închis ermetic. A se păstra la distanță de alimente, băuturi și hrană pentru animale
Specificațiile zonei de depozitare:	Spații suficient ventilați, la distanță de materiale incompatibile
Specificațiile recipientilor:	Păstrați întotdeauna containerele ermetic închise
Incompatibilități:	Niciuna
7.3. Utilizare finală specifică:	
Utilizări finale specifice:	Inhibitor de coroziune pentru fluide de foraj

8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ		
8.1. Parametri de control		
Amestec		N, N-Dietil-hidroxilamina 85% CAS No. 3710-84-7
Valori limită de expunere DNEL		Consumator: 00:13 mg / kg - Expunere: orala umana - efecte sistemice pe termen scurt Lucrător industrial: 8.76 mg/m3 - Expunere: Inhalarea umană - efecte sistemice pe termen lung Consumator: 0,65 mg/m3 - Expunere: Inhalare umană - efecte sistemice pe termen scurt Lucrător industrial: 45,6 mg/m3 - Expunere: Inhalarea umană - efecte locale pe termen lung, Lucrător industrial: 4,7 mg / kg - Expunere: Dermic umana- efecte sistemice pe termen lung
Valori limită de expunere PNEC		Target: apă proaspătă - Valoare: 8,2 mg / l Target: apa de mare - Valoare: 0,82 mg / l Țintă: sedimente de apă dulce - Valoare: 0.0652 mg / kg Target: sedimente apa de mare - Valoare: 0.00652 mg / kg
Limita biologică:		- - -
8.2. Controale ale expunerii profesionale		
8.2.1. Controale tehnice corespunzătoare		Ventilație generală
8.2.2. Măsuri de protecție individuală, precum echipamentul de protecție personală.		Stație de spălare ochi în apropiere.
Protecția individuală	Respiratorie:	Utilizați aparat de respirație
	Ochi	Ochelari de protecție
	Maini	Mănuși de protecție totală
	Corp	Salopetă protectoare pentru intregul corp
8.3. Controlul expunerii mediuluiă		
Variante de expunere		- -

9. PROPRIETĂȚI FIZICE ȘI CHIMICE	
9.1. Informații generale	
Forma:	Lichid
Aspect:	Lichid
Culoare:	De la incolor la galben pai
Miros:	Nu este relevant
Prag olfactiv:	N.a.
9.2. Informații pentru sănătate, siguranță și mediu	
pH:	> 10
Punct de topire:	N.a.
Punct de fierbere:	100 °C
Punct de aprindere:	N.a.
Inflamabilitate (solid, gaz):	N.a.
Temperatura de autoaprindere:	N.a.
Temperatura de descompunere:	N.a.
Pericol de explozie:	N.a.
Limita de inflamabilitate superioară:	N.a.
Limita inferioară de inflamabilitate:	N.a.
Presiunea de vapori:	N.a.
Densitatea la 20 °C:	N.a.
Densitatea aparentă (20°C):	N.a.
Densitatea relativă:	1,00 gr/cm ³
Densitatea de vapori:	N.a.
Rata de evaporare:	N.a.
Solubilitate în apă (20°C):	N.a.
Coeficientul de distribuție (n-octanol):	N.a.
Vâscozitatea (40°C):	N.a.
9.3. Alte informații	
Alte informații:	N.a.
10. STABILITATE ȘI REACTIVITATE	
10.1. Reactivitate	
Condiții care trebuie evitate:	Stabil în condiții normale
10.2. Stabilitate chimică	
Materiale incompatibile:	Niciunul
Posibilitatea de reacții periculoase:	Stabil în condiții normale
10.3. Produsi de descompunere periculoși	
Alte informații:	Stabil în condiții normale.
11. INFORMAȚII TOXICOLOGICE	
11.1. Toxicitate Acută	
Substanța	<i>N, N-Dietil-hidroxilamina 85% CAS No. 3710-84-7</i>
Toxicitate orală acută:	LD50 (Șobolan): 2190 mg/kg
Toxicitate inhalatorie acută:	LC50 (Șobolan) 4 h: 3140 ppm
Toxicitate cutanată acută:	LD50 (Iepure): 1300 mg/kg

**- DEOXY DEHA -**

11.2. Corozivitate	
Piele:	N.a.
Ochi:	N.a.
11.3. Iritabilitate primară	
Piele:	N.a.
Ochi:	N.a.
11.4. Nocivitate	
Ingestie:	N.a.
Inhalare:	N.a.
11.5. Sensibilitate	
Piele:	N.a.
Ochi:	N.a.

12. INFORMAȚII ECOLOGICE	
12.1. Toxicitate	
Substanța	<i>N, N-Dietil-hidroxilamina 85% CAS No. 3710-84-7</i>
Toxicitate în apă:	LC50 (Pești): 134 mg/l EC50 (Alge) 48h: 8.9 mg/l EC50 (Crustacee) 96h:> 101 mg/l
Toxicitate în aer:	N.a.
Toxicitate în sol:	N.a.
12.2. Persistență și degradabilitate	
Alte informații:	Nu este ușor biodegradabil
12.3. Potenția Bioacumulativ	
N.a.	N.a.
12.4. Mobilitate în sol	
Alte informații:	N.a.
12.5. Resultatele evaluării PBT și vPvB	
PBT:	N.a.
vPvB:	Niciunul
12.6. Alte efecte adverse	
Alte informații:	N.a.

13. CONSIDERAȚII PRIVIND ELIMINAREA	
13.1. Metode de eliminare a produsului	
Sfaturi:	Colectați dacă este posibil. Eliminați în conformitate cu reglementările locale.
Cod de deșeu:	N.a.
13.2. Metode de eliminare a ambalajului	
Sfaturi:	N.a.
Alte recomandări:	Eliminați în conformitate cu reglementările locale și naționale

**- DEOXY DEHA -**

14. INFORMAȚII REFERITOARE LA TRANSPORT	
14.1. Transport rutier / feroviar (ADR / RID)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Norme de transport ONU	N.a.
Clasa (clasele) de pericol pentru transport	N.a.
Grupul de ambalare:	N.a.
Denumirea oficială a transportului	
Cod de restricție în galerie/tunel	N.a.
14.2. Transport Maritim (IMDG)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Numarul EMS	
Clasa (clasele) de pericol pentru transport	
Grupul de ambalare:	
Poluant marin:	
Denumirea oficială a transportului	N.a.
14.3. Transport Aerian (ICAO-TI și IATA-DGR)	
Număr ONU	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Clasa IACO/ATA	
Eticheta	
Grupul de ambalare:	
Denumirea oficială a transportului	N.a.
14.4. Transport în vrac	
Anexa II a MARPOL73/78:	Nu sunt mărfuri periculoase în conformitate cu reglementările în transport
Codul IBC:	N.a.

15. INFORMAȚII DE REGLEMENTARE	
15.1. Regulamente / legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză.	
Regulamentul (CE) nr. 1907/2006 (REACH) - privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a Directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei	
Regulamentul (CE) nr. 1272/2008 (CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 790/2009 (adaptarea la progresul tehnic și științific al Regulamentului CLP) - privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	
Regulamentul (CE) nr. 453/2010 (Amendamentul Regulamentului REACH) - modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH)	
Regulament FDS: Această Fișă cu Date de Securitate este elaborată în conformitate cu Regulamentul (UE) nr. 1272/2008, Regulamentul (UE) nr. 1907/2006, amendat prin Regulamentul (UE) nr. 453/2010, Directiva 67/548/CEE (DPP) și Directiva 1999/45/CE (DSP)	
Regulament (CE) nr. 1907/2006 (REACH) Restricții la introducerea pe piață și utilizare, Regulament 552/2009: Nu conține substanțe restricționate.	
Reglementări naționale: Legea 249/2011 pentru modificarea art. 4 din Legea nr. 349/2007 privind reorganizarea cadrului instituțional în domeniul managementului substanțelor chimice. Legea 254/2011 pentru modificarea art. 26 din Legea nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase. REGULAMENTUL (UE) NR. 286/2011 AL COMISIEI de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor HG 1408/2008 privind clasificarea, ambalarea și etichetarea substanțelor periculoase; HG 937/2010 privind clasificarea, ambalarea și etichetarea la introducerea pe piață a preparatelor periculoase; REGULAMENTUL (CE) NR. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006.	

**- DEOXY DEHA -**

Rectificare la Regulamentul (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006 (Jurnalul Oficial al Uniunii Europene L 353 din 31 decembrie 2008).

REGULAMENTUL (CE) NR. 790/2009 de modificare, în vederea adaptării la progresul tehnic și științific, a Regulamentului (CE) nr. 1272/2008 al Parlamentului European și al Consiliului privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

REGULAMENTUL (UE) NR. 453/2010 AL COMISIEI din 20 mai 2010 de modificare a Regulamentului (CE) nr. 1907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH).

Regulament 552/2009 de modificare a anexei XVII din **Regulamentul (CE) nr. 1907/2006 – REACH** privind „Restricțiile privind producerea, introducerea pe piață și utilizarea anumitor substanțe, amestecuri și articole periculoase

HG 735/2006 privind limitarea emisiei de compuși organici volatili.

HG 371/2010 pentru modificarea și completarea Hotărârii Guvernului nr. 699/2003 privind stabilirea unor măsuri pentru reducerea emisiilor de compuși organici volatili datorate utilizării solventilor organici în anumite activități și instalații.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

Legea 263/2005 pentru modificarea și completarea Legii nr. 360/2003 privind regimul substanțelor și preparatelor chimice periculoase;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă.

REGULAMENTUL (CE) NR. 1336/2008 de modificare a Regulamentului (CE) nr. 648/2004 în vederea adaptării acestuia la Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei.

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

O.U.G. 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006.

Legislația privind eliminarea deșeurilor:

Legea 211/2011 privind regimul deșeurilor.

HG 427/2010 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

HG 268/2005 pentru modificarea și completarea HG nr. 128/2002 privind incinerarea deșeurilor.

HG 349/2005 privind depozitarea deșeurilor;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 856/ 2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase.

HG 128/2002 privind incinerarea deșeurilor, modificată și completată prin HG 268/2005.

Legislația pentru deșeurile de ambalaj:

Ordinul 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje.

HG 247/2011 pentru modificarea și completarea Hotărârii Guvernului nr. 621/2005 privind gestionarea ambalajelor și a deșeurilor de ambalaje.

HG 1872/2006 pentru modificarea și completarea HG 621 /2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje.

Cod deșeu ambalaj: 15 01 10* ambalaje care conțin reziduuri sau sunt contaminate cu substanțe periculoase.

16.2. Declarații

Această fișă completează buletinul tehnic, fără să-l înlocuiască. Informațiile furnizate în această fișă tehnică cu date de securitate sunt corecte, conform cunoștințelor noastre, informațiilor și datelor noastre la data publicării sale.

Informațiile se referă numai la produsul specificat și nu pot fi valabile pentru un altfel de produs/material care este folosit în combinație cu orice alte produse/ materiale sau în orice proces, dacă nu se specifică acest lucru în text.

Această fișă tehnică cu date de siguranță conține doar informații referitoare la sănătate și siguranță. Produsul trebuie să fie utilizat în conformitate cu tehnologia AVA. Persoanele care manipulează acest produs trebuie să fie informate cu privire la măsurile de siguranță și trebuie să aibă acces la această informație.

Această fișă cu date de securitate a fost actualizată complet în conformitate cu Regulamentul 453/2010/EU.

Această fișă anulează și înlocuiește orice ediție precedentă.

**- DEOXY DEHA -****Alte informații**

Informațiile conținute în această Fișă cu Date de Securitate se bazează pe datele acumulate în timp și disponibile în momentul elaborării și sunt specifice acestui document.

Scopul acestei fișe este de descriere a produsului din punct de vedere al siguranței în utilizare, procesare, depozitare, transport, eliminare și nu constituie o garanție privind proprietățile specifice ale produsului.

Este întotdeauna responsabilitatea utilizatorului să ia toate măsurile de prevedere pentru fiecare secțiune a prezentei fișe astfel ca produsul să fie utilizat în siguranță.

În cazul în care sunt neclarități, se vor lua ca și informații principale de referință, informațiile conținute în varianta în limba engleză a prezentei Fișe cu Date de Securitate.

16.3. Abrevieri și acronime:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Acordul european privind transportul rutier internațional al mărfurilor periculoase

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) - Regulamentul privind transportul internațional de mărfuri periculoase pe căile ferate

GHS: Globally Harmonized System of Classification and Labelling of Chemicals - Sistemul global armonizat de clasificare și etichetare a produselor chimice

EINECS: European Inventory of Existing Commercial Chemical Substances – Baza de date Europeană a substanțelor chimice existente

CAS: Chemical Abstracts Service (division of the American Chemical Society) – Baza de date pentru substanțe chimice (divizie a Societății Americane de Chimicale)

CSA: Chemical Safety Assessment – Evaluarea Securității Chimice

ACGIH: American Conference of Industrial Hygienists - Conferința americană de Sănătate Publică

EC50: median effective concentration - concentrația efectivă medie

LC50: median lethal concentration - concentrația letală medie

LD50: median lethal dose - doză letală medie

NOEC: no observable effect concentration – concentrația fără efect observat

PNEC: predicted no-effect concentration - concentrația fără efect prevăzut

PBT: persistent, bioaccumulative, toxic chemicals - substanțe chimice persistente, bioacumulative, toxice

vPvB: very persistent, very bioaccumulative chemicals - produse chimice foarte persistente, foarte bioacumulative

TLV-TWA: Threshold limit value – Time weighted average; professional exposure limit average on 8 hours - Valoarea prag limită - Timpul mediu ponderat; limita medie de expunere profesională în 8 ore

TLV-STEL: Threshold limit value – Short Term exposure limit ; professional exposure limit at short term - Valoarea prag limită - Limita de expunere pe termen scurt; limita de expunere profesională pe termen scurt

TLV-C : Threshold limit value – Ceiling - Valoarea prag limită – maximă

**- DEOXY DEHA -**

16.4. Alte informații
Fraze de pericol utilizate în secțiunile anterioare
H226: Lichid și vapori inflamabili H312: Nociv în contact cu pielea H332: Nociv în caz de inhalare H315: Provoacă iritarea pielii H319: Provoacă o iritare gravă a ochilor H335: Poate provoca iritarea căilor respiratorii H411: Toxic pentru mediul acvatic cu efecte pe termen lung H412: Nociv pentru mediul acvatic cu efecte pe termen lung
R10: Inflamabil R20/21: Nociv prin inhalare și în contact cu pielea. R36/37/38: Irritant pentru ochi, sistem respirator și pentru piele R52/53: Nociv pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic.
Fraze de precauție /siguranta utilizate în secțiunile anterioare
P261: Nu respirați praful/fumul/gazul/ceața/vaporii/spray-ul. P280: Purtați mănuși de protecție / îmbrăcăminte de protecție / echipament de protecție a ochilor / echipament de protecție a feței. P312: Sunați la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic, dacă nu vă simțiți bine. P362: Scoateți îmbrăcăminte contaminată și spălați-o înainte de reutilizare. P304 + P340: ÎN CAZ DE INHALARE: transportați victima la aer liber și mențineți-o în stare de repaus, într-o poziție confortabilă pentru respirație. P332 + P313: În caz de iritare a pielii, consultați medical. P305 + P351 + P338: ÎN CAZ DE CONTACT CU OCHII: clătiți cu atenție cu apă, timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți. P501: Aruncați conținutul / recipientul în conformitate cu reglementările în vigoare.
S23: A nu se inspira gazul/fumul/vaporii/aerosolii/ (termenul(ii) corespunzător(i) se specific de producător). S26: În cazul contactului cu ochii, spălați imediat cu multă apă și consultați medicul. S24/25: Evitați contactul cu pielea și ochii. S36/37: Purtați echipament de protecție corespunzător, mănuși și mască de protecție pentru ochi/față. S60: Acest produs și ambalajul (recipientul) său se vor depozita ca un deșeu periculos

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

SECȚIUNEA 2: Identificarea pericolelor

2.1 Clasificarea substanței sau a amestecului

Clasificare conform Regulamentului (CE) nr. 1272/2008 (CLP)

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

<i>Clasa de pericol</i>	<i>Clasa și categoria de pericol</i>	<i>Categorie</i>	<i>Fraza de pericol</i>
corodarea/iritarea pielii	Skin Corr. 1C	1C	H314
lezarea gravă a ochilor/iritarea ochilor	Eye Dam. 1	1	H318
sensibilizarea pielii	Skin Sens. 1A	1A	H317
periculos pentru mediul acvatic - pericol acut	Aquatic Acute 1	1	H400
periculos pentru mediul acvatic - pericol cronic	Aquatic Chronic 1	1	H410

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

Cele mai importante efecte adverse fizico-chimice, asupra sănătății umane și asupra mediului

Corodarea pielii produce leziunea ireversibilă a pielii; anume, necroza vizibilă trecând de epidermă și ajungând până la dermă. Vărsarea și apa de stingere a incendiului pot cauza poluarea cursurilor de apă.

2.2 Elemente pentru etichetă

Etichetarea în conformitate cu Regulamentul (CE) nr. 1272/2008 (CLP)

Cuvânt de avertizare pericol

Pictograme

GHS05, GHS07,
GHS09

Frazele de pericol

H314 Provoacă arsuri grave ale pielii și lezarea ochilor.
H317 Poate provoca o reacție alergică a pielii.
H410 Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Frazele de precauție

P261 Evitați să inspirați ceața/vaporii/spray-ul.
P273 Evitați dispersarea în mediu.
P280 A se purta mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/echipament de protecție a feței/protecție a auzului/....
P301+P330+P331 ÎN CAZ DE ÎNGHIȚIRE: clătiți gura. NU provocați vomă.
P303+P361+P353 ÎN CAZ DE CONTACT CU PIELEA (sau cu părul): Scoateți imediat toată îmbrăcăminte contaminată. Clătiți pielea cu apă [sau faceți duș].
P304+P340 ÎN CAZ DE INHALARE: transportați persoana la aer liber și mențineți-o într-o poziție confortabilă pentru respirație.
P305+P351+P338 ÎN CAZ DE CONTACT CU OCHII: Clătiți cu atenție cu apă timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.
P310 Sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ/un medic.
P501 Aruncați conținutul/recipientul în conformitate cu reglementările locale/regionale/naționale/internaționale.

Informații suplimentare privind pericolele

EUH071 Corosiv pentru căile respiratorii.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Ingrediente periculoase pentru etichetare

masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)

2.3 Alte pericole

Rezultatele evaluării PBT și vPvB

Acest amestec nu conține nicio substanță evaluată a fi PBT sau vPvB.

SECȚIUNEA 3: Compoziție/informații privind componenții

3.2 Amestecuri

Ingrediente periculoase

Denumirea substanței	Element de identificare	% Masă	Clasificare conf. 1272/2008/CE	Limite de conc. specifice	Factori M

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

SECȚIUNEA 4: Măsurile de prim ajutor

4.1 Descrierea măsurilor de prim ajutor

Observații generale

Nu lăsați persoana afectată nesupravegheată. Evacuați victima din zona de pericol. Mențineți persoana afectată la căldură, nemișcată și acoperită. Scoateți imediat toată îmbrăcămintea contaminată. În caz de pierdere a cunoștinței, așezați persoana în poziție laterală stabilă. Nu-i administrați niciodată ceva pe gură.

După inhalare

În caz de iritare a tractului respirator, consultați un medic.

După contactul cu pielea

Scoateți îmbrăcămintea contaminată. După contactul cu pielea, scoateți imediat toată îmbrăcămintea contaminată și spălați imediat cu multă apă. Sunați imediat la un medic.

După contactul cu ochii

Clătiți din abundență cu apă proaspătă și curată, timp de cel puțin 10 minute, ținând pleoapele depărtate. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți. Sunați un medic imediat.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

După ingerare

Se clătește gura cu apă (numai dacă persoana este conștientă). NU provocați vomă. Sunați imediat la un medic.

4.2 Cele mai importante simptome și efecte, atât acute, cât și întârziate

Provoacă arsuri grave ale pielii și lezarea ochilor. Ingestion causes pain, burns, abdominal pain, possible general impact (shock).

4.3 Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare

No specific antidot is known. Treatment of the symptoms.

SECȚIUNEA 5: Măsurile de combatere a incendiilor

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare

Pulverizare de apă, Spumă rezistentă la alcool, Praf de extingtor, Dioxid de carbon (CO₂)

Mijloace de stingere necorespunzătoare

Jet continuu de apă

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Produși de combustie periculoși

Oxizi de azot (NO_x), Monoxid de carbon (CO), Dioxid de carbon (CO₂), Oxizi de sulf (SO_x)

5.3 Recomandări destinate pompierilor

Mențineți containerele reci prin pulverizarea de apă. A nu se inspira fumul în caz de incendiu și/sau explozie. Nu lăsați apa folosită la stingerea incendiului să pătrundă în canalizări sau în cursurile de apă. Colectați separat apa contaminată folosită la stingerea incendiilor. Stingeți incendiul de la o distanță rezonabilă, luând măsuri normale de precauție.

Echipamentul de protecție special destinat pompierilor

Echipament de protecție chimică, Folosiți aparate de protecție respiratorie adecvate

SECȚIUNEA 6: Măsurile de luat în caz de dispersie accidentală

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Pentru personalul care nu este implicat în situații de urgență

Evacuați persoana într-un loc sigur.

Pentru personalul care intervine în situații de urgență

Purtați aparat de respirat dacă sunteți expus la vapori/praf/spray/gaze. Utilizați echipamentul de protecție individuală conform cerințelor.

6.2 Precauții pentru mediul înconjurător

Păstrați la distanță față de canalele de scurgere și apele de suprafață sau subterane. Rețineți apa de spălare contaminată și eliminați-o. Chemicals generally shouldn't reach surface water.

6.3 Metode și material pentru izolarea incendiilor și pentru curățenie

Sfaturi privind modul de izolare a unei cantități vărsate

Acoperirea canalelor de evacuare

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Sfaturi privind modul de curățare a unei cantități vărsate

Ștergeți cu material absorbant (de ex. cârpă, fleece). Colectați scurgerile de produs: Material absorbant (de exemplu, nisip, diatomit, liant acid, liant universal, rumeguș etc.)

Tehnica adecvată de izolare

Utilizarea materialelor absorbante.

Alte informații referitoare la vărsări și dispersii

Puneți în containere adecvate pentru eliminare. Ventilați zona afectată.

6.4 Trimitere la alte secțiuni

Secțiunea 7: Manipularea și depozitarea. A se vedea și secțiunile 8 și 13 din fișa cu date de securitate.

SECȚIUNEA 7: Manipularea și depozitarea

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări

Măsurile de prevenire a incendiilor, precum și a generării de aerosoli și praf

Nu sunt necesare măsuri speciale.

Sfaturi privind igiena generală la locul de muncă

Spălați mâinile după utilizare. Nu mâncați, beți sau fumați în zonele de lucru. Îndepărtați îmbrăcămintea contaminată și echipamentul de protecție înainte de a pătrunde în zonele în care se ia masa. Nu țineți niciodată mâncarea sau băutura în apropiere de produsele chimice. Nu puneți niciodată produsele chimice în recipiente care sunt folosite în mod obișnuit pentru mâncare sau băutură. A se păstra departe de hrană, băuturi și hrană pentru animale.

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Proiectarea specială a spațiilor de depozitare sau a rezervoarelor

Păstrați ambalajul închis ermetic și într-un loc bine ventilat.

Temperatura de depozitare

Temperatura de depozitare recomandată: <40 °C.

Compatibilitățile privind ambalarea

Păstrați numai în recipientul original. Pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR).

7.3 Utilizare finală specifică (utilizări finale specifice)

Biocid. Produse chimice de tratare a apei. Agent de condiționare.

SECȚIUNEA 8: Controale ale expunerii/protecția personală

8.1 Parametri de control

Valorile limită naționale

Valori limită de expunere profesională (Limite de expunere la locul de muncă)

nu este relevant

8.2 Controale ale expunerii

Controale tehnice corespunzătoare

Ventilație generală.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Măsuri de protecție individuală (echipamentul de protecție personală)

Trebuie să existe garanții, ca instalațiile de clătire a ochilor și dușurile de siguranță să se afle aproape de locul de muncă.

Protecția ochilor/feței

A se purta mască de protecție a ochilor/feței.

Protecția pielii

Chemical resistant protective clothing.

Protecția mâinilor

A se purta mănuși corespunzătoare. Mănușile de protecție chimică adecvate sunt testate conform EN 374. Verificați etanșeitatea/impermeabilitatea înainte de utilizare. În scopuri speciale, se recomandă să verificați rezistența la produse chimice a mănușilor de protecție menționate mai sus, împreună cu furnizorul acestor mănuși. In case of spray contact at least protection index 2 recommended, according to more than 30 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.4 mm

In case of prolonged and intensive contact protection index 6 recommended, according to more than 480 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.7 mm.

Tipul de material

PVC: policlorură de vinil, PE: polietilenă, CR: cauciuc cloroprenic (clorobutadienic), NBR: cauciuc acrilonitrilbutadienic, IIR: cauciuc izobuten-izoprenic (butilcauciuc), FKM: elastomer cu fluor

Timpul de perforare a materialului din care sunt fabricate mănușile

Momentul de cedare și însușirile de origine ale materialului trebuie luate în considerare

Alte măsuri de protecție

Spălați-vă mâini bine după utilizare.

Protecția respirației

În cazul în care ventilarea este insuficientă, purtați echipament de protecție respiratorie.

Controlul expunerii mediului

Considerații privind eliminarea: a se vedea secțiunea 13.

SECȚIUNEA 9: Proprietățile fizice și chimice

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect

Starea fizică	lichid
Culoarea	galben - verde - albastru deschis
Miros	fara miros
Pragul de acceptare a mirosului	nu este aplicabilă

Vâscozitatea

Vâscozitatea cinematică	4,5 mm ² /s
Vâscozitatea dinamică	4,6 mPa s la 20 °C
Proprietăți explozive	nici una/nici unul
Proprietăți oxidante	nici una/nici unul

9.2 Alte informații

Nu există informații suplimentare.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

SECȚIUNEA 10: Stabilitate și reactivitate

10.1 Reactivitate

Acest material nu este reactiv în condiții normale de mediu ambiant.

10.2 Stabilitate chimică

Materialul este stabil în condiții ambientale normale, precum și în condițiile de temperatură și presiune în care se anticipează că vor avea loc depozitarea și manipularea.

10.3 Posibilitatea de reacții periculoase

Nu se cunosc reacții periculoase.

10.4 Condiții de evitat

Nu există condiții specifice cunoscute care trebuie evitate.

10.5 Materiale incompatibile

Nu există informații suplimentare.

10.6 Produși de descompunere periculoși

Produșii de descompunere periculoși anticipați în mod rezonabil care sunt produși în urma utilizării, depozitării, vărsării și încălzirii nu sunt cunoscuți. Produși de combustie periculoși: a se vedea secțiunea 5.

SECȚIUNEA 11: Informații toxicologice

11.1 Informații privind efectele toxicologice

Nu sunt disponibile date de testare pentru întregul amestec.

Procedura de clasificare

Metoda pentru clasificarea amestecului se bazează pe ingredientele amestecului (formula de aditivitate).

Toxicitate acută

Nu se clasifică ca fiind toxic(ă) acut(ă).

Product ATEmix oral : >2000 mg/kg
Product ATEmix dermal : >2000 mg/kg

Toxicitatea acută a componentilor amestecului

Denumirea substanței	Nr. CAS	Calea de expunere	Efect	Valoare	Specii
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	orală	LD50	64 ^{mg} /kg	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	prin inhalare: praf/ceață	LC50	0,33 ^{mg} /l/4h	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	dermică	LD50	87,12 ^{mg} /kg	iepure

Corodarea/iritarea pielii

Provoacă arsuri grave ale pielii și lezarea ochilor.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Lezarea gravă a ochilor/iritarea ochilor

Provoacă leziuni oculare grave.

Sensibilizarea căilor respiratorii sau a pielii

Poate provoca o reacție alergică a pielii.

Mutagenicitatea celulelor embrionare

Nu sunt disponibile date de testare pentru întregul amestec.

Cancerigenitate

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitatea pentru reproducere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - o singură expunere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - expunere repetată

Nu sunt disponibile date de testare pentru întregul amestec.

Pericol prin aspirare

Nu se clasifică ca prezentând pericol prin aspirare.

Alte informații

Corosiv pentru căile respiratorii.

SECȚIUNEA 12: Informații ecologice

12.1 Toxicitatea

Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Toxicitate acvatică (acută) a componentelor amestecului					
<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Efect</i>	<i>Durata de expunere</i>	<i>Valoare</i>	<i>Specii</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	LC50	96 h	0,19 mg/l	pește
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	EC50	48 h	0,16 mg/l	nevertebrate acvatice
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	ErC50	72 h	19,9 µg/l	alge

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Toxicitate acvatică (cronică) a componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Efect</i>	<i>Valoare</i>	<i>Specii</i>	<i>Durata de expunere</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	LC50	0,07 mg/l	pește	14 d
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	EC50	>0,18 mg/l	nevertebrate acvatice	21 d
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	ErC50	45,6 µg/l	alge	120 h

12.2 Persistența și degradabilitatea

Nu este ușor biodegradabil(ă).

Degradabilitatea componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Proces</i>	<i>Rata de degradare</i>	<i>Timp</i>	<i>Metoda</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	generare de dioxid de carbon	>60 %	29 d	

12.3 Potențialul de bioacumulare

A worth-mentioning accumulation in organisms is not expected.

Potențial de bioacumulare a componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>BCF</i>	<i>Log KOW</i>	<i>BOD5/COD</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	54	≥-0,34 – ≤0,63 (pH valoare: 7, 10 °C)	

12.4 Mobilitatea în sol

Nu sunt disponibile date.

12.5 Rezultatele evaluării PBT și vPvB

Nu este aplicabilă.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

12.6 Alte efecte adverse

Potențialul de a afecta sistemul endocrin

Niciun ingredient nu figurează pe listă.

Observații

A nu se arunca în rețeaua de canalizare sau în apa de suprafață.

SECȚIUNEA 13: Considerații privind eliminarea

13.1 Metode de tratare a deșeurilor

Acest produs și ambalajul său se vor depozita ca un deșeu periculos. Alocarea de numere de identificare/marcaje pentru reziduuri trebuie să se efectueze corespunzător OID, specific procesului și branșei. Eliminarea deșeurilor de produs se va face conform legii 211/2011 privind regimul deșeurilor. ¶ Eliminarea deșeurilor de ambalaje se face cf. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje; HG 856/2002- evidența gestiunii deșeurilor și aprobarea listei deșeurilor. Legea 249/2015 privind modalitatea de gestionare a ambalajelor și a deșeurilor de ambalaje.

Informații relevante pentru tratarea deșeurilor

Este un deșeu periculos; pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR). Ambalajele golite complet pot fi reciclate. Manipulați ambalajele contaminate în același mod ca și substanța respectivă.

Observații

Vă rugăm să luați în considerare dispozițiile naționale sau regionale relevante. Deșeurile vor fi selectate pe categorii care pot fi tratate separat de către facilitățile de gestionare a deșeurilor de la nivel local sau național. A nu se arunca în rețeaua de canalizare sau în apa de suprafață. Evitați dispersarea în mediu.

SECȚIUNEA 14: Informații referitoare la transport

14.1 Numărul ONU	3265
14.2 Denumirea corectă ONU pentru expediție	LICHID ORGANIC COROSIV, ACID, N.S.A.

SECȚIUNEA 15: Informații de reglementare

15.1 Regulamente/legislație în domeniul securității, al sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispozițiile relevante ale Uniunii Europene (UE)

Restricții în conformitate cu REACH, Anexa XVII

Substanțe periculoase cu restricții (REACH, Anexa XVII)

Denumirea substanței	Denumirea conf. inventarului	Nr. CAS	Restricție
Ferrocid 8583	acest produs îndeplinește criteriile de clasificare în conformitate cu Regulamentul nr. 1272/2008/CE		R3

Legendă

R3

- Nu se utilizează în:
 - articole decorative destinate producerii unor efecte de lumină sau de culoare prin intermediul unor faze diferite, de exemplu, în lămpi decorative și în scrumiere;
 - obiecte destinate producerii de farse și capcane;
 - jocuri pentru unul sau mai mulți participanți sau orice alt articol destinat unei folosințe similare, chiar și cu aspecte decorative.
- Este interzisă introducerea pe piață a articolelor care nu se conformează punctului 1.
- Nu se introduc pe piață dacă conțin colorant, cu excepția cazului în care este necesar din motive fiscale, sau parfum ori ambele, dacă:
 - pot fi utilizate drept combustibili în lămpi decorative cu ulei pentru a fi furnizate publicului larg; și
 - prezintă un pericol în caz de inhalare și sunt etichetate cu R65 sau H304.
- Lămpile decorative cu ulei destinate publicului larg nu sunt introduse pe piață decât dacă sunt conforme standardului european privind lămpile decorative cu ulei (EN 14059), adoptat de Comitetul European de Standardizare (CEN).
- Fără a aduce atingere punerii în aplicare a altor dispoziții comunitare referitoare la clasificarea, ambalarea și etichetarea substanțelor și a amestecurilor periculoase, furnizorii se asigură, înainte de introducerea pe piață, că sunt respectate următoarele cerințe:
 - uleiurile lampante, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate vizibil, lizibil și de neșters după cum urmează: „A nu se lăsa la îndemâna copiilor lămpi umplute cu acest lichid” și, începând cu 1 decembrie 2010, „Doar o înghițitură de ulei lampant – sau chiar suptul fitilului lămpilor – poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate, începând cu 1 decembrie 2010, lizibil și de neșters, după cum urmează: „O singură înghițitură din acest lichid poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - uleiurile lampante și lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt îmbuteliate, începând cu 1 decembrie 2010, în recipiente negre opace care nu depășesc 1 litru.
- Până la 1 iunie 2014 cel târziu, Comisia solicită Agenției Europene pentru Produse Chimice să pregătească un dosar, în conformitate cu articolul 69 din prezentul regulament, în scopul de a interzice, dacă este cazul, lichidele de aprins focul pentru barbecue și combustibilii pentru lămpile decorative, etichetați R65 sau H304, destinați publicului larg.
- Persoanele fizice sau juridice care introduc pe piață pentru prima oară uleiuri lampante și lichide de aprins focul pentru barbecue, etichetate cu R65 sau H304, furnizează autorității competente din statul membru în cauză, până la 1 decembrie 2011 și apoi anual, date privind soluții alternative pentru uleiul lampant și lichidele de aprins focul pentru barbecue etichetate R65 sau H304. Statele membre pun datele respective la dispoziția Comisiei.

Abrevieri si acronime

Abr.	Descrieri ale abrevierilor utilizate
Acute Tox.	Toxicitate acută
ADN	Accord européen relatif au transport international des marchandises dangereuses par voies de navigation intérieures (Acordul european privind transportul internațional al mărfurilor periculoase pe căile navigabile interioare)
ADR	Accord européen relatif au transport international des marchandises dangereuses par route (Acordul european referitor la transportul rutier internațional al mărfurilor periculoase)
Aquatic Acute	Periculos pentru mediul acvatic - pericol acut
Aquatic Chronic	Periculos pentru mediul acvatic - pericol cronic
BCF	Bioconcentration factor (factor de bioconcentrare)
BOD	Consumul biochimic de oxigen
CAS	Chemical Abstracts Service (departament care deține cea mai cuprinzătoare listă a substanțelor chimice)
CLP	Regulamentul (CE) Nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor
COD	Consumul chimic de oxigen
DGR	Reglementări privind Mărfurile Periculoase (a se vedea IATA/DGR)
EC50	Concentrația Efectivă 50%. CE50 corespunde concentrației unei substanțe testate care produce schimbări de 50% în efect (de ex., asupra creșterii) într-un interval de timp specificat
EINECS	European Inventory of Existing Commercial Chemical Substances (Inventarul european al substanțelor chimice existente introduse pe piață)
ELINCS	European List of Notified Chemical Substances (Lista europeană a substanțelor chimice notificate)
EmS	Emergency Schedule (Plan de urgență)
ErC50	≡ CE50: în această metodă, acea concentrație a substanței de testat care determină o reducere cu 50 % fie a creșterii (CEb50), fie a vitezei de creștere (CEr50) în comparație cu testul martor
Eye Dam.	Lezare gravă a ochiului
Eye Irrit.	Iritant pentru ochi
factor M	Înseamnă un factor de multiplicare. Acesta se aplică concentrației unei substanțe clasificate ca fiind periculoasă pentru mediul acvatic, toxicitate acută categoria 1 sau toxicitate cronică categoria 1, și care se utilizează pentru determinarea, prin metoda însumării, a clasificării unui amestec, în care este prezentă substanța
IATA	International Air Transport Association (Asociația Internațională de Transport Aerian)
IATA/DGR	Dangerous Goods Regulations (DGR) for the air transport (IATA) (Reglementări privind Mărfurile Periculoase pentru transportul aerian)

Ferrocid 8583

<i>Abr.</i>	<i>Descrieri ale abrevierilor utilizate</i>
IMDG	International Maritime Dangerous Goods Code (Codul maritim internațional pentru mărfuri periculoase)
LC50	Lethal Concentration 50 % (concentrație letală 50 %): LC50 corespunde concentrației unei substanțe testate care produce o letalitate de 50 % într-un interval de timp specificat
LD50	Lethal Dose 50 % (doză letală 50 %): DLx corespunde dozei unei substanțe testate care produce o letalitate de 50 % într-un interval de timp specificat
log KOW	n-Octanol/apă
MARPOL	Convenția internațională pentru prevenirea poluării de către nave (abr. de la „Marine Pollutant”)
NLP	No-Longer Polymer (ex-polimer)
Nr. CE	Inventarul CE (EINECS, ELINCS și NLP-list) este sursa numărului CE, format din șapte cifre, un identificator al substanțelor disponibile pe piață în UE (Uniunea Europeană)
Nr. index	Numărul index reprezintă codul de identificare alocat substanței în partea 3 din anexa VI la Regulamentul (CE) nr. 1272/2008
OACI	International Civil Aviation Organization (Organizația Internațională de Aviație Civilă)
Ox. Sol.	Solid oxidant
PBT	Persistent, bioacumulativ și toxic
REACH	Registration, Evaluation, Authorisation and Restriction of Chemicals (Înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice)
RID	Règlement concernant le transport International ferroviaire des marchandises Dangereuses (Regulamentul privind transportul internațional feroviar al mărfurilor periculoase)
Skin Corr.	Corosiv pentru piele
Skin Irrit.	Iritant pentru piele
Skin Sens.	Sensibilizarea pielii
SVHC	Substance of Very High Concern (substanță care prezintă motive de îngrijorare deosebită)
vPvB	Very Persistent and very Bioaccumulative (foarte persistent și foarte bioacumulativ)

Fire, Police & Ambulance - Emergency Telephone

Australia: 000
Papua New Guinea: 000
New Zealand: 111

Identification of Substances or Preparation

Product Trade Name: SODIUM BROMIDE BRINE
Synonyms: None
Chemical Family: Salt
UN Number: None
Dangerous Goods Class: None
Subsidiary Risk: None
Hazchem Code: None Allocated
Poisons Schedule: None Allocated
Application: Additive

Prepared By Chemical Compliance
Telephone: 1-580-251-4335
e-mail: fdunexchem@halliburton.com

2. COMPOSITION/INFORMATION ON INGREDIENTS

Substances	CAS Number	PERCENT	Australia NOHSC	New Zealand WES	ACGIH TLV-TWA
Sodium bromide	7647-15-6	30 - 60%	Not applicable	Not applicable	Not applicable

Non-Hazardous Substance to Total of 100%

3. HAZARDS IDENTIFICATION

Hazard Overview	May cause eye and skin irritation. May cause headache, dizziness, and other central nervous system effects. May be harmful if swallowed. Repeated overexposure may cause liver and kidney effects.
Risk Phrases	R36 Irritating to eyes.
HSNO Classification	Not Determined

4. FIRST AID MEASURES

Inhalation	If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult give oxygen. Get medical attention.
Skin	In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes. Get medical attention. Remove contaminated clothing and launder before reuse.
Eyes	In case of contact, or suspected contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention immediately after flushing.
Ingestion	Do not induce vomiting. Slowly dilute with 1-2 glasses of water or milk and seek medical attention. Never give anything by mouth to an unconscious person.
Notes to Physician	Not Applicable

5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media	All standard fire fighting media
Extinguishing media which must not be used for safety reasons	None known.
Special Exposure Hazards	Decomposition in fire may produce toxic gases.
Special Protective Equipment for Fire-Fighters	Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautionary Measures	Use appropriate protective equipment.
Environmental Precautionary Measures	Prevent from entering sewers, waterways, or low areas.
Procedure for Cleaning / Absorption	Isolate spill and stop leak where safe. Contain spill with sand or other inert materials. Scoop up and remove.

7. HANDLING AND STORAGE

Handling Precautions	Avoid contact with eyes, skin, or clothing. Wash hands after use. Launder contaminated clothing before reuse.
-----------------------------	---

Storage Information

Store away from oxidizers. Store away from acids. Store in a cool, dry location. Keep container closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls	Use in a well ventilated area.
Respiratory Protection	Not normally needed. But if significant exposures are possible then the following respirator is recommended: Dust/mist respirator. (N95, P2/P3)
Hand Protection	Nitrile gloves.
Skin Protection	Normal work coveralls.
Eye Protection	Chemical goggles; also wear a face shield if splashing hazard exists.
Other Precautions	Eyewash fountains and safety showers must be easily accessible.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
Color:	Clear colorless
Odor:	Odorless
pH:	Not Determined
Specific Gravity @ 20 C (Water=1):	1.44 - 1.5
Density @ 20 C (kg/l):	1.5
Bulk Density @ 20 C (kg/m³):	Not Determined
Boiling Point/Range (C):	Not Determined
Freezing Point/Range (C):	Not Determined
Pour Point/Range (C):	Not Determined
Flash Point/Range (C):	Not Determined
Flash Point Method:	Not Determined
Autoignition Temperature (C):	Not Determined
Flammability Limits in Air - Lower (g/m³):	Not Determined
Flammability Limits in Air - Lower (%):	Not Determined
Flammability Limits in Air - Upper (g/m³):	Not Determined
Flammability Limits in Air - Upper (%):	Not Determined
Vapor Pressure @ 20 C (mmHg):	Not Determined
Vapor Density (Air=1):	Not Determined
Percent Volatiles:	Not Determined
Evaporation Rate (Butyl Acetate=1):	Not Determined
Solubility in Water (g/100ml):	Soluble
Solubility in Solvents (g/100ml):	Not Determined
VOCs (g/l):	Not Determined
Viscosity, Dynamic @ 20 C (centipoise):	Not Determined
Viscosity, Kinematic @ 20 C (centistokes):	Not Determined
Partition Coefficient/n-Octanol/Water:	Not Determined
Molecular Weight (g/mole):	Not Determined
Decomposition Temperature (C):	Not Determined

10. STABILITY AND REACTIVITY

Stability Data:	Stable
Hazardous Polymerization:	Will Not Occur
Conditions to Avoid	None anticipated

Incompatibility (Materials to Avoid)	Strong oxidizers.
Hazardous Decomposition Products	Carbon monoxide and carbon dioxide.
Additional Guidelines	Not Applicable

11. TOXICOLOGICAL INFORMATION

Principle Route of Exposure Eye or skin contact, inhalation.

Symptoms related to exposure **Inhalation**

Vapors given off by heated product may be harmful. May cause respiratory irritation. May cause central nervous system depression including headache, dizziness, drowsiness, incoordination, slowed reaction time, slurred speech, giddiness and unconsciousness.

Skin Contact May cause skin irritation.

Eye Contact May cause eye irritation.

Ingestion Harmful if swallowed. May cause central nervous system depression including headache, dizziness, drowsiness, muscular weakness, incoordination, slowed reaction time, fatigue blurred vision, slurred speech, giddiness, tremors and convulsions. May cause liver and kidney damage.

Aggravated Medical Conditions Skin disorders. Central nervous system disorders.

Chronic Effects/Carcinogenicity Repeated overexposure may cause liver and kidney effects.

Other Information None known.

Toxicity Tests

Oral Toxicity: LD50: 3500 mg/kg (Rat)

Dermal Toxicity: Not determined

Inhalation Toxicity: Not determined

Primary Irritation Effect: Not determined

Carcinogenicity Not determined

Genotoxicity: Not determined

Reproductive / Developmental Toxicity: Not determined

12. ECOLOGICAL INFORMATION

Mobility (Water/Soil/Air) Not determined

Persistence/Degradability Not determined

Bio-accumulation Not determined

Ecotoxicological Information

Acute Fish Toxicity:	Not determined
Acute Crustaceans Toxicity:	Not determined
Acute Algae Toxicity:	Not determined

Chemical Fate Information	Not determined
---------------------------	----------------

Other Information	Not applicable
-------------------	----------------

13. DISPOSAL CONSIDERATIONS

Disposal Method	Disposal should be made in accordance with federal, state, and local regulations.
-----------------	---

Contaminated Packaging	Follow all applicable national or local regulations.
------------------------	--

14. TRANSPORT INFORMATION

Land Transportation

ADR
Not restricted

Air Transportation

ICAO/IATA
Not restricted

Sea Transportation

IMDG
Not restricted

Other Transportation Information

Labels:	None

END OF MSDS

STEA06348A

Section: 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier: **STEA06348A**
Substance type: CLP Mixture

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Use of the Substance/Mixture : CORROSION/SCALE INHIBITOR

Recommended restrictions on use : Reserved for industrial and professional use.

1.3 Details of the supplier of the safety data sheet:

COMPANY IDENTIFICATION
NALCO EUROPE B.V.
Postbus 627
2300 AP Leiden, The Netherlands
TEL: 0031 71 5241100

LOCAL COMPANY IDENTIFICATION
Nalco Ltd.
P.O. BOX 11, WINNINGTON AVENUE
NORTHWICH, CHESHIRE, U.K. CW8 4DX
TEL: +44 (0)1606 74488

For Product Safety information please contact: msdseame@nalco.com

1.4 Emergency telephone number: +32-(0)3-575-5555 Trans-European

Date of Compilation/Revision: 29.06.2017
Version Number: 1.0

Section: 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Skin irritation, Category 2	H315
Eye irritation, Category 2	H319
Specific target organ toxicity - repeated exposure, Category 2	H373

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal Word : Warning

Hazard Statements :	H315	Causes skin irritation.
	H319	Causes serious eye irritation.
	H373	May cause damage to organs through prolonged or repeated exposure.

Precautionary Statements :	Prevention:	
	P260	Do not breathe dust/fume/gas/mist/vapours/spray.
	P280	Wear protective gloves/ eye protection/ face

STE A06348A

protection.

Response:

P302 + P352

IF ON SKIN: Wash with plenty of water.

P305 + P351 + P338

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P314

Get medical advice/ attention if you feel unwell.

P332+P313

If skin irritation occurs: Get medical advice/attention.

Hazardous components which must be listed on the label:
Ethylene Glycol

2.3 Other hazards

None known.

Section: 3. COMPOSITION/INFORMATION ON INGREDIENTS**3.2 Mixtures****Hazardous components**

Chemical Name	CAS-No. EC-No. REACH No.	Classification (REGULATION (EC) No 1272/2008)	Concentration: [%]
Ethylene Glycol	107-21-1 203-473-3 01-2119456816-28	Acute toxicity Category 4; H302 Specific target organ toxicity - repeated exposure Category 2; H373	10 - < 20
C10-16 alkyl alcohol ethoxylate phosphate diethanolamine salt.	69011-83-2	Skin irritation Category 2; H315 Eye irritation Category 2; H319	10 - < 20

For the full text of the H-Statements mentioned in this Section, see Section 16.

Section: 4. FIRST AID MEASURES**4.1 Description of first aid measures**

- If inhaled : Get medical attention if symptoms occur.
- In case of skin contact : Wash off immediately with plenty of water for at least 15 minutes.
Use a mild soap if available.
Get medical attention if irritation develops and persists.
- In case of eye contact : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Remove contact lenses, if present and easy to do. Continue rinsing.
Get medical attention.
- If swallowed : Rinse mouth.
Get medical attention if symptoms occur.
- Protection of first-aiders : In event of emergency assess the danger before taking action.

STEA06348A

Do not put yourself at risk of injury. If in doubt, contact emergency responders. Use personal protective equipment as required.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

Section: 5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media : Do not use water unless flooding amounts are available.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : Fire Hazard
Keep away from heat and sources of ignition.
Flash back possible over considerable distance.

Hazardous combustion products : Decomposition products may include the following materials:
Carbon oxides
nitrogen oxides (NO_x)
Sulphur oxides
Oxides of phosphorus

5.3 Advice for firefighters

Special protective equipment for firefighters : Use personal protective equipment.

Further information : Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section: 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel : Remove all sources of ignition.
Ensure clean-up is conducted by trained personnel only.
Refer to protective measures listed in sections 7 and 8.

Advice for emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

6.2 Environmental precautions

Environmental precautions : Do not allow contact with soil, surface or ground water.

STEA06348A

6.3 Methods and materials for containment and cleaning up

- Methods for cleaning up : Eliminate all ignition sources if safe to do so.
Stop leak if safe to do so.
Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Flush away traces with water.
For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

6.4 Reference to other sections

- See Section 1 for emergency contact information.
For personal protection see section 8.
See Section 13 for additional waste treatment information.

Section: 7. HANDLING AND STORAGE

7.1 Precautions for safe handling

- Advice on safe handling : Avoid contact with skin and eyes. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Keep away from fire, sparks and heated surfaces. Wash hands thoroughly after handling. Use only with adequate ventilation.
- Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

- Requirements for storage areas and containers : Keep away from heat and sources of ignition. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labelled containers.
- Suitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Viton, TFE, FEP (encapsulated), Neoprene, Stainless Steel 304, Stainless Steel 316L, Nitrile, EPDM, Perfluoroelastomer, PTFE, HDPE (high density polyethylene), MDPE (medium density polyethylene), Teflon
- Unsuitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Carbon Steel C1018, Compatibility with Plastic Materials can vary; we therefore recommend that compatibility is tested prior to use.

7.3 Specific end uses

- Specific use(s) : CORROSION/SCALE INHIBITOR

Section: 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

Occupational Exposure Limits

STEAO6348A

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Ethylene Glycol	107-21-1	TWA (Vapour.)	20 ppm 52 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		STEL (Vapour.)	40 ppm 104 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		TWA (particles)	10 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		

DNEL

Ethylene Glycol	:	End Use: Workers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 106 mg/cm2
		End Use: Workers Exposure routes: Dermal Potential health effects: long term - systemic
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 35 mg/m3
		End Use: Workers Exposure routes: Inhalation Potential health effects: long-term - local Value: 35 mg/m3
		End Use: Consumers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 53 mg/cm2
		End Use: Consumers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 7 mg/m3

PNEC

Ethylene Glycol	:	Fresh water Value: 10 mg/l
		Marine water Value: 1 mg/l
		Water Value: 10 mg/l
		Intermittent release Value: 10 mg/l
		Fresh water sediment Value: 20.9 mg/kg
		Water Value: 1995.5 mg/l

STE A06348A

	Soil Value: 1.53 mg/kg
--	---------------------------

8.2 Exposure controls**Appropriate engineering controls**

Effective exhaust ventilation system.

Maintain air concentrations below occupational exposure standards.

Individual protection measures

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

Eye/face protection (EN 166) : Safety glasses with side-shields

Hand protection (EN 374) : Wear the following personal protective equipment:
Nitrile rubber
butyl-rubber
Impervious gloves
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection (EN 14605) : Wear suitable protective clothing.

Respiratory protection (EN 143, 14387) : Where concentrations in air may exceed the limits given in this section, the use of a half face filter mask or air supplied breathing apparatus is recommended. A suitable filter material depends on the amount and type of chemicals being handled. Consider the use of filter type: A-Pln event of emergency or planned entry into unknown concentrations a positive pressure, full-facepiece SCBA should be used. If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

Environmental exposure controls

General advice : Consider the provision of containment around storage vessels.

Section: 9. PHYSICAL AND CHEMICAL PROPERTIES**9.1 Information on basic physical and chemical properties**

Appearance : Liquid

Colour : amber

Odour : Slight

Flash point : 80 °C
Method: Pensky-Martens closed cup
Does not sustain combustion.

STEA06348A

pH	: 7.3
Odour Threshold	: no data available
Melting point/freezing point	: no data available
Initial boiling point and boiling range	: 100 °C
Evaporation rate	: no data available
Flammability (solid, gas)	: no data available
Upper explosion limit	: no data available
Lower explosion limit	: no data available
Vapour pressure	: no data available
Relative vapour density	: no data available
Relative density	: 1.089 (20 °C)
Solubility(ies)	
Water solubility	: completely soluble
Solubility in other solvents	: no data available
Partition coefficient: n-octanol/water	: no data available
Auto-ignition temperature	: no data available
Thermal decomposition	: no data available
Viscosity	
Viscosity, dynamic	: no data available
Viscosity, kinematic	: 6 mm ² /s (40 °C) Method: ASTM D 445
Explosive properties	: no data available
Oxidizing properties	: no data available

9.2 Other information

no data available

Section: 10. STABILITY AND REACTIVITY**10.1 Reactivity**

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

STEA06348A

10.5 Incompatible materials

Materials to avoid : Contact with strong oxidizers (e.g. chlorine, peroxides, chromates, nitric acid, perchlorate, concentrated oxygen, permanganate) may generate heat, fires, explosions and/or toxic vapors.

10.6 Hazardous decomposition products

Hazardous decomposition products : Decomposition products may include the following materials:
Carbon oxides
nitrogen oxides (NO_x)
Sulphur oxides
Oxides of phosphorus

Section: 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Information on likely routes of exposure : Inhalation, Eye contact, Skin contact

Toxicity

Product

Acute oral toxicity : Acute toxicity estimate : > 2,000 mg/kg

Acute inhalation toxicity : There is no data available for this product.

Acute dermal toxicity : There is no data available for this product.

Skin corrosion/irritation : There is no data available for this product.

Serious eye damage/eye irritation : There is no data available for this product.

Respiratory or skin sensitization : There is no data available for this product.

Carcinogenicity : No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

Reproductive effects : No toxicity to reproduction

Germ cell mutagenicity : Contains no ingredient listed as a mutagen

Teratogenicity : There is no data available for this product.

STOT - single exposure : Based on available data, the classification criteria are not met.

STOT - repeated exposure : There is no data available for this product.

Aspiration toxicity : No aspiration toxicity classification

Components

STE A06348A

Acute dermal toxicity : Ethylene Glycol
LD50 rabbit: 10,600 mg/kg

Potential Health Effects

Eyes : Causes serious eye irritation.

Skin : Causes skin irritation.

Ingestion : Health injuries are not known or expected under normal use.

Inhalation : Health injuries are not known or expected under normal use.

Chronic Exposure : May cause damage to organs through prolonged or repeated exposure.

Experience with human exposure

Eye contact : Redness, Pain, Irritation

Skin contact : Redness, Irritation

Ingestion : No symptoms known or expected.

Inhalation : No symptoms known or expected.

Further information : no data available

Section: 12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity

Product

Environmental Effects : This product has no known ecotoxicological effects.

Toxicity to fish : 96 hrs LC50 Turbot: > 1,800 mg/l
96 hrs NOEC Turbot: 1,800 mg/l

Toxicity to daphnia and other aquatic invertebrates : 240 hrs LC50 Corophium volutator: > 1,228.5 mg/l

Toxicity to algae : no data available

Components

Toxicity to fish : Ethylene Glycol
96 h LC50: 72,860 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates : Ethylene Glycol
48 h EC50: > 100 mg/l

Components

Toxicity to algae : Ethylene Glycol
96 h EC50: 6,500 mg/l

STE A06348A

Components

Toxicity to bacteria : Ethylene Glycol
> 1,995 mg/l
Method: ISO 8192

Components

Toxicity to fish (Chronic toxicity) : Ethylene Glycol
7 d NOEC: 15,380 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : Ethylene Glycol
7 d NOEC: 8,590 mg/l

12.2 Persistence and degradability

Product

Biodegradability : The organic portion of this preparation is expected to be readily biodegradable.

Components

Biodegradability : Ethylene Glycol
Result: Readily biodegradable.

C10-16 alkyl alcohol ethoxylate phosphate diethanolamine salt.

Result: no data available

12.3 Bioaccumulative potential

Product

Bioaccumulation : This preparation or material is not expected to bioaccumulate.

12.4 Mobility in soil

Product

This substance is water soluble and is expected to remain primarily in water.

12.5 Results of PBT and vPvB assessment

Product

Assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6 Other adverse effects

No adverse effects expected.

Section: 13. DISPOSAL CONSIDERATIONS

Dispose of in accordance with the European Directives on waste and hazardous waste. Waste codes should

STEA06348A

be assigned by the user, preferably in discussion with the waste disposal authorities.

13.1 Waste treatment methods

- | | |
|-----------------------------------|--|
| Product | : Where possible recycling is preferred to disposal or incineration.
If recycling is not practicable, dispose of in compliance with local regulations.
Dispose of wastes in an approved waste disposal facility. |
| Contaminated packaging | : Dispose of as unused product.
Empty containers should be taken to an approved waste handling site for recycling or disposal.
Do not re-use empty containers. |
| Guidance for Waste Code selection | : 16 03 05*- OFF SPECIFICATION BATCHES AND UNUSED PRODUCTS - Organic wastes containing dangerous substances. If this product is used in any further processes, the final user must redefine and assign the most appropriate European Waste Catalogue Code. |

Section: 14. TRANSPORT INFORMATION

The shipper/consignor/sender is responsible to ensure that the packaging, labeling, and markings are in compliance with the selected mode of transport.

Land transport (ADR/ADN/RID)

STEA06348A

Section: 15. REGULATORY INFORMATION**15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:****INTERNATIONAL CHEMICAL CONTROL LAWS****CANADA**

This product contains substance(s) which are found on the Non-Domestic Substances List (NDSL), or are not in compliance with other Canadian Acts.

United States TSCA Inventory

The substances in this preparation are included on or exempted from the TSCA 8(b) Inventory (40 CFR 710)

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out on the product.

Section: 16. OTHER INFORMATION**Procedure used to derive the classification according to REGULATION (EC) No 1272/2008**

Classification	Justification
Skin irritation 2, H315	Calculation method
Eye irritation 2, H319	Calculation method
Specific target organ toxicity - repeated exposure 2, H373	Calculation method

Full text of H-Statements

H302	Harmful if swallowed.
H315	Causes skin irritation.
H319	Causes serious eye irritation.
H373	May cause damage to organs through prolonged or repeated exposure.

Further information

Sources of key data used to compile the Safety Data Sheet : IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Man, Geneva: World Health Organization, International Agency for Research on Cancer.

The possible key literature references and data sources which may have been used in conjunction with the consideration of expert judgment to compile this Safety Data Sheet: European regulations/directives (including (EC) No. 1907/2006, (EC) No. 1272/2008), supplier data, inter-net, ESIS, IUCLID, ERICards, Non European official regulatory data and other data sources.

Prepared By : Regulatory Affairs

Numbers quoted in the MSDS are given in the format: 1,000,000 = 1 million and 1,000 = 1 thousand. 0.1 = 1 tenth and 0.001 = 1 thousandth

REVISED INFORMATION: Significant changes to regulatory or health information for this revision is indicated by a bar in the left-hand margin of the SDS.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Appendix I. Chemicals Safety Data Sheets

2 – Safety Data Sheets of chemicals used during construction/installation phase

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

SECȚIUNEA 1: Identificarea substanței/amestecului și a societății/întreprinderii

1.1 Element de identificare a produsului

Denumirea comercială Ferrocid 8583
Număr articol 48202
Identificatori (Uniunea Europeană)
Numărul de înregistrare (REACH) nerelevante (amestec)

1.2 Utilizări relevante identificate ale substanței sau amestecului și utilizări contraindicate

Utilizări relevante identificate Biocid
Produse chimice de tratare a apei
Agent de condiționare

1.3 Detalii privind furnizorul fișei cu date de securitate

Kurita Europe GmbH
Theodor-Heuss-Anlage 2
DE-68165 Mannheim
Germania

Telefon: + 49 621 1218-3000
e-mail: KEG_PS@kurita-water.com
Website: www.kurita.eu

Producător

Furnizor a produsului

Țara	Denumirea	Strada	Codul poștal/ localitatea	Telefon	Telefax	Website
România	ACC Waterchem SRL	Bd. Decabal 10	RO 030967 Bucharest	Cristian Cojocaru +40 741 23 59 68		www.kurita.eu

1.4 Număr de telefon care poate fi apelat în caz de urgență

Numar telefon urgenta: 021.318.36.06 (Disponibil in intervalul orar 8.00 – 16.00), Birou RSI si Informare Toxicologica din cadrul INSP, Str. D.Leonte Nr.1-3,Bucuresti, Romania
National Environmental Protection Agency (NEPA): +40 (0) 213118620
Emergency CONTACT (24-Hour-Number):

International: GBK/Infotrac ID 108808: (001) 352 323 3500
Assistance in mother tongue.

SECȚIUNEA 2: Identificarea pericolelor

2.1 Clasificarea substanței sau a amestecului

Clasificare conform Regulamentului (CE) nr. 1272/2008 (CLP)

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

<i>Clasa de pericol</i>	<i>Clasa și categoria de pericol</i>	<i>Categorie</i>	<i>Fraza de pericol</i>
corodarea/iritarea pielii	Skin Corr. 1C	1C	H314
lezarea gravă a ochilor/iritarea ochilor	Eye Dam. 1	1	H318
sensibilizarea pielii	Skin Sens. 1A	1A	H317
periculos pentru mediul acvatic - pericol acut	Aquatic Acute 1	1	H400
periculos pentru mediul acvatic - pericol cronic	Aquatic Chronic 1	1	H410

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

Cele mai importante efecte adverse fizico-chimice, asupra sănătății umane și asupra mediului

Corodarea pielii produce leziunea ireversibilă a pielii; anume, necroza vizibilă trecând de epidermă și ajungând până la dermă. Vărsarea și apa de stingere a incendiului pot cauza poluarea cursurilor de apă.

2.2 Elemente pentru etichetă

Etichetarea în conformitate cu Regulamentul (CE) nr. 1272/2008 (CLP)

Cuvânt de avertizare pericol

Pictograme

GHS05, GHS07,
GHS09

Frazele de pericol

H314 Provoacă arsuri grave ale pielii și lezarea ochilor.
H317 Poate provoca o reacție alergică a pielii.
H410 Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Frazele de precauție

P261 Evitați să inspirați ceața/vaporii/spray-ul.
P273 Evitați dispersarea în mediu.
P280 A se purta mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/echipament de protecție a feței/protecție a auzului/....
P301+P330+P331 ÎN CAZ DE ÎNGHIȚIRE: clătiți gura. NU provocați vomă.
P303+P361+P353 ÎN CAZ DE CONTACT CU PIELEA (sau cu părul): Scoateți imediat toată îmbrăcăminte contaminată. Clătiți pielea cu apă [sau faceți duș].
P304+P340 ÎN CAZ DE INHALARE: transportați persoana la aer liber și mențineți-o într-o poziție confortabilă pentru respirație.
P305+P351+P338 ÎN CAZ DE CONTACT CU OCHII: Clătiți cu atenție cu apă timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.
P310 Sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ/un medic.
P501 Aruncați conținutul/recipientul în conformitate cu reglementările locale/regionale/naționale/internaționale.

Informații suplimentare privind pericolele

EUH071 Corosiv pentru căile respiratorii.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Ingrediente periculoase pentru etichetare

masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)

2.3 Alte pericole

Rezultatele evaluării PBT și vPvB

Acest amestec nu conține nicio substanță evaluată a fi PBT sau vPvB.

SECȚIUNEA 3: Compoziție/informații privind componenții

3.2 Amestecuri

Ingrediente periculoase

Denumirea substanței	Element de identificare	% Masă	Clasificare conf. 1272/2008/CE	Limite de conc. specifice	Factori M
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	Nr. CAS 55965-84-9 Nr. index 613-167-00-5	1 – < 3	Acute Tox. 3 / H301 Acute Tox. 2 / H310 Acute Tox. 2 / H330 Skin Corr. 1C / H314 Eye Dam. 1 / H318 Skin Sens. 1A / H317 Aquatic Acute 1 / H400 Aquatic Chronic 1 / H410 EUH071	Skin Corr. 1C; H314: C ≥ 0,6 % Skin Irrit. 2; H315: 0,06 % ≤ C < 0,6 % Eye Dam. 1; H318: C ≥ 0,6 % Eye Irrit. 2; H319: 0,06 % ≤ C < 0,6 % Skin Sens. 1A; H317: C ≥ 0,0015 %	factor M (acut) = 100.0 factor M (cronic) = 100.0

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

SECȚIUNEA 4: Măsurile de prim ajutor

4.1 Descrierea măsurilor de prim ajutor

Observații generale

Nu lăsați persoana afectată nesupravegheată. Evacuați victima din zona de pericol. Mențineți persoana afectată la căldură, nemișcată și acoperită. Scoateți imediat toată îmbrăcămintea contaminată. În caz de pierdere a cunoștinței, așezați persoana în poziție laterală stabilă. Nu-i administrați niciodată ceva pe gură.

După inhalare

În caz de iritare a tractului respirator, consultați un medic.

După contactul cu pielea

Scoateți îmbrăcămintea contaminată. După contactul cu pielea, scoateți imediat toată îmbrăcămintea contaminată și spălați imediat cu multă apă. Sunați imediat la un medic.

După contactul cu ochii

Clătiți din abundență cu apă proaspătă și curată, timp de cel puțin 10 minute, ținând pleoapele depărtate. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți. Sunați un medic imediat.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

După ingerare

Se clătește gura cu apă (numai dacă persoana este conștientă). NU provocați vomă. Sunați imediat la un medic.

4.2 Cele mai importante simptome și efecte, atât acute, cât și întârziate

Provoacă arsuri grave ale pielii și lezarea ochilor. Ingestion causes pain, burns, abdominal pain, possible general impact (shock).

4.3 Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare

No specific antidot is known. Treatment of the symptoms.

SECȚIUNEA 5: Măsurile de combatere a incendiilor

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare

Pulverizare de apă, Spumă rezistentă la alcool, Praf de extingtor, Dioxid de carbon (CO₂)

Mijloace de stingere necorespunzătoare

Jet continuu de apă

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Produși de combustie periculoși

Oxizi de azot (NO_x), Monoxid de carbon (CO), Dioxid de carbon (CO₂), Oxizi de sulf (SO_x)

5.3 Recomandări destinate pompierilor

Mențineți containerele reci prin pulverizarea de apă. A nu se inspira fumul în caz de incendiu și/sau explozie. Nu lăsați apa folosită la stingerea incendiului să pătrundă în canalizări sau în cursurile de apă. Colectați separat apa contaminată folosită la stingerea incendiilor. Stingeți incendiul de la o distanță rezonabilă, luând măsuri normale de precauție.

Echipamentul de protecție special destinat pompierilor

Echipament de protecție chimică, Folosiți aparate de protecție respiratorie adecvate

SECȚIUNEA 6: Măsurile de luat în caz de dispersie accidentală

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Pentru personalul care nu este implicat în situații de urgență

Evacuați persoana într-un loc sigur.

Pentru personalul care intervine în situații de urgență

Purtați aparat de respirat dacă sunteți expus la vapori/praf/spray/gaze. Utilizați echipamentul de protecție individuală conform cerințelor.

6.2 Precauții pentru mediul înconjurător

Păstrați la distanță față de canalele de scurgere și apele de suprafață sau subterane. Rețineți apa de spălare contaminată și eliminați-o. Chemicals generally shouldn't reach surface water.

6.3 Metode și material pentru izolarea incendiilor și pentru curățenie

Sfaturi privind modul de izolare a unei cantități vărsate

Acoperirea canalelor de evacuare

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Sfaturi privind modul de curățare a unei cantități vărsate

Ștergeți cu material absorbant (de ex. cârpă, fleece). Colectați scurgerile de produs: Material absorbant (de exemplu, nisip, diatomit, liant acid, liant universal, rumeguș etc.)

Tehnica adecvată de izolare

Utilizarea materialelor absorbante.

Alte informații referitoare la vărsări și dispersii

Puneți în containere adecvate pentru eliminare. Ventilați zona afectată.

6.4 Trimitere la alte secțiuni

Secțiunea 7: Manipularea și depozitarea. A se vedea și secțiunile 8 și 13 din fișa cu date de securitate.

SECȚIUNEA 7: Manipularea și depozitarea

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări

Măsurile de prevenire a incendiilor, precum și a generării de aerosoli și praf

Nu sunt necesare măsuri speciale.

Sfaturi privind igiena generală la locul de muncă

Spălați mâinile după utilizare. Nu mâncați, beți sau fumați în zonele de lucru. Îndepărtați îmbrăcămintea contaminată și echipamentul de protecție înainte de a pătrunde în zonele în care se ia masa. Nu țineți niciodată mâncarea sau băutura în apropiere de produsele chimice. Nu puneți niciodată produsele chimice în recipiente care sunt folosite în mod obișnuit pentru mâncare sau băutură. A se păstra departe de hrană, băuturi și hrană pentru animale.

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Proiectarea specială a spațiilor de depozitare sau a rezervoarelor

Păstrați ambalajul închis ermetic și într-un loc bine ventilat.

Temperatura de depozitare

Temperatura de depozitare recomandată: <40 °C.

Compatibilitățile privind ambalarea

Păstrați numai în recipientul original. Pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR).

7.3 Utilizare finală specifică (utilizări finale specifice)

Biocid. Produse chimice de tratare a apei. Agent de condiționare.

SECȚIUNEA 8: Controale ale expunerii/protecția personală

8.1 Parametri de control

Valorile limită naționale

Valori limită de expunere profesională (Limite de expunere la locul de muncă)

nu este relevant

8.2 Controale ale expunerii

Controale tehnice corespunzătoare

Ventilație generală.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Măsuri de protecție individuală (echipamentul de protecție personală)

Trebuie să existe garanții, ca instalațiile de clătire a ochilor și dușurile de siguranță să se afle aproape de locul de muncă.

Protecția ochilor/feței

A se purta mască de protecție a ochilor/feței.

Protecția pielii

Chemical resistant protective clothing.

Protecția mâinilor

A se purta mănuși corespunzătoare. Mănușile de protecție chimică adecvate sunt testate conform EN 374. Verificați etanșeitatea/impermeabilitatea înainte de utilizare. În scopuri speciale, se recomandă să verificați rezistența la produse chimice a mănușilor de protecție menționate mai sus, împreună cu furnizorul acestor mănuși. In case of spray contact at least protection index 2 recommended, according to more than 30 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.4 mm

In case of prolonged and intensive contact protection index 6 recommended, according to more than 480 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.7 mm.

Tipul de material

PVC: policlorură de vinil, PE: polietilenă, CR: cauciuc cloroprenic (clorobutadienic), NBR: cauciuc acrilonitrilbutadienic, IIR: cauciuc izobuten-izoprenic (butilcauciuc), FKM: elastomer cu fluor

Timpul de perforare a materialului din care sunt fabricate mănușile

Momentul de cedare și însușirile de origine ale materialului trebuie luate în considerare

Alte măsuri de protecție

Spălați-vă mâini bine după utilizare.

Protecția respirației

În cazul în care ventilarea este insuficientă, purtați echipament de protecție respiratorie.

Controlul expunerii mediului

Considerații privind eliminarea: a se vedea secțiunea 13.

SECȚIUNEA 9: Proprietățile fizice și chimice

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect

Starea fizică	lichid
Culoarea	galben - verde - albastru deschis
Miros	fara miros
Pragul de acceptare a mirosului	nu este aplicabilă

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Alți parametri de securitate

pH (valoare)	ca. 4 – 6 (in aqueous solution: 10 ⁹ /l)
Punctul de topire/punctul de înghețare	ca. -5 °C
Punctul inițial de fierbere și intervalul de fierbere	ca. 102 °C
Punctul de aprindere	>101 °C
Viteza de evaporare	nedeterminat
Inflamabilitatea (solid, gaz)	nu este relevant (fluid)
Limita superioară/inferioară de inflamabilitate sau de explozie	nedeterminat
Presiunea de vapori	nedeterminat
Densitatea vaporilor	aceste informații nu sunt disponibile
Densitatea	ca. 1,04 g/cm ³ la 20 °C

Solubilitatea (solubilitățile)

Solubilitatea în apă	miscibil în orice proporție
-----------------------------	-----------------------------

Coeficientul de partiție

- n-octanol/apă (log KOW)	aceste informații nu sunt disponibile
Temperatura de autoaprindere	>600 °C
Temperatura de descompunere	nu există date disponibile

Vâscozitatea

Vâscozitatea cinematică	4,5 mm ² /s
Vâscozitatea dinamică	4,6 mPa s la 20 °C
Proprietăți explozive	nici una/nici unul
Proprietăți oxidante	nici una/nici unul

9.2 Alte informații

Nu există informații suplimentare.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

SECȚIUNEA 10: Stabilitate și reactivitate

10.1 Reactivitate

Acest material nu este reactiv în condiții normale de mediu ambiant.

10.2 Stabilitate chimică

Materialul este stabil în condiții ambientale normale, precum și în condițiile de temperatură și presiune în care se anticipează că vor avea loc depozitarea și manipularea.

10.3 Posibilitatea de reacții periculoase

Nu se cunosc reacții periculoase.

10.4 Condiții de evitat

Nu există condiții specifice cunoscute care trebuie evitate.

10.5 Materiale incompatibile

Nu există informații suplimentare.

10.6 Produși de descompunere periculoși

Produșii de descompunere periculoși anticipați în mod rezonabil care sunt produși în urma utilizării, depozitării, vărsării și încălzirii nu sunt cunoscuți. Produși de combustie periculoși: a se vedea secțiunea 5.

SECȚIUNEA 11: Informații toxicologice

11.1 Informații privind efectele toxicologice

Nu sunt disponibile date de testare pentru întregul amestec.

Procedura de clasificare

Metoda pentru clasificarea amestecului se bazează pe ingredientele amestecului (formula de aditivitate).

Toxicitate acută

Nu se clasifică ca fiind toxic(ă) acut(ă).

Product ATEmix oral : >2000 mg/kg
Product ATEmix dermal : >2000 mg/kg

Toxicitatea acută a componentilor amestecului

Denumirea substanței	Nr. CAS	Calea de expunere	Efect	Valoare	Specii
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	orală	LD50	64 ^{mg} /kg	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	prin inhalare: praf/ceață	LC50	0,33 ^{mg} /l/4h	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	dermică	LD50	87,12 ^{mg} /kg	iepure

Corodarea/iritarea pielii

Provoacă arsuri grave ale pielii și lezarea ochilor.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Lezarea gravă a ochilor/iritarea ochilor

Provoacă leziuni oculare grave.

Sensibilizarea căilor respiratorii sau a pielii

Poate provoca o reacție alergică a pielii.

Mutagenicitatea celulelor embrionare

Nu sunt disponibile date de testare pentru întregul amestec.

Cancerigenitate

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitatea pentru reproducere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - o singură expunere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - expunere repetată

Nu sunt disponibile date de testare pentru întregul amestec.

Pericol prin aspirare

Nu se clasifică ca prezentând pericol prin aspirare.

Alte informații

Corosiv pentru căile respiratorii.

SECȚIUNEA 12: Informații ecologice

12.1 Toxicitatea

Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Toxicitate acvatică (acută) a componentelor amestecului					
Denumirea substanței	Nr. CAS	Efect	Durata de expunere	Valoare	Specii
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	LC50	96 h	0,19 mg/l	pește
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	EC50	48 h	0,16 mg/l	nevertebrate acvatice
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	ErC50	72 h	19,9 µg/l	alge

A worth-mentioning accumulation in organisms is not expected.

Potențial de bioacumulare a componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>BCF</i>	<i>Log KOW</i>	<i>BOD5/COD</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	54	≥-0,34 – ≤0,63 (pH valoare: 7, 10 °C)	

12.4 Mobilitatea în sol

Nu sunt disponibile date.

12.5 Rezultatele evaluării PBT și vPvB

Nu este aplicabilă.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

12.6 Alte efecte adverse

Potențialul de a afecta sistemul endocrin

Niciun ingredient nu figurează pe listă.

Observații

A nu se arunca în rețeaua de canalizare sau în apa de suprafață.

SECȚIUNEA 13: Considerații privind eliminarea

13.1 Metode de tratare a deșeurilor

Acest produs și ambalajul său se vor depozita ca un deșeu periculos. Alocarea de numere de identificare/marcaje pentru reziduuri trebuie să se efectueze corespunzător OID, specific procesului și branșei. Eliminarea deșeurilor de produs se va face conform legii 211/2011 privind regimul deșeurilor. ¶ Eliminarea deșeurilor de ambalaje se face cf. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje; HG 856/2002- evidența gestiunii deșeurilor și aprobarea listei deșeurilor. Legea 249/2015 privind modalitatea de gestionare a ambalajelor și a deșeurilor de ambalaje.

Informații relevante pentru tratarea deșeurilor

Este un deșeu periculos; pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR). Ambalajele golite complet pot fi reciclate. Manipulați ambalajele contaminate în același mod ca și substanța respectivă.

Observații

Vă rugăm să luați în considerare dispozițiile naționale sau regionale relevante. Deșeurile vor fi selectate pe categorii care pot fi tratate separat de către facilitățile de gestionare a deșeurilor de la nivel local sau național. A nu se arunca în rețeaua de canalizare sau în apa de suprafață. Evitați dispersarea în mediu.

SECȚIUNEA 14: Informații referitoare la transport

14.1 Numărul ONU	3265
14.2 Denumirea corectă ONU pentru expediție	LICHID ORGANIC COROSIV, ACID, N.S.A.
Denumire tehnică (ingrediente periculoase)	(isothiazolinones)
14.3 Clasa (clasele) de pericol pentru transport	
Clasa	8
14.4 Grupul de ambalare	III
14.5 Pericole pentru mediul înconjurător	periculos pentru mediul acvatic
Substanță periculoasă pentru mediu (mediul acvatic)	isothiazolinones
14.6 Precauții speciale pentru utilizatori	
Nu există informații suplimentare.	
14.7 Transport în vrac, în conformitate cu anexa II la MARPOL și Codul IBC	
Încărcătura nu este destinată să fie transportată în vrac.	

Informații pentru fiecare Regulament-tip ONU

SECȚIUNEA 15: Informații de reglementare

15.1 Regulamente/legislație în domeniul securității, al sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispozițiile relevante ale Uniunii Europene (UE)

Restricții în conformitate cu REACH, Anexa XVII

Substanțe periculoase cu restricții (REACH, Anexa XVII)

Denumirea substanței	Denumirea conf. inventarului	Nr. CAS	Restricție
Ferrocid 8583	acest produs îndeplinește criteriile de clasificare în conformitate cu Regulamentul nr. 1272/2008/CE		R3

Legendă

R3

- Nu se utilizează în:
 - articole decorative destinate producerii unor efecte de lumină sau de culoare prin intermediul unor faze diferite, de exemplu, în lămpi decorative și în scrumiere;
 - obiecte destinate producerii de farse și capcane;
 - jocuri pentru unul sau mai mulți participanți sau orice alt articol destinat unei folosințe similare, chiar și cu aspecte decorative.
- Este interzisă introducerea pe piață a articolelor care nu se conformează punctului 1.
- Nu se introduc pe piață dacă conțin colorant, cu excepția cazului în care este necesar din motive fiscale, sau parfum ori ambele, dacă:
 - pot fi utilizate drept combustibili în lămpi decorative cu ulei pentru a fi furnizate publicului larg; și
 - prezintă un pericol în caz de inhalare și sunt etichetate cu R65 sau H304.
- Lămpile decorative cu ulei destinate publicului larg nu sunt introduse pe piață decât dacă sunt conforme standardului european privind lămpile decorative cu ulei (EN 14059), adoptat de Comitetul European de Standardizare (CEN).
- Fără a aduce atingere punerii în aplicare a altor dispoziții comunitare referitoare la clasificarea, ambalarea și etichetarea substanțelor și a amestecurilor periculoase, furnizorii se asigură, înainte de introducerea pe piață, că sunt respectate următoarele cerințe:
 - uleiurile lampante, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate vizibil, lizibil și de neșters după cum urmează: „A nu se lăsa la îndemâna copiilor lămpi umplute cu acest lichid” și, începând cu 1 decembrie 2010, „Doar o înghițitură de ulei lampant – sau chiar suptul fitilului lămpilor – poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate, începând cu 1 decembrie 2010, lizibil și de neșters, după cum urmează: „O singură înghițitură din acest lichid poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - uleiurile lampante și lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt îmbuteliate, începând cu 1 decembrie 2010, în recipiente negre opace care nu depășesc 1 litru.
- Până la 1 iunie 2014 cel târziu, Comisia solicită Agenției Europene pentru Produse Chimice să pregătească un dosar, în conformitate cu articolul 69 din prezentul regulament, în scopul de a interzice, dacă este cazul, lichidele de aprins focul pentru barbecue și combustibilii pentru lămpile decorative, etichetați R65 sau H304, destinați publicului larg.
- Persoanele fizice sau juridice care introduc pe piață pentru prima oară uleiuri lampante și lichide de aprins focul pentru barbecue, etichetate cu R65 sau H304, furnizează autorității competente din statul membru în cauză, până la 1 decembrie 2011 și apoi anual, date privind soluții alternative pentru uleiul lampant și lichidele de aprins focul pentru barbecue etichetate R65 sau H304. Statele membre pun datele respective la dispoziția Comisiei.

Abrevieri si acronime

Abr.	Descrieri ale abrevierilor utilizate
Acute Tox.	Toxicitate acută
ADN	Accord européen relatif au transport international des marchandises dangereuses par voies de navigation intérieures (Acordul european privind transportul internațional al mărfurilor periculoase pe căile navigabile interioare)
ADR	Accord européen relatif au transport international des marchandises dangereuses par route (Acordul european referitor la transportul rutier internațional al mărfurilor periculoase)
Aquatic Acute	Periculos pentru mediul acvatic - pericol acut
Aquatic Chronic	Periculos pentru mediul acvatic - pericol cronic
BCF	Bioconcentration factor (factor de bioconcentrare)
BOD	Consumul biochimic de oxigen
CAS	Chemical Abstracts Service (departament care deține cea mai cuprinzătoare listă a substanțelor chimice)
CLP	Regulamentul (CE) Nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor
COD	Consumul chimic de oxigen
DGR	Reglementări privind Mărfurile Periculoase (a se vedea IATA/DGR)
EC50	Concentrația Efectivă 50%. CE50 corespunde concentrației unei substanțe testate care produce schimbări de 50% în efect (de ex., asupra creșterii) într-un interval de timp specificat
EINECS	European Inventory of Existing Commercial Chemical Substances (Inventarul european al substanțelor chimice existente introduse pe piață)
ELINCS	European List of Notified Chemical Substances (Lista europeană a substanțelor chimice notificate)
EmS	Emergency Schedule (Plan de urgență)
ErC50	≡ CE50: în această metodă, acea concentrație a substanței de testat care determină o reducere cu 50 % fie a creșterii (CEb50), fie a vitezei de creștere (CEr50) în comparație cu testul martor
Eye Dam.	Lezare gravă a ochiului
Eye Irrit.	Iritant pentru ochi
factor M	Înseamnă un factor de multiplicare. Acesta se aplică concentrației unei substanțe clasificate ca fiind periculoasă pentru mediul acvatic, toxicitate acută categoria 1 sau toxicitate cronică categoria 1, și care se utilizează pentru determinarea, prin metoda însumării, a clasificării unui amestec, în care este prezentă substanța
IATA	International Air Transport Association (Asociația Internațională de Transport Aerian)
IATA/DGR	Dangerous Goods Regulations (DGR) for the air transport (IATA) (Reglementări privind Mărfurile Periculoase pentru transportul aerian)

<i>Abr.</i>	<i>Descrieri ale abrevierilor utilizate</i>
IMDG	International Maritime Dangerous Goods Code (Codul maritim internațional pentru mărfuri periculoase)
LC50	Lethal Concentration 50 % (concentrație letală 50 %): LC50 corespunde concentrației unei substanțe testate care produce o letalitate de 50 % într-un interval de timp specificat
LD50	Lethal Dose 50 % (doză letală 50 %): DLx corespunde dozei unei substanțe testate care produce o letalitate de 50 % într-un interval de timp specificat
log KOW	n-Octanol/apă
MARPOL	Convenția internațională pentru prevenirea poluării de către nave (abr. de la „Marine Pollutant”)
NLP	No-Longer Polymer (ex-polimer)
Nr. CE	Inventarul CE (EINECS, ELINCS și NLP-list) este sursa numărului CE, format din șapte cifre, un identificator al substanțelor disponibile pe piață în UE (Uniunea Europeană)
Nr. index	Numărul index reprezintă codul de identificare alocat substanței în partea 3 din anexa VI la Regulamentul (CE) nr. 1272/2008
OACI	International Civil Aviation Organization (Organizația Internațională de Aviație Civilă)
Ox. Sol.	Solid oxidant
PBT	Persistent, bioacumulativ și toxic
REACH	Registration, Evaluation, Authorisation and Restriction of Chemicals (Înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice)
RID	Règlement concernant le transport International ferroviaire des marchandises Dangereuses (Regulamentul privind transportul internațional feroviar al mărfurilor periculoase)
Skin Corr.	Corosiv pentru piele
Skin Irrit.	Iritant pentru piele
Skin Sens.	Sensibilizarea pielii
SVHC	Substance of Very High Concern (substanță care prezintă motive de îngrijorare deosebită)
vPvB	Very Persistent and very Bioaccumulative (foarte persistent și foarte bioacumulativ)

Trimiteri către literatura de specialitate și către sursele de date

Regulamentul (CE) Nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor. Regulamentul (CE) nr. 1907/2006 (REACH), modificat prin 2015/830/UE. ECHA: Agenția Europeană pentru Produse Chimice, <http://echa.europa.eu/>.

Transportul rutier, feroviar și pe căi navigabile interioare al mărfurilor periculoase (ADR/RID/ADN). Codul maritim internațional pentru mărfuri periculoase (IMDG). Dangerous Goods Regulations (DGR) for the air transport (IATA) (Reglementări privind Mărfurile Periculoase pentru transportul aerian).

Procedura de clasificare

Proprietățile fizice și chimice: Clasificarea este bazată pe amestecul testat.
Pericolele pentru sănătate, Pericole pentru mediul înconjurător: Metoda pentru clasificarea amestecului se bazează pe ingredientele amestecului (formula de aditivitate).

Ferrocid 8583

Hydrosure™ HD-5000

Section: 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier: Hydrosure™ HD-5000
Substance type: CLP Mixture

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Use of the Substance/Mixture : HYDROTEST CHEMICAL

Recommended restrictions on use : Reserved for industrial and professional use.

1.3 Details of the supplier of the safety data sheet:

COMPANY IDENTIFICATION
NALCO EUROPE B.V.
Postbus 627
2300 AP Leiden, The Netherlands
TEL: 0031 71 5241100

LOCAL COMPANY IDENTIFICATION
Nalco Ltd.
P.O. BOX 11, WINNINGTON AVENUE
NORTHWICH, CHESHIRE, U.K. CW8 4DX
TEL: +44 (0)1606 74488

For Product Safety information please contact: msdseame@nalco.com

1.4 Emergency telephone number: +32-(0)3-575-5555 Trans-European

Date of Compilation/Revision: 06.09.2017
Version Number: 1.2

Section: 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Acute toxicity, Category 4	H302
Skin corrosion, Category 1B	H314
Serious eye damage, Category 1	H318
Specific target organ toxicity - repeated exposure, Category 2	H373
Acute aquatic toxicity, Category 1	H400

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal Word : Danger

Hazard Statements	H302	Harmful if swallowed.
	H314	Causes severe skin burns and eye damage.
	H373	May cause damage to organs through prolonged or repeated exposure.
	H400	Very toxic to aquatic life.

Supplemental Hazard	:	EUH031	Contact with acids liberates toxic gas.
---------------------	---	--------	---

Hydrosure™ HD-5000

Statements

Precautionary Statements : **Prevention:**

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P273 Avoid release to the environment.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

Response:

P301 + P312 + P330 IF SWALLOWED: Call a POISON CENTER or doctor/ physician if you feel unwell. Rinse mouth.

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P305 + P351 + P338 + P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/ physician.

Hazardous components which must be listed on the label:

Didecyl-Dimethyl-Ammonium chloride

Ethylene Glycol

Quaternary ammonium compounds, C12-16-alkyltrimethyl, chlorides

2.3 Other hazards

None known.

Section: 3. COMPOSITION/INFORMATION ON INGREDIENTS**3.2 Mixtures****Hazardous components**

Chemical Name	CAS-No. EC-No. REACH No.	Classification (REGULATION (EC) No 1272/2008)	Concentration: [%]
Didecyl-Dimethyl-Ammonium chloride	7173-51-5 230-525-2	Acute toxicity Category 4; H302 Skin corrosion Category 1B; H314 Serious eye damage Category 1; H318 Acute aquatic toxicity Category 1; H400 Chronic aquatic toxicity Category 2; H411	20 - < 25
Ammonium Bisulfite	10192-30-0 233-469-7	Eye irritation Category 2; H319	10 - < 20
Ethylene Glycol	107-21-1 203-473-3 01-2119456816-28	Acute toxicity Category 4; H302 Specific target organ toxicity - repeated exposure Category 2; H373	10 - < 20
Quaternary ammonium compounds, C12-16-alkyltrimethyl, chlorides	308074-39-7	Acute toxicity Category 4; H302 Skin corrosion Category 1B; H314 Serious eye damage Category 1; H318 Acute aquatic toxicity Category 1; H400	10 - < 20

For the full text of the H-Statements mentioned in this Section, see Section 16.

Hydrosure™ HD-5000

Section: 4. FIRST AID MEASURES

4.1 Description of first aid measures

- | | | |
|----------------------------|---|--|
| If inhaled | : | Remove to fresh air.
Treat symptomatically.
Get medical attention if symptoms occur. |
| In case of skin contact | : | Wash off immediately with plenty of water for at least 15 minutes.
Use a mild soap if available.
Wash clothing before reuse.
Thoroughly clean shoes before reuse.
Get medical attention immediately. |
| In case of eye contact | : | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Remove contact lenses, if present and easy to do. Continue rinsing.
Get medical attention immediately. |
| If swallowed | : | Rinse mouth with water.
Do NOT induce vomiting.
Never give anything by mouth to an unconscious person.
Get medical attention immediately. |
| Protection of first-aiders | : | In event of emergency assess the danger before taking action.
Do not put yourself at risk of injury. If in doubt, contact emergency responders. Use personal protective equipment as required. |

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of immediate medical attention and special treatment needed

- | | | |
|-----------|---|------------------------|
| Treatment | : | Treat symptomatically. |
|-----------|---|------------------------|

Section: 5. FIREFIGHTING MEASURES

5.1 Extinguishing media

- | | | |
|--------------------------------|---|---|
| Suitable extinguishing media | : | Foam
Carbon dioxide
Dry powder
Other extinguishing agent suitable for Class B fires
For large fires, use water spray or fog, thoroughly drenching the burning material. |
| Unsuitable extinguishing media | : | None known. |

5.2 Special hazards arising from the substance or mixture

- | | | |
|--------------------------------------|---|--|
| Specific hazards during firefighting | : | Fire Hazard
Keep away from heat and sources of ignition.
Flash back possible over considerable distance. |
| Hazardous combustion | : | Decomposition products may include the following materials: |

Hydrosure™ HD-5000

products	Carbon oxides nitrogen oxides (NOx) Sulphur oxides
----------	--

5.3 Advice for firefighters

Special protective equipment for firefighters	: Use personal protective equipment.
Further information	: Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section: 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel	: Ensure adequate ventilation. Remove all sources of ignition. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8.
Advice for emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

6.2 Environmental precautions

Environmental precautions	: Do not allow contact with soil, surface or ground water.
---------------------------	--

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up	: Eliminate all ignition sources if safe to do so. Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.
-------------------------	--

6.4 Reference to other sections

See Section 1 for emergency contact information.
For personal protection see section 8.
See Section 13 for additional waste treatment information.

Section: 7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling	: Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Do not ingest.
-------------------------	---

Hydrosure™ HD-5000

Keep away from fire, sparks and heated surfaces. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling. Use only with adequate ventilation.

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep away from heat and sources of ignition. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labelled containers.

Suitable material : Keep in properly labelled containers.

Unsuitable material :
not determined

7.3 Specific end uses

Specific use(s) : HYDROTEST CHEMICAL

Section: 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**8.1 Control parameters****Occupational Exposure Limits**

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Ethylene Glycol	107-21-1	TWA (Vapour.)	20 ppm 52 mg/m ³	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		STEL (Vapour.)	40 ppm 104 mg/m ³	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		TWA (particles)	10 mg/m ³	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		

DNEL

Ethylene Glycol	:	End Use: Workers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 106 mg/cm ²
		End Use: Workers Exposure routes: Dermal Potential health effects: long term - systemic
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term systemic effects

Hydrosure™ HD-5000

		Value: 35 mg/m3
		End Use: Workers Exposure routes: Inhalation Potential health effects: long-term - local Value: 35 mg/m3
		End Use: Consumers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 53 mg/cm2
		End Use: Consumers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 7 mg/m3

PNEC

Ethylene Glycol	:	Fresh water Value: 10 mg/l
		Marine water Value: 1 mg/l
		Water Value: 10 mg/l
		Intermittent release Value: 10 mg/l
		Fresh water sediment Value: 20.9 mg/kg
		Water Value: 1995.5 mg/l
		Soil Value: 1.53 mg/kg

8.2 Exposure controls**Appropriate engineering controls**

Effective exhaust ventilation system.

Maintain air concentrations below occupational exposure standards.

Individual protection measures

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

Eye/face protection (EN 166) : Safety goggles
Face-shield

Hand protection (EN 374) : Recommended preventive skin protection
Gloves
Nitrile rubber
butyl-rubber

Hydrosure™ HD-5000

Breakthrough time: 1 – 4 hours
Minimum thickness for butyl-rubber 0.7 mm for nitrile rubber 0.4 mm or equivalent (please refer to the gloves manufacturer/distributor for advise).
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection (EN 14605) : Personal protective equipment comprising: suitable protective gloves, safety goggles and protective clothing

Respiratory protection (EN 143, 14387) : When respiratory risks cannot be avoided or sufficiently limited by technical means of collective protection or by measures, methods or procedures of work organization, consider the use of certified respiratory protection equipment meeting EU requirements (89/656/EEC, 89/686/EEC), or equivalent, with filter type:A-P

Environmental exposure controls

General advice : Consider the provision of containment around storage vessels.

Section: 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance	: liquid
Colour	: colourless
Odour	: characteristic
Flash point	: 92 °C
pH	: 4.51 - 6.51
Odour Threshold	: no data available
Melting point/freezing point	: no data available
Initial boiling point and boiling range	: 194 - 205 °C
Evaporation rate	: no data available
Flammability (solid, gas)	: no data available
Upper explosion limit	: 15.3 V%
Lower explosion limit	: 3.2 V%
Vapour pressure	: 0.123 hPa
Relative vapour density	: no data available
Relative density	: 1.046 - 1.076 (20 °C)
Density	: 1.044 - 1.074 g/cm3
Solubility(ies)	
Water solubility	: soluble

Hydrosure™ HD-5000

Solubility in other solvents	: no data available
Partition coefficient: n-octanol/water	: no data available
Auto-ignition temperature	: 410 °C
Thermal decomposition	: no data available
Viscosity, dynamic	: no data available
Viscosity, kinematic	: no data available
Explosive properties	: no data available
Oxidizing properties	: no data available

9.2 Other information

no data available

Section: 10. STABILITY AND REACTIVITY

10.1 Reactivity

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

10.5 Incompatible materials

Materials to avoid : Strong oxidizing agents
Strong acids
Strong bases

10.6 Hazardous decomposition products

Hazardous decomposition products : Decomposition products may include the following materials:
Carbon oxides
nitrogen oxides (NO_x)
Sulphur oxides

Section: 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Information on likely routes of exposure : Inhalation, Eye contact, Skin contact

Toxicity

Hydrosure™ HD-5000

Product

Acute oral toxicity	: Acute toxicity estimate : 1,728 mg/kg
Acute inhalation toxicity	: There is no data available for this product.
Acute dermal toxicity	: There is no data available for this product.
Skin corrosion/irritation	: There is no data available for this product.
Serious eye damage/eye irritation	: There is no data available for this product.
Respiratory or skin sensitization	: There is no data available for this product.
Carcinogenicity	: There is no data available for this product.
Reproductive effects	: There is no data available for this product.
Germ cell mutagenicity	: There is no data available for this product.
Teratogenicity	: There is no data available for this product.
STOT - single exposure	: There is no data available for this product.
STOT - repeated exposure	: There is no data available for this product.
Aspiration toxicity	: There is no data available for this product.

Components

Acute oral toxicity	: Didecyl-Dimethyl-Ammonium chloride LD50 rat: 1,150 mg/kg
	Ammonium Bisulfite LD50 rat: 2,610 mg/kg

Components

Acute dermal toxicity	: Didecyl-Dimethyl-Ammonium chloride LD50 rabbit: 2,930 mg/kg
	Ethylene Glycol LD50 rabbit: 10,600 mg/kg

Potential Health Effects

Eyes	: Causes serious eye damage.
Skin	: Causes severe skin burns.
Ingestion	: Harmful if swallowed. Causes digestive tract burns.
Inhalation	: May cause nose, throat, and lung irritation.
Chronic Exposure	: May cause damage to organs through prolonged or repeated exposure.

Hydrosure™ HD-5000

Experience with human exposure

Eye contact	: Redness, Pain, Corrosion
Skin contact	: Redness, Pain, Corrosion
Ingestion	: Corrosion, Abdominal pain
Inhalation	: Respiratory irritation, Cough
Further information	: no data available

Section: 12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity

Product

Environmental Effects	: Very toxic to aquatic life.
Toxicity to fish	: no data available
Toxicity to daphnia and other aquatic invertebrates	: no data available
Toxicity to algae	: no data available

Components

Toxicity to fish	: Didecyl-Dimethyl-Ammonium chloride 96 h LC50: 1 mg/l
	Ethylene Glycol 96 h LC50: 72,860 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates	: Ammonium Bisulfite 48 h EC50: 89 mg/l
	Ethylene Glycol 48 h EC50: > 100 mg/l

Components

Toxicity to algae	: Ethylene Glycol 96 h EC50: 6,500 mg/l
-------------------	--

Components

Toxicity to bacteria	: Ethylene Glycol > 1,995 mg/l Method: ISO 8192
----------------------	---

Components

Toxicity to fish (Chronic toxicity)	: Ethylene Glycol 7 d NOEC: 15,380 mg/l
-------------------------------------	--

Components

Toxicity to daphnia and other	: Ethylene Glycol
-------------------------------	-------------------

Hydrosure™ HD-5000

aquatic invertebrates (Chronic toxicity)

7 d NOEC: 8,590 mg/l

12.2 Persistence and degradability

Product

no data available

Components

Biodegradability

: Didecyl-Dimethyl-Ammonium chloride
Result: Eliminated from aquatic environment

Ammonium Bisulfite
Result: Not applicable - inorganic

Ethylene Glycol
Result: Readily biodegradable.

Quaternary ammonium compounds, C12-16-alkyltrimethyl, chlorides
Result: no data available

12.3 Bioaccumulative potential

no data available

12.4 Mobility in soil

no data available

12.5 Results of PBT and vPvB assessment

Product

Assessment

: This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6 Other adverse effects

no data available

Section: 13. DISPOSAL CONSIDERATIONS

Dispose of in accordance with the European Directives on waste and hazardous waste. Waste codes should be assigned by the user, preferably in discussion with the waste disposal authorities.

13.1 Waste treatment methods

Product

: The product should not be allowed to enter drains, water courses or the soil.
Where possible recycling is preferred to disposal or incineration.
If recycling is not practicable, dispose of in compliance with local regulations.

Hydrosure™ HD-5000

Dispose of wastes in an approved waste disposal facility.

Contaminated packaging : Dispose of as unused product.
Empty containers should be taken to an approved waste handling site for recycling or disposal.
Do not re-use empty containers.

Section: 14. TRANSPORT INFORMATION

The shipper/consignor/sender is responsible to ensure that the packaging, labeling, and markings are in compliance with the selected mode of transport.

Land transport (ADR/ADN/RID)

14.1 UN number:	UN 1760
14.2 UN proper shipping name:	CORROSIVE LIQUID, N.O.S. (Didecyl-Dimethyl-Ammonium chloride, Quaternary ammonium compounds)
14.3 Transport hazard class(es):	8
14.4 Packing group:	II
14.5 Environmental hazards:	Yes
14.6 Special precautions for user:	Not applicable.

Air transport (IATA)

14.1 UN number:	UN 1760
14.2 UN proper shipping name:	CORROSIVE LIQUID, N.O.S. (Didecyl-Dimethyl-Ammonium chloride, Quaternary ammonium compounds)
14.3 Transport hazard class(es):	8
14.4 Packing group:	II
14.5 Environmental hazards:	Yes
14.6 Special precautions for user:	Not applicable.

Sea transport (IMDG/IMO)

14.1 UN number:	UN 1760
14.2 UN proper shipping name:	CORROSIVE LIQUID, N.O.S. (Didecyl-Dimethyl-Ammonium chloride, Quaternary ammonium compounds)
14.3 Transport hazard class(es):	8
14.4 Packing group:	II
14.5 Environmental hazards:	Yes (Marine Pollutant)
14.6 Special precautions for user:	Not applicable.
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code:	Not applicable.

Section: 15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:

INTERNATIONAL CHEMICAL CONTROL LAWS

United States TSCA Inventory
not determined

15.2 Chemical Safety Assessment:

Hydrosure™ HD-5000

No Chemical Safety Assessment has been carried out on the product.

Section: 16. OTHER INFORMATION**Procedure used to derive the classification according to REGULATION (EC) No 1272/2008**

Classification	Justification
Acute toxicity 4, H302	Calculation method
Skin corrosion 1B, H314	Calculation method
Serious eye damage 1, H318	Calculation method
Specific target organ toxicity - repeated exposure 2, H373	Calculation method
Acute aquatic toxicity 1, H400	Calculation method

Full text of H-Statements

H302	Harmful if swallowed.
H314	Causes severe skin burns and eye damage.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H373	May cause damage to organs through prolonged or repeated exposure.
H400	Very toxic to aquatic life.
H411	Toxic to aquatic life with long lasting effects.

Page 1(11)

Substance key: 000000358688

Revision Date: 19.01.2018

Version : 2 - 2 / EU

Date of printing : 14.11.2018

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name

MULTITREAT 9379

Material number: 235807

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses of the substance or mixture

Industry sector :

Oilfield

Type of use :

Oxygen scavenger

1.3. Details of the supplier of the safety data sheet

Identification of the company

Clariant Produkte (Deutschland) GmbH

65926 Frankfurt am Main

Telephone no. : +49 69 305 18000

Information about the substance/mixture

BU Oil & Mining Services

Product Stewardship

e-mail: SDS.Europe@clariant.com

1.4. Emergency telephone number

00800-5121 5121 (24 h)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Skin irritation, Category 2

H315: Causes skin irritation.

Eye irritation, Category 2

H319: Causes serious eye irritation.

Specific target organ toxicity - single exposure, Category 3, Respiratory system

H335: May cause respiratory irritation.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal word :

Warning

Hazard statements :

H315 Causes skin irritation.

H319 Causes serious eye irritation.

MULTITREAT 9379

Page 2(11)

Substance key: 000000358688

Revision Date: 19.01.2018

Version : 2 - 2 / EU

Date of printing : 14.11.2018

H335 May cause respiratory irritation.

Precautionary statements :

Prevention:

P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.

P280 Wear eye protection/ face protection.

P280 Wear protective gloves.

Response:

P304 + P340 + P312 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell.

P337 + P313 If eye irritation persists: Get medical advice/ attention.

Storage:

P403 + P233 Store in a well-ventilated place. Keep container tightly closed.

Hazardous components which must be listed on the label:

Ammonium hydrogensulphite

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

No additional hazards are known except those derived from the labelling.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Hazardous components

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)
Ammonium hydrogensulphite	10192-30-0 233-469-7	Eye Dam./Irrit. 2; H319 STOT SE 3; H335 2; H315 EUH031	>= 50 - < 70
2-Butenedioic acid (2Z)-, polymer with sodium 2-propene-1-sulfonate	68715-83-3	Acute Tox. 4; H302 Skin Corr. 1B; H314 Met. Corr. 1; H290	>= 1 - < 3

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice : Remove/Take off immediately all contaminated clothing.
Get medical advice/ attention if you feel unwell.

MULTITREAT 9379

Page 3(11)

Substance key: 000000358688

Revision Date: 19.01.2018

Version : 2 - 2 / EU

Date of printing : 14.11.2018

- | | | |
|----------------------------|---|--|
| Protection of first-aiders | : | First Aid responders should pay attention to self-protection and use the recommended protective clothing |
| If inhaled | : | If inhaled, remove to fresh air.
Get medical advice/ attention. |
| In case of skin contact | : | In case of contact, immediately flush skin with soap and plenty of water. |
| In case of eye contact | : | In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. |
| If swallowed | : | If swallowed do not induce vomiting, seek medical advice and show safety datasheet or label |

4.2 Most important symptoms and effects, both acute and delayed

- | | | |
|----------|---|--|
| Symptoms | : | Treat symptomatically. |
| Risks | : | Causes skin irritation.
Causes serious eye irritation.
May cause respiratory irritation. |

4.3 Indication of any immediate medical attention and special treatment needed

- | | | |
|-----------|---|------------------------|
| Treatment | : | Treat symptomatically. |
|-----------|---|------------------------|

SECTION 5: Firefighting measures

5.1 Extinguishing media

- | | | |
|--------------------------------|---|--|
| Suitable extinguishing media | : | Water spray jet
Alcohol-resistant foam
Dry powder
Carbon dioxide (CO ₂) |
| Unsuitable extinguishing media | : | High volume water jet |

5.2 Special hazards arising from the substance or mixture

- | | | |
|--------------------------------------|---|---|
| Specific hazards during firefighting | : | In case of fires, hazardous combustion gases are formed:
Carbon monoxide (CO)
Carbon dioxide (CO ₂) |
|--------------------------------------|---|---|

5.3 Advice for firefighters

- | | | |
|---|---|-------------------------------------|
| Special protective equipment for firefighters | : | Self-contained breathing apparatus |
| Further information | : | Wear suitable protective equipment. |

MULTITREAT 9379

Version : 2 - 2 / EU

Date of printing : 14.11.2018

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Wear suitable protective equipment.
Ensure adequate ventilation.

6.2 Environmental precautions

Environmental precautions : The product should not be allowed to enter drains, water courses or the soil.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).
Treat recovered material as described in the section "Disposal considerations".

6.4 Reference to other sections

Information regarding Safe handling, see chapter 7., For personal protection see section 8., For disposal considerations see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : When used and handled appropriately no special measures are needed

Advice on protection against fire and explosion : Observe the general rules of industrial fire protection

Hygiene measures : Wash hands before breaks and at the end of workday. Use protective skin cream before handling the product. Take off immediately all contaminated clothing and wash it before reuse.

7.2 Conditions for safe storage, including any incompatibilities

Further information on storage conditions : Keep containers tightly closed in a cool, well-ventilated place.
Handle and open container with care.

7.3 Specific end use(s)

Specific use(s) : No further recommendations.

MULTITREAT 9379

Version : 2 - 2 / EU

Date of printing : 14.11.2018

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2 Exposure controls

Personal protective equipment

Eye protection : Depending on the risk, wear sufficient eye protection (safety glasses with side protection or goggles, and if necessary, face shield.)

Hand protection

Break through time : 480 min

Glove thickness : 0,7 mm

Remarks : Long-term exposure Impervious butyl rubber gloves

Break through time : 30 min

Glove thickness : 0,4 mm

Remarks : For short-term exposure (splash protection): Nitrile rubber gloves.

Remarks : These types of protective gloves are offered by various manufacturers. Please note the manufacturers' detailed statements, especially about the minimum thickness and the minimum breakthrough time. Consider also the particular working conditions under which the gloves are being used.

Protective measures : Observe the usual precautions for handling chemicals.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance : Liquid

Colour : colourless to slightly yellow

Odour : acrid, slight odour of sulfur dioxide

Odour Threshold : not tested.

pH : 4,0 - 6,0

Melting point : approx. -10 °C
(1.011 hPa)

Boiling point : approx. 100 °C
(1.011 hPa)

Flash point : Not applicable

Evaporation rate : not tested.

Burning number : Not applicable

Date of printing : 14.11.2018

Upper explosion limit / upper flammability limit	:	Not applicable
Lower explosion limit / Lower flammability limit	:	Not applicable
Vapour pressure	:	13 - 40 hPa (25 °C)
Relative vapour density	:	> 1
Density	:	1,31 - 1,35 g/cm ³ (25 °C) Method: ASTM D 1298
Bulk density	:	Not applicable
Solubility(ies)		
Water solubility	:	soluble
Solubility in other solvents	:	not tested. Solvent: fat
Partition coefficient: n-octanol/water	:	Pow: < 3
Auto-ignition temperature	:	> 300 °C
Decomposition temperature	:	> 200 °C No decomposition if used as directed.
Viscosity		
Viscosity, dynamic	:	< 10 mPa.s
Viscosity, kinematic	:	not tested.
Explosive properties	:	Not explosive
Oxidizing properties	:	not oxidizing

9.2 Other information

Minimum ignition energy	:	Not applicable
Particle size	:	Not applicable
Self-ignition	:	Not applicable

SECTION 10: Stability and reactivity

10.1 Reactivity

See section 10.3. "Possibility of hazardous reactions"

MULTITREAT 9379

Page 7(11)

Substance key: 000000358688

Revision Date: 19.01.2018

Date of printing : 14.11.2018

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : None known.

10.5 Incompatible materials

Materials to avoid : not known

10.6 Hazardous decomposition products

When handled and stored appropriately, no dangerous decomposition products are known

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Product:

Acute oral toxicity : Remarks: no data available

Acute inhalation toxicity : Remarks: no data available

Acute dermal toxicity : Remarks: no data available

Skin corrosion/irritation

Product:

Remarks: no data available

Serious eye damage/eye irritation

Product:

Remarks: no data available

Respiratory or skin sensitisation

Product:

14.6. Special precautions for user

See sections 6 to 8 of this Safety Data Sheet.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code (International Bulk Chemicals Code)

No transport as bulk according IBC - Code.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other regulations:

Apart from the data/regulations specified in this chapter, no further information is available concerning safety, health and environmental protection.

Take note of Dir 94/33/EC on the protection of young people at work.

15.2 Chemical safety assessment

No Chemical Safety Assessment (CSA) is yet available for the substance, or for the component substances, contained in this product.

SECTION 16: Other information

Full text of H-Statements

EUH031	: Contact with acids liberates toxic gas.
H290	: May be corrosive to metals.
H302	: Harmful if swallowed.
H314	: Causes severe skin burns and eye damage.
H315	: Causes skin irritation.
H319	: Causes serious eye irritation.
H335	: May cause respiratory irritation.

Full text of other abbreviations

Acute Tox.	: Acute toxicity
Eye Dam./Irrit.	: Serious eye damage/eye irritation
Met. Corr.	: Corrosive to metals
Skin Corr.	: Skin corrosion
STOT SE	: Specific target organ toxicity - single exposure

Clariant makes no warranties, express or implied, as to the information's accuracy, adequacy, sufficiency or freedom from defect and assumes no liability in connection with any use of this information. Any user of this product is responsible for determining the suitability of Clariant's products for its particular application. Nothing included in this information waives any of Clariant's General Terms and Conditions of Sale, which control unless it agrees otherwise in writing. Any existing intellectual/industrial property rights must be observed. Due to possible changes in our products and applicable national and international regulations and laws, the status of our products could change. Material Safety Data Sheets providing safety precautions, that should be observed when handling or storing Clariant products, are available upon request and are provided in compliance with applicable law. You should obtain and review the applicable Material Safety Data Sheet information before handling any of these products. For additional information, please contact Clariant.

SAFETY DATA SHEET

Version

3.01

PETROSWEET HSW85790

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name : PETROSWEET HSW85790
Product code : HSW85790
Product type : Liquid. [Clear.]

1.2 Relevant identified uses of the substance or mixture and uses advised against

Recommended use : Hydrogen Sulphide Scavenger

1.3 Details of the supplier of the safety data sheet

Baker Hughes
Kirkby Bank Road,
Knowsley Industrial Park,
Liverpool,
L33 7SY, UK

Tel: +44 (0)151 545 3899

Fax: +44 (0)151 547 3590

e-mail address of person responsible for this SDS : paul.chapman2@bakerhughes.com

1.4 Emergency telephone number

Supplier

Telephone number : CHEMTREC Emergency Telephone within UK: 0870 820 0418
CHEMTREC Emergency Telephone outside UK: +44 870 820 0418

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315
Eye Irrit. 2, H319
Skin Sens. 1, H317
Muta. 2, H341
STOT SE 3, H335

2.2 Label elements

Regulation (EC) No. 1272/2008 [CLP]

Hazard pictograms :

GHS08 GHS07

Signal word : Warning

PETROSWEET HSW85790

SECTION 2: Hazards identification

Hazard statements	: Causes serious eye irritation. Causes skin irritation. May cause an allergic skin reaction. Suspected of causing genetic defects. May cause respiratory irritation.
<u>Precautionary statements</u>	
Prevention	: Obtain special instructions before use. Wear protective gloves: > 8 hours (breakthrough time): nitrile Gloves. Wear eye or face protection: Recommended: Safety glasses.. Wear protective clothing.
Response	: IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.
Storage	: Store locked up.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Supplemental label elements	: Not applicable.
Hazardous ingredients	: glyoxal
Precautionary statements (Code)	: P201, P280, P304 + P340 + P312, P405, P501
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.

2.3 Other hazards

Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII	Not applicable. P: Not available. B: Not available. T: Not available.
Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	Not applicable. vP: Not available. vB: Not available.
Other hazards which do not result in classification	: None known.

SECTION 3: Composition/information on ingredients

3.2 Mixtures : Mixture

Product/ingredient name	Identifiers	% by weight	<u>Classification</u> Regulation (EC) No. 1272/2008 [CLP]	Type
glyoxal	REACH #: 01-2119461733-37 EC: 203-474-9 CAS: 107-22-2 Index: 605-016-00-7	≥25 - <50	Acute Tox. 4, H332 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Muta. 2, H341 STOT SE 3, H335	[1]
ethanediol	REACH #: 01-2119456816-28 EC: 203-473-3	≥1 - <3	Acute Tox. 4, H302 STOT RE 2, H373	[1] [2]

PETROSWEET HSW85790

SECTION 3: Composition/information on ingredients

Alcohols, C8-10, ethoxylated	CAS: 107-21-1 Index: 603-027-00-1	≥1 - <3	Acute Tox. 4, H302 Eye Dam. 1, H318 See Section 16 for the full text of the H statements declared above.	[1]
	CAS: 71060-57-6			

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

- Eye contact** : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention. Continue to rinse for at least 15 minutes. Chemical burns must be treated promptly by a physician.
- Inhalation** : Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 15 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
- Ingestion** : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : May cause respiratory irritation.
- Skin contact** : Causes skin irritation. May cause an allergic skin reaction.
- Ingestion** : Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following: pain or irritation watering redness
- Inhalation** : Adverse symptoms may include the following: respiratory tract irritation coughing
- Skin contact** : Adverse symptoms may include the following: irritation redness
- Ingestion** : No specific data.

PETROSWEET HSW85790

SECTION 4: First aid measures

4.3 Indication of any immediate medical attention and special treatment needed

- Notes to medical doctor** : No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : Not available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

- Suitable** : If necessary Use dry chemical, CO₂, alcohol-resistant foam or water spray (fog). Use water spray for extinction.
- Not suitable** : None known.

5.2 Special hazards arising from the substance or mixture

- Special exposure hazards** : In a fire or if heated, a pressure increase will occur and the container may burst. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide

5.3 Advice for fire-fighters

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment.
- Additional information** : Not available.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

- 6.2 Environmental precautions** : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and material for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
- 6.4 Reference to other sections** : Note: see section 8 for personal protective equipment and section 13 for waste disposal.

PETROSWEET HSW85790

SECTION 7: Handling and storage

7.1 Precautions for safe handling

: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Storage

: Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Recommended Packaging materials

: Use original container.

7.3 Specific end use(s)

: Hydrogen Sulphide Scavenger

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
ethanediol	EH40/2005 WELs (United Kingdom (UK), 12/2011). Absorbed through skin. TWA: 10 mg/m ³ 8 hours. Form: Particulate STEL: 104 mg/m ³ 15 minutes. Form: Vapour TWA: 52 mg/m ³ 8 hours. Form: Vapour STEL: 40 ppm 15 minutes. Form: Vapour TWA: 20 ppm 8 hours. Form: Vapour

Recommended monitoring procedures

: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

DNELs/DMELs

Product/ingredient name	Type	Exposure	Value	Population	Effects
glyoxal	DNEL	Long term Dermal	48 mg/kg bw/day	Workers	Systemic
	DNEL	Long term Inhalation	16.9 mg/m ³	Workers	Systemic
ethanediol	DNEL	Long term Dermal	106 mg/kg bw/day	Workers	Systemic
	DNEL	Long term Inhalation	35 mg/m ³	Workers	Local

PNECs

PETROSWEET HSW85790

SECTION 8: Exposure controls/personal protection

Product/ingredient name	Compartment Detail	Value	Method Detail
glyoxal	Fresh water	0.319 mg/l	-
	Marine water	0.0319 mg/l	-
	Fresh water sediment	0.685 mg/kg	-
	Marine water sediment	0.0685 mg/kg	-
	Soil	4.06 mg/kg	-
	Sewage Treatment Plant	4.1 mg/l	-
ethanediol	Fresh water	10 mg/l	-
	Marine	1 mg/l	-
	Fresh water sediment	20.9 mg/kg	-
	Soil	1.53 mg/kg	-
	Sewage Treatment Plant	199.5 mg/l	-

8.2 Exposure controls

Occupational exposure controls : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Respiratory protection** : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Recommended: half-face mask and organic vapour (Type A) and particulate filter
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Wear suitable gloves tested to EN374.
Chemical-resistant gloves: nitrile Gloves
- Eye protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommended: Safety glasses.
- Skin protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

PETROSWEET HSW85790

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	: Liquid. [Clear.]
Colour	: Yellow. [Light]
Odour	: Odourless.
Odour threshold	: Not available.
pH	: 7.1
Initial boiling point and boiling range	: Not available.
Melting point/freezing point	: -15°C (5°F)
Flammability (solid, gas)	: May be combustible at high temperature.
Flash point	: Closed cup: >62°C (>143.6°F) [PMCC]
Explosive properties	: Not available.
Upper/lower flammability or explosive limits	: Not available.
Oxidising properties	: Not available.
Vapour pressure	: Not available.
Density	: Not available.
Relative density	: 1.241 to 1.311 (16°C)
Solubility	: Easily soluble in the following materials: cold water and hot water.
Partition coefficient: n-octanol/water	: Not available.
Viscosity	: Kinematic (40°C): <6 cSt
Vapour density	: Not available.
Evaporation rate (butyl acetate = 1)	: Not available.
Decomposition temperature	: Not available.
Auto-ignition temperature	: Not available.

9.2 Other information

Pour point	: Not available.
------------	------------------

SECTION 10: Stability and reactivity

10.1 Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	: The product is stable.
10.3 Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	: No specific data.
10.5 Incompatible materials	: No specific data.
10.6 Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

PETROSWEET HSW85790

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
ethanediol	LC50 Inhalation Vapour	Rat	>2.5 mg/l	6 hours
	LD50 Dermal	Mouse	>3500 mg/kg	-
Alcohols, C8-10, ethoxylated	LD50 Oral	Rat	2700 mg/kg	-

Conclusion/Summary : Not available.

Acute toxicity estimates

Route	ATE value
Oral	13247.9 mg/kg
Inhalation (vapours)	28.21 mg/l

Irritation/Corrosion

Conclusion/Summary : Not available.

Conclusion/Summary : Not available.

Mutagenicity

Conclusion/Summary : Not available.

Carcinogenicity

Conclusion/Summary : Not available.

Reproductive toxicity

Conclusion/Summary : Not available.

Teratogenicity

Conclusion/Summary : Not available.

Specific target organ toxicity (single exposure)

Product/ingredient name	Category	Route of exposure	Target organs
glyoxal	Category 3	Not applicable.	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Product/ingredient name	Category	Route of exposure	Target organs
ethanediol	Category 2	Not determined	Not determined

Aspiration hazard

Not available.

Information on the likely routes of exposure : Not available.

Potential acute health effects

Inhalation : May cause respiratory irritation.

Ingestion : Irritating to mouth, throat and stomach.

Skin contact : Causes skin irritation. May cause an allergic skin reaction.

Eye contact : Causes serious eye irritation.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation : Adverse symptoms may include the following: respiratory tract irritation coughing

Ingestion : No specific data.

Skin contact : Adverse symptoms may include the following: irritation redness

Eye contact : Adverse symptoms may include the following: pain or irritation watering redness

Delayed and immediate effects and also chronic effects from short and long term exposure

PETROSWEET HSW85790

SECTION 11: Toxicological information

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

Conclusion/Summary : Not available.

General : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : Suspected of causing genetic defects.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Interactive effects : Not available.

Other information : Not available.

SECTION 12: Ecological information

12.1 Toxicity : No known significant effects or critical hazards.

Product/ingredient name	Result	Species	Exposure
glyoxal	Acute EC50 66480 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
ethanediol	Acute LC50 215000 µg/l Fresh water	Fish - Pimephales promelas	96 hours
	Acute EC50 6500 to 13000 mg/l Fresh water	Algae	72 hours
	Acute EC50 >100 mg/l Fresh water	Daphnia	48 hours
	Acute LC50 72860 mg/l Fresh water	Fish	96 hours

Conclusion/Summary : Not available.

12.2 Persistence and degradability

Conclusion/Summary : Not available.

Product/ingredient name	Aquatic half-life	Photolysis	
ethanediol	-	-	Readily

12.3 Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
glyoxal	-1.62	3.2	low
ethanediol	-1.36	-	low

12.4 Mobility in soil : Not available.

12.5 Results of PBT and vPvB assessment

PBT : Not applicable.
P: Not available. B: Not available. T: Not available.

vPvB : Not applicable.
vP: Not available. vB: Not available.

12.6 Other adverse effects : No known significant effects or critical hazards.

PETROSWEET HSW85790

SECTION 12: Ecological information

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Hazardous waste : The classification of the product may meet the criteria for a hazardous waste.

Packaging

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

13.2 Additional information

Special precautions : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

International transport regulations

Regulatory information	14.1 UN number	14.2 Proper shipping name	14.3 Transport hazard class(es)	14.4 PG*	Label
ADR/RID Class	Not regulated.		-	-	
ADN Class	Not regulated.		-	-	
IMDG Class	Not regulated.		-	-	
IATA Class	Not regulated.		-	-	

PG* : Packing group

Regulatory information	14.5 Environmental hazards	Additional information
ADR/RID Class	No.	-
ADN Class	No.	-
IMDG Class	No.	-
IATA Class	No.	-

PETROSWEET HSW85790

SECTION 14: Transport information

14.6 Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code : Not available.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles : Not applicable.

Other EU regulations

Europe inventory : Not determined.

Black List Chemicals (76/464/EEC) : Not listed

Priority List Chemicals (793/93/EEC) : Not listed

Seveso Directive

This product is not controlled under the Seveso Directive.

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Inform Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

15.2 Chemical Safety Assessment : This product contains substances for which Chemical Safety Assessments are still required.

Additional information : Shelf life: 6 months

PETROSWEET HSW85790

SECTION 16: Other information

16.1 Revision comments : Not available.

Indicates information that has changed from previously issued version.

16.2 Abbreviations and acronyms : ATE = Acute Toxicity Estimate
CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]
DNEL = Derived No Effect Level
EUH statement = CLP-specific Hazard statement
PNEC = Predicted No Effect Concentration
RRN = REACH Registration Number

16.3 Key literature references and sources for data : Not available.

16.4 Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315
Eye Irrit. 2, H319
Skin Sens. 1, H317
Muta. 2, H341
STOT SE 3, H335

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Classification	Justification
Skin Irrit. 2, H315	Calculation method
Eye Irrit. 2, H319	Calculation method
Skin Sens. 1, H317	Calculation method
Muta. 2, H341	Calculation method
STOT SE 3, H335	Calculation method

16.5 Full text of abbreviated H statements : H302 Harmful if swallowed.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H318 Causes serious eye damage.
H319 Causes serious eye irritation.
H332 Harmful if inhaled.
H335 May cause respiratory irritation.
H341 Suspected of causing genetic defects.
H373 May cause damage to organs through prolonged or repeated exposure.

Full text of classifications [CLP/GHS] : Acute Tox. 4, H302 ACUTE TOXICITY (oral) - Category 4
Acute Tox. 4, H332 ACUTE TOXICITY (inhalation) - Category 4

SECTION 16: Other information

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.

Safety Data Sheet California CARB Compliant

1 - Identification

Product Name: WD-40 Multi-Use Product Aerosol

Product Use: Lubricant, Penetrant, Drives Out Moisture, Removes and Protects Surfaces From Corrosion

Restrictions on Use: None identified

SDS Date Of Preparation: August 2, 2021

Manufacturer: WD-40 Company

Address: 9715 Businesspark Avenue
San Diego, California, USA
92131

Telephone:

Emergency: 1-888-324-7596

Information: 1-888-324-7596

Chemical Spills: 1-800-424-9300 (Chemtrec)
1-703-527-3887 (International Calls)

2 – Hazards Identification

Hazcom 2012/GHS Classification:

Flammable Aerosol Category 1

Gas Under Pressure: Compressed Gas

Aspiration Toxicity Category 1

Specific Target Organ Toxicity Single Exposure Category 3 (nervous system effects)

Note: This product is a consumer product and is labeled in accordance with the US Consumer Product Safety Commission regulations which take precedence over OSHA Hazard Communication labeling. The actual container label will not include the label elements below. The labeling below applies to industrial/professional products.

Label Elements:

DANGER!

Extremely Flammable Aerosol.

Contains gas under pressure; may explode if heated.

May be fatal if swallowed and enters airways.

May cause drowsiness or dizziness.

Prevention

Keep away from heat, sparks, open flames, hot surfaces. – No smoking.

Do not spray on an open flame or other ignition source.

Pressurized container: Do not pierce or burn, even after use.

Avoid breathing vapors or mists.

Use only outdoors or in a well-ventilated area.

Response

IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.

Storage

Store locked up.

Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Store in a well-ventilated place.

Disposal

Dispose of contents and container in accordance with local and national regulations.

3 - Composition/Information on Ingredients

Ingredient	CAS #	Weight Percent	US Hazcom 2012/ GHS Classification
LVP Aliphatic Hydrocarbon	64742-47-8	45-50%	Aspiration Toxicity Category 1
Petroleum Base Oil	64742-56-9 64742-65-0 64742-53-6 64742-54-7 64742-71-8	<35%	Not Hazardous
Aliphatic Hydrocarbon	64742-47-8	<25%	Flammable Liquid Category 3 Aspiration Toxicity Category 1 Specific Target Organ Toxicity Single Exposure Category 3 (nervous system effects)
Carbon Dioxide	124-38-9	2-3%	Simple Asphyxiant Gas Under Pressure, Compressed Gas

Note: The specific chemical identity and exact percentages are a trade secret.

4 – First Aid Measures

Ingestion (Swallowed): Aspiration Hazard. DO NOT induce vomiting. Call physician, poison control center or the WD-40 Safety Hotline at 1-888-324-7596 immediately.

Eye Contact: Flush thoroughly with water. Remove contact lenses if present after the first 5 minutes and continue flushing for several more minutes. Get medical attention if irritation persists.

Skin Contact: Wash with soap and water. If irritation develops and persists, get medical attention.

Inhalation (Breathing): If irritation is experienced, move to fresh air. Get medical attention if irritation or other symptoms develop and persist.

Signs and Symptoms of Exposure: Harmful or fatal if swallowed. Aspiration of liquid into the lungs during swallowing or vomiting may cause lung damage. May cause eye and respiratory irritation. Inhalation of mists or vapors may cause drowsiness, dizziness and other nervous system effects. Skin contact may cause drying of the skin.

Indication of Immediate Medical Attention/Special Treatment Needed: Immediate medical attention is needed for ingestion.

5 – Fire Fighting Measures

Suitable (and unsuitable) Extinguishing Media: Use water fog, dry chemical, carbon dioxide or foam. Do not use water jet or flooding amounts of water. Burning product will float on the surface and spread fire.

Specific Hazards Arising from the Chemical: Extremely flammable aerosol. Contents under pressure. Keep away from ignition sources and open flames. Exposure of containers to extreme heat and flames can cause them to rupture often with violent force. Vapors are heavier than air and may travel along surfaces to remote ignition sources and flash back. Combustion will produce oxides of carbon and hydrocarbons.

Special Protective Equipment and Precautions for Fire-Fighters: Firefighters should always wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire-exposed containers with water. Use shielding to protect against bursting containers.

6 – Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures: Wear appropriate protective clothing (see Section 8). Eliminate all sources of ignition and ventilate area.

Methods and Materials for Containment/Cleanup: Leaking cans should be placed in a plastic bag or open pail until the pressure has dissipated. Contain and collect liquid with an inert absorbent and place in a container for disposal. Clean spill area thoroughly. Report spills to authorities as required.

7 – Handling and Storage

Precautions for Safe Handling: Avoid contact with eyes. Avoid prolonged contact with skin. Avoid breathing vapors or aerosols. Use only with adequate ventilation. Keep away from heat, sparks, pilot lights, hot surfaces and open flames. Unplug electrical tools, motors and appliances before spraying or bringing the can near any source of electricity. Electricity can burn a hole in the can and cause contents to burst into flames. To avoid serious burn injury, do not let the can touch battery terminals, electrical connections on motors or appliances or any other source of electricity. Wash thoroughly with soap and water after handling. Keep containers closed when not in use. Keep out of the reach of children. Do not puncture, crush or incinerate containers, even when empty.

Conditions for Safe Storage: Store in a cool, well-ventilated area, away from incompatible materials. Do not store above 120°F or in direct sunlight. U.F.C (NFPA 30B) Level 3 Aerosol. Store away from oxidizers.

8 – Exposure Controls/Personal Protection

Chemical	Occupational Exposure Limits
LVP Aliphatic Hydrocarbon	1200 mg/m ³ TWA (manufacturer recommended)
Petroleum Base Oil	5 mg/m ³ TWA (Inhalable) ACGIH TLV (as Mineral oil) 5 mg/m ³ TWA OSHA PEL (as Oil mist, mineral)
Aliphatic Hydrocarbon	1200 mg/m ³ TWA (manufacturer recommended)
Carbon Dioxide	5000 ppm TWA, 30,000 ppm STEL ACGIH TLV 5000 ppm TWA OSHA PEL

The Following Controls are Recommended for Normal Consumer Use of this Product

Appropriate Engineering Controls: Use in a well-ventilated area.

Personal Protection:

Eye Protection: Avoid eye contact. Always spray away from your face.

Skin Protection: Avoid prolonged skin contact. Chemical resistant gloves recommended for operations where skin contact is likely.

Respiratory Protection: None needed for normal use with adequate ventilation.

For Bulk Processing or Workplace Use the Following Controls are Recommended

Appropriate Engineering Controls: Use adequate general and local exhaust ventilation to maintain exposure levels below that occupational exposure limits.

Personal Protection:

Eye Protection: Safety goggles recommended where eye contact is possible.

Skin Protection: Wear chemical resistant gloves.

Respiratory Protection: None required if ventilation is adequate. If the occupational exposure limits are exceeded, wear a NIOSH approved respirator. Respirator selection and use should be based on contaminant type, form and concentration. Follow OSHA 1910.134, ANSI Z88.2 and good Industrial Hygiene practice.

Work/Hygiene Practices: Wash with soap and water after handling.

9 – Physical and Chemical Properties

Appearance:	Light green to amber liquid	Flammable Limits: (Solvent Portion)	LEL: 0.6% UEL: 8%
Odor:	Mild petroleum odor	Vapor Pressure:	95-115 PSI @ 70°F
Odor Threshold:	Not established	Vapor Density:	Greater than 1 (air=1)
pH:	Not Applicable	Relative Density:	0.8 – 0.82 @ 60°F
Melting/Freezing Point:	Not established	Solubilities:	Insoluble in water
Boiling Point/Range:	361 - 369°F (183 - 187°C)	Partition Coefficient; n-octanol/water:	Not established
Flash Point:	138°F (59°C) Tag Closed Cup (liquid)	Autoignition Temperature:	Not established
Evaporation Rate:	Not established	Decomposition Temperature:	Not established
Flammability (solid, gas):	Flammable Aerosol	Viscosity:	2.79-2.96 cSt @ 100°F
VOC:	24.1%	Pour Point:	-63°C (-81.4°F) ASTM

	MIR=0.43gO3/gVOC		D-97
--	------------------	--	------

10 – Stability and Reactivity

Reactivity: Not reactive under normal conditions

Chemical Stability: Stable

Possibility of Hazardous Reactions: May react with strong oxidizers generating heat.

Conditions to Avoid: Avoid heat, sparks, flames and other sources of ignition. Do not puncture or incinerate containers.

Incompatible Materials: Strong oxidizing agents.

Hazardous Decomposition Products: Carbon monoxide and carbon dioxide.

11 – Toxicological Information

Symptoms of Overexposure:

Inhalation: High concentrations may cause nasal and respiratory irritation and central nervous system effects such as headache, dizziness and nausea. Intentional abuse may be harmful or fatal.

Skin Contact: Prolonged and/or repeated contact may produce mild irritation and defatting with possible dermatitis.

Eye Contact: Contact may be irritating to eyes. May cause redness and tearing.

Ingestion: This product has low oral toxicity. Swallowing may cause gastrointestinal irritation, nausea, vomiting and diarrhea. This product is an aspiration hazard. If swallowed, can enter the lungs and may cause chemical pneumonitis, severe lung damage and death.

Chronic Effects: None expected.

Carcinogen Status: None of the components are listed as a carcinogen or suspect carcinogen by IARC, NTP, ACGIH or OSHA.

Reproductive Toxicity: None of the components is considered a reproductive hazard.

Numerical Measures of Toxicity:

Acute Toxicity Estimates: Oral > 5,000 mg/kg; Dermal >2,000 mg/kg based on an assessment of the ingredients. This product is not classified as toxic by established criteria. It is an aspiration hazard.

12 – Ecological Information

Ecotoxicity: No specific aquatic toxicity data is currently available; however components of this product are not expected to be harmful to aquatic organisms

Persistence and Degradability: Components are readily biodegradable.

Bioaccumulative Potential: Bioaccumulation is not expected based on an assessment of the ingredients.

Mobility in Soil: No data available

Other Adverse Effects: None known

13 - Disposal Considerations

If this product becomes a waste, it would be expected to meet the criteria of a RCRA ignitable hazardous waste (D001). However, it is the responsibility of the generator to determine at the time of disposal the proper classification and method of disposal. Do not puncture or incinerate containers, even empty. Dispose in accordance with federal, state, and local regulations.

14 – Transportation Information

DOT Surface Shipping Description: UN1950, Aerosols, 2.1 Ltd. Qty

(Note: Shipping Papers are not required for Limited Quantities unless transported by air or vessel – each package must be marked with the Limited Quantity Mark)

IMDG Shipping Description: UN1950, Aerosols, 2.1, LTD QTY

ICAO Shipping Description: UN1950, Aerosols, flammable, 2.1

NOTE: WD-40 Company does not test aerosol cans to assure that they meet the pressure and other requirements for transport by air. We do not recommend that our aerosol products be transported by air.

15 – Regulatory Information

U.S. Federal Regulations:

CERCLA 103 Reportable Quantity: This product is not subject to CERCLA reporting requirements, however, oil spills are reportable to the National Response Center under the Clean Water Act and many states have more stringent release reporting requirements. Report spills required under federal, state and local regulations.

SARA TITLE III:

Hazard Category For Section 311/312: Refer to Section 2 for the OSHA Hazard Classification.

Section 313 Toxic Chemicals: This product contains the following chemicals subject to SARA Title III Section 313 Reporting requirements: None

Section 302 Extremely Hazardous Substances (TPQ): None

EPA Toxic Substances Control Act (TSCA) Status: All of the components of this product are listed on the TSCA inventory.

California Safe Drinking Water and Toxic Enforcement Act (Proposition 65): This product does not require a California Proposition 65 warning.

VOC Regulations: This product complies with the consumer product VOC limits of CARB, the US EPA and states adopting the OTC VOC rules.

Canadian Environmental Protection Act: All of the ingredients are listed on the Canadian Domestic Substances List or exempt from notification

16 – Other Information

HMIS Hazard Rating:

Health – 1 (slight hazard), Fire Hazard – 4 (severe hazard), Physical Hazard – 0 (minimal hazard)

2.2 Elemente pentru etichetă

Etichetare (Regulamentul (CE) Nr. 1272/2008)

Pictograme de pericol :

Cuvânt de avertizare : Pericol

Fraze de pericol : H226 Lichid și vapori inflamabili.
H304 Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H315 Provoacă iritarea pielii.
H332 Nociv în caz de inhalare.
H351 Susceptibil de a provoca cancer.
H373 Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
H411 Toxic pentru viața acvatică având efecte de lungă durată.

Fraze de precauție : **Prevenire:**
P210 A se păstra departe de surse de căldură, suprafețe fierbinți, scântei, flăcări și alte surse de aprindere. Fumatul interzis.
P260 Nu inspirați ceața/vaporii/spray-ul.
P273 Evitați dispersarea în mediu.
P280 Purați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/ echipament de protecție a feței.
Intervenție:
P301 + P310 ÎN CAZ DE ÎNGHIȚIRE: sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.
P331 NU provocați vomă.
Eliminare:
P501 Eliminați conținutul/recipientele conform prevederilor legale în vigoare

2.3 Alte pericole

Note : Pericol ridicat de alunecare ca urmare a deversării accidentale a produsului.
Nu sunt cunoscute pericole suplimentare generate de produs pentru oameni și mediu.
Conform informațiilor de până acum, nu conține compusi care îndeplinesc criteriile de PBT sau vPvB.

SECȚIUNEA 4. MĂSURI DE PRIM AJUTOR

4.1 Descrierea măsurilor de prim ajutor

Indicații generale	:	Din cauza materialelor vărsate, suprafața devine alunecoasă. Înainte de a încerca să salvați victimele, izolați zona de toate sursele potențiale de aprindere, incluzând deconectarea alimentării cu energie electrică. Asigurați o ventilație suficientă și verificați dacă este prezentă o atmosferă sigură și respirabilă înainte de intrarea în spații închise. Este necesară protecția proprie a persoanelor care acordă măsurile de prim ajutor.
Inhalare	:	După inhalarea accidentală a vaporilor, persoana (persoanele) afectată (afectate) trebuie transportată (transportate) la aer curat. A se solicita asistență medicală de urgență. Dacă victima este înconștientă și nu respiră: asigurați-vă că nu există obstrucții ale respirației și dispuneți administrarea respirației artificiale de către personal instruit. Dacă este necesar, aplicați masaj cardiac extern și cereți sfatul medicului. Dacă victima este înconștientă și respiră: așezați-o în poziția de recuperare. Administrați oxigen dacă este necesar. În cazul unor simptome persistente este necesară consultarea medicului.
Contact cu pielea	:	După contactul cu pielea se spală bine zona cu apă și săpun. Dacă a fost expus întreg corpul, persoana trebuie spalată în întregime, mai ales părul acesteia. Îndepărtați îmbrăcămintea contaminată, încălțăminte contaminată și eliminați-le în siguranță. Se acopera zonele corpului afectate cu haine curate și care nu adera la aceste zone. Cereți sfatul medicului dacă apar și persistă iritații, umflături sau înroșire a pielii. Atunci când utilizați echipamente de înaltă presiune, se poate produce injectarea produsului. Dacă se produc leziuni la presiuni mari, solicitați imediat asistență medicală profesionistă. Nu așteptați să apară simptomele. În caz de arsuri termice minore: răciți zona afectată. Țineți zona arsă sub un jet de apă rece timp de cel puțin cinci minute sau până când durerea scade în intensitate. În orice caz, hipotermia trebuie să fie evitată.
Contact cu ochii	:	După contactul cu ochii clătiți timp de 10-15 minute, ținând pleoapele deschise cu jet de apă sau cu soluție din recipientul pentru spălarea ochilor. Îndepărtați lentilele de contact, dacă sunt prezente și sunt ușor de scos. Continuați clătirea. În cazul unor simptome de durată, este necesară consultarea unui oftalmolog.
Ingerare, Absorbție substanță în plămâni	:	În caz de ingerare, presupuneți întotdeauna că a avut loc aspirația. Victima trebuie trimisă imediat la spital. Nu așteptați să apară simptomele. Nu induceți vomă deoarece există un risc ridicat de aspirație. Nu administrați nimic pe gură unei persoane înconștiente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

4.2 Cele mai importante simptome și efecte, atât acute cât și întârziate

Simptome	: Grețuri, vărsături și diaree, precum și pericolul unei pneumonite de origine chimică din cauza aspirației pe parcursul înghițirii sau al vomei. Vaporii produsului în concentrație ridicată pot conduce la apariția unor iritații ale ochilor și ale mucoaselor (nas, gât). După inhalarea pe termen lung a vaporilor concentrați este posibilă apariția durerilor de cap, a amețelilor, a stărilor euforice, de nervozitate, a tremurului, a spasmelor tonico-clonice, pierderea cunoștinței, insuficiența circulatorie și paralizia centrală a sistemului respirator. Concentrații foarte ridicate pot provoca pierderea cunoștinței chiar și după perioade foarte scurte de expunere. Simptome la contactul cu pielea: înroșire, iritație. Simptome la contactul cu ochii: iritație ușoară (nespecifică).
Efecte	: În caz de aspirație, există riscul de apariție a pneumonitei chimice.

4.3 Indicații privind orice fel de asistență medicală imediată și tratamente speciale necesare

Tratament	: Tratament simptomatic. Dacă este necesar, solicitați spitalizarea persoanei. După înghițirea unor cantități mai mari de 1-2 ml/kg greutate corporală este necesară administrarea de cărbune activ (aproximativ 50 g) și spitalizarea persoanei. În cazul unei stări puternice de agitație, este necesară sedarea persoanei (la indicația medicului).
-----------	--

SECȚIUNEA 5. MĂSURI DE COMBATERE A INCENDIILOR

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare	: Pentru focarele mici de incendiu: pulbere uscată de stingere, Spumă (numai personal special instruit); Ceață de apă (numai personal special instruit); bioxid de carbon (CO ₂); Alte gaze inerte (în conformitate cu reglementările); Nisip sau pământ. În cazul unui focar de incendiu extins: spumă sau apa pulverizată.
Mijloace de stingere necorespunzătoare	: Jet direct/compact de apă; (poate cauza extinderea focarului de ardere prin stropire); Se va evita utilizarea simultană de spumă și apă pe aceeași suprafață deoarece apa distruge spuma.

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Pericol specific din cauza substanței sau amestecului, din cauza produselor de combustie sau din cauza gazelor generate prin ardere.	: Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Această substanță plutește și se poate reaprinde la suprafața apei. A se feri de sursele de aprindere. Este permisă numai utilizarea sculelor, dispozitivelor și echipamentelor care nu produc scântei sau realizate în construcție antiexplozivă și rezistente la solvenți. Trebuie avuți în vedere potențialii produși de combustie, cum ar fi CO, SO _x sau NO _x . Combustia incompletă poate genera un amestec complex de particule solide și lichide aeropurtate și gaze, inclusiv monoxid de carbon și compuși organici și anorganici neidentificați.
--	--

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

5.3 Recomandări destinate pompierilor

Echipament special de protecție	:	În cazul unui incendiu de proporții sau în spațiile închise și insuficient aerisite, purtați îmbrăcăminte de protecție ignifugă completă și un aparat de respirat autonom (SCBA) cu o mască pentru întreaga față acționat în modul de presiune pozitivă.
Informații suplimentare	:	Răcirea imediată a recipientelor și a ambalajelor din apropiere cu apă pulverizată, și, dacă este posibil, îndepărtarea acestora din zona de pericol. Reziduurile de ardere și apa contaminată utilizată la stingerea incendiilor trebuie eliminate conform prevederilor impuse de autoritățile locale. Asigurați o rezervă de apă pentru stingere.

SECȚIUNEA 6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Precauții pentru personal	:	Se acționează din aceeași direcție cu direcția vântului (atenție la schimbarea direcției vântului). Alertați personalul de urgență. Dacă se poate efectua în siguranță, opriți sau izolați scurgerea la sursă. Îndepărtați toate sursele de foc din apropiere. Identificarea, marcarea și limitarea accesului în zona cu pericol de explozie. Nu este permis accesul persoanelor neautorizate. Exceptând deversările de mică amploare: Fezabilitatea oricăror acțiuni trebuie întotdeauna evaluată și avizată, dacă este posibil, de o persoană competentă instruită responsabilă cu gestionarea situației de urgență. În cazul unei emisii de ampolare, alertați locuitorii aflați în direcția de bătaie a vântului. Dacă este necesar, notificați autoritățile competente în conformitate cu toate reglementările în vigoare. Personalul de prim-ajutor trebuie să poarte echipament individual de protecție. Aerisirea corespunzătoare a încăperilor contaminate. Evitați contactului cu pielea. Deversări de mică amploare: hainele de lucru antistatice normale sunt, de obicei, suficiente. Deversări de ampolare: costum pentru întregul corp din material antistatic și rezistent la substanțe chimice; Mănuși de lucru care asigură rezistență adecvată la substanțe chimice, în special la hidrocarburi aromatice. Notă: mănușile din PVA (alcool polivinilic) nu sunt impermeabile și nu sunt potrivite pentru utilizare în caz de urgență. Cască de lucru. Pantofi sau cizme de siguranță antistatice nederapante. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii. Protecție respiratorie: Se poate utiliza mască, pentru protecția parțială sau totală a feței, cu filtru pentru vapori organici sau un aparat de respirat autonom (SCBA), în funcție de ampolarea deversării și de nivelul estimat de expunere. Dacă situația nu poate fi evaluată complet sau dacă este posibilă lipsa oxigenului, trebuie utilizate doar aparate SCBA. A se evita contactul direct cu materialul degajat. Evitați formarea de scântei. În zona de pericol, este recomandată oprirea utilajelor, echipamentelor și a autovehiculelor care nu sunt realizate în construcție antiexplozivă. Fumatul este interzis. Nu este permisă acționarea întrerupătoarelor și pornirea echipamentelor electrice care pot conduce la formarea de scântei. Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

6.2 Precauții pentru mediul înconjurător

Precauții pentru mediul înconjurător	:	Se va opri scurgerea produsului în condiții de siguranță. Prevenirea scurgerii în canalizări, cursuri de apă, subsoluri sau spații închise prin realizarea unor diguri de nisip și/sau pământ sau prin alte măsuri adecvate de stopare scurgere (bariere plutitoare, skimming sau alte tehnici de ordin mecanic). Materialul absorbant contaminat poate să prezinte același grad de pericolozitate ca și produsul scurs. Deversarea în mediu trebuie evitată. Dacă produsul deversat a poluat mediul (a ajuns în canalizări, cursuri de apă, sol sau aer) este necesară informarea autorităților relevante.
---	---	---

6.3 Metode și materiale pentru izolarea incendiilor și pentru curățenie

Procedee adecvate pentru curățare sau absorbție sau izolare	:	Aspirarea /evacuarea prin pompare a cantităților mari. Colectarea cantităților reziduale cu materiale absorbante neinflamabile, de exemplu nisip, pământ sau liant pentru ulei, respectiv îndiguirea acestora. Deversările de ampolare pot fi acoperite atent cu spumă, dacă este disponibilă, pentru a limita formarea norilor de vaporii. Nu utilizați jeturi directe. Observație: pe măsură ce crește cantitatea de substanță absorbită în liant, crește viteza de evaporare și, prin aceasta, pericolul de incendiu. În caz de contaminare a solului, îndepărtați solul contaminat și tratați în conformitate cu reglementările locale. În cazul deversărilor de mică ampolare în ape închise (cum ar fi porturile), izolați produsul cu bariere plutitoare sau alte echipamente. Colectați produsul vărsat cu materiale absorbante plutitoare adecvate/specifice. Deversările mari în ape deschise trebuie izolate cu bariere plutitoare sau alte mijloace mecanice. Dacă acest lucru nu este posibil, controlați propagarea și colectați produsul prin separare mecanică (skimming) sau alte mijloace mecanice. Utilizarea agenților de dispersie trebuie avizată de un expert și, dacă este necesar, aprobată de autoritățile locale. Colectați produsul recuperat și alte materiale în rezervoare sau containere adecvate în vederea revalorificării sau eliminării în siguranță. Colectarea deșeurilor în containere etichetate adecvat pentru deșeurile periculoase și eliminarea ulterioară conform normelor și legislației în vigoare.
Procedee neadecvate pentru curățare sau absorbție sau izolare	:	Fără date disponibile

6.4 Trimitere la alte secțiuni

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

6.5 Informații suplimentare

Adoptați măsuri corespunzătoare condițiilor și reglementărilor locale.

Motorina Standard

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

SECȚIUNEA 7. MANIPULARE ȘI DEPOZITARE

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări pentru manipularea în condiții de securitate	:	Procurați instrucțiuni speciale înainte de utilizare. Se va utiliza numai în sistem închis. Aspirarea vaporilor la locul de emisie. În cazul în care este disponibil, pentru evacuarea în aer liber a gazelor de ardere și a aerului uzat se va folosi un separator, respectiv epurator de aer. Dacă este posibil, se va face aerisirea încăperii la nivelul solului. Evitarea contactului cu pielea, cu ochii și cu îmbrăcămintea. A nu se ingera. Nu este permisă inhalarea vaporilor. Evitați scurgerea produsului. A se utiliza și depozita doar în exterior sau într-un spațiu bine aerisit. Utilizați echipamentul de protecție individuală conform cerințelor. Pentru mai multe informații despre echipamentele de protecție și condițiile de operare, a se vedea scenariile de expunere.
Recomandări de prevenire a incendiului și a exploziei	:	Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. Aveți grijă la acumularea în puțuri și spațiile închise. A nu se utiliza aer comprimat pentru operațiuni de umplere, descărcare sau manipulare. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Adoptați măsuri împotriva încărcării electrostatice. Legați la centura de împământare toate echipamentele de lucru. A se feri de sursele de aprindere. Utilizarea de echipamente / armături protejate împotriva exploziilor și a unor instrumente care nu produc scântei. Fumatul interzis. Asigurați-vă că toate reglementările relevante privind facilitățile de manipulare și depozitare a produselor inflamabile sunt respectate.

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Cerințe pentru spațiile de depozitare și containere	<p>: Dispunerea zonei de depozitare, construcția rezervoarelor, echipamentele și procedurile de operare trebuie să respecte legislația europeană, națională sau locală relevantă.</p> <p>Instalațiile de depozitare trebuie proiectate cu împrejurimi adecvate pentru a preveni poluarea solului și apelor în caz de scurgeri sau deversări.</p> <p>Recipientele vor fi păstrate închise etanș și într-un loc bine ventilat.</p> <p>Este permisă numai utilizarea unor recipiente staționare autorizate.</p> <p>Toate rezervoarele și echipamentele se vor lega la centura de împământare.</p> <p>Depozitați într-un spațiu corespunzător.</p> <p>De regulă este necesară existența unui spațiu de depozitare etanșat și rezistent.</p> <p>Curățarea, inspectarea și întreținerea structurii interne a rezervoarelor de depozitare trebuie efectuate doar de personal calificat și echipat corespunzător, conform prevederilor din reglementările naționale, locale sau ale companiei.</p> <p>Înainte de intrarea în rezervoarele de stocare sau a începerii unor lucrări în spații închise, trebuie efectuată proba de gaze (prezența hidrocarburilor, conținutul de oxigen) respectiv testată prezența atmosferei explozive.</p> <p>Materialele recomandate pentru containere sau căptușelile containerelor includ oțel moale, oțel inoxidabil.</p> <p>Materiale nepotrivite: Anumite materiale sintetice pot fi nepotrivite pentru containere sau căptușeala containerelor, în funcție de specificațiile și utilizarea materialului.</p> <p>Compatibilitatea trebuie verificată împreună cu producătorul.</p> <p>Dacă produsul se livrează în containere:</p> <p>Păstrați produsul numai în ambalajul (recipientul) original.</p> <p>Etichetați containerele în mod corespunzător.</p> <p>A se proteja de lumina solară.</p> <p>Vapori de hidrocarburi ușoare se pot acumula în spațiile libere ale containerelor.</p> <p>Aceștia pot cauza pericole de inflamabilitate/explozie.</p> <p>Containerelor golite pot conține reziduuri inflamabile ale produsului.</p> <p>Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.</p>
Informații suplimentare asupra condițiilor de depozitare	<p>: Evitarea efectului termic.</p> <p>A se feri de sursele de aprindere.</p>

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri de protecție în cazul depozitării în comun	: A nu se depozita împreună cu: substanțe periculoase explozive, gaze, alte substanțe periculoase explozive, substanțe solide periculoase inflamabile, substanțe periculoase piroforice sau care se autoîncălesc, substanțe periculoase care, în contact cu apa, degajă gaze inflamabile, substanțe periculoase puternic oxidante, azotat de amoniu și produse care conțin azotat de amoniu, peroxizi organici și substanțe periculoase auto-reactive, substanțe periculoase necombustibile încadrate în categoriile de toxicitate acută 1 și 2 / foarte toxice, substanțe infecțioase, substanțe radioactive, Restricții la depozitarea împreună cu: substanțe periculoase oxidante, substanțe periculoase necombustibile, cu toxicitate acută cat. 3 / toxice sau cu efecte cronice, solide combustibile, alte substanțe combustibile și necombustibile, Ca urmare a normelor specifice de depozitare și din cauza caracteristicilor speciale ale substanțelor/amestecurilor dintr-un depozit, în urma evaluării riscurilor, pot rezulta și alte limitări (restricții).
--	---

7.3 Utilizare finală specifică (utilizări finale specifice)

Instrucțiuni legate de utilizări specifice	: Se va utiliza numai în scopurile relevante menționate în Secțiunea 1.2. Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

PNEC pentru produs

Substanța component principal al produsului este un complex de hidrocarburi cu structură variabilă sau necunoscută. Metodele tradiționale pentru determinarea PNEC nu sunt aplicabile, nefiind astfel posibilă determinarea unei singure valori PNEC reprezentative pentru astfel de substanțe.

8.2 Controale ale expunerii

Se va utiliza numai în scopurile relevante menționate în Secțiunea 1.2., Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Măsuri generale de protecție

Măsuri de igienă	:	Asigurați-vă că sunt instituite măsuri de administrare adecvate. Evitarea contactului cu ochii, cu pielea și cu îmbrăcămintea. Hainele contaminate cu produs trebuie schimbate imediat și curățate înainte de reutilizare.
------------------	---	--

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Echipament personal de protecție

Protecție respiratorie	:	Când se produc vapori: utilizați protecție respiratorie cu filtru A pentru gaz, culoare caracteristică maro (A1 până la 0,1 vol%, A2 până la 0,5 vol%, A3 până la 1 vol%). În cazul unor concentrații ridicate și în situația în care nu există informații suficiente, se va utiliza numai aparat pentru protecția respirației autonom (izolant).
Protecția mâinilor	:	<p>În practică, durata de utilizare a mănușilor recomandate pentru protecția împotriva substanțelor chimice poate fi mai redusă decât timpul de penetrare determinat conform normelor EN 374 din cauza numărului mare de factori de influență (de exemplu temperatură, sarcină mecanică). În cazul unui posibil contact cu mâinile, a se purta mănuși de protecție rezistente împotriva pătrunderii lichidelor.</p> <p>Material: Nitril; Timpul de penetrare: 480 min Grosimea materialului: 0,40 mm Metodă de verificare: EN 374</p> <p>Material: Viton; Timpul de penetrare: 480 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Butil; Timpul de penetrare: 120 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Policloropren; Timpul de penetrare: 60 min Grosimea materialului: 0,60 mm Metodă de verificare: EN 374</p>
Protecția ochilor / feței	:	Ochelari de protecție cu ecrane laterale. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii.
Protecția corpului	:	Utilizarea, în toate cazurile, de îmbrăcăminte rezistentă la foc și antistatică pe termen lung. Cască de lucru. Pantofi sau cizme de siguranță antistatice nederapante. Dacă este necesar, termorezistente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Controlul expunerii mediului

Controlul expunerii mediului	:	Se va utiliza pe cât posibil aparatură închisă. Dacă există risc de expunere, trebuie asigurată extracția/ventilația adecvată. Respectarea valorilor limită cu privire la emisii, dacă este cazul, asigurând o ventilație cu evacuare a aerului (dacă este necesar). A se vedea și Secțiunea 6 " Măsuri de luat în caz de dispersie accidentală ".
------------------------------	---	--

8.3 Informații suplimentare

În situația concretă de utilizare, ca urmare a evaluării individuale de pericol poate fi necesară utilizarea de echipamente diferite de protecție a persoanei.

SECȚIUNEA 9. PROPRIETĂȚI FIZICE ȘI CHIMICE

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect	:	lichid
Stare de agregare	:	lichid
Culoare	:	ușor gălbui
Miros	:	specific de produs petrolier
Prag de acceptare a mirosului	:	miros clar perceptibil

Vâscozitate cinematică	2,0 - 4,5 mm ² /s la 40 °C	EN ISO 3104	
Vâscozitate dinamică			Nedeterminat
Proprietăți explozive		Derivație din structura chimică	nu este exploziv
Proprietăți oxidante		Derivație din structura chimică	neoxidant

9.2 Alte informații

nu există date

SECȚIUNEA 10. STABILITATE SI REACTIVITATE

10.1 Reactivitate

Stabil chimic în condiții normale de depozitare și manipulare, cu respectarea prevederilor din Secțiunea 7.

10.2 Stabilitate chimică

Stabil chimic în condiții normale de depozitare și manipulare, cu respectarea prevederilor din Secțiunea 7.

10.3 Posibilitatea de reacții periculoase

Reacții potențial periculoase : Amestecurile de vapori / aer care prezintă pericol de explozie pot fi prezente, chiar și în recipiente goale, necurățate.
Dacă este puternic încălzit: Pericol de ardere spontană
Reacții cu substanțele oxidante.

10.4 Condiții de evitat

Condiții de evitat : A se feri de surse de căldură, flacără deschisă și alte surse similare de foc.

10.5 Materiale incompatibile

Materiale de evitat : acizi tari și agenți oxidanți;

10.6 Produși de descompunere periculoși

Produși de descompunere periculoși : Nedeterminat

vapori invizibili, mai grei decât aerul

SECȚIUNEA 11. INFORMAȚII TOXICOLOGICE

11.1 Informații privind efectele toxicologice

Toxicitate acută

Efect oral acut	:	LD50 șobolan Metodă: OECD 420 Substanță de test: 68334-30-5 Doză: aprox. 7.600 mg/kg g.c.
Efect acut la inhalare	:	LC50 șobolan Doză: 3,6 mg/l / 4 o Metodă: OECD 403 Substanță de test: 68334-30-5
Efect acut cutanat	:	LD50 iepure Doză: > 5 ml/kg gc Metodă: OECD 434 Substanță de test: 68334-30-5 (aprox. >4.300 mg/kg g.c./zi)
Alte efecte acute	:	nu există date
Alte efecte	:	nicio informație

Corodarea/iritarea pielii

Iritația pielii	:	iepure Rezultat: Iritant pentru piele Metodă: OECD 404 Substanță de test: 68334-30-5
-----------------	---	---

Lezarea gravă/iritarea ochilor

Iritația ochilor	:	iepure Rezultat: nu este iritant Metodă: OECD 405 Substanță de test: 68334-30-5 posibilă iritație temporară
------------------	---	---

Sensibilizarea căilor respiratorii sau a pielii

sensibilizare	:	Metodă: OECD 406 Substanță de test: 68334-30-5 Nu există informații cu privire la posibile efecte de sensibilizare
---------------	---	--

Mutagenitatea celulelor germinative

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Genotoxicitate în vitro	: testul Ames Rezultat: negativ cu activare metabolica Metodă: Test Ames modificat conform ASTM E 1687 Substanță de test: 68334-30-5
Genotoxicitate în vivo	: Încercare micronucleară (clastogenicitate) Substanță de test: 68476-30-2 Metodă: OECD 475 Rezultat: negativ
	: Test de aberatie cromozomiala Substanță de test: 64741-44-2 Metodă: OECD 475 Rezultat: negativ
Evaluare toxicologică / Mutagenitatea celulelor germinative	: Pe baza datelor disponibile, nu este clasificat ca mutagen.

Cancerogenitatea

Efect cancerigen	: Substanță de test: 10 distilate medii Metodă: Nedeterminat Studii privind efectele cancerigene la șoareci dermic Rezultat: pozitiv LOAEL Doză: 25 mg/kg/gc/zi cronic șoarece
Evaluare toxicologică / Cancerogenitatea	: Clasificat în conformitate cu Regulamentul CLP (CE) a UE nr. 1272/2008 la categoria 2 H351

Toxicitate pentru reproducere

Toxicitate pentru reproducere/fertilitate	: Mod de aplicare: orală; șobolan Substanță de test: distilate, grele, C18-50 - ramificate, ciclice și liniare Metodă: US EPA Ghidul de testare a efectelor asupra sănătății OPPTS 870.3800 și OECD 416 NOAEL (F1); Doză: 1000 mg/kg gc/zi
Toxicitate pentru dezvoltare/teratogenicitate	: Mod de aplicare: piele; șobolan Substanță de test: 64741-49-7 Metodă: OECD 414 NOAEL Doză: 125 mg/kg/zi (toxicitate maternală/la dezvoltare)
Evaluare toxicologică / Toxicitate pentru dezvoltare/teratogenicitate Toxicitate pentru reproducere/fertilitate	: În baza datelor disponibile, nu este clasificat ca fiind toxic pentru dezvoltare sau teratogenic.

Toxicitate asupra unui organ țintă specific - expunere unică

Toxicitate asupra unui organ țintă specific - expunere unică	:	Rute de expunere: nu există date
--	---	----------------------------------

Toxicitate asupra unui organ țintă specific - expunere repetată

Efecte în cazul expunerii repetate sau de lungă durată	:	Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
--	---	---

Pericol prin aspirare

Toxicitate prin aspirare	:	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
--------------------------	---	---

Efecte neurologice

Efecte neurologice	:	nu există date
Efecte narcotice	:	Concentrațiile ridicate pot avea efecte narcotice.

Evaluare toxicologică /

Toxicitate la doză repetată	:	NOEL dermic; Doză: 0,5 ml/kg (sistemic); 0,0001 ml/kg (local); Metodă: OECD 410
	:	NOAEC (inhalare) doză: >1,71 mg/l/90d (sistemic); 0,88 mg/l/90 d (local); metodă: OECD 413; substanță de test: cel mai probabil 68334-30-6

11.2 Informații suplimentare

Datele de mai sus sunt pentru componentul principal, CAS-Nr. 68334-30-5
(dacă nu se menționează altfel)

SECȚIUNEA 12. INFORMAȚII ECOLOGICE

12.1 Toxicitatea

Toxicitate acută

Toxicitate acută la pești	:	LL50 Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 65 mg/l Durată de expunere: 96 o Metodă: OECD 203
---------------------------	---	---

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

		NOEL Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 10 mg/l Durată de expunere: 96 o Metodă: OECD 203
Toxicitate acută în cazul nevertebratelor acvatic	:	NOEL Specii: Daphnia magna (Purici de apă mari) Doză: 46 mg/l Durată de expunere: 48 o Metodă: OECD 202
Toxicitatea pentru alge și plantele acvatic	:	ErL50 Specii: Pseudokirchneriella subcapitata Doză: 22 mg/l Durată de expunere: 72 o Metodă: OECD 201
Toxicitate la microorganisme	:	NOEL Specii: Tetrahymena pyriformis Doză: 3.217 mg/l Durată de expunere: 40 o Substanță de test: motorină de vid, motorina hidrocracată si combustibili distilati Metodă: QSAR
		EL50 Specii: Tetrahymena pyriformis Doză: > 1.000 mg/l Durată de expunere: 40 o Substanță de test: motorină de vid, motorina hidrocracată si combustibili distilati Metodă: QSAR
Toxicitate pentru organismele edafice	:	nu există date
Toxicitate în cazul plantelor terestre	:	nu există date
Toxicitate asupra altor organisme terestre (care nu sunt mamifere)	:	nu există date

Toxicitate cronică

Toxicitate pentru pești (Toxicitate cronică)	:	NOEL Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 0,083 mg/l Durată de expunere: 14 z Substanță de test: motorină de vid, motorina hidrocracată si combustibili distilati Metodă: QSAR
---	---	---

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Toxicitate la daphnia și alte nevertebrate acvatic. (Toxicitate cronică)	:	NOEL Specii: Daphnia magna Doză: 0,2 mg/l Durată de expunere: 21 z Substanță de test: motorină de vid, motorina hidrocracată și combustibili distilați Metodă: (Q)SAR
Acvatică acută	:	EL50: >1000 mg/l/ 40h; NOEL: 3,217 mg/l, nu există criterii de clasificare pentru toxicitate acvatică acută
Acvatică cronică	:	Toxic pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic
Date de toxicitate în sol	:	nu există date
Alte organisme relevante din punct de vedere al mediului	:	nu există date

12.2 Persistență și degradabilitate

Persistență, Biodegradare	:	Greu biodegradabil.
----------------------------------	---	---------------------

12.3 Potențial de bioacumulare

Bioacumulare	:	Nu sunt disponibile date relevante. Potențial de bioacumulare (Coeficient de partiție (n-octanol/apă)): nu există date
---------------------	---	---

12.4 Mobilitate în sol

Mobilitate	:	Note: Nu lăsați produsul să fie eliberat necontrolat în mediu.
Transport între diferite medii	:	nu există date
Capacitate de eliminare fizico-chimică	:	Acest produs este insolubil în apă și plutește la suprafața acesteia. Poate fi separat mecanic, în stații de tratare a apelor uzate.

12.5 Rezultate ale evaluării PBT și vPvB

Rezultate ale evaluării PBT și vPvB	:	Conform informațiilor de până acum, nu conține compusi care îndeplinesc criteriile de PBT sau vPvB.
--	---	---

12.6 Alte efecte adverse

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Efecte asupra stațiilor de epurare	:	nicio informație
Alte efecte adverse	:	Nu evacuați produsul în sistemul de canalizare, cursuri de apă și pe sol. În caz de accident, contactați echipele speciale de intervenție și anunțați autoritățile locale competente.

12.7 Alte informații

Alte informații	:	Datele de mai sus sunt pentru componentul principal, CAS-Nr. 68334-30-5 (dacă nu se menționează altfel)
-----------------	---	---

SECȚIUNEA 13. CONSIDERAȚII PRIVIND ELIMINAREA

13.1 Metode de tratare a deșeurilor

Instrucțiuni privind eliminarea deșeurilor de produs	:	Reziduurile de produs vor fi eliminate conform prevederilor legale.
Instrucțiuni privind eliminarea deșeurilor de ambalaj	:	În măsura în care produsul a fost livrat în ambalaj, de preferat, ambalajele goale vor fi refolosite sau, dacă nu există această posibilitate, vor fi transportate la un punct de valorificare / eliminare finală a deșeurilor periculoase. Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.
Codul deșeurilor conform Catalogului european al deșeurilor în cazul utilizării conform Secțiunii 1:		
Cod deșeu de produs	:	13 07 01* ulei combustibil și combustibil diesel
Cod deșeu de ambalaj	:	15 01 10* ambalaje care conțin reziduuri de substanțe periculoase sau sunt contaminate cu substanțe periculoase

13.2 Informații suplimentare

Codul de deșeu depinde de originea deșeurilor și, în situații individuale, poate diferi de informațiile de mai sus.

Legislația privind eliminarea deșeurilor de produs:

Legea nr 211/2011 privind regimul deșeurilor, cu modificările și completările ulterioare;

HG 235/2007 privind gestionarea uleiurilor uzate;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 349/2005 privind depozitarea deșeurilor, cu modificările și completările ulterioare;

HG 856/2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase, cu modificările și completările ulterioare;

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

Legislația pentru deșeurile de ambalaje:

Ordinul nr. 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje;

Legea nr. 249/2015 privind modalitatea de gestionare a ambalajelor și deșeurilor de ambalaje, cu modificările și completările ulterioare.

Informații suplimentare

La cerere, producătorul vă oferă informații suplimentare referitoare la clasificarea produsului pentru transport.

SECȚIUNEA 15. INFORMAȚII DE REGLEMENTARE

15.1 Regulamente/legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispoziții comunitare privind protecția sănătății și a mediului

Directiva 2010/75/UE privind emisiile industriale (prevenirea și controlul integrat al poluării) - Capitolul V - Dispoziții speciale aplicabile instalațiilor și activităților care utilizează solvenți organici.	:	Produsul nu face obiectul directivei COV dacă se utilizează în scopurile prevăzute (vezi secțiunea 1.2).
Regulamentul (CE) nr. 1907/2006, Anexa XVII	:	nr. 3 - Substanțe sau amestecuri lichide considerate periculoase conform definițiilor din Directiva 67/548/CEE și Directiva 1999/45/CE;
Directiva 2012/18/UE a Parlamentului European și a Consiliului din 4 iulie 2012 privind controlul pericolelor de accidente majore care implică substanțe periculoase, de modificare și ulterior de abrogare a Directivei 96/82/CE a Consiliului (SEVESO III).	:	Anexă I, Partea 1: P5c LICHIDE INFLAMABILE E2 Periculoase pentru mediul acvatic în categoria cronic 2. Anexa I Partea 2: 34. Produse petroliere și carburanți alternativi. (c) distilate de petrol, exclusiv fracția grea (inclusiv motorină, combustibil gazos pentru încălzirea locuințelor și amestecurile).
Directiva 92/85/CEE a Consiliului din 19 octombrie 1992 privind introducerea de măsuri pentru promovarea îmbunătățirii securității și a sănătății la locul de muncă în cazul lucrătoarelor gravide, care au născut de curând sau care alăptează [a zecea directivă specială în sensul articolului 16 alineatul (1) din Directiva 89/391/CEE]	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Directiva 94/33/CE a Consiliului din 22 iunie 1994 privind protecția tinerilor la locul de muncă	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.
---	---	---

Alte reglementări:

Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivei 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006, cu modificările și completările ulterioare.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase, cu modificările și completările ulterioare;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă, cu modificările și completările ulterioare;

Regulamentul (CE) nr.1907/2006 privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), cu modificările și completările ulterioare.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006

Legea 319/2006 privind Securitatea și sănătatea în muncă, cu modificările și completările ulterioare;

HG 1218/2006 privind stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici, cu modificările și completările ulterioare;

OUG 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) 1.907/2006, cu modificările și completările ulterioare.

Legea nr.59/2016 privind controlul asupra pericolelor de accident major în care sunt implicate substanțe periculoase.

OUG 96/2003 privind protecția maternității la locul de muncă, cu modificările și completările ulterioare.

HG 600/2007 privind protecția tinerilor la locul de muncă, cu modificările și completările ulterioare

Hotărârea nr. 893/2006 pentru modificarea Hotărârii Guvernului nr. 1.593/2002 privind aprobarea Planului național de pregătire, răspuns și cooperare în caz de poluare marină cu hidrocarburi.

15.2 Evaluarea securității chimice

S-a efectuat evaluarea privind siguranța chimică pentru componenta principală, în cadrul procesului de înregistrare REACH. S-a confirmat faptul, că în caz de controlare a componentei principale ca substanță primară se poate asigura controlul corespunzător și pentru celelalte componente ale amestecului. În consecință, în Anexă sunt listate scenariile de expunere elaborate pentru componenta principală. CAS-NR.: 68334-30-5

SECȚIUNEA 16. ALTE INFORMAȚII

Textul integral al frazelor de pericol H menționate la Secțiunile 2 și 3

Acute Tox.	Toxicitate acută
Aquatic Chronic	Toxicitate acvatică cronică
Asp. Tox.	Pericol de aspirare
Carc.	Carcinogenicitate
Flam. Liq.	Lichide inflamabile
Skin Irrit.	Corodarea/Iritarea pielii
STOT RE	Toxicitate asupra unui organ țintă specific - expunere repetată

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

STOT SE	Toxicitate asupra unui organ țintă specific - o singură expunere
H225	Lichid și vapori foarte inflamabili.
H226	Lichid și vapori inflamabili.
H301	Toxic în caz de înghițire.
H304	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H311	Toxic în contact cu pielea.
H315	Provoacă iritarea pielii.
H331	Toxic în caz de inhalare.
H332	Nociv în caz de inhalare.
H351	Susceptibil de a provoca cancer.
H370	Provoacă leziuni ale organelor (nerv optic (nervus opticus), sistem nervos central).
H373	Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
H411	Toxic pentru viața acvatică având efecte de lungă durată.

Anexă

Scenariile de expunere pentru cele mai frecvente utilizari sunt enumerate mai jos. Dacă este necesar, se pot furniza la cerere și alte scenarii de expunere.

1. Titlu scurt al Scenariului de expunere: 01a - Distribuția substanței/materialului

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC4: Producție chimică în cadrul căreia există posibilitatea de expunere PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC9: Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire) PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC4: Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC5: Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol ERC6a: Utilizarea unui intermediar ERC6b: Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC6c: Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC6d: Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoriea Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESERC 1.1b.v1
Procese, sarcini, activități acoperite	: Încărcarea în vrac (incluzând încărcarea în nave maritime/barje, vagoane de cale ferată/autocisterne și containere intermediare de transport în vrac) și reambalarea (incluzând canistre și recipiente mici) a substanței/materialului, inclusiv eșantionarea, depozitarea, descărcarea și activitățile de laborator asociate. Nu include emisiile din timpul transportului.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

- ERC4, Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC5, Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol
ERC6a, Utilizarea unui intermediar
ERC6b, Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC6c, Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC6d, Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

- Tonaj pentru utilizare regională : 31 10E6 t/an
Tonaj anual la amplasament (tone/an) : 61.000
Tonaj zilnic maxim la amplasament (kg/zi) : 200.000
Frațiune de tonaj UE utilizată în regiune : 0,1
Frațiune din tonajul regional utilizat la nivel local: : 0,002
Note : Substanța este un produs UVCB complex. Preponderent hidrofoba.
MSafe (tonaj maxim permis la amplasament) : 670.000 kg/zi
Note : Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

- Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

- Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

- Factor de emisie sau de eliberare/degajare: : 0,1 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apa reziduală.

Condiții tehnice și măsuri / măsuri organizaționale

- Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 90,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de eliminare: 83,3 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de toxicitatea secundară a elementului apă dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 94,9 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2 : Producție chimică sau de rafinare în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3 : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC4 : Producție chimică în cadrul căreia există posibilitatea de expunere
- PROC8a : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC9 : Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire)
- PROC15 : Utilizare ca reactiv de laborator

Caracteristici produs

Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).

Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor

Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa

Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Frecvența și durata folosirii

Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează
altfel)

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitățile. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate alte măsuri specifice.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Manipulați substanța în cadrul unui sistem închis.

CS503 Încărcare și descărcare deschisă în vrac

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Manipulați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Nu au fost identificate alte măsuri specifice.

CS503 Încărcare și descărcare deschisă în vrac

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Purtați mănuși corespunzătoare testate conform EN374.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS503 Încărcare și descărcare deschisă în vrac

Purtați mănuși corespunzătoare testate conform EN374.

CS6 Umplere a canistrelor și a recipientelor mici

Purtați mănuși corespunzătoare testate conform EN374.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acesteia

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,024

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,2

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 02 - Formularea & (re)ambalarea substanțelor/materialelor și amestecurilor

Stadiul ciclului de viață	: F: Formulare sau reambalare
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC4: Producție chimică în cadrul căreia există posibilitatea de expunere PROC5: Amestecare sau combinare în procese discontinue PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC9: Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire) PROC14: Tabletare, comprimare, extrudare, peletizare, granulare PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC2: Formulare în amestec
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVO SpERC 2.2.v1
Procese, sarcini, activități acoperite	: Formularea, ambalarea și reambalarea substanței și a amestecurilor acesteia în loturi sau prin operațiuni continue, inclusiv depozitarea, transferurile de materiale, amestecarea, tabletarea, comprimarea, peletizarea, extrudarea, ambalarea la scară mare și mică, întreținerea, eșantionarea și activitățile de laborator asociate.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC2, Formulare în amestec

Cantitatea folosită

Tonaj pentru utilizare regională	: 30 10E6 t/an
Tonaj anual la amplasament (tone/an)	: 30.000
Tonaj zilnic maxim la amplasament (kg/zi)	: 100.000
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,001
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoab.
MSafe (tonaj maxim permis la amplasament)	: 100.000 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Frecvența și durata folosirii

Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 1,00 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,02 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,01 %
Sol
Note : Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apa reziduală. Frație degajată din proces în aer (după măsuri tipice de management al riscurilor la amplasament în conformitate cu cerințele Directivei UE privind emisiile de solvenți)
Factorii de eliberare/degajare în apă și sol se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM)

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%): 96,7 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%): 35,1 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Preveniți descărcarea substanței nedizolvate în sau recuperați-o din apele reziduale de la amplasament. Dacă se evacuează la stația de tratare a apelor menajere uzate, este necesară tratarea suplimentară a apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 96,7 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Metode de valorificare : Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1 : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2 : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3 : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC4 : Producție chimică în cadrul căreia există posibilitatea de expunere
- PROC5 : Amestecare sau combinare în procese discontinue
- PROC8a : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC9 : Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire)
- PROC14 : Tabletare, comprimare, extrudare, peletizare, granulare
- PROC15 : Utilizare ca reactiv de laborator

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor
- Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa
- Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Frecvența și durata folosirii

- Acoperă expunerile zilnice de până la 8 ore : 8 o
- (cu excepția cazului în care se menționează altfel)

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS136 Procese discontinue la temperaturi ridicate

Asigurați ventilație cu extragerea aerului la punctele unde apar emisii.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate măsuri specifice.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate măsuri specifice.

CS14 Transferuri în vrac.

Manipulați substanța în cadrul unui sistem închis.

CS30 Operațiuni de amestecare (sisteme deschise).

Asigurați ventilație cu extragerea aerului la punctele unde apar emisii.

CS100 Producția sau prepararea articolelor prin tabletare, comprimare, extrudare sau peletizare

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Depozitați substanța în cadrul unui sistem închis.

Motorina Standard

Data revizuirii: 05.03.2018

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

CS136 Procese discontinue la temperaturi ridicate

Nu au fost identificate alte măsuri specifice.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea. Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Purtați mănuși corespunzătoare testate conform EN374.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS14 Transferuri în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS30 Operațiuni de amestecare (sisteme deschise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS100 Producția sau prepararea articolelor prin tabletare, comprimare, extrudare sau peletizare

Purtați mănuși corespunzătoare testate conform EN374.

CS6 Umplere a canistrelor și a recipientelor mici

Purtați mănuși corespunzătoare testate conform EN374.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 12a - Utilizare drept combustibil sau carburant: Industrial

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC16: Utilizarea combustibililor
Categorie de eliberare în mediu	: ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVO SpERC 7.12a.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea ca și / ori în combustibil sau carburant (sau aditivi sau componente de aditivi pentru combustibil sau carburant) și include activități asociate cu transferul, utilizarea, întreținerea echipamentelor și manipularea deșeurilor acestora.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

Tonaj pentru utilizare regională	: 3,7 10E6 t/an
Tonaj anual la amplasament	: 1,5 10E6 t/an
Tonaj zilnic maxim la amplasament (kg/zi)	: 5 10E6
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,4
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoa.
MSafe (tonaj maxim permis la amplasament)	: 5 10E6 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 300 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
---------------------------------------	------

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,500 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 95,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%): 98,7 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%): 74,1 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, este necesară tratarea suplimentară a apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 98,7 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

- PROC2** : Productie chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor
- Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (conditii STP). < 5 hPa
- Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Frecvența și durata folosirii

- Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate alte măsuri specifice.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Manipulați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea. Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS14 Transferuri în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS8 Transferuri în canistre/în loturi

Purtați mănuși corespunzătoare testate conform EN374.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate alte măsuri specifice.

CS507 Activități de realimentare cu combustibil/carburant

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea. Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS14 Transferuri în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS8 Transferuri în canistre/în loturi

Purtați mănuși corespunzătoare testate conform EN374.

CS507 Activități de realimentare cu combustibil/carburant

Purtați mănuși corespunzătoare testate conform EN374.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL) / fără efect derivat (DNEL) atunci când sunt implementate Măsurile de Management al Riscului (RMM)/Condițiile Operaționale (OC) descrise la Secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,024

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,077

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 12c - Utilizare drept combustibil sau carburant - Consumatori

Stadiul ciclului de viață	: C: Utilizare de către consumatori
Domeniu de utilizare	: nu se aplică
Categorie produs	: PC13: Combustibili/carburanți
Categorie de eliberare în mediu	: ERC9a: Utilizare larg răspândită a unui fluid funcțional (la interior) ERC9b: Utilizare larg răspândită a unui fluid funcțional (la exterior)
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOG SpERC 9.12c.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea de către consumatori a combustibililor/carburanților.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC9a, Utilizare larg răspândită a unui fluid funcțional (la interior)

ERC9b, Utilizare larg răspândită a unui fluid funcțional (la exterior)

Caracteristici produs

Cantitatea folosită

Tonaj pentru utilizare regională	: 19 10E6 t/an
Tonaj anual la amplasament (tone/an)	: 9.500
Tonaj zilnic maxim la amplasament (kg/zi)	: 26.000
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,0005
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoa.
MSafe (tonaj maxim permis la amplasament)	: 180.000 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 365 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
Factor de diluare locală în apă de mare	: 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degaare:	: 0,1 %
Aer	
Factor de emisie sau de eliberare/degaare:	: 0,001 %
Apă	

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberare/degajare din proces de utilizare cu dispersie largă. Factorii de eliberare/degajare pentru aer și sol se referă exclusiv la utilizarea regională. Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii consumatorului pentru:

PC13 : Combustibili/carburanți

Caracteristici produs

Concentrația substanței în amestec/articol : Dacă nu este menționat altfel, se referă la concentrații de până la 100%
Formă fizică (în momentul folosirii) : Lichid
Presiune de vapori : Presiune de vapori > 0,1 hPa
Note : Dacă nu se specifică altfel, acoperă cantitățile de utilizare de până la 37500 g [ConsOC2]; acoperă suprafața de contact cu pielea de până la 420 cm2 [ConsOC5]
Dacă nu este menționat altfel, se referă la frecvența de utilizare de până la 0,143 ori/zi (ConsOC4); Se referă la expunerea de până la 2 ore/caz (ConsOC14); Dacă nu este menționat altfel, presupune utilizarea la temperatura ambiantă. Presupune utilizarea într-o cameră de 20 m3. Presupune utilizarea cu ventilație obișnuită.

Alte condiții de exploatare date care afectează expunerea consumatorilor

Activitatea (în aer liber/în spații interioare) : PC13:Carburanți--Lichid - subcategorii adăugate: Alimentare cu carburanți a autovehiculelor
Volum încăpere : 100 m3
Note : Dacă nu este menționat altfel, se referă la concentrații până la 100%. Se referă la utilizarea de până la 52 zile/an. Se referă la utilizarea de până la o dată/zi de utilizare. Se referă la suprafețe de contact cu pielea de până la 210 cm2. Pentru fiecare caz de utilizare, se referă la cantități utilizate de până la 37500 g. Se referă la utilizarea în aer liber. Acoperă utilizarea într-o încăpere cu dimensiunea de 100m3; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,05 ore/caz.
Activitatea (în aer liber/în spații interioare) : PC13:Combustibili--Lichid -: combustibil pentru încălzirea locuințelor
Volum încăpere : 100 m3

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 120 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Se referă la suprafețe de contact cu pielea de până la 210.00 cm ² ., Pentru fiecare caz de utilizare, se referă la cantități utilizate de până la 1500 g., Acoperă utilizarea în condiții de ventilație casnică tipică., Acoperă utilizarea într-o încăpere cu dimensiunea de 20m ³ ; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,03 ore/caz.
Activitatea (în aer liber/în spații interioare)	:	PC13:Carburanți--Lichid - subcategorii adăugate: Echipament pentru grădină - Utilizare
Volum încăpere	:	100 m ³
Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 26 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Pentru fiecare caz de utilizare, se referă la cantități utilizate până la 750 g., Se referă la utilizarea în aer liber., Acoperă utilizarea într-o încăpere cu dimensiunea de 100m ³ ; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 2 ore/caz.
Activitatea (în aer liber/în spații interioare)	:	PC13:Carburanți--Lichid (subcategorii adăugate): Echipament pentru grădină - Alimentare cu carburanți
Volum încăpere	:	34 m ³
Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 26 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Se referă la suprafețe de contact cu pielea de până la 420 cm ² ., Pentru fiecare caz de utilizare, se referă la cantități utilizate până la 750 g., Se referă la utilizarea într-un garaj pentru o singură mașină (34 m ³) cu folosirea ventilației obișnuite., Acoperă utilizarea într-o încăpere cu dimensiunea de 34m ³ ; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,03 ore/caz.

Condiții și măsuri legate de protecția consumatorului (ex. sfaturi de comportament, protecție personală și igienă)

Mod de aplicare	:	PC13:Carburanți--Lichid - subcategorii adăugate: Alimentare cu carburanți a autovehiculelor
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Combustibili--Lichid -: combustibil pentru încălzirea locuințelor
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Carburanți--Lichid - subcategorii adăugate: Echipament pentru grădină - Utilizare
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Carburanți--Lichid (subcategorii adăugate): Echipament pentru grădină - Alimentare cu carburanți
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite

3. Estimarea expunerii și referința la sursa acestora

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru a estima expunerile consumatorilor, în conformitate cu conținutul raportului ECETOC nr. 107 și cu Capitolul R15 din IR&CSA TGD. În situațiile în care determinanții expunerii diferă de aceste surse, atunci aceștia sunt indicați.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL) / fără efect derivat (DNEL) atunci când sunt implementate Măsurile de Management al Riscului (RMM)/Condițiile Operaționale (OC) descrise la Secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului.

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,024

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,088

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

SECȚIUNEA 1. IDENTIFICAREA SUBSTANȚEI/AMESTECULUI ȘI A SOCIETĂȚII/ÎNȚREPRINDERII

1.1 Element de identificare a produsului

Denumire comercială	:	Combustibil naval RMG 380 - max. 0,5% S
---------------------	---	---

1.2 Utilizări relevante identificate ale substanței sau amestecului și utilizări contraindicate

Utilizări relevante identificate

Utilizări relevante	:	Utilizarea la motoare de nave autorizate în acest scop.
Utilizări identificate conform raportului de securitate chimică (CSR)	:	<u>Producere</u> 01-Producerea substanței <u>Formulare sau reambalare</u> 02 Formularea și (re)ambalarea substanțelor și amestecurilor <u>Utilizare în spații industriale</u> 01a - Distribuția substanței 12a - Utilizare drept combustibil sau carburant: Industrial <u>Utilizare larg răspândită de către lucrători profesioniști</u> 12b - Utilizare drept combustibil sau carburant: Profesional

Pentru detalii privind utilizările, a se vedea Anexa

Restricții recomandate privind utilizarea

Utilizări contraindicate	:	Sunt contraindicate utilizările în scop profesional ale substanțelor din categoria combustibilii grei (HFO) în acoperiri, și aplicații rutiere și în construcții. Din motive care țin de protecția sănătății umane, aceste utilizări nu mai sunt susținute în dosarele de înregistrare.
--------------------------	---	---

1.3 Detalii privind furnizorul fișei cu date de securitate

Adresă completă Producător, importator, distribuitor	:	OMV Petrom S.A. Strada Coralilor Nr. 22 Sector 1 013329 București („Petrom City”) Romania
Telefon	:	+40 (0) 725 16 16 16
Adresa de e-mail a persoanei competente	:	info.msds@petrom.com

1.4 Număr de telefon care poate fi apelat în caz de urgență

+40 (0) 725 16 16 16	Linia de urgență / tarif normal / 24/7 / română / engleză
+40 21 318 36 06	Biroul pentru Regulamentul Sanitar Internațional și Informare Toxicologică / tarif normal; L-V; 8:00-15:00; limba română

SECȚIUNEA 2. IDENTIFICAREA PERICOLELOR

2.1 Clasificarea substanței sau a amestecului

Clasificare (Regulamentul (CE) Nr. 1272/2008)

Acute Tox. 4 H332, Carc. 1B H350, Repr. 2 H361d, STOT RE 2 H373, Aquatic Acute 1 H400, Aquatic Chronic 1 H410,
Pentru textul complet al frazelor de pericol H menționate în această Secțiune și metodele de clasificare, consultați Secțiunea 16.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

2.2 Elemente pentru etichetă

Etichetare (Regulamentul (CE) Nr. 1272/2008)

Pictograme de pericol :

Cuvânt de avertizare : Pericol

Fraze de pericol : H350 Poate provoca cancer.
H332 Nociv în caz de inhalare.
H361d Susceptibil de a dăuna fătului
H373 Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.
H410 Foarte toxic pentru viața acvatică având efecte de lungă durată.

Fraze de precauție : **Prevenire:**
P201 Procurați instrucțiuni speciale înainte de utilizare.
P260 Nu inspirați vaporii.
P273 Evitați dispersarea în mediu.
P280 Purați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/ echipament de protecție a feței.
Intervenție:
P308 + P313 ÎN CAZ DE expunere sau de posibilă expunere: consultați medicul.
Eliminare:
P501 Eliminați conținutul/recipientele conform prevederilor legale în vigoare

Etichetare suplimentară:

EUH 066 Expunerea repetată poate provoca uscarea sau crăparea pielii.
Restrictionat la utilizari profesionale din cauza clasificării cancerigen, categoria 1B, cu excepția utilizărilor drept carburant/combustibil.

2.3 Alte pericole

Note : De regulă, produsul este prelucrat în stare încălzită (până la 90 °C).
Produsul este livrat și transportat la temperatura mai mică de 60 °C
Contactul cu acesta poate provoca arsuri.
Pericol ridicat de alunecare ca urmare a deversării accidentale a produsului.
Produsul nu conține constituenți PBT incluși în lista candidaților SVHC în concentrații mai mari de 0,1%.

SECȚIUNEA 3. COMPOZIȚIE/INFORMAȚII PRIVIND COMPONENTII

3.1 Substanțe

Nu se aplică

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

3.2 Amestecuri

Natura chimică	hidrocarburi
----------------	--------------

SECȚIUNEA 4. MĂSURI DE PRIM AJUTOR

4.1 Descrierea măsurilor de prim ajutor

Indicații generale	: Întotdeauna evaluați condițiile de securitate de la fața locului, înainte de a încerca să salvați victimele și a acorda primul ajutor. Este necesară protecția proprie a persoanelor care acordă măsurile de prim ajutor. Întotdeauna solicitați ajutor, înainte de a ajuta victima.
Inhalare	: După inhalarea accidentală a vaporilor, persoana (persoanele) afectată (afectate) trebuie transportată (transportate) la aer curat. Mențineți victima la căldură și în poziție de repaus. Dacă victima este conștientă, așezați-o în poziția de recuperare. (în poziție verticală sau înclinat ușor în față în poziție șezând). Dacă victima este inconștientă și nu respiră: asigurați-vă că nu există obstrucții ale respirației și dispuneți administrarea respirației artificiale de către personal instruit. Dacă este necesar, aplicați masaj cardiac extern și cereți sfatul medicului. Dacă victima este inconștientă și respiră: așezați-o în poziția de recuperare. Administrați oxigen dacă este necesar. Solicitați asistență medicală dacă respirația continuă să fie dificilă. Dacă se suspectează inhalarea de H ₂ S (hidrogen sulfurat): Personalul salvator trebuie să poarte măști de oxigen, centură și frânghie de siguranță și să respecte procedurile de salvare. Transportați victima la aer curat cât mai repede posibil. Inițiați imediat respirația artificială dacă respirația s-a oprit. Poate fi utilă administrarea de oxigen. Solicitați sfatul medicului pentru tratamentul ulterior.
Contact cu pielea	: Îndepărtați îmbrăcămintea contaminată, încălțămintea contaminată și eliminați-le în siguranță. Spălați zona afectată cu apă și săpun. (10 până la 15 minute). Nu utilizați niciodată benzină, kerosen sau alți solvenți pentru spălarea pielii contaminate. Solicitați îngrijire medicală dacă apare iritația, inflamarea sau înroșirea pielii. Atunci când utilizați echipamente de înaltă presiune, se poate produce injectarea produsului. Dacă se produc leziuni la presiuni mari, solicitați imediat asistență medicală profesionistă. Nu așteptați să apară simptomele. În cazul arsurilor termice minore, răcoriți arsura. Țineți zona arsă sub un jet de apă rece timp de cel puțin cinci minute sau până când durerea scade în intensitate. Trebuie evitată hipotermia corpului. Nu aplicați gheață pe arsură. Îndepărtați cu atenție hainele neaderente. NU încercați să îndepărtați porțiuni de îmbrăcăminte lipite de pielea arsă, ci tăiați în jurul acestora. Cereți sfatul medicului în toate cazurile de arsuri grave.
Contact cu ochii	: După contactul cu ochii clătiți timp de 10-15 minute, ținând pleoapele deschise cu jet de apă sau cu soluție din recipientul pentru spălarea ochilor. Îndepărtați lentilele de contact, dacă sunt prezente și sunt ușor de scos. Continuați clătirea. Dacă se produc și persistă iritații, vedere încețoșată sau umflături, solicitați recomandări medicale de la un specialist. Dacă produsul fierbinte este împrăștiat în ochi, acesta trebuie răcit imediat pentru a disipa căldura sub un jet de apă rece. Asigurați imediat un consult și un tratament medical specializat pentru victimă.
Ingerare, Absorbție substanță în plămâni	: Nu induceți vomă. Solicitați asistență medicală. Clătiți gura cu apă dacă persoana este complet conștientă și solicitați imediat asistență medicală. Nu administrați nimic pe gură unei persoane inconștiente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

4.2 Cele mai importante simptome și efecte, atât acute cât și întârziate

Simptome	: Iritarea căilor respiratorii din cauza expunerii excesive la fum, ceață sau expunerea la vapori. Piele uscată, iritație în cazul expunerii repetate sau prelungite. Ușoară iritație oculară (nespecific). Poate cauza arsuri în caz de contact cu produsul la temperaturi înalte. Prin ingestie se preconizează puține simptome sau niciun simptom. În acest caz, s-ar putea produce greață și diaree.
Efecte	: Prin inhalare: iritația nasului și a tractului respirator. În caz de contact cu pielea: poate provoca iritație ușoară. În caz de contact cu ochii: poate provoca iritație reversibilă ușoară.

4.3 Indicații privind orice fel de asistență medicală imediată și tratamente speciale necesare

Tratament	: Dacă este necesar, solicitați spitalizarea persoanei. După înghițirea unor cantități mai mari de 1-2 ml/kg greutate corporală este necesară administrarea de cărbune activ (aproximativ 50 g) și spitalizarea persoanei. În cazul unei stări puternice de agitație, este necesară sedarea persoanei (la indicația medicului).
------------------	---

SECȚIUNEA 5. MĂSURI DE COMBATERE A INCENDIILOR

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare	: Dacă focarul de incendiu este mic: pulbere de stingere, spumă (numai personal special instruit) aeromecanică sau bioxid de carbon. Ceață de apă (numai personal special instruit); Alte gaze inerte (în conformitate cu reglementările); Nisip sau pământ. În cazul unui focar de incendiu extins: spumă
Mijloace de stingere necorespunzătoare	: Nu utilizați jeturi de apă directe pe produsul ce arde; ar putea provoca împrăștierea și răspândirea focului. Se va evita utilizarea simultană de spumă și apă pe aceeași suprafață deoarece apa distruge spuma.

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Pericol specific din cauza substanței sau amestecului, din cauza produselor de combustie sau din cauza gazelor generate prin ardere.	: Această substanță plutește și se poate reaprinde la suprafața apei. Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Combustia incompletă poate genera un amestec complex de particule solide și lichide aeropurtate și gaze, inclusiv monoxid de carbon, H ₂ S, SO _x (oxizi de sulf) sau acid sulfuric și compuși organici și anorganici neidentificați.
---	--

5.3 Recomandări destinate pompierilor

Echipament special de protecție	: În cazul unui incendiu de proporții sau în spațiile închise și insuficient aerisite, purtați îmbrăcăminte de protecție ignifugă și chimică completă și un aparat de respirat autonom (SCBA) cu o mască pentru întreaga față acționat în modul de presiune pozitivă.
--	---

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Informații suplimentare	:	Răcirea imediată a recipientelor și a ambalajelor din apropiere cu apă pulverizată, și, dacă este posibil, îndepărtarea acestora din zona de pericol. Reziduurile de ardere și apa contaminată utilizată la stingerea incendiilor trebuie eliminate conform prevederilor impuse de autoritățile locale.
-------------------------	---	---

SECȚIUNEA 6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Precauții pentru personal	:	<p>Se acționează din aceeași direcție cu direcția vântului (atenție la schimbarea direcției vântului). Identificarea și închiderea zonei de pericol. Atunci când se suspectează sau se demonstrează prezența unor cantități periculoase de H₂S în jurul produsului vărsat, pot fi justificate acțiuni suplimentare sau speciale, inclusiv restricționări ale accesului, utilizarea de echipamente speciale de protecție, proceduri speciale și instruirea personalului. Țineți personalul neimplicat la distanță de zona deversării. Alertați personalul de urgență. Aerisirea corespunzătoare a încăperilor contaminate. Evitați contactul direct cu materialul eliberat. Exceptând deversările de mică amploare: Fezabilitatea oricăror acțiuni trebuie întotdeauna evaluată și avizată, dacă este posibil, de o persoană competentă instruită responsabilă cu gestionarea situației de urgență. În cazul unei emisii de ampolare, alertați locuitorii aflați în direcția de bătaie a vântului. Eliminați toate sursele de aprindere dacă acest lucru prezintă siguranță (de exemplu, electricitate, scântei, incendii, flăcări intermitente). Echipament de protecție individuală pentru situații de urgență. Deversări de mică amploare: hainele de lucru antistatice normale sunt, de obicei, suficiente. Deversări de ampolare: costum pentru întregul corp din material antistatic și rezistent la substanțe chimice. dacă este necesar, termorezistent și izolant termic.</p> <p>Mănuși de lucru care asigură rezistență adecvată la substanțe chimice, în special la hidrocarburi aromatice. Notă: mănușile din PVA (alcool polivinilic) nu sunt impermeabile și nu sunt potrivite pentru utilizare în caz de urgență. Dacă este posibil sau se anticipează contactul cu produsul fierbinte, mănușile trebuie să fie termorezistente și izolate termic.</p> <p>Protecție respiratorie: O mască de protecție obișnuită sau pentru întreaga față cu filtru(e) de compuși organici (și, după caz, de H₂S). se poate utiliza un aparat de respirat autonom (SCBA) în funcție de extinderea deversării și de gradul prognozat de expunere. Dacă situația nu poate fi evaluată complet sau dacă este posibilă lipsa oxigenului, trebuie utilizate doar aparate SCBA. Cască de protecție. Încălțăminte de protecție antistatică nederapantă. Dacă este necesar, termorezistente. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii.</p>
---------------------------	---	---

6.2 Precauții pentru mediul înconjurător

Precauții pentru mediul înconjurător	:	<p>Etanșarea punctului de scurgere. Prevenirea scurgerii în canalizare, în apele de suprafață și în apa din pânza freatică prin realizarea unor diguri din nisip, respectiv pământ sau prin alte măsuri de îndiguire. În cazul unei scurgeri în apele de suprafață, în rețeaua de canalizare sau pe/în sol este necesară informarea autorităților competente. Lăsați produsul fierbinte să se răcească natural. Deversările de ampolare pot fi acoperite atent cu spumă, dacă este disponibilă, pentru a limita riscul de incendiu. Nu utilizați jeturi directe. Asigurați ventilația adecvată în interiorul clădirilor sau în spații închise. Absorbiți produsul vărsat cu materiale necombustibile adecvate.</p>
--------------------------------------	---	--

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

6.3 Metode și materiale pentru izolarea incendiilor și pentru curățenie

Procedee adecvate pentru curățare sau absorbție sau izolare	:	Aspirarea /evacuarea prin pompare a cantităților mari. Colectarea cantităților reziduale cu materiale absorbante neinflamabile, de exemplu nisip, pământ sau liant pentru ulei, respectiv îndiguirea acestora. Colectarea deșeurilor în containere etichetate adecvat pentru deșeuri periculoase și eliminarea ulterioară conform normelor și legislației în vigoare. În caz de contaminare a solului, îndepărtați solul contaminat și tratați în conformitate cu reglementările locale. Utilizarea agenților de dispersie trebuie avizată de un expert și, dacă este necesar, aprobată de autoritățile locale.
Procedee neadecvate pentru curățare sau absorbție sau izolare	:	Fără date disponibile

6.4 Trimitere la alte secțiuni

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

SECȚIUNEA 7. MANIPULARE ȘI DEPOZITARE

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări pentru manipularea în condiții de securitate	:	Procurați instrucțiuni speciale înainte de utilizare. Asigurați-vă că toate reglementările relevante privind facilitățile de manipulare și depozitare a produselor inflamabile sunt respectate. Trebuie efectuată o evaluare specifică a riscurilor de inhalare cauzate de prezența H ₂ S în spațiile libere din rezervoare, spațiile închise, reziduurile de produse, deșeurile din rezervoare și apele reziduale, precum și a diseminărilor accidentale pentru a putea determina măsurile de control potrivite situației locale. Se va utiliza numai în echipamente închise. Aspirarea vaporilor la locul de emisie. În spațiile libere ale rezervoarelor de depozitare a produsului se poate acumula hidrogen sulfurat (H ₂ S), putând atinge concentrații potențial periculoase. Dacă este posibil, se va face aerisirea încăperii la nivelul solului. Evitarea contactului cu pielea, cu ochii și cu îmbrăcămintea. Trebuie luate măsuri de protecție pentru a evita arsurile cutanate în timpul manipulării produsului fierbinte. Utilizați echipamente individuale de protecție adecvate după cum este necesar. Evitați scurgerea produsului. A se utiliza și depozita doar în exterior sau într-un spațiu bine aerisit.
Recomandări de prevenire a incendiului și a exploziei	:	Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. Aveți grijă la acumularea în puțuri și spațiile închise. A nu se inspira aburi/ceață/vapori. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Adoptați măsuri împotriva încărcării electrostatice. Luați măsuri de precauție împotriva electricității statice. Containere, rezervoare și echipamente de transfer/colectare legate la pământ/fixate Legați la centura de împământare toate echipamentele de lucru utilizate. A se feri de sursele de aprindere.

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Cerințe pentru spațiile de depozitare și containere	: Disponerea zonei de depozitare, construcția rezervoarelor, echipamentele și procedurile de operare trebuie să respecte legislația europeană, națională sau locală relevantă. Instalațiile de depozitare trebuie proiectate cu împrejurimi adecvate pentru a preveni poluarea solului și apelor în caz de scurgeri sau deversări. Recipientele vor fi păstrate închise etanș și într-un loc bine ventilat. Este permisă numai utilizarea unor recipiente staționare autorizate. Toate rezervoarele și echipamentele se vor lega la centura de împământare. Depozitați într-un spațiu corespunzător. De regulă este necesară existența unui spațiu de depozitare etanșat și rezistent. Materiale recomandate: Pentru containere sau căptușeala containerelor folosiți oțel cu conținut scăzut de carbon (moale) sau oțel inoxidabil. Materiale nepotrivite: Anumite materiale sintetice pot fi nepotrivite pentru containere sau căptușeala containerelor, în funcție de specificațiile și utilizarea materialului. Compatibilitatea trebuie verificată împreună cu producătorul. Containerele goale pot conține reziduuri de produse combustibile. Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.
Informații suplimentare asupra condițiilor de depozitare	: Evitarea efectului termic. A se feri de sursele de aprindere. Curățarea, inspectarea și întreținerea structurii interne a rezervoarelor de depozitare trebuie efectuate doar de personal calificat și echipat corespunzător, conform prevederilor din reglementările naționale, locale sau ale companiei. În spațiile libere ale rezervoarelor de depozitare a produsului se poate acumula hidrogen sulfurat (H ₂ S), putând atinge concentrații potențial periculoase. Înainte de a pătrunde în rezervoarele de depozitare și de a iniția orice operațiune într-o zonă închisă, verificați conținutul de oxigen, nivelul de hidrogen sulfurat (H ₂ S) și inflamabilitatea din atmosferă.
Măsuri de protecție în cazul depozitării în comun	: A nu se depozita împreună cu substanțe periculoase explozive, gaze, alte substanțe periculoase potențial explozive, substanțe periculoase puternic oxidante, azotat de amoniu și produse care conțin azotat de amoniu, peroxizi organici și substanțe periculoase auto-reactive, substanțe infecțioase sau substanțe radioactive. Restricții la depozitarea împreună cu substanțe periculoase piroforice sau care se autoîncălzesc, substanțe periculoase care degajă gaze inflamabile în contact cu apa sau substanțe periculoase oxidante. Ca urmare a normelor specifice de depozitare și din cauza caracteristicilor speciale ale substanțelor/amestecurilor dintr-un depozit, în urma evaluării riscurilor, pot rezulta și alte limitări (restricții).

7.3 Utilizare finală specifică (utilizări finale specifice)

Instrucțiuni legate de utilizări specifice	: Se va utiliza numai în scopurile prevăzute/relevante. Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

SECȚIUNEA 8. CONTROALE ALE EXPUNERII / PROTECȚIA PERSONALĂ

8.1 Parametri de control

Valoare limită de expunere profesională pentru produs

Nu se cunosc date

Valoare limită de expunere profesională pentru componenți

Componenți: Impuritate

hidrogen sulfurat - Nr. CAS: 7783-06-4 - Nr. EINECS: 231-977-3

Tip	mg/m ³	ppm	Coeficient de depasire	Notă	Sursă
Valoare limită maximă la locul de muncă (8 h)	7	5	-	-	Hotărâre Guvern 1/2012; Directiva 2009/161/UE
Valoare limită maximă la locul de muncă (15 min)	14	10	-	-	Hotărâre Guvern 1/2012; Directiva 2009/161/UE

Valori limită biologice pentru produs

Nu se cunosc date

Valori limită biologice pentru componenți

Nu se cunosc date

DNEL/DMEL pentru produs

Utilizare finală: Muncitor, efecte sistemice la expunere acută
Rute de expunere: inhalare;
Valoare: 4716,8 mg/m³
DNEL, Cel mai sensibil criteriu: Toxicitate acută (inhalare)

Utilizare finală: Muncitor, efecte sistemice, pe termen lung
Rute de expunere: piele;
Valoare: 0,065 mg/kg/zi
DNEL, Cel mai sensibil criteriu: Dezvoltare / Toxicitate teratogenă

Utilizare finală: Muncitor, efecte sistemice la expunere pe termen lung
Rute de expunere: inhalare;
Valoare: 0,18 mg/m³
DNEL, Cel mai sensibil criteriu: Dezvoltare / Toxicitate teratogenă

PNEC pentru produs

apă, ape reziduale, sol, sediment
Nu pot fi atribuite valori unice PNEC, deoarece produsul este un amestec de substanțe UVCB constituite din hidrocarburi.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

8.2 Controale ale expunerii

Se va utiliza numai în scopurile prevăzute/relevante., Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Măsuri generale de protecție

Măsuri de igienă	:	Asigurați-vă că sunt instituite măsuri de administrare adecvate. Evitarea contactului cu ochii, cu pielea și cu îmbrăcămintea. Hainele contaminate cu produs trebuie schimbate imediat și curățate înainte de reutilizare.
-------------------------	---	--

Echipament personal de protecție

Protecție respiratorie	:	Când se produc vapori: utilizați protecție respiratorie cu filtru A pentru gaz, culoare caracteristică maro (A1 până la 0,1 vol%, A2 până la 0,5 vol%, A3 până la 1 vol%). În cazul unor concentrații ridicate și în situația în care nu există informații suficiente, se va utiliza numai aparat pentru protecția respirației autonom (izolant).
Protecția mâinilor	:	<p>În practică, durata de utilizare a mănușilor recomandate pentru protecția împotriva substanțelor chimice poate fi mai redusă decât timpul de penetrare determinat conform normelor EN 374 din cauza numărului mare de factori de influență (de exemplu temperatură, sarcină mecanică). În cazul unui posibil contact cu mâinile, a se purta mănuși de protecție rezistente împotriva pătrunderii lichidelor. Atenție la alegerea mănușilor potrivite când lucrați cu produse, țevi etc., fierbinți!</p> <p>Material: Nitril; Timpul de penetrare: 480 min Grosimea materialului: 0,40 mm Metodă de verificare: EN 374</p> <p>Material: Viton; Timpul de penetrare: 480 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Butil; Timpul de penetrare: 120 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Policloropren; Timpul de penetrare: 60 min Grosimea materialului: 0,60 mm Metodă de verificare: EN 374</p>
Protecția ochilor / feței	:	În cazul în care există pericol de stropire se vor utiliza ochelari cu protecție integrală sau mască de protecție. În caz contrar, ochelari de siguranță cu protecție laterală.
Protecția corpului	:	Utilizarea, în toate cazurile, de îmbrăcăminte rezistentă la foc și antistatică pe termen lung. Cască de protecție. Încălțăminte de protecție antistatică nederapantă.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Controlul expunerii mediului

Controlul expunerii mediului	:	Se va utiliza numai în echipamente închise. Dacă există risc de expunere, trebuie asigurată extracția/ventilația adecvată. Respectarea valorilor limită cu privire la emisii, dacă este cazul, asigurând o ventilație cu evacuare a aerului (dacă este necesar). În cazul unui transport în recipiente care nu prezintă siguranță împotriva fisurării, se recomandă utilizarea de containere exterioare corespunzătoare. A se vedea și Secțiunea 6 "Măsuri de luat în caz de dispersie accidentală".
-------------------------------------	---	--

8.3 Informații suplimentare

În situația concretă de utilizare, ca urmare a evaluării individuale de pericol poate fi necesară utilizarea de echipamente diferite de protecție a persoanei.

SECȚIUNEA 9. PROPRIETĂȚI FIZICE ȘI CHIMICE

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect	:	lichid
Stare de agregare	:	lichid
Culoare	:	maro-negru
Miros	:	tipic
Prag de acceptare a mirosului	:	Miros perceptibil

Caracteristica	Valori	Metodă	Notă
pH			nu se aplică
punct de topire/punct de congelare	$\leq 30\text{ }^{\circ}\text{C}$	ISO 3016	punct de curgere
interval de fierbere			Nedeterminat

Data revizuirii: 30.08.2019

SECȚIUNEA 11. INFORMAȚII TOXICOLOGICE

11.1 Informații privind efectele toxicologice

Toxicitate acută

Efect oral acut	: LD50 șobolan, mascul/femelă Doză: > 4.320 mg/kg Metodă: OECD 401 Substanță de test: 64741-62-4
Efect acut la inhalare	: LC50 șobolan, mascul/femelă Doză: 4100 mg/m3/ 4 o Metodă: EPA OTS 798.1150 Substanță de test: 64741-62-4
Efect acut cutanat	: LD50 iepure, mascul/femelă Doză: > 2.000 mg/kg Metodă: OECD 434 Substanță de test: 64741-62-4
Alte efecte acute	: Nu sunt disponibile date relevante
Alte efecte	: Expunerea repetată poate provoca uscarea sau crăparea pielii.

Corodarea/iritarea pielii

Iritația pielii	: Piele de iepure Rezultat: nu este iritant Metodă: EU Method B.4 Substanță de test: 64741-57-7
-----------------	--

Lezarea gravă/iritarea ochilor

Iritația ochilor	: Ochi de iepure Rezultat: nu este iritant Metodă: EU Method B.5 Substanță de test: 64741-57-7
------------------	---

Sensibilizarea căilor respiratorii sau a pielii

sensibilizare	: Test Buehler Piele de cobai Clasificare: nu provoacă sensibilizare Metodă: EU Method B.6 Substanță de test: 64741-62-4
---------------	--

Mutagenitatea celulelor germinative

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Genotoxicitate în vitro	: Testul Ames modificat Rezultat: pozitiv Metodă: OECD 471 Substanță de test: 64741-62-4
Genotoxicitate în vivo	: Încercare micronucleară (clastogenicitate) Substanță de test: 64741-62-4 Metodă: EU Method B.12 Rezultat: negativ
Evaluare toxicologică / Mutagenitatea celulelor germinative	: nu există criterii de clasificare pentru mutagenitate

Cancerogenitatea

Efect cancerigen	: dermic, șoarece Substanță de test: 64741-62-4 Metodă: OECD 451 NOAEL Doză: 0,1% (mascul)
Evaluare toxicologică / Cancerogenitatea	: Poate cauza cancer.

Toxicitate pentru reproducere

Toxicitate pentru reproducere/fertilitate	: Conform coloanei II din Anexa X REACH, studiul nu trebuie realizat dacă substanța este cunoscută a fi genotoxic-cancerigenă și sunt adoptate măsuri adecvate de management al riscurilor.
Toxicitate pentru dezvoltare/teratogenicitate	: Mod de aplicare: piele; șobolan Substanță de test: 64741-62-4 Metodă: EPA OTS 798.4900 NOAEL: Doză 0,05 mg/kg/zi
Evaluare toxicologică / Toxicitate pentru dezvoltare/teratogenicitate Toxicitate pentru reproducere/fertilitate	: Pe baza componentelor, produsul este clasificat drept toxic pentru reproducere, Nu există criterii de clasificare pentru fertilitate Pe baza datelor disponibile, produsul este clasificat ca teratogen.

Toxicitate asupra unui organ țintă specific - expunere unică

Toxicitate asupra unui organ țintă specific - expunere unică	: concludent, dar insuficient pentru clasificare
---	--

Toxicitate asupra unui organ țintă specific - expunere repetată

Efecte în cazul expunerii repetate sau de lungă durată	: Poate provoca leziuni ale organelor în caz de expunere prelungită sau repetată. Organe țintă: sânge, timus, ficat
---	--

Pericol prin aspirare

Toxicitate prin aspirare	: Fără risc de aspirație
---------------------------------	--------------------------

Efecte neurologice

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Efecte narcotice	:	nici unul cunoscut
------------------	---	--------------------

Evaluare toxicologică /

Efecte acute	:	Produsul se clasifică ca fiind nociv la inhalare.
Sensibilizare	:	Conform datelor disponibile, produsul nu se clasifică ca fiind un produs cu efecte de sensibilizare.
Toxicitate la doză repetată	:	Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.

11.2 Informații suplimentare

Alte informații	:	Expunerea repetată poate provoca uscarea sau crăparea pielii.
-----------------	---	---

SECȚIUNEA 12. INFORMAȚII ECOLOGICE

12.1 Toxicitatea

Toxicitate acută

Toxicitate acută la pești	:	LL50 Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 79 mg/l Durată de expunere: 96 o Substanță de test: 68476-33-5 Metodă: OECD 203
Toxicitate acută în cazul nevertebratelor acvatice	:	EL50 Specii: Daphnia magna (Purici de apă mari) Doză: 0,22 mg/l Durată de expunere: 48 o Substanță de test: 64741-61-3 Metodă: OECD 202
Toxicitatea pentru alge și plantele acvatice	:	EL50 Specii: Pseudokirchneriella subcapitata Doză: 0,28 - 0,37 mg/l Durată de expunere: 72 o Substanță de test: 64741-61-3 Metodă: OECD 201

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Toxicitate la microorganisme	: LL50 Specii: Tetrahymena pyriformis Doză: > 1.000 mg/l Durată de expunere: 72 o Substanță de test: păcură grea Metodă: QSAR
Toxicitate pentru organismele edafice	: nu există date
Toxicitate în cazul plantelor terestre	: nu există date
Toxicitate asupra altor organisme terestre (care nu sunt mamifere)	: NOAEL Specii: Anas platyrhynchos Doză: 20000 mg/kg/zi Durată de expunere: 22 Săpt. Substanță de test: titei North Slope expus la intemperii (WEVC) Metodă: OECD 206

Toxicitate cronică

Toxicitate pentru pești (Toxicitate cronică)	: NOEL (mortalitate) Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 0,1 mg/l Durată de expunere: 28 z Substanță de test: păcură grea Metodă: QSAR
Toxicitate la daphnia și alte nevertebrate acvatic. (Toxicitate cronică)	: NOEL (Reproducere) Specii: Daphnia magna Doză: 0,27 mg/l Durată de expunere: 21 z Substanță de test: păcură grea Metodă: QSAR
Acvatică acută	: Conform datelor eco-toxicologice, produsul este clasificat ca fiind foarte toxic pentru organisme acvatice.
Acvatică cronică	: Pe baza datelor ecotoxicologice, produsul este considerat periculos pentru mediu, cu efecte îndelungate.
Date de toxicitate în sol	: nu există date
Alte organisme relevante din punct de vedere al mediului	: nu există date

12.2 Persistență și degradabilitate

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Persistență, Biodegradare	:	Metodă: Model computerizat Petrorisk Combustibilii petrolieri grei sunt rezistenți la hidroliză, deoarece nu conțin un grup funcțional reactiv din punct de vedere hidrolitic. Mai mult, aceștia nu suferă fotoliză în apă sau sol.
----------------------------------	---	--

12.3 Potențial de bioacumulare

Bioacumulare	:	Nu sunt disponibile date relevante, Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. , Testele standard pentru acest efect sunt destinate pentru substanțe mono-component și nu sunt adecvate pentru această substanță complexă. , Cu toate acestea, acest efect a fost calculat pentru structurile hidrocarburilor reprezentative (model PETRORISK). , Valorile estimate pentru BCF sunt în general supra-conservative, întrucât nu este luată în considerare biotransformarea. , Prin urmare, este posibil ca expunerile indirecte și estimările de risc prognozate conform PETRORISK să fie supraestimate. Potențial de bioacumulare (Coeficient de partiție (n-octanol/apă)): nu există date
---------------------	---	---

12.4 Mobilitate în sol

Mobilitate	:	Note: Nu lăsați produsul să fie eliberat necontrolat în mediu.
Transport între diferite medii	:	Nu sunt informații relevante disponibile. Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. Testele standard pentru acest efect sunt destinate pentru substanțe mono-component și nu sunt adecvate pentru această substanță complexă. Cu toate acestea, acest efect este caracterizat prin utilizarea relațiilor cantitative structura-activitate pentru structurile hidrocarburilor reprezentative (model PETRORISK).
Capacitate de eliminare fizico-chimică	:	Acest produs este insolubil în apă și plutește la suprafața acesteia. Poate fi separat mecanic, în stații de tratare a apelor uzate.

12.5 Rezultate ale evaluării PBT și vPvB

Rezultate ale evaluării PBT și vPvB	:	Produsul este un amestec de substanțe UVCB constituite din hidrocarburi. , Informații suplimentare relevante pentru evaluarea PBT a acestei substanțe sunt necesare. , Unele eșantioane ale acestei substanțe pentru care sunt disponibile date analitice, conțin constituenți PBT/vPvB incluși în lista candidaților SVHC în concentrații mai mari de 0,1%. , Nu au fost identificate alte structuri de hidrocarburi reprezentative care să satisfacă criteriile PBT / vPvB.
--	---	---

12.6 Alte efecte adverse

Efecte asupra stațiilor de epurare	:	Conform datelor modelului QSAR referitor la categoria combustibililor petrolieri grei, produsul nu are efecte toxice acute față de microorganismele din instalațiile de tratare a apelor reziduale (LL50>1000 mg/l). Cu toate acestea, există posibilitatea unor efecte cronice față de microorganisme (NOEL 15 mg/l).
Alte efecte adverse	:	Nu evacuați hidrocarburi lichide în sistemul de canalizare, cursuri de apă și pe sol. În caz de accident, contactați echipele speciale de intervenție și anunțați autoritățile locale competente.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

SECȚIUNEA 13. CONSIDERAȚII PRIVIND ELIMINAREA

13.1 Metode de tratare a deșeurilor

Instrucțiuni privind eliminarea deșeurilor de produs	:	Reziduurile de produs vor fi eliminate conform prevederilor legale.
Instrucțiuni privind eliminarea deșeurilor de ambalaj	:	În măsura în care produsul a fost livrat în ambalaj, de preferat, ambalajele goale vor fi refolosite sau, dacă nu există această posibilitate, vor fi transportate la un punct de valorificare / eliminare finală a deșeurilor periculoase.
Codul deșeurilor conform Catalogului european al deșeurilor în cazul utilizării conform Secțiunii 1:		
Cod deșeu de produs	:	13 07 03* alți combustibili (inclusiv amestecuri)
Cod deșeu de ambalaj	:	15 01 10* ambalaje care conțin reziduuri de substanțe periculoase sau sunt contaminate cu substanțe periculoase

13.2 Informații suplimentare

Codul de deșeu depinde de originea deșeurilor și, în situații individuale, poate diferi de informațiile de mai sus.

Legislația privind eliminarea deșeurilor de produs:

Legea nr 211/2011 privind regimul deșeurilor, cu modificările și completările ulterioare ;

HG 235/2007 privind gestionarea uleiurilor uzate;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 349/2005 privind depozitarea deșeurilor, cu modificările și completările ulterioare;

HG 856/2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase, cu modificările și completările ulterioare;

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

Legislația pentru deșeurile de ambalaje:

Ordinul nr. 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deseuri de ambalaje;

Legea nr. 249/2015 privind modalitatea de gestionare a ambalajelor și deșeurilor de ambalaje, cu modificările și completările ulterioare.

Informații suplimentare

Produsul este transportat, depozitat și prelucrat la temperaturi mai mici de 100 °C.

La cerere, producătorul vă oferă informații suplimentare referitoare la clasificarea produsului pentru transport.

SECȚIUNEA 15. INFORMAȚII DE REGLEMENTARE

15.1 Regulamente/legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispoziții comunitare privind protecția sănătății și a mediului

Directiva 2010/75/UE privind emisiile industriale (prevenirea și controlul integrat al poluării) - Capitolul V - Dispoziții speciale aplicabile instalațiilor și activităților care utilizează solvenți organici.	:	Produsul nu face obiectul directivei COV dacă se utilizează în scopurile prevăzute (vezi secțiunea 1.2).
Regulamentul (CE) nr. 1907/2006, Anexa XVII	:	nr. 28 Substanțe cancerigene din categoria 1A, respectiv 1 sau categoria 1B, respectiv 2;
Directiva 2012/18/UE a Parlamentului European și a Consiliului din 4 iulie 2012 privind controlul pericolelor de accidente majore care implică substanțe periculoase, de modificare și ulterior de abrogare a Directivei 96/82/CE a Consiliului (SEVESO III).	:	Anexă I, Partea 1: E1 Periculoase pentru mediul acvatic în categoria acut 1 sau cronic 1. Anexa I Partea 2: 34. Produse petroliere și carburanți alternativi. (d) păcură

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Directiva 92/85/CEE a Consiliului din 19 octombrie 1992 privind introducerea de măsuri pentru promovarea îmbunătățirii securității și a sănătății la locul de muncă în cazul lucrătoarelor gravide, care au născut de curând sau care alăptează [a zecea directivă specială în sensul articolului 16 alineatul (1) din Directiva 89/391/CEE]	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.
Directiva 94/33/CE a Consiliului din 22 iunie 1994 privind protecția tinerilor la locul de muncă	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.

Alte reglementări:

Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006, cu modificările și completările ulterioare.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase, cu modificările și completările ulterioare;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă, cu modificările și completările ulterioare;

Regulamentul (CE) nr. 1907/2006 privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), cu modificările și completările ulterioare.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006

Legea 319/2006 privind Securitatea și sănătatea în muncă, cu modificările și completările ulterioare;

HG 1218/2006 privind stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici, cu modificările și completările ulterioare;

OUG 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) 1.907/2006, cu modificările și completările ulterioare.

Legea nr.59/2016 privind controlul asupra pericolelor de accident major în care sunt implicate substanțe periculoase.

OUG 96/2003 privind protecția maternității la locul de muncă, cu modificările și completările ulterioare.

HG 600/2007 privind protecția tinerilor la locul de muncă, cu modificările și completările ulterioare

Hotărârea nr. 893/2006 pentru modificarea Hotărârii Guvernului nr. 1.593/2002 privind aprobarea Planului național de pregătire, răspuns și cooperare în caz de poluare marină cu hidrocarburi.

15.2 Evaluarea securității chimice

S-a efectuat evaluarea privind siguranța chimică, în cadrul procesului de înregistrare REACH a substanțelor componente. S-a confirmat faptul, că în caz de controlare a componentei principale ca substanță primară se poate asigura controlul corespunzător și pentru celelalte componente ale amestecului. În consecință, în Anexă sunt listate scenariile de expunere elaborate pentru componenta principală. Pentru scenariile de expunere relevante, consultați Anexa.

SECȚIUNEA 16. ALTE INFORMAȚII

Textul integral al frazelor de pericol H menționate la Secțiunile 2 și 3

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Acute Tox.	Toxicitate acută
Aquatic Acute	Toxicitate acvatică acută
Aquatic Chronic	Toxicitate acvatică cronică
Asp. Tox.	Pericol de aspirare
Carc.	Carcinogenicitate
Flam. Liq.	Lichide inflamabile
Repr.	Toxicitate reproductivă
Skin Irrit.	Corodarea/Iritarea pielii
STOT RE	Toxicitate asupra unui organ țintă specific - expunere repetată
H226	Lichid și vapori inflamabili.
H304	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H315	Provoacă iritarea pielii.
H332	Nociv în caz de inhalare.
H350	Poate provoca cancer.
H361d	Susceptibil de a dăuna fătului
H373	Poate provoca leziuni ale organelor (sânge, timus, ficat) în caz de expunere prelungită sau repetată.
H400	Foarte toxic pentru viața acvatică.
H410	Foarte toxic pentru viața acvatică având efecte de lungă durată.

Anexă

Scenariile de expunere pentru cele mai frecvente utilizari sunt enumerate mai jos. Dacă este necesar, se pot furniza la cerere și alte scenarii de expunere.

1. Titlu scurt al Scenariului de expunere: 01-Producerea substanței

Stadiul ciclului de viață	: M: Producere
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC1: Producerea substanței
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 1.1.v1
Procese, sarcini, activități acoperite	: Producerea substanței. Include transferurile de material, depozitarea, prelevarea de eșantioane, activitățile de laborator asociate, întreținerea și încărcarea (inclusiv în vapoare/barje, vehicule de transport combinat rutier/feroviar și containere pentru materiale în vrac).

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC1, Producerea substanței

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofoba.
Tonaj pentru utilizare regională	: 2,7 10E6 t/an
Fracțiune de tonaj UE utilizată în regiune:	: 0,2
Fracțiune din tonajul regional utilizat la nivel local:	: 1,0
Tonaj anual la amplasament (tone/an)	: 2,7 10E6
Tonaj zilnic maxim la amplasament	: 9,1 10E6 kg/zi
MSafe (tonaj maxim permis la amplasament)	: 1,17 10E7 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Frecvența și durata folosirii

Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,001 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,010 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 90,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de >= (%): 89,2 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Preveniți descărcarea substanței nedizolvate în sau recuperați-o din apele reziduale de la amplasament. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Debitul efluentului în stația de tratare a apelor reziduale : 10.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : În timpul producției nu sunt generate reziduuri/deșeuri de substanță/material.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : În timpul producției nu sunt generate reziduuri/deșeuri de substanță/material.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC1** : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Productie chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC15** : Utilizare ca reactiv de laborator

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid
- Presiune de vapori : Lichid, presiune de vapori la STP. < 0,5 kPa
- Note : Operațiunea se desfășoară la temperatură ridicată (> 20°C peste temperatura ambiantă), Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Cantitatea folosită

nu se aplică :

Frecvența și durata folosirii

Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS2 Eșantionarea procesului + OC9 în aer liber

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS2 Eșantionarea procesului + OC9 în aer liber

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS2 Eșantionarea procesului + OC9 în aer liber

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

1. Titlu scurt al Scenariului de expunere: 01a - Distribuția substanței

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC4: Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC5: Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol ERC6a: Utilizarea unui intermediar ERC6b: Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC6c: Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC6d: Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial

Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS2 Eșantionarea procesului + OC9 în aer liber

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS137 Eșantionarea produselor

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

1. Titlu scurt al Scenariului de expunere: 02 Formularea și (re)ambalarea substanțelor și amestecurilor

Stadiul ciclului de viață	: F: Formulare sau reambalare
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC2: Formulare în amestec
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 2.2.v1
Procese, sarcini, activități acoperite	: Formularea, ambalarea și reambalarea substanței și a amestecurilor sale în operațiuni continue sau discontinue, inclusiv depozitarea, transferurile de materiale, amestecarea, tabletarea, comprimarea, peletizarea, extrudarea, ambalarea la scară mare și mică, eșantionarea, întreținerea și activitățile de laborator asociate.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC2, Formulare în amestec

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofobă.
Tonaj pentru utilizare regională	: 1,7 10E5 t/an
Fracțiune de tonaj UE utilizată în regiune:	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,18
Tonaj anual la amplasament (tone/an)	: 3 10E4
Tonaj zilnic maxim la amplasament (kg/zi):	: 1 10E5
MSafe (tonaj maxim permis la amplasament)	: 1,34 10E5 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 300 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
Factor de diluare locală în apă de mare	: 100

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare:	: 0,1 %
Aer	
Factor de emisie sau de eliberare/degajare:	: 0,001 %
Apă	
Factor de emisie sau de eliberare/degajare:	: 0,01 %
Sol	
Note	: fracție degajată din proces în aer (după măsuri tipice de management al riscurilor la amplasament în conformitate cu cerințele Directivei UE privind emisiile de solvenți) Factorii de eliberare/degajare în apă și sol se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM) Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer	: Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 0 %
apă	: Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de eliminare: 82,9 %
apă	: Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %
Note	: Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de toxicitatea secundară a elementului terestru. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament. Preveniți descărcarea substanței nedizolvate în sau recuperați-o din apele reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale	: Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale	: 2.000 m3/d
Eficiență (Stație de tratare a apelor reziduale)	: 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia	: 90,1 %
Tratarea nămolului	: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note	: Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor	: Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.
---------------------	--

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare	: Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.
------------------------	---

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC2** : Productie chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC15** : Utilizare ca reactiv de laborator

Caracteristici produs

Concentrația substanței în amestec/articol	Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
Formă fizică (în momentul folosirii)	: Lichid
Presiune de vapori	: Lichid, presiune de vapori la STP. < 0,5 kPa
Note	: Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Canitatea folosită

Neaplicabil :

Frecvența și durata folosirii

Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis.

CS137 Eșantionarea produselor

Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS36 Activități de laborator.

Manipulați în interiorul unei hote de tiraj sau implementați metode echivalente adecvate pentru a reduce la minimum expunerea.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Transferați prin linii/conducte închise. Goliți liniile/conductele de transfer înainte de decuplare. Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului. Asigurați-vă că operațiunea este efectuată în spațiu exterior (în aer liber).

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor. Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri.

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS137 Eșantionarea produselor

A se evita desfășurarea activităților care implică expunerea mai mult de 15 minute

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS8 Transferuri în canistre/în loturi

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutătoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS15 Expuneri generale (sisteme închise).

CS2 Eșantionare a procesului

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS137 Eșantionarea produselor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS36 Activități de laborator.

Purtați mănuși corespunzătoare testate conform EN374.

CS510 Încărcarea (descărcarea) navelor maritime/barjelor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS511 Încărcarea autocisternelor/vagoanelor de cale ferată

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

Categorie de eliberare în mediu	: ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 7.12a.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea ca și / ori în combustibil sau carburant (sau aditivi sau componente de aditivi pentru combustibil sau carburant) și include activități asociate cu transferul, utilizarea, întreținerea echipamentelor și manipularea deșeurilor acestora.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofobă.
Tonaj pentru utilizare regională	: 1,3 10E5 t/an
Fracțiune de tonaj UE utilizată în regiune:	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 1
Tonaj anual la amplasament	: 1,3 10E5 t/an
Tonaj zilnic maxim la amplasament	: 4,4 10E5 kg/zi
MSafe (tonaj maxim permis la amplasament)	: 5,70 10E5 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 300 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
Factor de diluare locală în apă de mare	: 100

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,5 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală. Factorul de emisie sau de eliberare/degajare în apă este < 0,001%.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 95,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de >= (%): 89,2 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC2** : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid
- Presiune de vapori : Lichid, presiune de vapori la STP. < 5 hPa
- Note : Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Frecvența și durata folosirii

- Note : Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luati în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Reduceți la minimum expunerea folosind măsuri precum sisteme închise, unități specializate și ventilație de evacuare generală/locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați/spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS502 Descărcarea închisă a materialelor în vrac

OC9 în exterior

Transferați prin linii/conducte închise.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS117 Utilizarea echipamentelor de filtrare a materialelor solide

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră)

CS85 Depozitare produse în vrac

Depozitați substanța în cadrul unui sistem închis. Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră)

CS39 Curățare și întreținere echipamente.

Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Goliți și spălați sistemul înainte de deschiderea sau întreținerea echipamentelor.

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

G18 Măsuri generale (carcinogeni).

Inspectați, testați și mențineți cu regularitate toate măsurile de control. Aveți în vedere necesitatea măsurilor de supraveghere a sănătății în funcție de riscuri. Acolo unde există potențial de expunere: permiteți accesul doar pentru personalul autorizat; asigurați instruirea operatorilor pentru activitatea specifică pentru a minimiza expunerile. Asigurați-vă că există sisteme sigure de lucru sau mecanisme echivalente pentru gestionarea riscurilor.

CS15 Expuneri generale (sisteme închise).

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS502 Descărcarea închisă a materialelor în vrac

OC9 în exterior

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS8 Transferuri în canistre/în loturi

A se evita desfășurarea activităților care implică expunerea mai mult de 1 oră

CS117 Utilizarea echipamentelor de filtrare a materialelor solide

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

CS85 Depozitare produse în vrac

A se evita desfășurarea activităților care implică expunerea mai mult de 4 ore

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

G18 Măsuri generale (carcinogeni).

Acolo unde există potențial de expunere: Purtați mănuși corespunzătoare și îmbrăcăminte de protecție pentru a împiedica contaminarea pielii; purtați mască de protecție respiratorie atunci când folosirea acesteia este identificată pentru anumite scenarii ajutoare; curățați imediat substanțele/materialele scurse/vărsate și eliminați deșeurile în siguranță.

CS15 Expuneri generale (sisteme închise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS502 Descărcarea închisă a materialelor în vrac

OC9 în exterior

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS117 Utilizarea echipamentelor de filtrare a materialelor solide

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS85 Depozitare produse în vrac

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajaților.

CS39 Curățare și întreținere echipamente.

Purtarea mănușilor rezistente la produse chimice (testate conform EN374) corelată cu instruirea pentru activitatea specifică.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efecte carcinogene. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

1. Titlu scurt al Scenariului de expunere: 12b - Utilizare drept combustibil sau carburant: Profesional

Stadiul ciclului de viață	: PW: Utilizare larg răspândită de către lucrători profesioniști
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC16: Utilizarea combustibililor
Categorie de eliberare în mediu	: ERC9a: Utilizare larg răspândită a unui fluid funcțional (la interior) ERC9b: Utilizare larg răspândită a unui fluid funcțional (la exterior)
Alte informații	: Categorie Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVO SpERC 9.12b.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea ca și / ori în combustibil sau carburant (sau aditivi sau componente de aditivi pentru combustibil sau carburant) și include activități asociate cu transferul, utilizarea, întreținerea echipamentelor și manipularea deșeurilor acestora.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC9a, Utilizare larg răspândită a unui fluid funcțional (la interior)

ERC9b, Utilizare larg răspândită a unui fluid funcțional (la exterior)

Cantitatea folosită

Note	: Substanța este un produs UVCB complex. Preponderent hidrofobă.
Tonaj pentru utilizare regională (tone/an)	: 3,4 10E4
Fracțiune de tonaj UE utilizată în regiune:	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,0005
Tonaj anual la amplasament (tone/an)	: 17
Tonaj zilnic maxim la amplasament (kg/zi):	: 47
MSafe (tonaj maxim permis la amplasament)	: 789 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 365 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,01 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberare/degajare din proces de utilizare cu dispersie largă. Factorii de eliberare/degajare pentru aer și sol se referă exclusiv la utilizarea regională.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: nu se aplică:
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%): 0 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%): 0 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de oameni prin expunere indirectă (în principal, ingerare). Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 90,1 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 90,1 %
Tratarea nămolului : A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare., Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului., Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

Combustibil naval RMG 380 - max. 0,5% S
Nr. produs P01050

Data emiterii: 30.08.2019
Data revizuirii: 30.08.2019

- PROC1** : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

Concentrația substanței în amestec/articol	Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
Formă fizică (în momentul folosirii)	: Lichid
Presiune de vapori	: Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa
Note	: Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel., Presupune implementarea unui standard de bază adecvat privind igiena profesională.

Frecvența și durata folosirii

Note	: Acoperă expunerile zilnice de până la 8 ore (cu excepția cazului în care se menționează altfel)
------	---

Condiții tehnice și măsuri

G18 Măsuri generale (carcinogeni).

Luați în considerare progresele tehnice și modernizarea procesului (inclusiv automatizarea) pentru eliminarea degajărilor/eliberărilor/emisiilor. Minimizați expunerea folosind măsuri precum sistemele închise, unitățile specializate și ventilația de evacuare generală / locală adecvată. Goliți sistemele și curățați liniile/conductele de transfer înainte de a afecta etanșeitatea. Curățați / spălați echipamentul, unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS15 Expuneri generale (sisteme închise).

CS137 Eșantionarea produselor

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis. Eșantionați printr-o buclă închisă sau un alt sistem pentru a evita expunerea. Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră).

CS502 Descărcarea închisă a materialelor în vrac

Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră). Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS8 Transferuri în canistre/în loturi

Asigurați un standard adecvat de ventilație controlată (10 - 15 schimburi de aer pe oră). Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS507 Alimentare cu carburanți

Asigurați-vă că transferurile de material se efectuează în condiții izolate sau sub ventilație cu extragerea aerului.

CS39 Curățare și întreținere echipamente.

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) Păstrați substanțele provenite din golire în spații de depozitare etanșe până la eliminarea sau reciclarea ulterioară. Curățați imediat substanțele/materialele scurse/vărsate. Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

2. Hazard Identification**2.1 Classification of the substance or mixture**

Carcinogenicity, category 1A
Eye Irritation, category 2
Flammable Liquid, category 2
Reproductive Toxicity, category 2
STOT, repeated exposure, category 1
Skin Irritation, category 2

2.2 Label elements

Symbol(s) of Product

Signal Word

Danger

Named Chemicals on Label

TOLUENE, MICROCRYSTALLINE SILICA

HAZARD STATEMENTS

Flammable Liquid, category 2	H225	Highly flammable liquid and vapour.
Skin Irritation, category 2	H315	Causes skin irritation.
Eye Irritation, category 2	H319	Causes serious eye irritation.
Carcinogenicity, category 1A	H350-1A	May cause cancer.
Reproductive Toxicity, category 2	H361	Suspected of damaging fertility or the unborn child.
STOT, repeated exposure, category 1	H372	Causes damage to organs through prolonged or repeated exposure.

PRECAUTION PHRASES

P201	Obtain special instructions before use.
P202	Do not handle until all safety precautions have been read and understood.
P210	Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
P235	Keep cool.
P260	Do not breathe dust/fume/gas/mist/vapours/spray.
P264	Wash hands thoroughly after handling.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P284	Wear respiratory protection.
P305+351+338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.
P308+313	IF exposed or concerned: Get medical advice/attention
P314	Get medical advice/attention if you feel unwell.
P332+313	If skin irritation occurs: Get medical advice/attention.
P403+233	Store in a well-ventilated place. Keep container tightly closed.

2.3 Other hazards

No Information

Results of PBT and vPvB assessment:

The product does not meet the criteria for PBT/VPvB in accordance with Annex XIII.

3. Composition/Information On Ingredients

Additional Information: The text for GHS Hazard Statements shown above (if any) is given in Section 16.

4. First-aid Measures

4.1 Description of First Aid Measures

AFTER INHALATION: Give oxygen or artificial respiration if needed. Remove person to fresh air. If signs/symptoms continue, get medical attention.

AFTER SKIN CONTACT: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. If skin irritation persists, call a physician.

AFTER EYE CONTACT: Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

AFTER INGESTION: Do NOT induce vomiting. Never give anything by mouth to an unconscious person. If swallowed, call a poison control centre or doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed

Harmful if swallowed. Irritating to eyes and skin. Risk of serious damage to the lungs (by aspiration). Vapours may cause drowsiness and dizziness.

4.3 Indication of any immediate medical attention and special treatment needed

No information available on clinical testing and medical monitoring. Specific toxicological information on substances, if available, can be found in section 11.

When symptoms persist or in all cases of doubt seek medical advice.

5. Fire-fighting Measures

5.1 Extinguishing Media:

Carbon Dioxide, Dry Chemical, Foam, Water Fog

UNUSUAL FIRE AND EXPLOSION HAZARDS: Flammable liquid. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Vapors may travel to areas away from work site before igniting/flashing back to vapor source. Provide adequate ventilation. Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Electrical installations / working materials must comply with the technological safety standards. Wear shoes with conductive soles.

FOR SAFETY REASONS NOT TO BE USED: No Information

5.2 Special hazards arising from the substance or mixture

No Information

5.3 Advice for firefighters

SPECIAL FIREFIGHTING PROCEDURES: In the event of fire, wear self-contained breathing apparatus. Cool containers / tanks with water spray. Flammable.

SPECIAL FIREFIGHTING PROTECTION EQUIPMENT: No Information

6. Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Evacuate personnel to safe areas. Remove all sources of ignition. To avoid ignition of vapours by static electricity discharge, all metal parts of the equipment must be grounded. Wear personal protective equipment. For personal protection see section 8.

6.2 Environmental precautions

Do not allow material to contaminate ground water system. Prevent product from entering drains.

6.3 Methods and material for containment and cleaning up

Prevent further leakage or spillage if safe to do so. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13).

6.4 Reference to other sections

Please refer to disposal requirements or country specific disposal requirements for this material. See Section 13 for further information.

7. Handling and Storage

7.1 Precautions for safe handling

INSTRUCTIONS FOR SAFE HANDLING : Keep containers dry and tightly closed to avoid moisture absorption and contamination. Prepare the working solution as given on the label(s) and/or the user instructions. Do not breathe vapours or spray mist. Ensure all equipment is electrically grounded before beginning transfer operations. Do not use sparking tools.

Do not get in eyes, on skin, or on clothing. Use only with adequate ventilation/personal protection. Wash thoroughly after handling.

PROTECTION AND HYGIENE MEASURES : Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. When using, do not eat, drink or smoke.

7.2 Conditions for safe storage, including any incompatibilities

CONDITIONS TO AVOID: Heat, flames and sparks.

STORAGE CONDITIONS: Keep container closed when not in use. Store in a dry, well ventilated place away from sources of heat, ignition and direct sunlight.

7.3 Specific end use(s)

No specific advice for end use available.

8. Exposure Controls/Personal Protection

FURTHER ADVICE: Refer to the regulatory exposure limits for the workforce enforced in each country. Some components may not have been classified at the EU level under the dangerous substances and preparations regulation.

8.2 Exposure controls

Personal Protection

RESPIRATORY PROTECTION: In order to avoid inhalation of spray-mist and sanding dust, all spraying and sanding must be done wearing adequate respirator. Use only with ventilation to keep levels below exposure guidelines reported in this document. User should test and monitor exposure levels to ensure all personnel are below guidelines. If not sure, or not able to monitor, use State or federally approved supplied air respirator. For silica containing coatings in a liquid state, and/or if no exposure limits are established above, air-supplied respirators are generally not required.

EYE PROTECTION: Ensure that eyewash stations and safety showers are close to the workstation location. Safety glasses with side-shields.

HAND PROTECTION: Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. Impervious gloves. Request information on glove permeation properties from the glove supplier. Lightweight protective clothing

OTHER PROTECTIVE EQUIPMENT: No Information

ENGINEERING CONTROLS: Avoid contact with skin, eyes and clothing. Ensure adequate ventilation, especially in confined areas.

9. Physical and Chemical Properties

9.1 Information on basic physical and chemical properties

Appearance:	Viscous Liquid, Various Colors
Physical State	Liquid
Odor	Solvent
Odor threshold	N/D
pH	N/D
Melting point / freezing point (°C)	N/D
Boiling point/range (°C)	232F (111C) - 284 F (140 C)
Flash Point (°C)	50F (10C)

Evaporation rate	Slower Than Ether
Flammability (solid, gas)	Not determined
Upper/lower flammability or explosive limits	0.6 - 10.4
Vapour Pressure, mmHg	N/D
Vapour density	Heavier than Air
Relative density	Not determined
Solubility in / Miscibility with water	N/D
Partition coefficient: n-octanol/water	Not determined
Auto-ignition temperature (°C)	Not determined
Decomposition temperature (°C)	Not determined
Viscosity	Unknown
Explosive properties	Not determined
Oxidising properties	Not determined

9.2 Other information

VOC Content g/l:	264
Specific Gravity (g/cm3)	app. 1.28

10. Stability and Reactivity

10.1 Reactivity

No reactivity hazards known under normal storage and use conditions.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous polymerisation does not occur.

10.4 Conditions to avoid

Heat, flames and sparks.

10.5 Incompatible materials

Strong oxidizing agents.

10.6 Hazardous decomposition products

Carbon dioxide (CO₂), carbon monoxide (CO), oxides of nitrogen (NO_x), dense black smoke.

11. Toxicological Information

11.1 Information on toxicological effects

Acute Toxicity:

Oral LD50: N/D

Inhalation LC50: N/D

Irritation: Eye Irritation and Skin Irritation, category 2

Corrosivity: Unknown

Sensitization: Unknown

Repeated dose toxicity: STOT Repeated Dose (lungs): Category 1

Carcinogenicity: Carcinogenicity, category 1A

Mutagenicity: Unknown

Toxicity for reproduction: Reproductive Toxicity, category 2

STOT-single exposure: Unknown

STOT-repeated exposure: STOT, repeated exposure, category 1

Aspiration hazard: Unknown

If no information is available above under Acute Toxicity then the acute effects of this product have not been tested. Data on individual components are tabulated below:

<u>CAS-No.</u>	<u>Chemical Name</u>	<u>Oral LD50</u>	<u>Dermal LD50</u>	<u>Vapor LC50</u>	<u>Gas LC50</u>	<u>Dust/Mist LC50</u>

Additional Information:

This product may contain Ethyl Benzene, which is listed by IARC as possibly carcinogenic to humans (Group 2B). This listing is based on inadequate evidence of carcinogenicity in humans and sufficient evidence in experimental animals. This product contains silica which is classified by IARC as a known human carcinogen (Group 1). Crystalline silica is known to cause silicosis. The classification(s) is/are relevant when exposed to these respirable substances in dust or powder form only, including cured product that is subject to sanding, grinding, cutting, or other surface preparation activities.

12. Ecological Information

12.1 Toxicity:

EC50 48hr (Daphnia):	Unknown
IC50 72hr (Algae):	Unknown
LC50 96hr (fish):	Unknown

12.2 Persistence and degradability: Unknown

12.3 Bioaccumulative potential: Unknown

12.4 Mobility in soil: Unknown

12.5 Results of PBT and vPvB assessment: The product does not meet the criteria for PBT/VPvB in accordance with Annex XIII.

12.6 Other adverse effects: Unknown

13. Disposal Considerations

13.1 WASTE TREATMENT METHODS: Do not burn, or use a cutting torch on, the empty drum. If recycling is not practicable, dispose of in compliance with local regulations. Dispose of in accordance with local regulations. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport Information

14.1	UN number	UN 1263
14.2	UN proper shipping name	Paint
	Technical name	N/A
14.3	Transport hazard class(es)	3
	Subsidiary shipping hazard	N/A
14.4	Packing group	II
14.5	Environmental hazards	Unknown
14.6	Special precautions for user	Unknown
	EmS-No.:	F-E, S-E
14.7	Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code	Unknown

15. Regulatory Information

15.1 Safety, health and environmental regulations/legislation for the substance or mixture:

U.S. Federal Regulations: As follows -

CERCLA - Sara Hazard Category

This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Flammable (gases, aerosols, liquids, or solids), Carcinogenicity, Reproductive toxicity, Skin Corrosion or Irritation, Serious eye damage or eye irritation, Specific target organ toxicity (single or repeated exposure)

Sara Section 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

<u>Chemical Name</u>	<u>CAS-No.</u>	<u>%</u>
BISMUTH VANDATE	14059-33-7	20.03
TOLUENE	108-88-3	9.33
META-XYLENE	108-38-3	3.21
ETHYL BENZENE	100-41-4	1.49
PARA-XYLENE	106-42-3	1.42
ORTHO-XYLENE	95-47-6	1.05

Toxic Substances Control Act:

All components of this product are either listed on the TSCA Inventory or are exempt.

This product contains the following chemical substances subject to the reporting requirements of TSCA 12(B) if exported from the United States:

<u>Chemical Name</u>	<u>CAS-No.</u>
PARA-XYLENE	106-42-3

U.S. State Regulations: As follows -**New Jersey Right-to-Know:**

The following materials are non-hazardous, but are among the top five components in this product.

<u>Chemical Name</u>	<u>CAS-No.</u>
ACRYLIC COPOLYMER	TRADE SECRET
COLOR PIGMENT	5567-15-7

Pennsylvania Right-To-Know

The following non-hazardous ingredients are present in the product at greater than 3%.

<u>Chemical Name</u>	<u>CAS-No.</u>
ACRYLIC COPOLYMER	TRADE SECRET
COLOR PIGMENT	5567-15-7
YELLOW PIGMENT	31837-42-0
AZO PIGMENT	82199-12-0
YELLOW IRON OXIDE	51274-00-1
IRON OXIDE	1309-37-1
ACRYLIC POLYOL	TRADE SECRET
AZO PIGMENT	2786-76-7
RED PIGMENT	84632-65-5
COLOR PIGMENT	15793-73-4
QUINACRIDONE PIGMENT	1047-16-1
COLOR PIGMENT	1328-53-6

CALIFORNIA PROPOSITION 65

WARNING: Cancer and Reproductive Harm -- www.P65Warnings.ca.gov

International Regulations: As follows -*** Canadian DSL:**

All chemical ingredients included on inventory (DSL)

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

16. Other Information

Text for GHS Hazard Statements shown in Section 3 describing each ingredient:

H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.

H312	Harmful in contact with skin.
H315	Causes skin irritation.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H331	Toxic if inhaled.
H332	Harmful if inhaled.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H350	May cause cancer.
H351	Suspected of causing cancer.
H361	Suspected of damaging fertility or the unborn child.
H371	May cause damage to organs.
H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.
H412	Harmful to aquatic life with long lasting effects.

Reasons for revision

No Information

The information contained herein is, to the best of our knowledge and belief accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by use of this material. It is the responsibility of the user to comply with all applicable federal, state, and local laws and regulations.

SAFETY DATA SHEET

Carboline Urethane Converter 811

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name Carboline Urethane Converter 811
Product number 820UC811-B

1.2. Relevant identified uses of the substance or mixture and uses advised against

2.2. Label elements

Pictogram

Signal word Warning

Hazard statements H226 Flammable liquid and vapour.
 H317 May cause an allergic skin reaction.
 H332 Harmful if inhaled.
 H335 May cause respiratory irritation.
 H412 Harmful to aquatic life with long lasting effects.

Carboline Urethane Converter 811

Precautionary statements	P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
	P240 Ground/bond container and receiving equipment.
	P241 Use explosion-proof electrical equipment.
	P242 Use only non-sparking tools.
	P243 Take precautionary measures against static discharge.
	P261 Avoid breathing vapour/spray.
	P271 Use only outdoors or in a well-ventilated area.
	P272 Contaminated work clothing should not be allowed out of the workplace.
	P273 Avoid release to the environment.
	P280 Wear protective gloves/protective clothing/eye protection/face protection.
	P302+P352 IF ON SKIN: Wash with plenty of water.
	P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
	P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
	P312 Call a POISON CENTER/doctor if you feel unwell.
	P321 Specific treatment (see medical advice on this label).
	P333+P313 If skin irritation or rash occurs: Get medical advice/attention.
	P362+P364 Take off contaminated clothing and wash it before reuse.
	P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.
	P403+P233 Store in a well-ventilated place. Keep container tightly closed.
	P403+P235 Store in a well-ventilated place. Keep cool.
	P405 Store locked up.
	P501 Dispose of contents/container in accordance with national regulations.
Contains	hexamethylene-1,6-diisocyanate homopolymer, Low boiling point naphtha - unspecified,
	hexamethylene-di-isocyanate

2.3. Other hazards

No data available.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information	Remove affected person from source of contamination. Chemical burns must be treated by a physician.
Inhalation	If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. First aid personnel should wear appropriate protective equipment during any rescue. If spray/mist has been inhaled, proceed as follows. Remove person to fresh air and keep comfortable for breathing. Maintain an open airway. Rinse nose and mouth with water. Consult a physician for specific advice. Keep affected person warm and at rest. Get medical attention if symptoms are severe or persist.
Ingestion	Rinse mouth thoroughly with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.
Skin contact	Remove affected person from source of contamination. Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if any discomfort continues.
Eye contact	Remove affected person from source of contamination. Remove contact lenses, if present and easy to do. Continue rinsing. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes and get medical attention.
Protection of first aiders	Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. First aid personnel should wear appropriate protective equipment during any rescue.

4.2. Most important symptoms and effects, both acute and delayed

Inhalation	The product contains organic solvents. Toxic if inhaled.
-------------------	--

Carboline Urethane Converter 811

Ingestion This product is corrosive. Liquid irritates mucous membranes and may cause abdominal pain if swallowed. May cause chemical burns in mouth and throat.

Skin contact Causes severe burns.

Eye contact Redness. Conjunctivitis, irritation, tearing. May cause chemical eye burns.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor Treat symptomatically.

Specific treatments No specific chemical antidote is known to be required after exposure to this product.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media Use foam, carbon dioxide, dry powder or water fog to extinguish.

5.2. Special hazards arising from the substance or mixture

Specific hazards Not known. Thermal decomposition or combustion products may include the following substances: Toxic gases or vapours.

Hazardous combustion products None known.

5.3. Advice for firefighters

Protective actions during firefighting Move containers from fire area if it can be done without risk. Control run-off water by containing and keeping it out of sewers and watercourses. Stop leak if safe to do so. Contain and collect extinguishing water. Ventilate closed spaces before entering them. Cool containers exposed to flames with water until well after the fire is out.

Special protective equipment for firefighters Use air-supplied respirator, gloves and protective goggles.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions Ensure procedures and training for emergency decontamination and disposal are in place. Wear protective clothing as described in Section 8 of this safety data sheet. Avoid inhalation of vapours and contact with skin and eyes. Take care as floors and other surfaces may become slippery. Ensure suitable respiratory protection is worn during removal of spillages in confined areas.

6.2. Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground. The product contains substances which are toxic to aquatic organisms and which may cause long-term adverse effects in the aquatic environment. May accumulate in soil and water systems.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Large Spillages: Collect spillage for reclamation or absorb in vermiculite, dry sand or similar material. Flush contaminated area with plenty of water. Small Spillages: Absorb small quantities with paper towels and evaporate in a safe place. Once evaporation is complete, place paper in a suitable waste disposal container and seal securely. Leave small quantities to evaporate, if safe to do so. Allow small quantities to evaporate to the atmosphere in a safe, open place.

6.4. Reference to other sections

Carboline Urethane Converter 811

Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions Obtain special instructions before use. Avoid contact with skin, eyes and clothing. Read label before use. Wear protective clothing as described in Section 8 of this safety data sheet. For professional users only.

Advice on general occupational hygiene Take off contaminated clothing. Promptly remove any clothing that becomes wet or contaminated. Remove contaminated clothing and wash the skin thoroughly with soap and water after work. Contaminated clothing should be placed in a closed container for disposal or decontamination. Good personal hygiene procedures should be implemented. Provide eyewash station. Do not eat, drink or smoke when using this product.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions Store in tightly-closed, original container in a dry and cool place. Protect from sunlight. Keep away from food, drink and animal feeding stuffs. Keep containers upright.

7.3. Specific end use(s)

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

8.2. Exposure controls

Protective equipment

Appropriate engineering controls

As this product contains ingredients with exposure limits, process enclosures, local exhaust ventilation or other engineering controls should be used to keep worker exposure below any statutory or recommended limits, if use generates dust, fumes, gas, vapour or mist.

Eye/face protection

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible.

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible.

Other skin and body protection

Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact.

Hygiene measures

Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. Clean equipment and the work area every day.

Respiratory protection

Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible.

Thermal hazards

If there is a risk of contact with hot product, all protective equipment worn should be suitable for use with high temperatures.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Carboline Urethane Converter 811

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance	Homogeneous
Colour	Clear.
Flash point	>23°C; <60°C
Relative density	1,08–1,13 gr/cm ³ (20°C)

9.2. Other information

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity	There are no known reactivity hazards associated with this product.
------------	---

10.2. Chemical stability

Stability	Stable at normal ambient temperatures and when used as recommended.
-----------	---

10.3. Possibility of hazardous reactions

10.4. Conditions to avoid

Conditions to avoid	Avoid exposure to high temperatures or direct sunlight.
---------------------	---

10.5. Incompatible materials

10.6. Hazardous decomposition products

Hazardous decomposition products	Decomposition at ambient temperatures may generate the following substances: Carbon monoxide (CO). Carbon dioxide (CO ₂).
----------------------------------	---

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Toxicological effects	This product is toxic. Allergic skin reaction may be observed in hypersensitive personnel. Harmful if swallowed.
-----------------------	---

Acute toxicity - inhalation

ATE inhalation (vapours mg/l)	1,222.0
-------------------------------	---------

Skin corrosion/irritation

Skin corrosion/irritation	No information available.
---------------------------	---------------------------

Respiratory sensitisation

Respiratory sensitisation	Sensitising.
---------------------------	--------------

Skin sensitisation

Skin sensitisation	Sensitising.
--------------------	--------------

Carcinogenicity

Carcinogenicity	No information available.
-----------------	---------------------------

Reproductive toxicity

Reproductive toxicity - fertility	No information available.
-----------------------------------	---------------------------

Specific target organ toxicity - single exposure

STOT - single exposure	May cause respiratory irritation.
------------------------	-----------------------------------

Specific target organ toxicity - repeated exposure

STOT - repeated exposure	Data lacking.
--------------------------	---------------

Carboline Urethane Converter 811

Inhalation	The product contains organic solvents. May cause drowsiness or dizziness.
Ingestion	May be harmful if swallowed. May cause stomach pain or vomiting.
Skin contact	Liquid may irritate skin.
Eye contact	May irritate eyes.

SECTION 12: Ecological Information

Ecotoxicity	Dangerous for the environment. The product contains volatile organic compounds (VOCs) which have a photochemical ozone creation potential. May cause long lasting harmful effects to aquatic life. The product may have adverse effects on organisms in soil and water.
--------------------	---

12.1. Toxicity

Toxicity	No effects known.
-----------------	-------------------

12.2. Persistence and degradability

Persistence and degradability	No data available.
--------------------------------------	--------------------

12.3. Bioaccumulative potential

Bioaccumulative potential	Not known.
----------------------------------	------------

12.4. Mobility in soil

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
---	---

12.6. Other adverse effects

Other adverse effects	Not known.
------------------------------	------------

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information	Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
Disposal methods	Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Confirm disposal procedures with environmental engineer and local regulations. Product residues retained in emptied containers can be hazardous.

SECTION 14: Transport information

14.1. UN number

UN No. (ADR/RID)	1263
UN No. (IMDG)	1263
UN No. (ICAO)	1263
UN No. (ADN)	1263

14.2. UN proper shipping name

Proper shipping name (ADR/RID)	PAINT RELATED MATERIAL
---------------------------------------	------------------------

Carboline Urethane Converter 811

Proper shipping name (IMDG) PAINT RELATED MATERIAL

Proper shipping name (ICAO) PAINT RELATED MATERIAL

Proper shipping name (ADN) PAINT RELATED MATERIAL

14.3. Transport hazard class(es)

ADR/RID class	3
ADR/RID classification code	F1
ADR/RID label	3
IMDG class	3
ICAO class/division	3
ADN class	3

Transport labels

14.4. Packing group

ADR/RID packing group	III
IMDG packing group	III
ADN packing group	III
ICAO packing group	III

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant
No.

14.6. Special precautions for user

EmS	F-E, S-E
ADR transport category	3
Emergency Action Code	•3Y
Hazard Identification Number (ADR/RID)	30
Tunnel restriction code	(D/E)

14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Carboline Urethane Converter 811

EU legislation

Commission Decision 2000/532/EC as amended by Decision 2001/118/EC establishing a list of wastes and hazardous waste pursuant to Council Directive 75/442/EEC on waste and Directive 91/689/EEC on hazardous waste with amendments.

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

Key literature references and sources for data	This SDS has been created as a result of observations, measurements on the product related to the product and the data that raw material suppliers provide
Revision comments	This is first issue.
Issued by	Mr. Tolga DIRAZ - Certified SDS Author - Certificate No: 01.40.08/06.03.2015 / tdiraz@iyigullu.com.tr / +90 224 261 05 37
Revision	0
Supersedes date	28/12/2015
SDS number	4923
Risk phrases in full	R10 Flammable. R20 Harmful by inhalation. R23 Toxic by inhalation. R36/37/38 Irritating to eyes, respiratory system and skin. R37 Irritating to respiratory system. R42/43 May cause sensitisation by inhalation and skin contact. R43 May cause sensitisation by skin contact. R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. R52/53 Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. R65 Harmful: may cause lung damage if swallowed. R66 Repeated exposure may cause skin dryness or cracking. R67 Vapours may cause drowsiness and dizziness.
Hazard statements in full	H226 Flammable liquid and vapour. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H319 Causes serious eye irritation. H332 Harmful if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects. EUH208 Contains hexamethylene-di-isocyanate. May produce an allergic reaction.

Carboline Urethane Converter 811

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty, guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.

SAFETY DATA SHEET

Date of issue/Date of revision 17 August 2021

Version 4

Section 1. Identification

Product name : AMERLOCK 400C / 400GF CURE
Product code : 000001065894
Other means of identification : 00289015; 00317785; 00317786; 00320207; 00325467
Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Product use : Professional applications, Used by spraying.
Use of the substance/ mixture : Coating.
Uses advised against : Not applicable.

Manufacturer : PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272
Emergency telephone number : (412) 434-4515 (U.S.)
(514) 645-1320 (Canada)
SETIQ Interior de la República: 800-00-214-00 (México)
SETIQ Ciudad de México: (55) 5559-1588 (México)
Technical Phone Number : 888-977-4762

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (inhalation) - Category 4
SKIN CORROSION - Category 1
SERIOUS EYE DAMAGE - Category 1
SKIN SENSITIZATION - Category 1
CARCINOGENICITY - Category 2
TOXIC TO REPRODUCTION - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3
Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 13.7% (oral), 59.4% (dermal), 70.3% (inhalation)

GHS label elements

Section 2. Hazards identification

Hazard pictograms

:

**Signal word**

: Danger

Hazard statements

: Flammable liquid and vapor.
Causes severe skin burns and eye damage.
May cause an allergic skin reaction.
Harmful if inhaled.
May cause respiratory irritation.
Suspected of causing cancer.
Suspected of damaging fertility or the unborn child.

Precautionary statements**Prevention**

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Response

: IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor. Wash contaminated clothing before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.

Storage

: Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

: Sanding and grinding dusts may be harmful if inhaled. Do not taste or swallow. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified

: Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture
Product name : AMERLOCK 400C / 400GF CURE
Other means of identification : 00289015; 00317785; 00317786; 00320207; 00325467

Ingredient name	%	CAS number
Talc, not containing asbestiform fibers	≥20 - ≤50	14807-96-6
4-methylpentan-2-one	≥10 - ≤12	108-10-1
Polyaminoamide	≥5.0 - ≤10	68082-29-1
benzyl alcohol	≥1.0 - ≤5.0	100-51-6
cyclohexanone	≥1.0 - ≤5.0	108-94-1
3-aminomethyl-3,5,5-trimethylcyclohexylamine	≥1.0 - ≤5.0	2855-13-2
4-nonylphenol, branched	≥1.0 - ≤5.0	84852-15-3
4,4'-Isopropylidenediphenol, oligomeric reaction products with 1-chloro-2,3-epoxypropane, reaction products with 3-aminomethyl-3,5,5-trimethylcyclohexylamine	≥1.0 - ≤5.0	38294-64-3
2-methylpropan-1-ol	≥1.0 - ≤4.0	78-83-1
2,4,6-tris(dimethylaminomethyl)phenol	≥0.10 - ≤2.7	90-72-2
salicylic acid	<1.0	69-72-7

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

Eye contact : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.
Inhalation : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Ingestion : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye damage.
Inhalation : Harmful if inhaled. May cause respiratory irritation.
Skin contact : Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.

Section 4. First aid measures

Ingestion : Corrosive to the digestive tract. Causes burns.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:
pain
watering
redness

Inhalation : Adverse symptoms may include the following:
respiratory tract irritation
coughing
reduced fetal weight
increase in fetal deaths
skeletal malformations

Skin contact : Adverse symptoms may include the following:
pain or irritation
redness
dryness
cracking
blistering may occur
reduced fetal weight
increase in fetal deaths
skeletal malformations

Ingestion : Adverse symptoms may include the following:
stomach pains
reduced fetal weight
increase in fetal deaths
skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO₂, water spray (fog) or foam.

Unsuitable extinguishing media : Do not use water jet.

Section 5. Fire-fighting measures

- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon oxides
nitrogen oxides
halogenated compounds
metal oxide/oxides
- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Talc, not containing asbestiform fibers	ACGIH TLV (United States, 3/2020). TWA: 2 mg/m ³ 8 hours. Form: Respirable OSHA PEL Z3 (United States). TWA: 2 mg/m ³
4-methylpentan-2-one	ACGIH TLV (United States, 3/2020). STEL: 75 ppm 15 minutes. TWA: 20 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 410 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.
Polyaminoamide benzyl alcohol	None. IPEL (-).

Section 8. Exposure controls/personal protection

cyclohexanone	TWA: 5 ppm STEL: 10 ppm ACGIH TLV (United States, 3/2020). Absorbed through skin. STEL: 50 ppm 15 minutes. TWA: 20 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 200 mg/m ³ 8 hours. TWA: 50 ppm 8 hours.
3-aminomethyl-3,5,5-trimethylcyclohexylamine	None.
4-nonylphenol, branched	None.
4,4'-Isopropylidenediphenol, oligomeric reaction products with 1-chloro-	None.
2,3-epoxypropane, reaction products with 3-aminomethyl-	
3,5,5-trimethylcyclohexylamine	
2-methylpropan-1-ol	ACGIH TLV (United States, 3/2020). TWA: 152 mg/m ³ 8 hours. TWA: 50 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 300 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.
2,4,6-tris(dimethylaminomethyl)phenol	None.
salicylic acid	None.

Key to abbreviations

A	= Acceptable Maximum Peak	S	= Potential skin absorption
ACGIH	= American Conference of Governmental Industrial Hygienists.	SR	= Respiratory sensitization
C	= Ceiling Limit	SS	= Skin sensitization
F	= Fume	STEL	= Short term Exposure limit values
IPEL	= Internal Permissible Exposure Limit	TD	= Total dust
OSHA	= Occupational Safety and Health Administration.	TLV	= Threshold Limit Value
R	= Respirable	TWA	= Time Weighted Average
Z	= OSHA 29 CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances		

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Section 8. Exposure controls/personal protection

Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Chemical splash goggles and face shield.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Gloves	: butyl rubber
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.

Section 9. Physical and chemical properties

Appearance

Physical state	: Liquid.
Color	: Colorless.
Odor	: Amine-like. [Strong]
Odor threshold	: Not available.
pH	: Not applicable.
Melting point	: Not available.
Boiling point	: >37.78°C (>100°F)
Flash point	: Closed cup: 37°C (98.6°F)
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Evaporation rate	: Not available.

Section 9. Physical and chemical properties

Vapor pressure	: Not available.
Vapor density	: Not available.
Relative density	: 1.36
Density (lbs / gal)	: 11.35
Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water	: Not applicable.
Viscosity	: Kinematic (40°C (104°F)): >21 mm ² /s (>21 cSt)
Volatility	: 28% (v/v), 17.186% (w/w)
% Solid. (w/w)	: 82.814

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Hazardous decomposition products	: Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds metal oxide/oxides

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
4-methylpentan-2-one	LC50 Inhalation Vapor	Rat	12.3 mg/l	4 hours
	LD50 Dermal	Rabbit	>5000 mg/kg	-
	LD50 Oral	Rat	2.08 g/kg	-
benzyl alcohol	LC50 Inhalation Dusts and mists	Rat	>4178 mg/m ³	4 hours
	LD50 Dermal	Rabbit	2000 mg/kg	-
	LD50 Oral	Rat	1.23 g/kg	-
cyclohexanone	LC50 Inhalation Gas.	Rat	8000 ppm	4 hours
	LC50 Inhalation Vapor	Rat	11 mg/l	4 hours
	LD50 Dermal	Rabbit	1100 mg/kg	-
	LD50 Oral	Rat	1.62 g/kg	-
3-aminomethyl-3,5,5-trimethylcyclohexylamine	LC50 Inhalation Dusts and mists	Rat	>5.01 mg/l	4 hours
	LD50 Dermal	Rat	>2000 mg/kg	-

Section 11. Toxicological information

4-nonylphenol, branched	LD50 Oral	Rat	1030 mg/kg	-
	LD50 Dermal	Rabbit	2.14 g/kg	-
2-methylpropan-1-ol	LD50 Oral	Rat	1300 mg/kg	-
	LC50 Inhalation Vapor	Rat	24.6 mg/l	4 hours
	LD50 Dermal	Rabbit	2460 mg/kg	-
2,4,6-tris	LD50 Oral	Rat	2830 mg/kg	-
(dimethylaminomethyl)phenol	LD50 Dermal	Rabbit	1.28 g/kg	-
	LD50 Dermal	Rat	1280 mg/kg	-
	LD50 Oral	Rat	1200 mg/kg	-
salicylic acid	LD50 Oral	Rat	0.891 g/kg	-

Conclusion/Summary : There are no data available on the mixture itself.

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
4-nonylphenol, branched	Skin - Erythema/Eschar	Rabbit	4	-	-
2,4,6-tris (dimethylaminomethyl)phenol	Skin - Visible necrosis	Rabbit	-	4 hours	7 days

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Eyes : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Sensitization

Product/ingredient name	Route of exposure	Species	Result
3-aminomethyl- 3,5,5-trimethylcyclohexylamine	skin	Guinea pig	Sensitizing
2,4,6-tris (dimethylaminomethyl)phenol	skin	Guinea pig	Sensitizing

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Mutagenicity

Conclusion/Summary : There are no data available on the mixture itself.

Carcinogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Classification

Product/ingredient name	OSHA	IARC	NTP
4-methylpentan-2-one	-	2B	-
cyclohexanone	-	3	-

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4

NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen

OSHA: +

Not listed/not regulated: -

Section 11. Toxicological information

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Talc, not containing asbestiform fibers	Category 3	-	Respiratory tract irritation
4-methylpentan-2-one	Category 3	-	Respiratory tract irritation
2-methylpropan-1-ol	Category 3	-	Respiratory tract irritation
	Category 3		Narcotic effects

Specific target organ toxicity (repeated exposure)

Not available.

Target organs

: Contains material which causes damage to the following organs: blood, liver, heart, brain, skin, central nervous system (CNS).
Contains material which may cause damage to the following organs: kidneys, lungs, the reproductive system, cardiovascular system, upper respiratory tract, bones, eye, lens or cornea.

Aspiration hazard

Not available.

Information on the likely routes of exposure

Potential acute health effects

Eye contact : Causes serious eye damage.

Inhalation : Harmful if inhaled. May cause respiratory irritation.

Skin contact : Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.

Ingestion : Corrosive to the digestive tract. Causes burns.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:
pain
watering
redness

Inhalation : Adverse symptoms may include the following:
respiratory tract irritation
coughing
reduced fetal weight
increase in fetal deaths
skeletal malformations

Section 11. Toxicological information

Skin contact : Adverse symptoms may include the following:

pain or irritation
redness
dryness
cracking
blistering may occur
reduced fetal weight
increase in fetal deaths
skeletal malformations

Ingestion : Adverse symptoms may include the following:

stomach pains
reduced fetal weight
increase in fetal deaths
skeletal malformations

Delayed and immediate effects and also chronic effects from short and long term exposure

Conclusion/Summary : There are no data available on the mixture itself. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Long term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : Suspected of damaging fertility or the unborn child.

Numerical measures of toxicity

Acute toxicity estimates

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

Product code 000001065894

14. Transport information

	DOT	IMDG	IATA
UN number	UN3469	UN3469	UN3469
UN proper shipping name	PAINT, FLAMMABLE, CORROSIVE	PAINT, FLAMMABLE, CORROSIVE	PAINT, FLAMMABLE, CORROSIVE
Transport hazard class(es)	3(8)	3(8)	3(8)
Packing group	III	III	III
Environmental hazards	No.	Yes.	Yes. The environmentally hazardous substance mark is not required.
Marine pollutant substances	Not applicable.	(4-nonylphenol, branched)	Not applicable.
Product RQ (lbs)	48637.6	Not applicable.	Not applicable.
RQ substances	(4-methylpentan-2-one)	Not applicable.	Not applicable.

Additional information

- DOT** : Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ (reportable quantity) transportation requirements.
- IMDG** : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- IATA** : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not applicable.

Section 15. Regulatory information

United States

United States inventory (TSCA 8b) : At least one component is inactive.

United States - TSCA 12(b) - Chemical export notification:

4-nonylphenol, branched

One time notification

United States - TSCA 5(a)2 - Proposed significant new use rules:

4-nonylphenol, branched

SAFETY DATA SHEET

Date of issue/Date of revision 26 July 2021

Version 22

Section 1. Identification

Product name : AMERLOCK 2/400 PEARL GRAY RESIN

Product code : 00333561

Other means of identification : Not available.

Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Product use : Professional applications, Used by spraying.

**Use of the substance/
mixture** : Coating.

Uses advised against : Not applicable.

Manufacturer : PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272

**Emergency telephone
number** : (412) 434-4515 (U.S.)
(514) 645-1320 (Canada)
SETIQ Interior de la República: 800-00-214-00 (México)
SETIQ Ciudad de México: (55) 5559-1588 (México)

Technical Phone Number : 888-977-4762

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Classification of the
substance or mixture** : FLAMMABLE LIQUIDS - Category 3
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
SKIN SENSITIZATION - Category 1
CARCINOGENICITY - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract
irritation) - Category 3
Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 31.8%
(dermal), 90% (inhalation)

Section 2. Hazards identification

This product contains TiO₂ which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many PPG products, TiO₂ is utilized as a raw material in a liquid coating formulation. In this case, the TiO₂ particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO₂ when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8).

GHS label elements

Hazard pictograms

Signal word

: Warning

Hazard statements

: Flammable liquid and vapor.
Causes skin irritation.
May cause an allergic skin reaction.
Causes serious eye irritation.
May cause respiratory irritation.
Suspected of causing cancer.

Precautionary statements

Prevention

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Response

: IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Wash contaminated clothing before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

Storage

: Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

: Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified

: Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Product name : AMERLOCK 2/400 PEARL GRAY RESIN

Ingredient name	%	CAS number
bis-[4-(2,3-epoxipropoxy)phenyl]propane	≥50 - ≤75	1675-54-3
Talc, not containing asbestiform fibers	≥20 - ≤50	14807-96-6
titanium dioxide	≥1.0 - ≤5.0	13463-67-7
Solvent naphtha (petroleum), light aromatic	≥1.0 - ≤5.0	64742-95-6
1,2,4-trimethylbenzene	≥1.0 - ≤3.0	95-63-6

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

- Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
- Inhalation** : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- Skin contact** : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
- Ingestion** : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : May cause respiratory irritation.
- Skin contact** : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
- Ingestion** : No known significant effects or critical hazards.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following:
pain or irritation
watering
redness
- Inhalation** : Adverse symptoms may include the following:
respiratory tract irritation
coughing

Section 4. First aid measures

- Skin contact** : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
- Ingestion** : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable extinguishing media** : Do not use water jet.

- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon oxides
metal oxide/oxides

- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Section 7. Handling and storage

- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
bis-[4-(2,3-epoxipropoxy)phenyl]propane Talc, not containing asbestiform fibers	None. ACGIH TLV (United States, 3/2020). TWA: 2 mg/m ³ 8 hours. Form: Respirable OSHA PEL Z3 (United States). TWA: 2 mg/m ³
titanium dioxide	OSHA PEL (United States, 5/2018). TWA: 15 mg/m ³ 8 hours. Form: Total dust ACGIH TLV (United States, 3/2020). TWA: 10 mg/m ³ 8 hours.
Solvent naphtha (petroleum), light aromatic 1,2,4-trimethylbenzene	None. ACGIH TLV (United States, 3/2020). TWA: 123 mg/m ³ 8 hours. TWA: 25 ppm 8 hours.

Key to abbreviations

A	= Acceptable Maximum Peak
ACGIH	= American Conference of Governmental Industrial Hygienists.
C	= Ceiling Limit
F	= Fume
IPEL	= Internal Permissible Exposure Limit
OSHA	= Occupational Safety and Health Administration.
R	= Respirable
Z	= OSHA 29 CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances

S	= Potential skin absorption
SR	= Respiratory sensitization
SS	= Skin sensitization
STEL	= Short term Exposure limit values
TD	= Total dust
TLV	= Threshold Limit Value
TWA	= Time Weighted Average

Consult local authorities for acceptable exposure limits.

Section 8. Exposure controls/personal protection

- Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.
- Appropriate engineering controls** : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
- Individual protection measures**
- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Eye/face protection** : Chemical splash goggles.
- Skin protection**
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Gloves** : butyl rubber
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.

Section 9. Physical and chemical properties

Appearance

Physical state	: Liquid.
Color	: Gray.
Odor	: Characteristic.
Odor threshold	: Not available.
pH	: Not applicable.
Melting point	: Not available.
Boiling point	: >37.78°C (>100°F)
Flash point	: Closed cup: 55°C (131°F)
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Evaporation rate	: 0.32 (butyl acetate = 1)
Vapor pressure	: 1 kPa (7.8 mm Hg)
Vapor density	: Not available.
Relative density	: 1.43
Density (lbs / gal)	: 11.93
Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water	: Not applicable.
Viscosity	: Kinematic (40°C (104°F)): >21 mm ² /s (>21 cSt)
Volatility	: 10% (v/v), 6.285% (w/w)
% Solid. (w/w)	: 93.715

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Hazardous decomposition products	: Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
bis-[4-(2,3-epoxipropoxy)phenyl]propane	LD50 Dermal	Rabbit	23000 mg/kg	-
titanium dioxide	LD50 Oral	Rat	15000 mg/kg	-
	LC50 Inhalation Dusts and mists	Rat	>6.82 mg/l	4 hours
	LD50 Dermal	Rabbit	>5000 mg/kg	-
	LD50 Oral	Rat	>5000 mg/kg	-
Solvent naphtha (petroleum), light aromatic	LD50 Dermal	Rabbit	3.48 g/kg	-
1,2,4-trimethylbenzene	LD50 Oral	Rat	8400 mg/kg	-
	LC50 Inhalation Vapor	Rat	18000 mg/m ³	4 hours
	LD50 Oral	Rat	5 g/kg	-

Conclusion/Summary : There are no data available on the mixture itself.

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
bis-[4-(2,3-epoxipropoxy)phenyl]propane	Eyes - Redness of the conjunctivae	Rabbit	0.4	24 hours	-
	Eyes - Mild irritant	Rabbit	-	24 hours	-
	Skin - Erythema/Eschar	Rabbit	0.8	4 hours	-
	Skin - Edema	Rabbit	0.5	4 hours	-
	Skin - Mild irritant	Rabbit	-	4 hours	-

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Eyes : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Sensitization

Product/ingredient name	Route of exposure	Species	Result
bis-[4-(2,3-epoxipropoxy)phenyl]propane	skin	Mouse	Sensitizing

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Mutagenicity

Conclusion/Summary : There are no data available on the mixture itself.

Carcinogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Classification

Section 11. Toxicological information

bis-[4-(2,3-epoxipropoxy)phenyl]propane	-	3	-
titanium dioxide	-	2B	-

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4

NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen

OSHA: +

Not listed/not regulated: -

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Talc, not containing asbestiform fibers	Category 3	-	Respiratory tract irritation
Solvent naphtha (petroleum), light aromatic	Category 3	-	Respiratory tract irritation
1,2,4-trimethylbenzene	Category 3 Category 3	-	Narcotic effects Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Not available.

Target organs

: Contains material which causes damage to the following organs: brain, central nervous system (CNS).
Contains material which may cause damage to the following organs: blood, lungs, cardiovascular system, upper respiratory tract, skin, eyes.

Aspiration hazard

Name	Result
Solvent naphtha (petroleum), light aromatic	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure

Potential acute health effects

Eye contact : Causes serious eye irritation.
Inhalation : May cause respiratory irritation.
Skin contact : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:
pain or irritation
watering
redness

Section 11. Toxicological information

Inhalation : Adverse symptoms may include the following:
respiratory tract irritation
coughing

Skin contact : Adverse symptoms may include the following:
irritation
redness
dryness
cracking

Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Conclusion/Summary : There are no data available on the mixture itself. This product contains TiO₂ which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many PPG products, TiO₂ is utilized as a raw material in a liquid coating formulation. In this case, the TiO₂ particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO₂ when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Long term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been

Section 13. Disposal considerations

cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

14. Transport information

	DOT	IMDG	IATA
UN number	UN1263	UN1263	UN1263
UN proper shipping name	PAINT	PAINT	PAINT
Transport hazard class(es)	3	3	3
Packing group	III	III	III
Environmental hazards	No.	Yes.	Yes. The environmentally hazardous substance mark is not required.
Marine pollutant substances	Not applicable.	(bis-[4-(2,3-epoxipropoxy)phenyl]propane, Solvent naphtha (petroleum), light aromatic)	Not applicable.

Additional information

- DOT** : This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal) of combustible liquids are not regulated as hazardous materials.
- IMDG** : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- IATA** : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not applicable.

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Classification of the
substance or mixture** : FLAMMABLE LIQUIDS - Category 3
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
SKIN SENSITIZATION - Category 1
CARCINOGENICITY - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract
irritation) - Category 3
Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 20.9%
(dermal), 80.7% (inhalation)

Section 2. Hazards identification

This product contains TiO₂ which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many PPG products, TiO₂ is utilized as a raw material in a liquid coating formulation. In this case, the TiO₂ particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO₂ when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8).

GHS label elements

Hazard pictograms

Signal word

: Warning

Hazard statements

: Flammable liquid and vapor.
Causes skin irritation.
May cause an allergic skin reaction.
Causes serious eye irritation.
May cause respiratory irritation.
Suspected of causing cancer.

Precautionary statements

Prevention

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Response

: IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Wash contaminated clothing before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

Storage

: Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

: Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified

: Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Product name : AMERLOCK 2/400 LIGHT TINT RESIN

Ingredient name	%	CAS number
bis-[4-(2,3-epoxipropoxy)phenyl]propane	≥50 - ≤75	1675-54-3
Talc, not containing asbestiform fibers	≥10 - ≤20	14807-96-6
titanium dioxide	≥10 - ≤20	13463-67-7
Solvent naphtha (petroleum), light aromatic	≥1.0 - ≤5.0	64742-95-6
1,2,4-trimethylbenzene	≥1.0 - ≤5.0	95-63-6

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

- Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
- Inhalation** : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- Skin contact** : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
- Ingestion** : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : May cause respiratory irritation.
- Skin contact** : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
- Ingestion** : No known significant effects or critical hazards.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following:
pain or irritation
watering
redness
- Inhalation** : Adverse symptoms may include the following:
respiratory tract irritation
coughing

Section 4. First aid measures

- Skin contact** : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
- Ingestion** : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable extinguishing media** : Do not use water jet.

- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon oxides
metal oxide/oxides

- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Section 7. Handling and storage

- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
 Bis-[4-(2,3-epoxipropoxy)phenyl]propane Talc, not containing asbestiform fibers	None. ACGIH TLV (United States, 3/2020). TWA: 2 mg/m ³ 8 hours. Form: Respirable
titanium dioxide	OSHA PEL Z3 (United States). TWA: 2 mg/m ³ OSHA PEL (United States, 5/2018). TWA: 15 mg/m ³ 8 hours. Form: Total dust ACGIH TLV (United States, 3/2020). TWA: 10 mg/m ³ 8 hours.
Solvent naphtha (petroleum), light aromatic 1,2,4-trimethylbenzene	None. ACGIH TLV (United States, 3/2020). TWA: 123 mg/m ³ 8 hours. TWA: 25 ppm 8 hours.

Key to abbreviations

A	= Acceptable Maximum Peak
ACGIH	= American Conference of Governmental Industrial Hygienists.
C	= Ceiling Limit
F	= Fume
IPEL	= Internal Permissible Exposure Limit
OSHA	= Occupational Safety and Health Administration.
R	= Respirable
Z	= OSHA 29 CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances

S	= Potential skin absorption
SR	= Respiratory sensitization
SS	= Skin sensitization
STEL	= Short term Exposure limit values
TD	= Total dust
TLV	= Threshold Limit Value
TWA	= Time Weighted Average

Consult local authorities for acceptable exposure limits.

Section 8. Exposure controls/personal protection

- Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.
- Appropriate engineering controls** : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
- Individual protection measures**
- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Eye/face protection** : Chemical splash goggles.
- Skin protection**
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Gloves** : butyl rubber
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.

Section 9. Physical and chemical properties

Appearance

Physical state	: Liquid.
Color	: Not available.
Odor	: Characteristic.
Odor threshold	: Not available.
pH	: Not applicable.
Melting point	: Not available.
Boiling point	: >37.78°C (>100°F)
Flash point	: Closed cup: 55°C (131°F)
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Evaporation rate	: 0.36 (butyl acetate = 1)
Vapor pressure	: 1.1 kPa (8 mm Hg)
Vapor density	: Not available.
Relative density	: 1.46
Density (lbs / gal)	: 12.18
Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water	: Not applicable.
Viscosity	: Kinematic (40°C (104°F)): >21 mm ² /s (>21 cSt)
Volatility	: 9% (v/v), 5.151% (w/w)
% Solid. (w/w)	: 94.849

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Hazardous decomposition products	: Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
bis-[4-(2,3-epoxipropoxy)phenyl]propane	LD50 Dermal	Rabbit	23000 mg/kg	-
titanium dioxide	LD50 Oral	Rat	15000 mg/kg	-
	LC50 Inhalation Dusts and mists	Rat	>6.82 mg/l	4 hours
	LD50 Dermal	Rabbit	>5000 mg/kg	-
	LD50 Oral	Rat	>5000 mg/kg	-
Solvent naphtha (petroleum), light aromatic	LD50 Dermal	Rabbit	3.48 g/kg	-
1,2,4-trimethylbenzene	LD50 Oral	Rat	8400 mg/kg	-
	LC50 Inhalation Vapor	Rat	18000 mg/m ³	4 hours
	LD50 Oral	Rat	5 g/kg	-

Conclusion/Summary : There are no data available on the mixture itself.

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
bis-[4-(2,3-epoxipropoxy)phenyl]propane	Eyes - Redness of the conjunctivae	Rabbit	0.4	24 hours	-
	Eyes - Mild irritant	Rabbit	-	24 hours	-
	Skin - Erythema/Eschar	Rabbit	0.8	4 hours	-
	Skin - Edema	Rabbit	0.5	4 hours	-
	Skin - Mild irritant	Rabbit	-	4 hours	-

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Eyes : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Sensitization

Product/ingredient name	Route of exposure	Species	Result
bis-[4-(2,3-epoxipropoxy)phenyl]propane	skin	Mouse	Sensitizing

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Mutagenicity

Conclusion/Summary : There are no data available on the mixture itself.

Carcinogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Classification

Section 11. Toxicological information

Product/ingredient name	OSHA	IARC	NTP
<div> <div></div> <div> bis-[4-(2,3-epoxipropoxy)phenyl]propane titanium dioxide </div> </div>	-	3	-
	-	2B	-

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4

NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen

OSHA: +

Not listed/not regulated: -

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Talc, not containing asbestiform fibers	Category 3	-	Respiratory tract irritation
Solvent naphtha (petroleum), light aromatic	Category 3	-	Respiratory tract irritation
1,2,4-trimethylbenzene	Category 3	-	Narcotic effects
	Category 3	-	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Not available.

Target organs

: Contains material which causes damage to the following organs: brain, central nervous system (CNS).
 Contains material which may cause damage to the following organs: blood, lungs, cardiovascular system, upper respiratory tract, skin, eyes.

Aspiration hazard

Name	Result
Solvent naphtha (petroleum), light aromatic	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure

Potential acute health effects

Eye contact : Causes serious eye irritation.
Inhalation : May cause respiratory irritation.
Skin contact : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:
 pain or irritation
 watering
 redness

Section 11. Toxicological information

Inhalation : Adverse symptoms may include the following:
respiratory tract irritation
coughing

Skin contact : Adverse symptoms may include the following:
irritation
redness
dryness
cracking

Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Conclusion/Summary : There are no data available on the mixture itself. This product contains TiO₂ which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many PPG products, TiO₂ is utilized as a raw material in a liquid coating formulation. In this case, the TiO₂ particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO₂ when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Long term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Section 11. Toxicological information

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapors) (mg/l)	Inhalation (dusts and mists) (mg/l)

Persistence and degradability

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
bis-[4-(2,3-epoxipropoxy)phenyl]propane	-	-	Not readily

Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
1,2,4-trimethylbenzene	3.63	120.23	low

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been

Section 13. Disposal considerations

cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

14. Transport information

	DOT	IMDG	IATA
UN number	UN1263	UN1263	UN1263
UN proper shipping name	PAINT	PAINT	PAINT
Transport hazard class(es)	3	3	3
Packing group	III	III	III
Environmental hazards	No.	Yes.	Yes. The environmentally hazardous substance mark is not required.
Marine pollutant substances	Not applicable.	(bis-[4-(2,3-epoxipropoxy)phenyl]propane, Solvent naphtha (petroleum), light aromatic)	Not applicable.

Additional information

- DOT** : This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal) of combustible liquids are not regulated as hazardous materials.
- IMDG** : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- IATA** : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not applicable.

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Classification of the
substance or mixture** : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (inhalation) - Category 4
RESPIRATORY SENSITIZATION - Category 1
SKIN SENSITIZATION - Category 1
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 1% (dermal), 1.8% (inhalation)

GHS label elements

Section 2. Hazards identification

Hazard pictograms

:

**Signal word**

: Danger

Hazard statements

: Flammable liquid and vapor.
May cause an allergic skin reaction.
Harmful if inhaled.
May cause allergy or asthma symptoms or breathing difficulties if inhaled.
May cause respiratory irritation.
May cause drowsiness or dizziness.

Precautionary statements**Prevention**

: Wear protective gloves, protective clothing and eye or face protection. Wear respiratory protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Contaminated work clothing must not be allowed out of the workplace.

Response

: IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. If experiencing respiratory symptoms: Call a POISON CENTER or doctor. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Wash contaminated clothing before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention.

Storage

: Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

: Moisture-sensitive material. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Skin contact to isocyanate monomer may lead to allergic lung reaction. Based on the properties of the isocyanate components and considering toxicological data on similar mixtures, this mixture may cause acute irritation and/or sensitization of the respiratory system, leading to an asthmatic condition, wheezing and tightness of the chest. Sensitized persons may subsequently show asthmatic symptoms when exposed to atmospheric concentrations well below the OEL. Repeated exposure may lead to permanent respiratory disability. Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified

: Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Product name : AMERCOAT 450H CURE

Ingredient name	%	CAS number
Hexamethylene diisocyanate, oligomers (isocyanurate type)	≥50 - ≤75	28182-81-2
n-butyl acetate	≥20 - ≤50	123-86-4
Solvent naphtha (petroleum), light aromatic	≥1.0 - ≤3.5	64742-95-6
1,2,4-trimethylbenzene	≤2.0	95-63-6
hexamethylene-di-isocyanate	<1.0	822-06-0

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

- Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
- Inhalation** : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- Skin contact** : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
- Ingestion** : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : No known significant effects or critical hazards.
- Inhalation** : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- Skin contact** : Defatting to the skin. May cause skin dryness and irritation. May cause an allergic skin reaction.
- Ingestion** : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

- Eye contact** : No specific data.

Section 4. First aid measures

- Inhalation** : Adverse symptoms may include the following:
respiratory tract irritation
coughing
wheezing and breathing difficulties
asthma
nausea or vomiting
headache
drowsiness/fatigue
dizziness/vertigo
unconsciousness
- Skin contact** : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
- Ingestion** : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable extinguishing media** : Do not use water jet.

- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon oxides
nitrogen oxides
Cyanate and isocyanate.
hydrogen cyanide

Section 5. Fire-fighting measures

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
- Special provisions** : Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Place in a suitable container. The contaminated area should be cleaned immediately with a suitable decontaminant. One possible (flammable) decontaminant comprises (by volume): water (45 parts), ethanol or isopropyl alcohol (50 parts) and concentrated (d: 0,880) ammonia solution (5 parts). A non-flammable alternative is sodium carbonate (5 parts) and water (95 parts). Add the same decontaminant to the remnants and let stand for several days until no further reaction in an unsealed container. Once this stage is reached, close container and dispose of according to local regulations (see section 13). Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Precautions should be taken to minimize exposure to atmospheric humidity or water. CO₂ will be formed, which, in closed containers, could result in pressurization.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Hexamethylene diisocyanate, oligomers (isocyanurate type)	IPEL (-). TWA: 0.5 mg/m ³ STEL: 1 mg/m ³
n-butyl acetate	OSHA PEL (United States, 5/2018). TWA: 710 mg/m ³ 8 hours. TWA: 150 ppm 8 hours. ACGIH TLV (United States, 3/2020). STEL: 150 ppm 15 minutes. TWA: 50 ppm 8 hours.
Solvent naphtha (petroleum), light aromatic	None.

Section 8. Exposure controls/personal protection

1,2,4-trimethylbenzene

ACGIH TLV (United States, 3/2020).TWA: 123 mg/m³ 8 hours.

TWA: 25 ppm 8 hours.

hexamethylene-di-isocyanate

ACGIH TLV (United States, 3/2020).TWA: 0.03 mg/m³ 8 hours.

TWA: 0.005 ppm 8 hours.

OSHA PEL (United States, 5/2018).**Absorbed through skin.**TWA: 5 mg/m³, (as CN) 8 hours.

Key to abbreviations

A = Acceptable Maximum Peak
 ACGIH = American Conference of Governmental Industrial Hygienists.
 C = Ceiling Limit
 F = Fume
 IPEL = Internal Permissible Exposure Limit
 OSHA = Occupational Safety and Health Administration.
 R = Respirable
 Z = OSHA 29 CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances

S = Potential skin absorption
 SR = Respiratory sensitization
 SS = Skin sensitization
 STEL = Short term Exposure limit values
 TD = Total dust
 TLV = Threshold Limit Value
 TWA = Time Weighted Average

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Safety glasses with side shields.

Skin protection

Section 8. Exposure controls/personal protection

Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Gloves	: butyl rubber
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: <input checked="" type="checkbox"/> Use an air-fed respirator unless a site-specific assessment determines that an air-fed respirator is not necessary, in which case the results of the risk assessment should be utilized to determine whether respiratory protection is necessary and what type of protection is appropriate. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. The respiratory protection shall be in accordance to 29 CFR 1910.134.
Restrictions on use	: Persons with a history of asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used.

Section 9. Physical and chemical properties

Appearance

Physical state	: Liquid.
Color	: Not available.
Odor	: Characteristic.
Odor threshold	: Not available.
pH	: <input checked="" type="checkbox"/> Not applicable.
Melting point	: Not available.
Boiling point	: >37.78°C (>100°F)
Flash point	: Closed cup: 33.33°C (92°F)
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Evaporation rate	: 0.93 (butyl acetate = 1)
Vapor pressure	: <input checked="" type="checkbox"/> 1.4 kPa (10.7 mm Hg)
Vapor density	: Not available.
Relative density	: 1.03
Density (lbs / gal)	: 8.6

Section 9. Physical and chemical properties

Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water	: <input checked="" type="checkbox"/> Not applicable.
Viscosity	: <input checked="" type="checkbox"/> Kinematic (40°C (104°F)): >21 mm ² /s (>21 cSt)
Volatility	: 45% (v/v), 38.423% (w/w)
% Solid. (w/w)	: 61.577

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: In a fire, hazardous decomposition products may be produced. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from: oxidizing agents, strong alkalis, strong acids, amines, alcohols, water. Uncontrolled exothermic reactions occur with amines and alcohols.
Hazardous decomposition products	: <input checked="" type="checkbox"/> Depending on conditions, decomposition products may include the following materials: Cyanate and isocyanate. carbon oxides nitrogen oxides hydrogen cyanide

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
<input checked="" type="checkbox"/> Hexamethylene diisocyanate, oligomers (isocyanurate type)	LD50 Dermal	Rabbit	>2000 mg/kg	-
n-butyl acetate	LD50 Oral	Rat - Female	>2500 mg/kg	-
	LC50 Inhalation Vapor	Rat	>21.1 mg/l	4 hours
	LC50 Inhalation Vapor	Rat	2000 ppm	4 hours
	LD50 Dermal	Rabbit	>17600 mg/kg	-

Section 11. Toxicological information

Conclusion/Summary : There are no data available on the mixture itself.

Irritation/Corrosion

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Eyes : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Sensitization

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Mutagenicity

Conclusion/Summary : There are no data available on the mixture itself.

Carcinogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Hexamethylene diisocyanate, oligomers (isocyanurate type)	Category 3	-	Respiratory tract irritation
n-butyl acetate	Category 3	-	Narcotic effects
Solvent naphtha (petroleum), light aromatic	Category 3	-	Respiratory tract irritation
1,2,4-trimethylbenzene	Category 3	-	Narcotic effects
hexamethylene-di-isocyanate	Category 3	-	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Not available.

Target organs

: Contains material which causes damage to the following organs: brain, central nervous system (CNS).

Contains material which may cause damage to the following organs: blood, lungs, upper respiratory tract, skin, eye, lens or cornea.

Aspiration hazard

Name	Result
Solvent naphtha (petroleum), light aromatic	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure

Potential acute health effects

Section 11. Toxicological information

- Eye contact** : No known significant effects or critical hazards.
- Inhalation** : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- Skin contact** : Defatting to the skin. May cause skin dryness and irritation. May cause an allergic skin reaction.
- Ingestion** : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

- Eye contact** : No specific data.
- Inhalation** : Adverse symptoms may include the following:
respiratory tract irritation
coughing
wheezing and breathing difficulties
asthma
nausea or vomiting
headache
drowsiness/fatigue
dizziness/vertigo
unconsciousness
- Skin contact** : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
- Ingestion** : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

- Conclusion/Summary** : There are no data available on the mixture itself. Skin contact to isocyanate monomer may lead to allergic lung reaction. Based on the properties of the isocyanate components and considering toxicological data on similar mixtures, this mixture may cause acute irritation and/or sensitization of the respiratory system, leading to an asthmatic condition, wheezing and tightness of the chest. Repeated exposure may lead to permanent respiratory disability. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

- Potential immediate effects** : There are no data available on the mixture itself.
- Potential delayed effects** : There are no data available on the mixture itself.

Long term exposure

Section 11. Toxicological information

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapors) (mg/l)	Inhalation (dusts and mists) (mg/l)

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

The information contained in this data sheet is based on present scientific and technical knowledge. The purpose of this information is to draw attention to the health and safety aspects concerning the products supplied by PPG, and to recommend precautionary measures for the storage and handling of the products. No warranty or guarantee is given in respect of the properties of the products. No liability can be accepted for any failure to observe the precautionary measures described in this data sheet or for any misuse of the products.

SAFETY DATA SHEET

Date of issue/Date of revision 7 November 2015

Version 4

Section 1. Identification

Product name : ACRYLIC LACQUER THINNER
Product code : DTL16
Other means of identification : Not available.
Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Product use : Industrial applications.
Use of the substance/ mixture : Coating. Paints. Painting-related materials.
Uses advised against : Not applicable.

Supplier : PPG Industries, Inc.
One PPG Place,
Pittsburgh, PA 15272
Emergency telephone number : (412) 434-4515 (U.S.)
(514) 645-1320 (Canada)
01-800-00-21-400 (Mexico)
Technical Phone Number : 1-800-647-6050

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture :  FLAMMABLE LIQUIDS - Category 2
ACUTE TOXICITY (oral) - Category 4
SKIN CORROSION/IRRITATION - Category 2
SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A
CARCINOGENICITY - Category 2
TOXIC TO REPRODUCTION (Unborn child) - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (central nervous system (CNS), hearing organs, kidneys and liver) - Category 2

GHS label elements

Section 2. Hazards identification

Signal word : Danger

Hazard statements :

- Highly flammable liquid and vapor.
- Harmful if swallowed.
- Causes serious eye irritation.
- Causes skin irritation.
- Suspected of damaging the unborn child.
- Suspected of causing cancer.
- May cause respiratory irritation.
- May cause drowsiness and dizziness.
- May cause damage to organs through prolonged or repeated exposure. (central nervous system (CNS), hearing organs, kidneys, liver)

Precautionary statements

Prevention :

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.

Response :

Get medical attention if you feel unwell. IF exposed or concerned: Get medical attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements :

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified :

Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Product name : ACRYLIC LACQUER THINNER

Ingredient name	%	CAS number
acetone	≥33 - <50	67-64-1
isobutyl acetate	≥10 - <25	110-19-0
Isopropyl alcohol	≥9.2 - <25	67-63-0
toluene	≥8.4 - <25	108-88-3
Solvent naphtha (petroleum), light aliph.	≥7 - <25	64742-89-8
heptane	≥3 - <25	142-82-5
methylcyclohexane	≥7 - <25	108-87-2
xylene	≥6.1 - <25	1330-20-7
2-methoxy-1-methylethyl acetate	≥0.1 - <25	108-65-6
ethylbenzene	≥1.1 - <4.5	100-41-4

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

- Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
- Inhalation** : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- Skin contact** : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
- Ingestion** : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation.
- Skin contact** : Causes skin irritation. Defatting to the skin.
- Ingestion** : Harmful if swallowed. Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

Section 4. First aid measures

Eye contact : Adverse symptoms may include the following:
pain or irritation
watering
redness

Inhalation : Adverse symptoms may include the following:
respiratory tract irritation
coughing
nausea or vomiting
headache
drowsiness/fatigue
dizziness/vertigo
unconsciousness
reduced fetal weight
increase in fetal deaths
skeletal malformations

Skin contact : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
reduced fetal weight
increase in fetal deaths
skeletal malformations

Ingestion : Adverse symptoms may include the following:
reduced fetal weight
increase in fetal deaths
skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO₂, water spray (fog) or foam.

Unsuitable extinguishing media : Do not use water jet.

Section 5. Fire-fighting measures

- Specific hazards arising from the chemical** : Highly flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 6. Accidental release measures

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
acetone	ACGIH TLV (United States, 4/2014). STEL: 1782 mg/m ³ 15 minutes. STEL: 750 ppm 15 minutes. TWA: 1188 mg/m ³ 8 hours. TWA: 500 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 2400 mg/m ³ 8 hours. TWA: 1000 ppm 8 hours.

Section 8. Exposure controls/personal protection

isobutyl acetate	ACGIH TLV (United States, 4/2014). TWA: 713 mg/m ³ 8 hours. TWA: 150 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 700 mg/m ³ 8 hours. TWA: 150 ppm 8 hours.
Isopropyl alcohol	ACGIH TLV (United States, 4/2014). STEL: 400 ppm 15 minutes. TWA: 200 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 980 mg/m ³ 8 hours. TWA: 400 ppm 8 hours.
toluene	OSHA PEL Z2 (United States, 2/2013). AMP: 500 ppm 10 minutes. CEIL: 300 ppm TWA: 200 ppm 8 hours. ACGIH TLV (United States, 4/2014). TWA: 20 ppm 8 hours. None.
Solvent naphtha (petroleum), light aliph. heptane	ACGIH TLV (United States, 4/2014). STEL: 2050 mg/m ³ 15 minutes. STEL: 500 ppm 15 minutes. TWA: 1640 mg/m ³ 8 hours. TWA: 400 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 2000 mg/m ³ 8 hours. TWA: 500 ppm 8 hours.
methylcyclohexane	ACGIH TLV (United States, 4/2014). TWA: 1610 mg/m ³ 8 hours. TWA: 400 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 2000 mg/m ³ 8 hours. TWA: 500 ppm 8 hours.
xylene	ACGIH TLV (United States, 4/2014). STEL: 651 mg/m ³ 15 minutes. STEL: 150 ppm 15 minutes. TWA: 434 mg/m ³ 8 hours. TWA: 100 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 435 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.
2-methoxy-1-methylethyl acetate	IPEL (PPG, 4/2009). TWA: 50 ppm
ethylbenzene	ACGIH TLV (United States, 4/2014). TWA: 20 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 435 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.

Key to abbreviations

A = Acceptable Maximum Peak
ACGIH = American Conference of Governmental Industrial Hygienists.
C = Ceiling Limit

S = Potential skin absorption
SR = Respiratory sensitization
SS = Skin sensitization

Section 8. Exposure controls/personal protection

F = Fume
 IPEL = Internal Permissible Exposure Limit
 OSHA = Occupational Safety and Health Administration.
 R = Respirable
 Z = OSHA 29CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances

STEL = Short term Exposure limit values
 TD = Total dust
 TLV = Threshold Limit Value
 TWA = Time Weighted Average

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Chemical splash goggles.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Gloves : For prolonged or repeated handling, use the following type of gloves:

May be used: Chloroprene
 Recommended: butyl rubber, nitrile rubber

Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Section 8. Exposure controls/personal protection

Respiratory protection : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid.
Color : Not available.
Odor : Not available.
Odor threshold : Not available.
pH : Not available.
Melting point : Not available.
Boiling point : >37.78°C (>100°F)
Flash point : Closed cup: -12.22°C (10°F)
Material supports combustion. : Yes.
Auto-ignition temperature : Not available.
Decomposition temperature : Not available.
Flammability (solid, gas) : Not available.
Lower and upper explosive (flammable) limits : Lower: 1.9%
Evaporation rate : 5.31 (butyl acetate = 1)
Vapor pressure : 16.4 kPa (122.8 mm Hg) [room temperature]
Vapor density : Not available.
Relative density : 0.8
Density (lbs / gal) : 6.68
Solubility : Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water : Not available.
Viscosity : Kinematic (40°C (104°F)): >0.21 cm²/s (>21 cSt)
Volatility : 100% (v/v), 100% (w/w)
% Solid. (w/w) : 0

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Section 10. Stability and reactivity

Conditions to avoid : When exposed to high temperatures may produce hazardous decomposition products.
Refer to protective measures listed in sections 7 and 8.

Incompatible materials : Keep away from the following materials to prevent strong exothermic reactions:
oxidizing agents, strong alkalis, strong acids.

Hazardous decomposition products : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
acetone	LC50 Inhalation Vapor	Rat	76000 mg/m ³	4 hours

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4

NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen

OSHA: +

Not listed/not regulated: -

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Name	Category
acetone	Category 3
isobutyl acetate	Category 3
Isopropyl alcohol	Category 3
toluene	Category 3
Solvent naphtha (petroleum), light aliph.	Category 3
heptane	Category 3
methylcyclohexane	Category 3
xylene	Category 3

Specific target organ toxicity (repeated exposure)

Name	Category
toluene	Category 2
xylene	Category 2
ethylbenzene	Category 2

Target organs

: Contains material which causes damage to the following organs: brain, central nervous system (CNS).
Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, the reproductive system, liver, heart, spleen, gastrointestinal tract, upper respiratory tract, skin, ears, eye, lens or cornea.

Aspiration hazard

Section 11. Toxicological information

Name	Result
toluene Solvent naphtha (petroleum), light aliph. heptane methylcyclohexane xylene ethylbenzene	ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation.
- Skin contact** : Causes skin irritation. Defatting to the skin.
- Ingestion** : Harmful if swallowed. Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following:
 pain or irritation
 watering
 redness
- Inhalation** : Adverse symptoms may include the following:
 respiratory tract irritation
 coughing
 nausea or vomiting
 headache
 drowsiness/fatigue
 dizziness/vertigo
 unconsciousness
 reduced fetal weight
 increase in fetal deaths
 skeletal malformations
- Skin contact** : Adverse symptoms may include the following:
 irritation
 redness
 dryness
 cracking
 reduced fetal weight
 increase in fetal deaths
 skeletal malformations
- Ingestion** : Adverse symptoms may include the following:
 reduced fetal weight
 increase in fetal deaths
 skeletal malformations

Delayed and immediate effects and also chronic effects from short and long term exposure

Section 11. Toxicological information

Conclusion/Summary : There are no data available on the mixture itself. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Long term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : Suspected of damaging the unborn child.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value
Oral	1879.6 mg/kg
Dermal	17213.5 mg/kg
Inhalation (gases)	82671.8 ppm
Inhalation (vapors)	146.2 mg/l
Inhalation (dusts and mists)	19.94 mg/l

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
2-methoxy-1-methylethyl acetate	Acute LC50 161 mg/l Fresh water	Fish	96 hours
ethylbenzene	Acute LC50 150 to 200 mg/l Fresh water	Fish - Lepomis macrochirus - Young of the year	96 hours

Persistence and degradability

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
acetone	-	-	Readily
toluene	-	-	Readily
xylene	-	-	Readily
ethylbenzene	-	-	Readily

Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
acetone	-0.24	3	low
isobutyl acetate	1.78	-	low
Isopropyl alcohol	0.05	-	low

methylcyclohexane	3.61	186.21	low
xylene	3.16	7.4 to 18.5	low
2-methoxy-1-methylethyl acetate	0.56	-	low
ethylbenzene	3.15	79.43	low

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact

Product code DTL16**Date of issue** 7 November 2015 **Version** 4**Product name** ACRYLIC LACQUER THINNER

Section 13. Disposal considerations

with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

Environmental hazards	No.	Yes.	No.
Marine pollutant substances	Not applicable.	(methylcyclohexane, heptane)	Not applicable.
Product RQ (lbs)	1564.9	Not applicable.	Not applicable.
RQ substances	(xylene, toluene)	Not applicable.	Not applicable.

Additional information

- DOT** : Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ (reportable quantity) transportation requirements.
- IMDG** : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- IATA** : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 15. Regulatory information

United States

United States inventory (TSCA 8b) : All components are listed or exempted.**U.S. Federal regulations** :

SARA 302/304

SARA 304 RQ : Not applicable.

Composition/information on ingredients

No products were found.

SARA 311/312

Section 15. Regulatory information

Classification : Fire hazard
 Immediate (acute) health hazard
 Delayed (chronic) health hazard

Composition/information on ingredients

Name	Fire hazard	Sudden release of pressure	Reactive	Immediate (acute) health hazard	Delayed (chronic) health hazard
acetone	Yes.	No.	No.	Yes.	No.
isobutyl acetate	Yes.	No.	No.	Yes.	No.

ethylbenzene	Yes.	No.	No.	Yes.	Yes.

SARA 313

Supplier notification	Chemical name	CAS number	Concentration
	Isopropyl alcohol	67-63-0	5 - 10
	toluene	108-88-3	5 - 10
	xylene	1330-20-7	3 - 7
	ethylbenzene	100-41-4	0.5 - 1.5

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

Additional environmental information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

California Prop. 65

WARNING: This product contains a chemical known to the State of California to cause cancer and birth defects or other reproductive harm.

Section 16. Other information

Hazardous Material Information System (U.S.A.)

Health : 2 * **Flammability** : 3 **Physical hazards** : 0

(*) - Chronic effects

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.

National Fire Protection Association (U.S.A.)

Health : 2 **Flammability** : 3 **Instability** : 0

Date of previous issue : 8/14/2015

Section 16. Other information

Organization that prepared the MSDS : EHS

Key to abbreviations

: ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient
MARPOL 73/78 = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)
UN = United Nations

Disclaimer

The information contained in this data sheet is based on present scientific and technical knowledge. The purpose of this information is to draw attention to the health and safety aspects concerning the products supplied by PPG, and to recommend precautionary measures for the storage and handling of the products. No warranty or guarantee is given in respect of the properties of the products. No liability can be accepted for any failure to observe the precautionary measures described in this data sheet or for any misuse of the products.

SAFETY DATA SHEET

Date of issue/Date of revision 30 May 2021

Version 13

Section 1. Identification

Product name : THINNER 21-25

Product code : 00948780

Chemical name : Stoddard solvent

Other means of identification : Not available.

Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Product use : Industrial applications.

Use of the substance/
mixture : Thinner.

Uses advised against : Not applicable.

Manufacturer : PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272

Emergency telephone number : (412) 434-4515 (U.S.)
(514) 645-1320 (Canada)
SETIQ Interior de la República: 800-00-214-00 (México)
SETIQ Ciudad de México: (55) 5559-1588 (México)

Technical Phone Number : 888-977-4762

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (inhalation) - Category 4
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
CARCINOGENICITY - Category 2
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1
ASPIRATION HAZARD - Category 1
Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 97.8% (dermal), 86.3% (inhalation)

GHS label elements

Section 2. Hazards identification

Hazard pictograms

:

**Signal word**

: Danger

Hazard statements

: Flammable liquid and vapor.
May be fatal if swallowed and enters airways.
Causes skin irritation.
Causes serious eye irritation.
Harmful if inhaled.
Suspected of causing cancer.
Causes damage to organs through prolonged or repeated exposure. (central nervous system (CNS))

Precautionary statements**Prevention**

: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

Response

: IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

Storage

: Store locked up. Store in a well-ventilated place. Keep cool.

Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

: Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.

Hazards not otherwise classified

: Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Product name

: THINNER 21-25

Chemical name

: Stoddard solvent

Section 3. Composition/information on ingredients

Ingredient name	%	CAS number
Stoddard solvent	≥75 - ≤90	8052-41-3
1,2,4-trimethylbenzene	≥5.0 - ≤9.3	95-63-6
mesitylene	≥1.0 - ≤4.5	108-67-8
xylene	≤1.8	1330-20-7
ethylbenzene	<1.0	100-41-4

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

- Eye contact** : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
- Inhalation** : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- Skin contact** : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
- Ingestion** : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : Harmful if inhaled.
- Skin contact** : Causes skin irritation. Defatting to the skin.
- Ingestion** : May be fatal if swallowed and enters airways.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following:
pain or irritation
watering
redness
- Inhalation** : No specific data.
- Skin contact** : Adverse symptoms may include the following:
irritation
redness
dryness
cracking
- Ingestion** : Adverse symptoms may include the following:
nausea or vomiting

Section 4. First aid measures

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable extinguishing media** : Do not use water jet.

- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon oxides

- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Section 6. Accidental release measures

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not swallow. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Special precautions** : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- Conditions for safe storage, including any incompatibilities** : Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Stoddard solvent	ACGIH TLV (United States, 3/2020). TWA: 525 mg/m ³ 8 hours. TWA: 100 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 2900 mg/m ³ 8 hours. TWA: 500 ppm 8 hours.
1,2,4-trimethylbenzene	ACGIH TLV (United States, 3/2020). TWA: 123 mg/m ³ 8 hours. TWA: 25 ppm 8 hours.
mesitylene	ACGIH TLV (United States, 3/2020). TWA: 123 mg/m ³ 8 hours. TWA: 25 ppm 8 hours.
xylene	ACGIH TLV (United States, 3/2020). STEL: 651 mg/m ³ 15 minutes. STEL: 150 ppm 15 minutes. TWA: 434 mg/m ³ 8 hours. TWA: 100 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 435 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.
ethylbenzene	ACGIH TLV (United States, 3/2020). TWA: 20 ppm 8 hours. OSHA PEL (United States, 5/2018). TWA: 435 mg/m ³ 8 hours. TWA: 100 ppm 8 hours.

Key to abbreviations

A	= Acceptable Maximum Peak	S	= Potential skin absorption
ACGIH	= American Conference of Governmental Industrial Hygienists.	SR	= Respiratory sensitization
C	= Ceiling Limit	SS	= Skin sensitization
F	= Fume	STEL	= Short term Exposure limit values
IPEL	= Internal Permissible Exposure Limit	TD	= Total dust
OSHA	= Occupational Safety and Health Administration.	TLV	= Threshold Limit Value
R	= Respirable	TWA	= Time Weighted Average
Z	= OSHA 29 CFR 1910.1200 Subpart Z - Toxic and Hazardous Substances		

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Section 8. Exposure controls/personal protection

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Chemical splash goggles.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Gloves : For prolonged or repeated handling, use the following type of gloves:

Recommended: polyvinyl alcohol (PVA), Viton®

May be used: nitrile rubber

Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid.

Color : Not available.

Odor : Characteristic.

Odor threshold : Not available.

pH : Not applicable.

Melting point : Not available.

Section 9. Physical and chemical properties

Boiling point	: >37.78°C (>100°F)
Flash point	: Closed cup: 44.5°C (112.1°F)
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Evaporation rate	: Not available.
Vapor pressure	: Not available.
Vapor density	: Not available.
Relative density	: 0.79
Density (lbs / gal)	: 6.59
Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n-octanol/water	:  Not applicable.
Viscosity	:  Kinematic (40°C (104°F)): <14 mm ² /s (<14 cSt)
Volatility	: 100% (v/v), 100% (w/w)
% Solid. (w/w)	: 0

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Hazardous decomposition products	:  Depending on conditions, decomposition products may include the following materials: carbon oxides

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Section 11. Toxicological information

Product/ingredient name	Result	Species	Dose	Exposure
Stoddard solvent	LD50 Oral	Rat	>5 g/kg	-

Product/ingredient name	Result	Species	Score	Exposure	Observation
xylene	Skin - Moderate irritant	Rabbit	-	24 hours 500 mg	-

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Eyes : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Sensitization

Conclusion/Summary

Skin : There are no data available on the mixture itself.

Respiratory : There are no data available on the mixture itself.

Mutagenicity

Conclusion/Summary : There are no data available on the mixture itself.

Carcinogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Classification

Product/ingredient name	OSHA	IARC	NTP
xylene	-	3	-
ethylbenzene	-	2B	-

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4

NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen

OSHA: +

Not listed/not regulated: -

Reproductive toxicity

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Section 11. Toxicological information

Name	Category	Route of exposure	Target organs
1,2,4-trimethylbenzene	Category 3	-	Respiratory tract irritation
mesitylene	Category 3	-	Respiratory tract irritation
xylene	Category 3	-	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Name	Category	Route of exposure	Target organs
Stoddard solvent	Category 1	-	central nervous system (CNS)
ethylbenzene	Category 2	-	hearing organs

Target organs : Contains material which causes damage to the following organs: brain.
Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, upper respiratory tract, skin, central nervous system (CNS), eye, lens or cornea, testes.

Aspiration hazard

Name	Result
Stoddard solvent	ASPIRATION HAZARD - Category 1
xylene	ASPIRATION HAZARD - Category 1
ethylbenzene	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure

Potential acute health effects

Eye contact : Causes serious eye irritation.
Inhalation : Harmful if inhaled.
Skin contact : Causes skin irritation. Defatting to the skin.
Ingestion : May be fatal if swallowed and enters airways.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:
 pain or irritation
 watering
 redness
Inhalation : No specific data.
Skin contact : Adverse symptoms may include the following:
 irritation
 redness
 dryness
 cracking
Ingestion : Adverse symptoms may include the following:
 nausea or vomiting

Delayed and immediate effects and also chronic effects from short and long term exposure

Section 11. Toxicological information

Conclusion/Summary : There are no data available on the mixture itself. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Long term exposure

Potential immediate effects : There are no data available on the mixture itself.

Potential delayed effects : There are no data available on the mixture itself.

Potential chronic health effects

General : Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapors) (mg/l)	Inhalation (dusts and mists) (mg/l)

Soil/water partition coefficient (K_{oc}) : Not available.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

Transport hazard class (es)	3	3	3
Packing group	III	III	III
Environmental hazards	No.	No.	No.
Marine pollutant substances	Not applicable.	Not applicable.	Not applicable.
Product RQ (lbs)	5911.2	Not applicable.	Not applicable.
RQ substances	(xylene)	Not applicable.	Not applicable.

Additional information

- DOT** : This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal) of combustible liquids are not regulated as hazardous materials in package sizes less than the product reportable quantity.
- IMDG** : None identified.
- IATA** : None identified.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not applicable.

Section 15. Regulatory information

United States

United States inventory (TSCA 8b) : All components are active or exempted.

SARA 302/304

SARA 304 RQ : Not applicable.

Composition/information on ingredients

No products were found.

SARA 311/312

Section 15. Regulatory information

Classification : FLAMMABLE LIQUIDS - Category 3
 ACUTE TOXICITY (inhalation) - Category 4
 SKIN IRRITATION - Category 2
 EYE IRRITATION - Category 2A
 CARCINOGENICITY - Category 2
 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1
 ASPIRATION HAZARD - Category 1
 HNOC - Defatting irritant

Composition/information on ingredients

Name	%	Classification
Stoddard solvent	≥75 - ≤90	FLAMMABLE LIQUIDS - Category 3 EYE IRRITATION - Category 2A SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1 ASPIRATION HAZARD - Category 1 HNOC - Defatting irritant
1,2,4-trimethylbenzene	≥5.0 - ≤9.3	FLAMMABLE LIQUIDS - Category 3 ACUTE TOXICITY (inhalation) - Category 4 SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2A SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3 HNOC - Defatting irritant
mesitylene	≥1.0 - ≤4.5	FLAMMABLE LIQUIDS - Category 3 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3 HNOC - Defatting irritant
xylene	≤1.8	FLAMMABLE LIQUIDS - Category 3 ACUTE TOXICITY (dermal) - Category 4 ACUTE TOXICITY (inhalation) - Category 4 SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2A SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3 ASPIRATION HAZARD - Category 1
ethylbenzene	<1.0	FLAMMABLE LIQUIDS - Category 2 ACUTE TOXICITY (inhalation) - Category 4 CARCINOGENICITY - Category 2 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 ASPIRATION HAZARD - Category 1 HNOC - Defatting irritant

SARA 313

Supplier notification	Chemical name	CAS number	Concentration
	1,2,4-trimethylbenzene	95-63-6	5 - 10
	xylene	1330-20-7	1 - 5
	ethylbenzene	100-41-4	0.1 - 1

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

Section 15. Regulatory information

Additional environmental information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

California Prop. 65

 **WARNING:** Cancer - www.P65Warnings.ca.gov.

Section 16. Other information

Hazardous Material Information System (U.S.A.)

Health : 2 * Flammability : 2 Physical hazards : 0

(*) - Chronic effects

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on MSDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

National Fire Protection Association (U.S.A.)

Health : 2 Flammability : 2 Instability : 0

Date of previous issue : 10/8/2020

Organization that prepared the SDS : EHS

Key to abbreviations

: ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient
MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)
N/A = Not available
SGG = Segregation Group
UN = United Nations

 Indicates information that has changed from previously issued version.

Disclaimer

The information contained in this data sheet is based on present scientific and technical knowledge. The purpose of this information is to draw attention to the health and safety aspects concerning the products supplied by PPG, and to recommend precautionary measures for the storage and handling of the products. No warranty or guarantee is given in respect of the properties of the products. No liability can be accepted for any failure to observe the precautionary measures described in this data sheet or for any misuse of the products.

SAFETY DATA SHEET

Revision: 06/22/2015

1. Identification of the substance/preparation and of the company/undertaking

Trade Name: Super Mud Dry

Intended use:

Viscosifier

Data on the Company:

Manufacturer: PDSCo, Inc.
105 W. Sharp St
El Dorado, AR 71730
USA
Tel – 870 863 5707
Fax – 870 863 0603
sales@pdscoinc.com
www.pdscoinc.com

2. Hazards Identification

Product not classified as hazardous according to US/EU regulations.

Human health effects: May cause slight skin irritation, especially with prolonged or repeated exposure. May cause irritation to the eyes that should cease on removal of the product. Inhalation of dust may cause irritation to the respiratory system.

Physicochemical effects: Very slippery underfoot when wet. If handled roughly dust may be created - as with many organic powders airborne dust clouds may cause a dust explosion hazard.

3. Composition/information on ingredients

Chemical characterization: Anionic Polyacrylamide

The products contain no substances classified as hazardous that need to be taken into account according to EC directives/CHIP.

4. First-aid measures

Inhalation: Remove the source of contamination or remove the casualty to fresh air. Clear any blocked airways. Seek medical advice if recovery is delayed, or symptoms are experienced.

Ingestion: Do not make the casualty vomit. Never give anything by mouth to an unconscious person. If the casualty is conscious, have them rinse their mouth thoroughly with water to remove as much of the product as possible. Do not swallow the water but spit it out. Repeat several times. Give the casualty 240-300ml of water to drink in small sips. Do not make the casualty drink a lot of water at once as this may cause vomiting. Obtain medical attention.

Skin contact:	In cases of local contamination e.g. to the hands, wash the skin with plenty of lukewarm water and soap. For large areas, remove all contaminated clothing and footwear immediately and flush the affected parts with plenty of lukewarm water to remove all traces of product. If any irritation persists seek medical attention.
Eye contact:	Do not allow the casualty to rub the eye(s). Quickly and gently brush the product off the face and away from the eyes. Immediately wash the affected eye(s) with plenty of eyewash solution or running water (preferably lukewarm), holding the eyelids apart to ensure complete removal of the product. Continue irrigation for 5 minutes. If there are any signs of irritation seek medical attention immediately.

5. Fire-fighting measures

Suitable extinguishing media:	Foam, dry powder, carbon dioxide, water-spray / fog – use as appropriate for the surrounding fire and other materials present. It should be noted that the products become very slippery when wet.
Extinguishing media which must not be used for safety reasons:	None known
Special exposure hazards:	The products become very slippery underfoot when wet.
Special protective equipment For fire-fighters:	As for all fires involving chemicals; chemical protection suit, suitable gloves and boots and self-contained breathing apparatus.

6. Accidental release measures

Personal precautions:	Use personal protective equipment suitable for the task in hand – see section 8. Respiratory protection may be required if dust is created during cleanup operations. Avoid formation of airborne dust clouds. The products become very slippery underfoot when wet.
Environmental precautions:	No special environmental precautions required.
Methods for cleaning up:	Shovel and sweep up into suitable containers for disposal. Flush away remaining traces completely with plenty of water.

7. Handling and storage

Handling:	Do not eat, drink or smoke whilst handling the products. Do not breathe in any dust formed. Immediately remove clothing that becomes contaminated and launder before re-use. Avoid formation of dust and airborne dust clouds. Keep work area dust free by regular cleaning. Any airborne dust formed during use must be kept away from sources of ignition.
Storage:	Avoid wet, damp and humid storage conditions. Keep in a dry, cool place.

8. Exposure controls/personal protection

Exposure limit values:	UK HSE workplace exposure limit for dust: Less than 10 mg/m ³ 8-hour TWA of inhalable dust Less than 4 mg/m ³ 8-hour TWA of respirable dust
Occupational exposure control	
Personal protective equipment:	Personal protective equipment (PPE) should be chosen in consultation with the PPE manufacturer and take into account the application e.g. scale of operation, temperature and other chemicals used.

Respiratory protection:	Ensure good ventilation. Local exhaust ventilation may be required to keep airborne dust below the workplace exposure limits. If dust is likely to be created when cleaning up spillages, respiratory protection such as a disposable filtering facepiece respirator (FFP2) or half-mask or full-face respirator with a particle filter type P2, may be required.
Hand protection:	Rubber or plastic gloves.
Eye protection:	Goggles or safety glasses depending on type of use.
Skin protection:	Lightweight protective clothing
Environmental exposure controls:	No special requirements.

9. Physical and chemical properties

Appearance:	White powder
Odor:	None/slight
PH (0.5% solution):	6.5-8.5
Melting point:	Not determined.
Boiling point:	Not determined.
Flash point:	Not applicable
Explosive properties:	Not determined
Oxidizing properties:	Not applicable
Vapor pressure:	Not applicable
Vapor density:	Not applicable
Relative density:	0.7 – 0.8 g/cm ³
Solubility	
- water solubility:	Dissolves in water to form a highly viscous solution
- fat solubility:	Not determined
Partition coefficient:	
n-octanol/water:	Not determined
Viscosity:	Not applicable
Evaporation rate:	Not applicable

10. Stability and reactivity

Stability:	Stable under normal conditions of use.
Conditions to avoid:	No special precautions other than good housekeeping of chemicals.
Materials to avoid:	Reactive chemicals.
Hazardous decomposition products:	Oxides of carbon produced on combustion.

11. Toxicological information

Low toxicity products. Tests carried out on similar products show acute oral LD₅₀ (rat) >5000 mg/kg and products not to be classified as irritating to the skin and eyes.

12. Ecological information

The products are not classified as dangerous for the environment. Tests carried out on other anionic polyacrylamides showed:

Effects on fish:	96 hour LC ₅₀ >300 mg/l
Effects on Daphnia:	48 hour EC ₅₀ >200 mg/l
Effects on algae:	72 hour EC ₅₀ >1000 mg/l
Biodegradability:	Not expected to be readily biodegradable

13. Disposal considerations

Surplus or waste product and contaminated packaging should be disposed of in accordance with local regulations.

14. Transport information

Land transport:	Not classified as dangerous for transport.
Sea transport (IMDG):	Not classified as dangerous for transport.
Air transport (ICAO):	Not classified as dangerous for transport.
Road transport (ADR):	Not classified as dangerous for transport.

15. Regulatory information

SARA Title III Section 311 Categories

Immediate (Acute) Health Effects: Yes

Delayed (Chronic) Health Effects: No

Fire Hazard: No

Sudden Release of Pressure Hazard: No

Reactivity Hazard: No

SARA 302 Extremely Hazardous Substances

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

None Present ()

SARA 313 – Specific Toxic Chemical Listings

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

None Present ()

16. Other information

HMIS Rating

Health: 0

Flammability: 1

Reactivity: 0

NFPA Rating

Health: 0

Fire: 1

Reactivity: 0

Training advice

Read the safety data sheet before using the product.

Further Information

The information provided in this safety data sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Product Name: MOBILGREASE 28
Revision Date: 23 Mar 2021
Page 1 of 10

SAFETY DATA SHEET

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

PRODUCT

Product Name: MOBILGREASE 28
Product Description: Synthetic Base Stocks and Additives
Product Code: 201550402020, 530626-85
Intended Use: Grease

COMPANY IDENTIFICATION

Supplier: Aviall Australia Pty. Limited
20-22 Lindaway Place
Tullamarine
Victoria 3043 Australia

Product Technical Information	(8:00am to 4:30pm Mon to Fri)	1300 919 904
Supplier General Contact	(03) 9339 3000	

SECTION 2 HAZARDS IDENTIFICATION

This material is not hazardous according to regulatory guidelines (see (M)SDS Section 15).

Contains: N-PHENYL-1-NAPHTHYLAMINE May produce an allergic reaction.

Other hazard information:

Physical / Chemical Hazards:

No significant hazards.

Health Hazards:

High-pressure injection under skin may cause serious damage. Excessive exposure may result in eye, skin, or respiratory irritation. Secondary amines or materials containing secondary amines should not be added to this product due to the risk of forming nitrosamines, some of which have been shown to be carcinogenic in lab animals.

Environmental Hazards:

Expected to be harmful to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

Product Name: MOBILGREASE 28
Revision Date: 23 Mar 2021
Page 2 of 10

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

Name	CAS#	Concentration*	GHS Hazard Codes
N-PHENYL-1-NAPHTHYLAMINE	90-30-2	0.1 - < 1%	H302, H317, H373, H400(M factor 1), H410(M factor 1)
N-OLEYLSARCOSINE	110-25-8	0.1 - < 1%	H315, H318, H332, H400(M factor 1), H412
PENTAERYTHRITOL	115-77-5	1 - < 5%	None
SODIUM NITRITE	7632-00-0	0.1 - < 1%	H272(2)(S), H301, H319(2A), H400(M factor 1)
SODIUM PHOSPHATE, TRIBASIC	10101-89-0	0.1 - < 1%	H315, H319(2A), H335

* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. Other ingredients determined not to be hazardous up to 100%.

SECTION 4 FIRST AID MEASURES

INHALATION

Under normal conditions of intended use, this material is not expected to be an inhalation hazard.

SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

NOTE TO PHYSICIAN

None

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Inappropriate Extinguishing Media: Straight streams of water

Product Name: MOBILGREASE 28

Revision Date: 23 Mar 2021

Page 3 of 10

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply. Fire-fighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Aldehydes, Incomplete combustion products, Oxides of carbon, Smoke, Fume, Sulphur oxides

FLAMMABILITY PROPERTIES

Flash Point [Method]: >204°C (400°F) [EST. FOR OIL, ASTM D-92 (COC)]

Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0

Autoignition Temperature: N/D

SECTION 6

ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

PROTECTIVE MEASURES

Avoid contact with spilled material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do so without risk. Scrape up spilled material with shovels into a suitable container for recycle or disposal.

Water Spill: Stop leak if you can do so without risk. Confine the spill immediately with booms. Warn other shipping. Skim from surface

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Prevent entry into waterways, sewers, basements or confined areas.

SECTION 7

HANDLING AND STORAGE

HANDLING

Prevent small spills and leakage to avoid slip hazard. Contains Sodium nitrite. Do not add amines which may form cancer causing nitrosamines.

Static Accumulator: This material is not a static accumulator.

STORAGE

Product Name: MOBILGREASE 28
Revision Date: 23 Mar 2021
Page 4 of 10

Do not store in open or unlabelled containers.

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMIT VALUES

Exposure limits/standards (Note: Exposure limits are not additive)

Substance Name	Form	Limit/Standard			Note	Source
PENTAERYTHRITOL	Inhalable dust.	TWA	10 mg/m ³			Australia WES
PENTAERYTHRITOL		TWA	10 mg/m ³			ACGIH
SODIUM PHOSPHATE, TRIBASIC		STEL	5 mg/m ³			OARS WEEL

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

Biological limits

No biological limits allocated.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Particulate

No protection is ordinarily required under normal conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapour warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Nitrile, Viton

Product Name: MOBILGREASE 28

Revision Date: 23 Mar 2021

Page 5 of 10

No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practise good housekeeping.

ENVIRONMENTAL CONTROLS

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9	PHYSICAL AND CHEMICAL PROPERTIES
-----------	----------------------------------

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION

Physical State: Solid
Form: Semi-fluid
Colour: Dark Red
Odour: Characteristic
Odour Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15.6 °C): 0.945 [Calculated]
Flammability (Solid, Gas): N/A
Flash Point [Method]: >204°C (400°F) [EST. FOR OIL, ASTM D-92 (COC)]
Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0
Autoignition Temperature: N/D
Boiling Point / Range: > 316°C (600°F) [Estimated]
Decomposition Temperature: N/D
Vapour Density (Air = 1): > 2 at 101 kPa
Vapour Pressure: < 0.013 kPa (0.1 mm Hg) at 20 °C
Evaporation Rate (n-butyl acetate = 1): N/D
pH: N/A
Log Pow (n-Octanol/Water Partition Coefficient): > 3.5
Solubility in Water: Negligible
Viscosity: 29.3 cSt (29.3 mm²/sec) at 40 °C | 5.7 cSt (5.7 mm²/sec) at 100°C [Estimated]
Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: N/D
Melting Point: N/D

Product Name: MOBILGREASE 28
Revision Date: 23 Mar 2021
Page 6 of 10

NOTE: Most physical properties above are for the oil component in the material.

SECTION 10 STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

INCOMPATIBLE MATERIALS: Strong oxidisers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

INFORMATION ON TOXICOLOGICAL EFFECTS

Hazard Class	Conclusion / Remarks
Inhalation	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Irritation: No end point data for material.	Negligible hazard at ambient/normal handling temperatures.
Ingestion	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin Corrosion/Irritation: No end point data for material.	Negligible irritation to skin at ambient temperatures. Based on assessment of the components.
Eye	
Serious Eye Damage/Irritation: No end point data for material.	May cause mild, short-lasting discomfort to eyes. Based on assessment of the components.
Sensitisation	
Respiratory Sensitization: No end point data for material.	Not expected to be a respiratory sensitizer.
Skin Sensitization: No end point data for material.	Not expected to be a skin sensitizer. Based on assessment of the components.
Aspiration: Data available.	Not expected to be an aspiration hazard. Based on physico-chemical properties of the material.
Germ Cell Mutagenicity: No end point data for material.	Not expected to be a germ cell mutagen. Based on assessment of the components.
Carcinogenicity: No end point data for material.	Not expected to cause cancer. Based on assessment of the components.
Reproductive Toxicity: No end point data for material.	Not expected to be a reproductive toxicant. Based on assessment of the components.
Lactation: No end point data for material.	Not expected to cause harm to breast-fed children.
Specific Target Organ Toxicity (STOT)	
Single Exposure: No end point data for material.	Not expected to cause organ damage from a single exposure.

Product Name: MOBILGREASE 28

Revision Date: 23 Mar 2021

Page 7 of 10

Repeated Exposure: No end point data for material.	Not expected to cause organ damage from prolonged or repeated exposure. Based on assessment of the components.
--	--

TOXICITY FOR SUBSTANCES

NAME	ACUTE TOXICITY
N-PHENYL-1-NAPHTHYLAMINE	Oral Lethality: LD 50 1625 mg/kg (Rat)

OTHER INFORMATION

For the product itself:

Component concentrations in this formulation would not be expected to cause skin sensitization, based on tests of the components, this formulation, or similar formulations.

Contains:

Synthetic base oils: Not expected to cause significant health effects under conditions of normal use, based on laboratory studies with the same or similar materials. Not mutagenic or genotoxic. Not sensitising in test animals and humans. N-phenyl-1-naphthylamine (PAN): A single oral overexposure may result in clinical signs/symptoms of cyanosis, headache, shallow respiration, dizziness, confusion, low blood pressure, convulsions, coma, or jaundice. Hematuria may occur due to bladder and kidney irritation, and anemia may develop later. Repeated exposure in laboratory animals caused liver and kidney damage and depressed bone marrow activity. Undiluted PAN is a skin sensitizer. Human testing of lubricants containing 1.0% PAN resulted in no reactions indicative of sensitization. Phenyl-alpha-naphthylamine (PAN): Undiluted PAN is a skin sensitizer. Human testing with lubricants containing 1.0% PAN caused no reactions indicative of sensitization. SODIUM NITRITE: Ingestion of sodium nitrite may reduce the oxygen-carrying capacity of blood and may cause cyanosis (bluish skin), shortness of breath, palpitations, coma, and/or death.

IARC Classification:

The following ingredients are cited on the lists below:

--REGULATORY LISTS SEARCHED--

1 = IARC 1

2 = IARC 2A

3 = IARC 2B

SECTION 12 ECOLOGICAL INFORMATION

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

ECOTOXICITY

Material -- Expected to be harmful to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

MOBILITY

Base oil component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable

Product Name: MOBILGREASE 28
Revision Date: 23 Mar 2021
Page 8 of 10

laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Suitable routes of disposal are supervised incineration, preferentially with energy recovery, or appropriate recycling methods in accordance with applicable regulations and material characteristics at the time of disposal.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

SECTION 14	TRANSPORT INFORMATION
------------	-----------------------

LAND (ADG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

Marine Pollutant: No

AIR (IATA): Not Regulated for Air Transport

SECTION 15	REGULATORY INFORMATION
------------	------------------------

This material is not considered hazardous according to Australia Model Work Health and Safety Regulations.

Product is not regulated according to Australian Dangerous Goods Code.

No Poison Schedule number allocated by the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP) established under the Therapeutic Goods Act.

REGULATORY STATUS AND APPLICABLE LAWS AND REGULATIONS

Listed or exempt from listing/notification on the following chemical inventories (May contain substance(s) subject to notification to the EPA Active TSCA inventory prior to import to USA): AIIC, DSL, ENCS, IECSC, ISHL, TCSI, TSCA

Special Cases:

Inventory	Status
KECI	Restrictions Apply

SECTION 16	OTHER INFORMATION

N/D = Not determined, N/A = Not applicable, STEL = Short-Term Exposure Limit, TWA = Time-Weighted Average

KEY TO THE H-CODES CONTAINED IN SECTION 3 OF THIS DOCUMENT (for information only):

H272(2): May intensify fire; oxidizer; Oxidizing Solid, Cat 2

H301: Toxic if swallowed; Acute Tox Oral, Cat 3

H302: Harmful if swallowed; Acute Tox Oral, Cat 4

H315: Causes skin irritation; Skin Corr/Irritation, Cat 2

H317: May cause allergic skin reaction; Skin Sensitisation, Cat 1

H318: Causes serious eye damage; Serious Eye Damage/Irr, Cat 1

H319(2A): Causes serious eye irritation; Serious Eye Damage/Irr, Cat 2A

H335: May cause respiratory irritation; Target Organ Single, Resp Irr

H373: May cause damage to organs through prolonged or repeated exposure; Target Organ, Repeated, Cat 2

H400: Very toxic to aquatic life; Acute Env Tox, Cat 1

H410: Very toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 1

H412: Harmful to aquatic life with long lasting effects; Chronic Env Tox, Cat 3

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

Composition: Component Table information was modified.

Perkal Pty Ltd Trading as Statewide Oil (South Australia): Section 01: Supplier Mailing Address information was deleted.

Perkal Pty Ltd Trading as Statewide Oil (Western Australia): Section 01: Supplier Mailing Address information was deleted.

Section 01: Company Contact Methods information was modified.

Section 01: Company Mailing Address information was deleted.

Section 01: Company Mailing Address information was modified.

Section 11: Tox List Cited Table information was deleted.

Section 16: HCode Key information was modified.

Southern Cross Lubes (Victoria and Tasmania, New South Wales and Australian Capital Territory): Section 01: Supplier Mailing Address information was deleted.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, republication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

2. Hazard Identification**2.1 Classification of the substance or mixture**

Aspiration Hazard, category 1
Eye Irritation, category 2
Flammable Liquid, category 2
Reproductive Toxicity, category 2
STOT, repeated exposure, category 2
STOT, single exposure, category 3, NE
Skin Irritation, category 2

2.2 Label elements

Symbol(s) of Product

Signal Word

Danger

Named Chemicals on Label

METHYL ETHYL KETONE, TOLUENE

HAZARD STATEMENTS

Flammable Liquid, category 2	H225	Highly flammable liquid and vapour.
Aspiration Hazard, category 1	H304	May be fatal if swallowed and enters airways.
Skin Irritation, category 2	H315	Causes skin irritation.
Eye Irritation, category 2	H319	Causes serious eye irritation.
STOT, single exposure, category 3, NE	H336	May cause drowsiness or dizziness.
Reproductive Toxicity, category 2	H361	Suspected of damaging fertility or the unborn child.
STOT, repeated exposure, category 2	H373	May cause damage to organs through prolonged or repeated exposure.

PRECAUTION PHRASES

P210	Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
P235	Keep cool.
P260	Do not breathe dust/fume/gas/mist/vapours/spray.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P284	Wear respiratory protection.
P301+310	IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P305+351+338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.
P308+313	IF exposed or concerned: Get medical advice/attention
P314	Get medical advice/attention if you feel unwell.
P331	Do NOT induce vomiting.
P332+313	If skin irritation occurs: Get medical advice/attention.
P403+233	Store in a well-ventilated place. Keep container tightly closed.

2.3 Other hazards

No Information

Results of PBT and vPvB assessment:

The product does not meet the criteria for PBT/VPvB in accordance with Annex XIII.

3. Composition/Information On Ingredients

3.2 Mixtures

Hazardous Ingredients

<u>CAS-No.</u>	<u>Chemical Name</u>	<u>%</u>
108-88-3	TOLUENE	75 - 100
78-93-3	METHYL ETHYL KETONE	10 - <25

<u>CAS-No.</u>	<u>GHS Symbols</u>	<u>GHS Hazard Statements</u>	<u>M-Factors</u>
108-88-3	GHS02-GHS07-GHS08	H225-304-315-319-336-361-373	0
78-93-3	GHS02-GHS07	H225-319-336	0

Additional Information: The text for GHS Hazard Statements shown above (if any) is given in Section 16.

4. First-aid Measures

4.1 Description of First Aid Measures

AFTER INHALATION: Give oxygen or artificial respiration if needed. Remove person to fresh air. If signs/symptoms continue, get medical attention.

AFTER SKIN CONTACT: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. If skin irritation persists, call a physician.

AFTER EYE CONTACT: Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

AFTER INGESTION: Do NOT induce vomiting. Never give anything by mouth to an unconscious person. If swallowed, call a poison control centre or doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed

Harmful if swallowed. Irritating to eyes and skin. Risk of serious damage to the lungs (by aspiration). Vapours may cause drowsiness and dizziness.

4.3 Indication of any immediate medical attention and special treatment needed

No information available on clinical testing and medical monitoring. Specific toxicological information on substances, if available, can be found in section 11.

When symptoms persist or in all cases of doubt seek medical advice.

5. Fire-fighting Measures

5.1 Extinguishing Media:

Carbon Dioxide, Dry Chemical, Foam, Water Fog

UNUSUAL FIRE AND EXPLOSION HAZARDS: Flammable liquid. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Vapors may travel to areas away from work site before igniting/flashing back to vapor source. Provide adequate ventilation. Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Electrical installations / working materials must comply with the technological safety standards. Wear shoes with conductive soles.

5.2 Special hazards arising from the substance or mixture

No Information

5.3 Advice for firefighters

In the event of fire, wear self-contained breathing apparatus. Cool containers / tanks with water spray. Flammable.

6. Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Evacuate personnel to safe areas. Remove all sources of ignition. To avoid ignition of vapours by static electricity discharge, all metal parts of the equipment must be grounded. Wear personal protective equipment. For personal protection see section 8.

6.2 Environmental precautions

Do not allow material to contaminate ground water system. Prevent product from entering drains.

6.3 Methods and material for containment and cleaning up

Prevent further leakage or spillage if safe to do so. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations

(see section 13).

6.4 Reference to other sections

Please refer to disposal requirements or country specific disposal requirements for this material. See Section 13 for further information.

7. Handling and Storage

7.1 Precautions for safe handling

INSTRUCTIONS FOR SAFE HANDLING : Keep containers dry and tightly closed to avoid moisture absorption and contamination. Prepare the working solution as given on the label(s) and/or the user instructions. Do not breathe vapours or spray mist. Ensure all equipment is electrically grounded before beginning transfer operations. Do not use sparking tools. Do not get in eyes, on skin, or on clothing. Use only with adequate ventilation/personal protection. Wash thoroughly after handling.

PROTECTION AND HYGIENE MEASURES : Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. When using, do not eat, drink or smoke.

7.2 Conditions for safe storage, including any incompatibilities

CONDITIONS TO AVOID: Heat, flames and sparks.

STORAGE CONDITIONS: Keep container closed when not in use. Store in a dry, well ventilated place away from sources of heat, ignition and direct sunlight.

7.3 Specific end use(s)

No specific advice for end use available.

8. Exposure Controls/Personal Protection

8.1 Control parameters

Ingredients with Occupational Exposure Limits (US)

<u>Name</u>	<u>CAS-No.</u>	<u>ACGIH TWA</u>	<u>ACGIH STEL</u>	<u>ACGIH Ceiling</u>
TOLUENE	108-88-3	20 PPM	N/E	N/E
METHYL ETHYL KETONE	78-93-3	200 PPM	300 PPM	N/E

<u>Name</u>	<u>CAS-No.</u>	<u>OSHA PEL</u>	<u>OSHA STEL</u>
TOLUENE	108-88-3	200 ppm	560 MGM3, 150 PPM
METHYL ETHYL KETONE	78-93-3	590 MGM3, 200 PPM	885 MGM3, 300 PPM

FURTHER INFORMATION: Refer to the regulatory exposure limits for the workforce enforced in each country.

8.2 Exposure controls

Personal Protection

RESPIRATORY PROTECTION: In order to avoid inhalation of spray-mist and sanding dust, all spraying and sanding must be done wearing adequate respirator. Use only with ventilation to keep levels below exposure guidelines reported in this document. User should test and monitor exposure levels to ensure all personnel are below guidelines. If not sure, or not able to monitor, use State or federally approved supplied air respirator. For silica containing coatings in a liquid state, and/or if no exposure limits are established above, air-supplied respirators are generally not required.

EYE PROTECTION: Ensure that eyewash stations and safety showers are close to the workstation location. Safety glasses with side-shields.

HAND PROTECTION: Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. Impervious gloves. Request information on glove permeation properties from the glove supplier. Lightweight

protective clothing

OTHER PROTECTIVE EQUIPMENT: No Information

ENGINEERING CONTROLS: Avoid contact with skin, eyes and clothing. Ensure adequate ventilation, especially in confined areas.

9. Physical and Chemical Properties

9.1 Information on basic physical and chemical properties

Appearance:	Clear Liquid
Physical State	Liquid
Odor	Solvent
Odor threshold	N/D
pH	N/D
Melting point / freezing point (°C)	N/D
Boiling point/range	173 F (78 C) - 232 F (111 C)
Flash Point	24F (-4C)
Evaporation rate	Slower Than Ether
Flammability (solid, gas)	Not determined
Upper/lower flammability or explosive limits	1.3 - 10.1
Vapour Pressure, mmHg	36.3
Vapour density	Heavier than Air
Relative density	Not determined
Solubility in / Miscibility with water	N/D
Partition coefficient: n-octanol/water	Not determined
Auto-ignition temperature (°C)	Not determined
Decomposition temperature (°C)	Not determined
Viscosity	Unknown
Explosive properties	Not determined
Oxidising properties	Not determined

9.2 Other information

VOC Content g/l:	850
Specific Gravity (g/cm3)	0.85

10. Stability and Reactivity

10.1 Reactivity

No reactivity hazards known under normal storage and use conditions.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous polymerisation does not occur.

10.4 Conditions to avoid

Heat, flames and sparks.

10.5 Incompatible materials

Strong oxidizing agents.

10.6 Hazardous decomposition productsCarbon dioxide (CO₂), carbon monoxide (CO), oxides of nitrogen (NO_x), dense black smoke.**11. Toxicological Information****11.1 Information on toxicological effects****Acute Toxicity:**

Oral LD50: N/D

Inhalation LC50: N/D

Irritation: Eye irritation and Skin irritation, Category 2**Corrosivity:** Unknown**Sensitization:** Unknown**Repeated dose toxicity:** Unknown**Carcinogenicity:** Unknown**Mutagenicity:** Unknown**Toxicity for reproduction:** Category 2**STOT-single exposure:** STOT, single exposure, category 3, NE**STOT-repeated exposure:** STOT repeated exposure (Auditory system, eyes) Category 2**Aspiration hazard:** Aspiration Hazard, category 1

If no information is available above under Acute Toxicity then the acute effects of this product have not been tested.
Data on individual components are tabulated below:

<u>CAS-No.</u>	<u>Chemical Name</u>	<u>Oral LD50</u>	<u>Dermal LD50</u>	<u>Vapor LC50</u>	<u>Gas LC50</u>	<u>Dust/Mist LC50</u>
108-88-3	TOLUENE	5000 mg/kg rat oral	12267 mg/kg, dermal, rabbit	8000 ppm/4 hrs, rat, inhalation	0.000	0.000
78-93-3	METHYL ETHYL KETONE	2194 mg/kg rat, oral	Not Available	34.5 mg/L/ 4 hour rat, inhalation	0.000	0.000

Additional Information:

No Information

12. Ecological Information

12.1 Toxicity:

EC50 48hr (Daphnia): Unknown

IC50 72hr (Algae): Unknown

LC50 96hr (fish): Unknown

12.2 Persistence and degradability: Unknown

12.3 Bioaccumulative potential: Unknown

12.4 Mobility in soil: Unknown

12.5 Results of PBT and vPvB assessment: The product does not meet the criteria for PBT/VPvB in accordance with Annex XIII.

12.6 Other adverse effects: Unknown

<u>CAS-No.</u>	<u>Chemical Name</u>	<u>EC50 48hr</u>	<u>IC50 72hr</u>	<u>LC50 96hr</u>
108-88-3	TOLUENE	6 mg/l (Daphnia magna)	12.5 mg/L (Algae)	5.8 mg/L (Fish)
78-93-3	METHYL ETHYL KETONE	308 mg/l (Daphnia magna)	No information	2993 mg/l (Pimephales promelas)

13. Disposal Considerations

13.1 **WASTE TREATMENT METHODS:** Do not burn, or use a cutting torch on, the empty drum. If recycling is not practicable, dispose of in compliance with local regulations. Dispose of in accordance with local regulations. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport Information

14.1 UN number	UN1263
14.2 UN proper shipping name	Paint Related Material
Technical name	N/A
14.3 Transport hazard class(es)	3
Subsidiary shipping hazard	N/A
14.4 Packing group	II
14.5 Environmental hazards	Unknown
14.6 Special precautions for user	Unknown
EmS-No.:	F-E, S-E
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code	Unknown

15. Regulatory Information

15.1 Safety, health and environmental regulations/legislation for the substance or mixture:

U.S. Federal Regulations: As follows -

CERCLA - Sara Hazard Category

This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Flammable (gases, aerosols, liquids, or solids), Reproductive toxicity, Skin Corrosion or Irritation, Serious eye damage or eye irritation, Specific target organ toxicity (single or repeated exposure), Aspiration Hazard

Sara Section 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

<u>Chemical Name</u>	<u>CAS-No.</u>
TOLUENE	108-88-3

Toxic Substances Control Act:

All components of this product are either listed on the TSCA Inventory or are exempt.

This product contains the following chemical substances subject to the reporting requirements of TSCA 12(B) if exported from the United States:

No TSCA 12(b) components exist in this product.

U.S. State Regulations: As follows -**New Jersey Right-to-Know:**

The following materials are non-hazardous, but are among the top five components in this product.

No NJ Right-To-Know components exist in this product.

Pennsylvania Right-To-Know

The following non-hazardous ingredients are present in the product at greater than 3%.

No PA Right-To-Know components exist in this product.

CALIFORNIA PROPOSITION 65

WARNING: Cancer and Reproductive Harm -- www.P65Warnings.ca.gov

International Regulations: As follows -*** Canadian DSL:**

All chemical ingredients included on inventory (DSL)

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

16. Other Information

Text for GHS Hazard Statements shown in Section 3 describing each ingredient:

H225	Highly flammable liquid and vapour.
H304	May be fatal if swallowed and enters airways.
H315	Causes skin irritation.
H319	Causes serious eye irritation.

H336	May cause drowsiness or dizziness.
H361	Suspected of damaging fertility or the unborn child.
H373	May cause damage to organs through prolonged or repeated exposure.

Reasons for revision

No Information

The information contained herein is, to the best of our knowledge and belief accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by use of this material. It is the responsibility of the user to comply with all applicable federal, state, and local laws and regulations.

12. Ecological Information

12.1 Toxicity:

EC50 48hr (Daphnia): Unknown

IC50 72hr (Algae): Unknown

LC50 96hr (fish): Unknown

12.2 Persistence and degradability: Unknown

12.3 Bioaccumulative potential: Unknown

12.4 Mobility in soil: Unknown

12.5 Results of PBT and vPvB assessment: The product does not meet the criteria for PBT/VPvB in accordance with Annex XIII.

12.6 Other adverse effects: Unknown

<u>CAS-No.</u>	<u>Chemical Name</u>	<u>EC50 48hr</u>	<u>IC50 72hr</u>	<u>LC50 96hr</u>
108419-32-5	ACETIC ACID ESTERS (C7-C9)	No information	No information	No information
142-92-7	HEXYL ACETATE	No information	No information	3.7 mg/L (fish)
64742-82-1	PETROLEUM DISTILLATE	4.5 mg/l (Daphnia Magna)	No information	8.2 mg/l (Fathead Minnow)

13. Disposal Considerations

13.1 **WASTE TREATMENT METHODS:** Do not burn, or use a cutting torch on, the empty drum. If recycling is not practicable, dispose of in compliance with local regulations. Dispose of in accordance with local regulations. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport Information

14.1	UN number	UN 1263
14.2	UN proper shipping name	Paint Related Material
	Technical name	N/A
14.3	Transport hazard class(es)	3
	Subsidiary shipping hazard	N/A
14.4	Packing group	III
14.5	Environmental hazards	Unknown
14.6	Special precautions for user	Unknown
	EmS-No.:	F-E, S-E
14.7	Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code	Unknown

15. Regulatory Information

15.1 Safety, health and environmental regulations/legislation for the substance or mixture:

U.S. Federal Regulations: As follows -

CERCLA - Sara Hazard Category

This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Flammable (gases, aerosols, liquids, or solids)

Sara Section 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

<u>Chemical Name</u>	<u>CAS-No.</u>
----------------------	----------------

No Sara 313 components exist in this product.

Toxic Substances Control Act:

All components of this product are either listed on the TSCA Inventory or are exempt.

This product contains the following chemical substances subject to the reporting requirements of TSCA 12(B) if exported from the United States:

<u>Chemical Name</u>	<u>CAS-No.</u>
----------------------	----------------

No TSCA 12(b) components exist in this product.

U.S. State Regulations: As follows -**New Jersey Right-to-Know:**

The following materials are non-hazardous, but are among the top five components in this product.

Chemical Name

ADDITIVE

CAS-No.

TRADE SECRET

Pennsylvania Right-To-Know

The following non-hazardous ingredients are present in the product at greater than 3%.

No PA Right-To-Know components exist in this product.

CALIFORNIA PROPOSITION 65

WARNING: Cancer and Reproductive Harm -- www.P65Warnings.ca.gov

International Regulations: As follows -*** Canadian DSL:**

All chemical ingredients included on inventory (DSL)

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

16. Other Information**Text for GHS Hazard Statements shown in Section 3 describing each ingredient:**

H226	Flammable liquid and vapour.
H304	May be fatal if swallowed and enters airways.
H312	Harmful in contact with skin.
H336	May cause drowsiness or dizziness.
H411	Toxic to aquatic life with long lasting effects.

Reasons for revision

No Information

The information contained herein is, to the best of our knowledge and belief accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by use of this material. It is the responsibility of the user to comply with all applicable federal, state, and local laws and regulations.

	Phone: CHEMTREC 1-800-424-9300 (toll free) or 1-703-527-3887		

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

WARNING: CAUSES SKIN IRRITATION.
MAY CAUSE AN ALLERGIC SKIN REACTION.
CAUSES SERIOUS EYE IRRITATION.

HAZARD CLASS	HAZARD CATEGORY
SKIN IRRITATION	2
EYE IRRITATION	2A
SKIN SENSITIZATION	1

PICTOGRAM(S)

Precautionary Statements

Prevention:	Avoid breathing vapors, mist, or spray. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Wear eye and face protection. Wear protective gloves.
Response:	IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to remove. Continue rinsing. If skin irritation or rash occurs: Get medical attention. If eye irritation persists: Get medical attention. Take off contaminated clothing.
Storage:	Not prescribed
Disposal:	Dispose of contents and/or container according to Federal, State/Provincial and local governmental regulations.

Classification complies with OSHA Hazard Communication Standard (29 CFR 1910.1200) and is consistent with the provisions of the United Nations Globally Harmonized System of Classification and Labeling of Chemicals (GHS).

See Section 11 for additional toxicological information.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous Component(s)	CAS Number	Percentage*
Substituted Silane	Proprietary	1 - 5

Distillates (petroleum), hydrotreated middle	64742-46-7	10 - 30
Silicon dioxide	7631-86-9	10 - 30
Acetic acid	64-19-7	1 - 5

* Exact percentage is a trade secret. Concentration range is provided to assist users in providing appropriate protections.

4. FIRST AID MEASURES

Inhalation:	Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. If symptoms develop and persist, get medical attention.
Skin contact:	Wipe off paste with paper towel or cloth. Wash with soap and water. If symptoms develop and persist, get medical attention.
Eye contact:	Rinse thoroughly with plenty of water, also under the eyelids. If eye irritation persists, consult a specialist.
Ingestion:	Do not induce vomiting. If a person feels unwell or symptoms of skin irritation appear, consult a physician.
Symptoms:	See Section 11.

5. FIRE FIGHTING MEASURES

Extinguishing media:	Foam, dry chemical or carbon dioxide.
Special firefighting procedures:	None
Unusual fire or explosion hazards:	None
Hazardous combustion products:	Formaldehyde. Silica mist. Acrid smoke and fumes.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

Environmental precautions:	Do not allow product to enter sewer or waterways.
Clean-up methods:	Scrape up as much material as possible. Spilled material will solidify. Store in a partly filled, closed container until disposal. Maintain good ventilation for large spills.

7. HANDLING AND STORAGE

Handling:	Avoid contact with eyes, skin and clothing. Do not handle contact lenses until all sealant has been removed from hands. Residual sealant may transfer to lenses and cause eye irritation.
Storage:	Store in a dry area below 90° F. Keep container closed.

For information on product shelf life contact Henkel Customer Service at (800) 243-4874.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

Hazardous Component(s)	ACGIH TLV	OSHA PEL	AIHA WEEL	OTHER
Substituted Silane	None	None	None	None
Distillates (petroleum), hydrotreated middle	None	5 mg/m3 PEL Mist.	None	None
Silicon dioxide	6 mg/m3 TWA	20 MPPCF TWA 0.8 mg/m3 TWA	None	3 mg/m3 TWA Respirable fraction.
Acetic acid	15 ppm STEL 10 ppm TWA	10 ppm (25 mg/m3) PEL	None	None

Engineering controls:

Ensure adequate ventilation, especially in confined areas. Use local ventilation if general ventilation is insufficient to maintain vapor concentration below established exposure limits.

Respiratory protection:

Use NIOSH approved respirator if there is potential to exceed exposure limit(s).

Eye/face protection:

Safety goggles or safety glasses with side shields. Full face protection should be used if the potential for splashing or spraying of product exists.

Skin protection:

Chemical resistant, impermeable gloves. Nitrile gloves. Butyl rubber gloves.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Paste
Color:	Translucent
Odor:	Acetic acid
Odor threshold:	Not available.
pH:	Not available.
Vapor pressure:	< 10 mm hg (20 °C (68°F))
Boiling point/range:	Not available.
Melting point/ range:	Not available.
Specific gravity:	1.01 at 20 °C (68°F)
Vapor density:	Heavier than air.
Flash point:	> 93 °C (> 199.4 °F)
Flammable/Explosive limits - lower:	4 %
Flammable/Explosive limits - upper:	19.9 %
Autoignition temperature:	Not available.
Evaporation rate:	Not available.
Solubility in water:	Not determined
Partition coefficient (n-octanol/water):	Not available.
VOC content:	3.0 %; 30 g/l
Viscosity:	Not available.
Decomposition temperature:	Not available.

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous reactions:	Will not occur.
Hazardous decomposition products:	Acetic acid is liberated slowly upon contact with moisture. Formaldehyde.
Incompatible materials:	Acids. Bases. Oxidizing agents. Water.
Reactivity:	Not available.
Conditions to avoid:	Prolonged heating at temperatures above 150 °C. Exposure to moisture.

11. TOXICOLOGICAL INFORMATION

Relevant routes of exposure: Skin, Inhalation, Eyes

Potential Health Effects/Symptoms

Inhalation: Acetic acid produced during cure may irritate eyes, nose and throat. When heated to temperatures exceeding 300° F (150° C) in the presence of air, silicones may form formaldehyde vapors. Formaldehyde is a potential cancer hazard and a known skin and respiratory sensitizer. Vapors irritate the eyes, nose and throat. Safe handling conditions may be maintained by keeping formaldehyde vapor concentrations below the OSHA permissible limit.

Skin contact: Causes skin irritation. May cause allergic skin reaction.

Eye contact: Causes serious eye irritation.

Ingestion: Not expected to be harmful by ingestion.

Hazardous Component(s)	LD50s and LC50s	Immediate and Delayed Health Effects
Substituted Silane	None	Irritant, Allergen
Distillates (petroleum), hydrotreated middle	None	Irritant
Silicon dioxide	Oral LD50 (RAT) = > 22,500 mg/kg Oral LD50 (RABBIT) = 1,200 mg/kg Oral LD50 (RAT) = 3.53 g/kg Oral LD50 (RAT) = 3.31 g/kg Dermal LD50 (RABBIT) = 1,060 mg/kg Inhalation LC50 (RAT, 4 h) = 11.4 mg/l	Nuisance dust
Acetic acid		Allergen, Corrosive, Eyes, Gastrointestinal, Immune system, Irritant, Kidney

Hazardous Component(s)	NTP Carcinogen	IARC Carcinogen	OSHA Carcinogen (Specifically Regulated)
Substituted Silane	No	No	No
Distillates (petroleum), hydrotreated middle	No	No	No
Silicon dioxide	No	No	No
Acetic acid	No	No	No

12. ECOLOGICAL INFORMATION

Ecological information: Not available.

13. DISPOSAL CONSIDERATIONS

Information provided is for unused product only.

Recommended method of disposal: Follow all local, state, federal and provincial regulations for disposal. Cured rubber can be incinerated or landfilled following EPA and local regulations.

Hazardous waste number: Not a RCRA hazardous waste.

14. TRANSPORT INFORMATION

The transport information provided in this section only applies to the material/formulation itself, and is not specific to any package/configuration.

U.S. Department of Transportation Ground (49 CFR)

Proper shipping name: Not regulated
Hazard class or division: None
Identification number: None
Packing group: None

International Air Transportation (ICAO/IATA)

Proper shipping name:	Not regulated
Hazard class or division:	None
Identification number:	None
Packing group:	None

Water Transportation (IMO/IMDG)

Proper shipping name:	Not regulated

Internet: www.henkelna.com

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

DANGER: CAUSES SKIN IRRITATION.
MAY CAUSE AN ALLERGIC SKIN REACTION.
CAUSES SERIOUS EYE DAMAGE.
HARMFUL IF INHALED.
MAY CAUSE ALLERGY OR ASTHMA SYMPTOMS OR BREATHING DIFFICULTIES IF INHALED.
MAY CAUSE CANCER.
CAUSES DAMAGE TO ORGANS THROUGH PROLONGED OR REPEATED EXPOSURE.

HAZARD CLASS	HAZARD CATEGORY
ACUTE TOXICITY INHALATION	4
SKIN IRRITATION	2
SERIOUS EYE DAMAGE	1
RESPIRATORY SENSITIZATION	1
SKIN SENSITIZATION	1
CARCINOGENICITY	1A
SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE	1

PICTOGRAM(S)

Precautionary Statements

Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust or fumes. Wash affected area thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves, clothing, eye and face protection. In case of inadequate ventilation wear respiratory protection.

Response: IF ON SKIN: Wash with plenty of water. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical attention. If skin irritation or rash occurs: Get medical attention. Take off contaminated clothing.

Storage: Store locked up.

Disposal: Dispose of contents and/or container according to Federal, State/Provincial and local governmental regulations.

Classification complies with OSHA Hazard Communication Standard (29 CFR 1910.1200) and is consistent with the provisions of the United Nations Globally Harmonized System of Classification and Labeling of Chemicals (GHS).

See Section 11 for additional toxicological information.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous Component(s)	CAS Number	Percentage*
Quartz (SiO ₂), <1% respirable	14808-60-7	50 - 60
Limestone	1317-65-3	10 - 20
Trimethoxyphenylsilane	2996-92-1	1 - 5
Trimethoxyvinylsilane	2768-02-7	1 - 5
Isophorone diamine diisocyanate	4098-71-9	1 - 5
Gamma-glycidoxypentyl trimethoxysilane	2530-83-8	0.1 - 1
N-[3-(Trimethoxysilyl)propyl]butylamine	31024-56-3	1 - 5
3-(Trimethoxysilyl)propylamine	13822-56-5	0.1 - 1

* Exact percentages may vary or are trade secret. Concentration range is provided to assist users in providing appropriate protections.

Exposure to moisture during cure will release 1-2% methanol.

4. FIRST AID MEASURES

Inhalation:	Move to fresh air. If symptoms persist, seek medical advice.
Skin contact:	Wash with soap and water. If skin irritation persists, call a physician. Wipe off paste with paper towel or cloth.
Eye contact:	Flush with copious amounts of water, preferably, lukewarm water for at least 15 minutes, holding eyelids open all the time. If symptoms develop and persist, get medical attention.
Ingestion:	Do not induce vomiting. If a person feels unwell or symptoms of skin irritation appear, consult a physician.
Symptoms:	See Section 11.

5. FIRE FIGHTING MEASURES

Extinguishing media:	carbon dioxide, foam, powder, water spray jet, fine water spray
Special firefighting procedures:	Wear protective equipment. Wear self-contained breathing apparatus.
Unusual fire or explosion hazards:	None identified.
Hazardous combustion products:	Upon decomposition, this product emits carbon monoxide, carbon dioxide and/or low molecular weight hydrocarbons.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

Environmental precautions:	Do not allow product to enter sewer or waterways.
Clean-up methods:	Refer to Section 8 "Exposure Controls / Personal Protection" prior to clean up. Store in a partly filled, closed container until disposal. Spilled material will solidify. Scrape up as much material as possible. Maintain good ventilation for large spills.

7. HANDLING AND STORAGE

Handling: Do not wear contact lenses. Avoid contact with eyes, skin and clothing. Keep out of the reach of children. Protect from moisture. Use only with adequate ventilation.

Storage: For safe storage, store between -20 °C (-4°F) and 40 °C (104°F)
Store in a cool, dry area. Avoid moisture.

For information on product shelf life, please review labels on container or check the Technical Data Sheet.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

Hazardous Component(s)	ACGIH TLV	OSHA PEL	AIHA WEEL	OTHER
Quartz (SiO ₂), <1% respirable	0.025 mg/m ³ TWA Respirable fraction.	0.05 mg/m ³ TWA (Respirable dust.) (Respirable dust.) 0.025 mg/m ³ OSHA_ACT (Respirable dust.) 0.05 mg/m ³ PEL Respirable dust. 2.4 MPPCF TWA Respirable. 0.1 mg/m ³ TWA Respirable.	None	None
Limestone	10 mg/m ³ TWA Total dust.	5 mg/m ³ PEL Respirable fraction. 15 mg/m ³ PEL Total dust.	None	None
Trimethoxyphenylsilane	None	None	None	None
Trimethoxyvinylsilane	None	None	None	None
Isophorone diamine diisocyanate	0.005 ppm TWA	None	None	None
Gamma-glycidoxypentyl trimethoxysilane	None	None	None	None
N-[3-(Trimethoxysilyl)propyl]butylamine	None	None	None	None
3-(Trimethoxysilyl)propylamine	None	None	None	None

Engineering controls: Local exhaust ventilation is recommended when general ventilation is not sufficient to control airborne contamination below occupational exposure limits.

Respiratory protection: Use NIOSH approved respirator if there is potential to exceed exposure limit(s).

Eye/face protection: Safety goggles or safety glasses with side shields.

Skin protection: Use impermeable gloves and protective clothing as necessary to prevent skin contact.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Solid
Color:	Gray
Odor:	Characteristic
Odor threshold:	Not available.
pH:	Not applicable
Vapor pressure:	Not applicable
Boiling point/range:	Not applicable
Melting point/range:	Not applicable
Specific gravity:	1.6 - 1.7
Vapor density:	Heavier than air.
Flash point:	107 °C (224.6 °F)
Flammable/Explosive limits - lower:	Not available.
Flammable/Explosive limits - upper:	Not available.
Autoignition temperature:	Not applicable
Flammability:	Not applicable
Evaporation rate:	Not applicable

Solubility in water:	Insoluble
Partition coefficient (n-octanol/water):	Not available.
VOC content:	4 %; 64 g/l (by weight, calculated using CARB method; g/L less water, less exempts calculated using SCAQMD method)
Viscosity:	1,200,000 mPa.s
Decomposition temperature:	Not available.

10. STABILITY AND REACTIVITY

Stability:	Stable under normal conditions of storage and use.
Hazardous reactions:	Will not occur.
Hazardous decomposition products:	Methanol is liberated slowly upon exposure to moisture.
Incompatible materials:	Oxidizing agents.
Reactivity:	Not available.
Conditions to avoid:	Exposure to moisture.

11. TOXICOLOGICAL INFORMATION

Relevant routes of exposure:	Inhalation, Skin contact, Eye contact
-------------------------------------	---------------------------------------

Potential Health Effects/Symptoms

Inhalation:	May be harmful if inhaled. Methanol is released during application and cure, which may affect the nervous system causing dizziness, headache or nausea. Abrasion of cured material such as by sanding or grinding could release respirable particles of silica quartz, a cancer hazard by inhalation. Normal use of this product causes no such release.
Skin contact:	Prolonged and/or repeated skin contact with this product may cause irritation/dermatitis.
Eye contact:	Vapors may irritate eyes. Contact with eyes will cause irritation. Symptoms include itching, burning, redness and tearing.
Ingestion:	Harmful if swallowed. Not expected under normal conditions of use.

Hazardous Component(s)	LD50s and LC50s	Immediate and Delayed Health Effects
Quartz (SiO ₂), <1% respirable	None	Immune system, Lung, Some evidence of carcinogenicity
Limestone	None	Nuisance dust
Trimethoxyphenylsilane	None	Irritant, Allergen
Trimethoxyvinylsilane	Inhalation LC50 (Rat, 4 h) = 2773 ppm	Irritant, Allergen

1.4. Emergency telephone number

Emergency Telephone Number: (281) 575-5000

2. Hazard(s) Identification

2.1 Classification in accordance with paragraph (d) of §1910.1200

Carcinogenicity	Category 1A - H350
Specific Target Organ Toxicity - (Repeated Exposure)	Category 1 - H372

2.2. Label Elements

Hazard Pictograms

Signal Word	Danger
Hazard Statements	H350 - May cause cancer by inhalation H372 - Causes damage to organs through prolonged or repeated exposure if inhaled
Precautionary Statements	
Prevention	P201 - Obtain special instructions before use P202 - Do not handle until all safety precautions have been read and understood P260 - Do not breathe dust/fume/gas/mist/vapors/spray P264 - Wash face, hands and any exposed skin thoroughly after handling P270 - Do not eat, drink or smoke when using this product P280 - Wear protective gloves/eye protection/face protection
Response	P308 + P313 - IF exposed or concerned: Get medical advice/attention P314 - Get medical attention/advice if you feel unwell
Storage	P405 - Store locked up
Disposal	P501 - Dispose of contents/container in accordance with local/regional/national/international regulations

**Contains
Substances**

	CAS Number
Bentonite	1302-78-9
Crystalline silica, quartz	14808-60-7
Crystalline silica, cristobalite	14464-46-1
Crystalline silica, tridymite	15468-32-3

2.3 Hazards not otherwise classified

None known

3. Composition/information on Ingredients

Substances	CAS Number	PERCENT (w/w)	GHS Classification - US
Bentonite	1302-78-9	60 - 100%	Not classified
Crystalline silica, quartz	14808-60-7	1 - 5%	Carc. 1A (H350) STOT RE 1 (H372)
Crystalline silica, cristobalite	14464-46-1	0.1 - 1%	Carc. 1A (H350) STOT RE 1 (H372)
Crystalline silica, tridymite	15468-32-3	0.1 - 1%	Carc. 1A (H350) STOT RE 1 (H372)

The exact percentage (concentration) of the composition has been withheld as proprietary.

4. First-Aid Measures**4.1. Description of first aid measures**

Inhalation	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
-------------------	--

Eyes	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.
Skin	Wash with soap and water. Get medical attention if irritation persists.
Ingestion	Under normal conditions, first aid procedures are not required.

4.2 Most important symptoms/effects, acute and delayed

Breathing crystalline silica can cause lung disease, including silicosis and lung cancer. Crystalline silica has also been associated with scleroderma and kidney disease.

4.3. Indication of any immediate medical attention and special treatment needed

Notes to Physician	Treat symptomatically.
---------------------------	------------------------

5. Fire-fighting measures

5.1. Extinguishing media

Suitable Extinguishing Media

All standard fire fighting media

Extinguishing media which must not be used for safety reasons

None known.

5.2 Specific hazards arising from the substance or mixture

Special Exposure Hazards

Decomposition in fire may produce toxic gases.

5.3 Special protective equipment and precautions for fire-fighters

Special Protective Equipment for Fire-Fighters

Full protective clothing and approved self-contained breathing apparatus required for fire fighting personnel.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use appropriate protective equipment. Avoid creating and breathing dust.

See Section 8 for additional information

6.2. Environmental precautions

Prevent from entering sewers, waterways, or low areas.

6.3. Methods and material for containment and cleaning up

Collect using dustless method and hold for appropriate disposal. Consider possible toxic or fire hazards associated with contaminating substances and use appropriate methods for collection, storage and disposal.

7. Handling and storage

7.1. Precautions for Safe Handling

Handling Precautions

This product contains quartz, cristobalite, and/or tridymite which may become airborne without a visible cloud. Avoid breathing dust. Avoid creating dusty conditions. Use only with adequate ventilation to keep exposure below recommended exposure limits. Wear a NIOSH certified, European Standard En 149, or equivalent respirator when using this product. Material is slippery when wet.

Hygiene Measures

Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Storage Information

Use good housekeeping in storage and work areas to prevent accumulation of dust. Close container when not in use. Do not reuse empty container.

8. Exposure Controls/Personal Protection

8.1 Occupational Exposure Limits

Substances	CAS Number	OSHA PEL-TWA	ACGIH TLV-TWA
Bentonite	1302-78-9	Not applicable	TWA: 1 mg/m ³
Crystalline silica, quartz	14808-60-7	10 mg/m ³ %SiO ₂ + 2	TWA: 0.025 mg/m ³
Crystalline silica, cristobalite	14464-46-1	1/2 x 10 mg/m ³ %SiO ₂ + 2	TWA: 0.025 mg/m ³
Crystalline silica, tridymite	15468-32-3	1/2 x 10 mg/m ³ %SiO ₂ + 2	0.05 mg/m ³

8.2 Appropriate engineering controls

Engineering Controls

Use approved industrial ventilation and local exhaust as required to maintain exposures below applicable exposure limits.

8.3 Individual protection measures, such as personal protective equipment

Personal Protective Equipment

If engineering controls and work practices cannot prevent excessive exposures, the selection and proper use of personal protective equipment should be determined by an industrial hygienist or other qualified professional based on the specific application of this product.

Respiratory Protection

Not normally needed. But if significant exposures are possible then the following respirator is recommended:

Dust/mist respirator. (N95, P2/P3)

Hand Protection

Normal work gloves.

Skin Protection

Wear clothing appropriate for the work environment. Dusty clothing should be laundered before reuse. Use precautionary measures to avoid creating dust when removing or laundering clothing.

Eye Protection

Wear safety glasses or goggles to protect against exposure.

Other Precautions

None known.

9. Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Physical State: Solid

Solubility in other solvents

No data available

Partition coefficient: n-octanol/water	No data available
Autoignition Temperature	No data available
Decomposition Temperature	No data available
Viscosity	No data available
Explosive Properties	No information available
Oxidizing Properties	No information available

9.2. Other information

VOC Content (%)	No data available
-----------------	-------------------

10. Stability and Reactivity**10.1. Reactivity**

Not expected to be reactive.

10.2. Chemical Stability

Stable

10.3. Possibility of Hazardous Reactions

Will Not Occur

10.4. Conditions to Avoid

None anticipated

10.5. Incompatible Materials

Hydrofluoric acid.

10.6. Hazardous Decomposition Products

Amorphous silica may transform at elevated temperatures to tridymite (870 C) or cristobalite (1470 C).

11. Toxicological Information**11.1 Information on likely routes of exposure**

Principle Route of Exposure Eye or skin contact, inhalation.

11.2 Symptoms related to the physical, chemical and toxicological characteristics**Acute Toxicity****Inhalation**

Inhaled crystalline silica in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (IARC, Group 1). There is sufficient evidence in experimental animals for the carcinogenicity of tridymite (IARC, Group 2A).

Breathing silica dust may cause irritation of the nose, throat, and respiratory passages. Breathing silica dust may not cause noticeable injury or illness even though permanent lung damage may be occurring. Inhalation of dust may also have serious chronic health effects (See "Chronic Effects/Carcinogenicity" subsection below).

Eye Contact

May cause mechanical irritation to eye.

Skin Contact

May cause mechanical skin irritation.

Ingestion

None known

Chronic Effects/Carcinogenicity Silicosis: Excessive inhalation of respirable crystalline silica dust may cause a progressive, disabling, and sometimes-fatal lung disease called silicosis. Symptoms include cough, shortness of breath, wheezing, non-specific chest illness, and reduced pulmonary function. This disease is exacerbated by smoking. Individuals with silicosis are predisposed to develop tuberculosis.

Cancer Status: The International Agency for Research on Cancer (IARC) has determined that crystalline silica inhaled in the form of quartz or cristobalite from occupational sources can cause lung cancer in humans (Group 1 - carcinogenic to humans) and has determined that there is sufficient evidence in experimental animals for the carcinogenicity of tridymite (Group 2A - possible carcinogen to humans). Refer to IARC Monograph 68, Silica, Some Silicates and Organic Fibres (June 1997) in conjunction with the use of these minerals. The National Toxicology Program classifies respirable crystalline silica as "Known to be a human carcinogen". Refer to the 9th Report on Carcinogens (2000). The American Conference of Governmental Industrial Hygienists (ACGIH) classifies crystalline silica, quartz, as a suspected human carcinogen (A2).

There is some evidence that breathing respirable crystalline silica or the disease silicosis is associated with an increased incidence of significant disease endpoints such as scleroderma (an immune system disorder manifested by scarring of the lungs, skin, and other internal organs) and kidney disease.

11.3 Toxicity data

Toxicology data for the components

Substances	CAS Number	LD50 Oral	LD50 Dermal	LC50 Inhalation
Bentonite	1302-78-9	> 5000 mg/kg (Rat) > 2000 mg/kg (Rat)	No data available	> 5.27 mg/L (Rat)
Crystalline silica, quartz	14808-60-7	500 mg/kg (Rat) >15,000 mg/kg (Human)	No data available	No data available
Crystalline silica, cristobalite	14464-46-1	500 mg/kg (Rat)	No data available	No data available
Crystalline silica, tridymite	15468-32-3	500 mg/kg (Rat)	No data available	No data available

Substances	CAS Number	Skin corrosion/irritation
Bentonite	1302-78-9	Non-irritating to the skin (Rabbit)
Crystalline silica, quartz	14808-60-7	Non-irritating to the skin
Crystalline silica, cristobalite	14464-46-1	Non-irritating to the skin
Crystalline silica, tridymite	15468-32-3	Non-irritating to the skin

Substances	CAS Number	Eye damage/irritation
Bentonite	1302-78-9	Non-irritating to the eye (Rabbit)
Crystalline silica, quartz	14808-60-7	Mechanical irritation of the eyes is possible.
Crystalline silica, cristobalite	14464-46-1	Mechanical irritation of the eyes is possible.
Crystalline silica, tridymite	15468-32-3	Mechanical irritation of the eyes is possible.

Substances	CAS Number	Skin Sensitization
Bentonite	1302-78-9	Did not cause sensitization on laboratory animals (mouse)
Crystalline silica, quartz	14808-60-7	Not regarded as a sensitizer.
Crystalline silica, cristobalite	14464-46-1	Not regarded as a sensitizer.
Crystalline silica, tridymite	15468-32-3	Not regarded as a sensitizer.

Substances	CAS Number	Respiratory Sensitization
Bentonite	1302-78-9	No information available
Crystalline silica, quartz	14808-60-7	No information available

Crystalline silica, cristobalite	14464-46-1	No information available
Crystalline silica, tridymite	15468-32-3	No information available

Substances	CAS Number	Mutagenic Effects
Bentonite	1302-78-9	In vitro tests did not show mutagenic effects
Crystalline silica, quartz	14808-60-7	Not regarded as mutagenic.
Crystalline silica, cristobalite	14464-46-1	Not regarded as mutagenic.
Crystalline silica, tridymite	15468-32-3	Not regarded as mutagenic.

Substances	CAS Number	Carcinogenic Effects
Bentonite	1302-78-9	Did not show carcinogenic effects in animal experiments (similar substances)
Crystalline silica, quartz	14808-60-7	Contains crystalline silica which may cause silicosis, a delayed and progressive lung disease. The IARC and NTP have determined there is sufficient evidence in humans of the carcinogenicity of crystalline silica with repeated respiratory exposure. Based on available scientific evidence, this substance is a threshold carcinogen with a mode of action involving indirect genotoxicity secondary to lung injury.
Crystalline silica, cristobalite	14464-46-1	Contains crystalline silica which may cause silicosis, a delayed and progressive lung disease. The IARC and NTP have determined there is sufficient evidence in humans of the carcinogenicity of crystalline silica with repeated respiratory exposure. Based on available scientific evidence, this substance is a threshold carcinogen with a mode of action involving indirect genotoxicity secondary to lung injury.
Crystalline silica, tridymite	15468-32-3	Contains crystalline silica which may cause silicosis, a delayed and progressive lung disease. The IARC and NTP have determined there is sufficient evidence in humans of the carcinogenicity of crystalline silica with repeated respiratory exposure. Based on available scientific evidence, this substance is a threshold carcinogen with a mode of action involving indirect genotoxicity secondary to lung injury.

Substances	CAS Number	Reproductive toxicity
Bentonite	1302-78-9	Did not show teratogenic effects in animal experiments.
Crystalline silica, quartz	14808-60-7	No information available
Crystalline silica, cristobalite	14464-46-1	No information available
Crystalline silica, tridymite	15468-32-3	No information available

Substances	CAS Number	STOT - single exposure
Bentonite	1302-78-9	None under normal use conditions
Crystalline silica, quartz	14808-60-7	No significant toxicity observed in animal studies at concentration requiring classification.
Crystalline silica, cristobalite	14464-46-1	No significant toxicity observed in animal studies at concentration requiring classification.
Crystalline silica, tridymite	15468-32-3	No significant toxicity observed in animal studies at concentration requiring classification.

Substances	CAS Number	STOT - repeated exposure
Bentonite	1302-78-9	None under normal use conditions
Crystalline silica, quartz	14808-60-7	Causes damage to organs through prolonged or repeated exposure if inhaled: (Lungs)
Crystalline silica, cristobalite	14464-46-1	Causes damage to organs through prolonged or repeated exposure if inhaled: (Lungs)
Crystalline silica, tridymite	15468-32-3	Causes damage to organs through prolonged or repeated exposure if inhaled: (Lungs)

Substances	CAS Number	Aspiration hazard
Bentonite	1302-78-9	Not applicable
Crystalline silica, quartz	14808-60-7	Not applicable
Crystalline silica, cristobalite	14464-46-1	Not applicable
Crystalline silica, tridymite	15468-32-3	Not applicable

12. Ecological Information

12.1. Toxicity

Ecotoxicity Effects

Product Ecotoxicity Data

No data available

Substance Ecotoxicity Data

Substances	CAS Number	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Toxicity to Invertebrates
Bentonite	1302-78-9	EC50(72h): > 100 mg/L (freshwater algae)	TLM96 10,000 ppm (Oncorhynchus mykiss) LC50 (96h) 16,000 - 19,000 mg/L (Oncorhynchus mykiss) LC50 (24h) 2800 – 3200 mg/L (black bass, warmouth bass, blue gill and sunfish)	No information available	EC50 (96h) 81.6 mg/L (Metacarcinus magister) EC50 (96h) 24.8 mg/L (Pandalus danae) EC50 (48h) > 100 mg/L (Daphnia magna)
Crystalline silica, quartz	14808-60-7	No information available	LL50 (96h) 10,000 mg/L (Danio rerio) (similar substance)	No information available	LL50 (24h) > 10,000 mg/L (Daphnia magna) (similar substance)
Crystalline silica, cristobalite	14464-46-1	No information available	LL0 (96h) 10,000 mg/L (Danio rerio) (similar substance)	No information available	LL50 (24h) > 10,000 mg/L (Daphnia magna) (similar substance)
Crystalline silica, tridymite	15468-32-3	No information available	LL0 (96h) 10,000 mg/L (Danio rerio) (similar substance)	No information available	LL50 (24h) > 10,000 mg/L (Daphnia magna) (similar substance)

12.2. Persistence and degradability

Substances	CAS Number	Persistence and Degradability
Bentonite	1302-78-9	The methods for determining biodegradability are not applicable to inorganic substances.
Crystalline silica, quartz	14808-60-7	The methods for determining biodegradability are not applicable to inorganic substances.
Crystalline silica, cristobalite	14464-46-1	The methods for determining biodegradability are not applicable to inorganic substances.
Crystalline silica, tridymite	15468-32-3	The methods for determining biodegradability are not applicable to inorganic substances.

12.3. Bioaccumulative potential

Substances	CAS Number	Log Pow
Bentonite	1302-78-9	No information available
Crystalline silica, quartz	14808-60-7	No information available
Crystalline silica, cristobalite	14464-46-1	No information available
Crystalline silica, tridymite	15468-32-3	No information available

12.4. Mobility in soil**12.5 Other adverse effects**

No information available

13. Disposal Considerations**13.1. Waste treatment methods****Disposal Method**

Bury in a licensed landfill according to federal, state, and local regulations.

Contaminated Packaging

Follow all applicable national or local regulations.

14. Transport Information**US DOT****UN Number:**

Supplier General Contact	+612 9250-5000
FAX	+612 9250-5742

SECTION 2 HAZARDS IDENTIFICATION

This material is not hazardous according to regulatory guidelines (see (M)SDS Section 15).

Other hazard information:

Physical / Chemical Hazards:

No significant hazards.

Health Hazards:

High-pressure injection under skin may cause serious damage. Excessive exposure may result in eye, skin, or respiratory irritation.

Environmental Hazards:

No significant hazards.

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 2 of 9

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

Name	CAS#	Concentration*	GHS Hazard Codes
1-DECENE, HOMOPOLYMER HYDROGENATED	68037-01-4	5 - < 10%	H304
2-PENTANOL, 4-METHYL-, HYDROGEN PHOSPHORODITHIOATE, ZINC SALT	2215-35-2	0.1 - < 1%	H303, H315, H318, H401, H411
DISTILLATES, HEAVY, C18-50 - BRANCHED, CYCLIC AND LINEAR	848301-69-9	10 - < 20%	H304
PHOSPHORODITHIOIC ACID, MIXED 0,0 BIS (1,3-DIMETHYLBUTYL AND ISO-PR)ESTERS, ZINC SALTS	84605-29-8	0.1 - < 1%	H303, H315, H318, H401, H411

* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. Other ingredients determined not to be hazardous up to 100%.

SECTION 4 FIRST AID MEASURES

INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

NOTE TO PHYSICIAN

None

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Inappropriate Extinguishing Media: Straight streams of water

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 3 of 9

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply. Fire-fighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Aldehydes, Incomplete combustion products, Oxides of carbon, Smoke, Fume, Sulphur oxides

FLAMMABILITY PROPERTIES

Flash Point [Method]: >200°C (392°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0

Autoignition Temperature: N/D

SECTION 6

ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

PROTECTIVE MEASURES

Avoid contact with spilled material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

For emergency responders: Respiratory protection: respiratory protection will be necessary only in special cases, e.g., formation of mists. Half-face or full-face respirator with filter(s) for dust/organic vapor or Self Contained Breathing Apparatus (SCBA) can be used depending on the size of spill and potential level of exposure. If the exposure cannot be completely characterized or an oxygen deficient atmosphere is possible or anticipated, SCBA is recommended. Work gloves that are resistant to hydrocarbons are recommended. Gloves made of polyvinyl acetate (PVA) are not water-resistant and are not suitable for emergency use. Chemical goggles are recommended if splashes or contact with eyes is possible. Small spills: normal antistatic work clothes are usually adequate. Large spills: full body suit of chemical resistant, antistatic material is recommended.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do so without risk. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do so without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dyke far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

Product Name: MOBIL 1 5W-30
Revision Date: 16 Aug 2021
Page 4 of 9

SECTION 7

HANDLING AND STORAGE

HANDLING

Avoid contact with used product. Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during switch-loading operations). Use proper bonding and/or earthing procedures. However, bonding and earthing may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Static Accumulator: This material is a static accumulator.

STORAGE

The type of container used to store the material may affect static accumulation and dissipation. Do not store in open or unlabelled containers. Keep away from incompatible materials.

Material is defined under the National Standard [NOHSC:1015] Storage and Handling of Workplace Dangerous Goods.

SECTION 8

EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMIT VALUES

Exposure limits/standards (Note: Exposure limits are not additive)

Substance Name	Form	Limit/Standard			Note	Source
1-DECENE, HOMOPOLYMER HYDROGENATED	Aerosols (thoracic fraction)	TWA	5 mg/m ³			ExxonMobil
DISTILLATES, HEAVY, C18-50 - BRANCHED, CYCLIC AND LINEAR		TWA	480 mg/m ³			Australia WES

Exposure limits/standards for materials that can be formed when handling this product:

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

Biological limits

No biological limits allocated.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 5 of 9

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Particulate

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapour warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Nitrile, Viton

No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practise good housekeeping.

ENVIRONMENTAL CONTROLS

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9

PHYSICAL AND CHEMICAL PROPERTIES

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION

Physical State: Liquid

Colour: Brown

Odour: Characteristic

Odour Threshold: N/D

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 6 of 9

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15.6 °C): 0.852

Flammability (Solid, Gas): N/A

Flash Point [Method]: >200°C (392°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0

Autoignition Temperature: N/D

Boiling Point / Range: > 316°C (601°F)

Decomposition Temperature: N/D

Vapour Density (Air = 1): > 2 at 101 kPa

Vapour Pressure: < 0.013 kPa (0.1 mm Hg) at 20 °C

Evaporation Rate (n-butyl acetate = 1): N/D

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): > 3.5

Solubility in Water: Negligible

Viscosity: 64.2 cSt (64.2 mm²/sec) at 40 °C | 11.1 cSt (11.1 mm²/sec) at 100°C [ASTM D 445]

Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: N/D

Melting Point: N/A

Pour Point: -39°C (-38°F)

SECTION 10 STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

INCOMPATIBLE MATERIALS: Strong oxidisers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

INFORMATION ON TOXICOLOGICAL EFFECTS

Hazard Class	Conclusion / Remarks
Inhalation	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Irritation: No end point data for material.	Negligible hazard at ambient/normal handling temperatures.
Ingestion	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin Corrosion/Irritation: No end point data for material.	Negligible irritation to skin at ambient temperatures. Based on assessment of the components.

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 7 of 9

Eye	
Serious Eye Damage/Irritation: No end point data for material.	May cause mild, short-lasting discomfort to eyes. Based on assessment of the components.
Sensitisation	
Respiratory Sensitization: No end point data for material.	Not expected to be a respiratory sensitizer.
Skin Sensitization: No end point data for material.	Not expected to be a skin sensitizer. Based on assessment of the components.
Aspiration: Data available.	Not expected to be an aspiration hazard. Based on physico-chemical properties of the material.
Germ Cell Mutagenicity: No end point data for material.	Not expected to be a germ cell mutagen. Based on assessment of the components.
Carcinogenicity: No end point data for material.	Not expected to cause cancer. Based on assessment of the components.
Reproductive Toxicity: No end point data for material.	Not expected to be a reproductive toxicant. Based on assessment of the components.
Lactation: No end point data for material.	Not expected to cause harm to breast-fed children.
Specific Target Organ Toxicity (STOT)	
Single Exposure: No end point data for material.	Not expected to cause organ damage from a single exposure.
Repeated Exposure: No end point data for material.	Not expected to cause organ damage from prolonged or repeated exposure. Based on assessment of the components.

TOXICITY FOR SUBSTANCES

NAME	ACUTE TOXICITY
2-PENTANOL, 4-METHYL-, HYDROGEN PHOSPHORODITHIOATE, ZINC SALT	Oral Lethality: LD 50 2230 mg/kg (Rat)

OTHER INFORMATION

For the product itself:

Diesel engine oils: Not carcinogenic in animals tests. Used and unused diesel engine oils did not produce any carcinogenic effects in chronic mouse skin painting studies. Oils that are used in gasoline engines may become hazardous and display the following properties: Carcinogenic in animal tests. Caused mutations in vitro. Possible allergen and photoallergen. Contains polycyclic aromatic compounds (PAC) from combustion products of gasoline and/or thermal degradation products.

Contains:

Synthetic base oils: Not expected to cause significant health effects under conditions of normal use, based on laboratory studies with the same or similar materials. Not mutagenic or genotoxic. Not sensitising in test animals and humans.

IARC Classification:

The following ingredients are cited on the lists below: None.

--REGULATORY LISTS SEARCHED--

1 = IARC 1

2 = IARC 2A

3 = IARC 2B

SECTION 12	ECOLOGICAL INFORMATION
------------	------------------------

Product Name: MOBIL 1 5W-30

Revision Date: 16 Aug 2021

Page 8 of 9

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

MOBILITY

Base oil component -- Low solubility and floats and is expected to migrate from water to the land.
Expected to partition to sediment and wastewater solids.

SECTION 13

DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products. Protect the environment. Dispose of used oil at designated sites. Minimize skin contact. Do not mix used oils with solvents, brake fluids or coolants.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

SECTION 14

TRANSPORT INFORMATION

LAND (ADG) : Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

Marine Pollutant: No

AIR (IATA): Not Regulated for Air Transport

SECTION 15

REGULATORY INFORMATION

This material is not considered hazardous according to Australia Model Work Health and Safety Regulations.

Product is not regulated according to Australian Dangerous Goods Code.

No Poison Schedule number allocated by the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP) established under the Therapeutic Goods Act.

Product Name: MOBIL 1 5W-30
Revision Date: 16 Aug 2021
Page 9 of 9

AS1940 COMBUSTIBLE CLASS: C2

REGULATORY STATUS AND APPLICABLE LAWS AND REGULATIONS

Listed or exempt from listing/notification on the following chemical inventories : AIIC, DSL, ENCS, IECSC, ISHL, KECI, PICCS, TCSI, TSCA

SECTION 16

OTHER INFORMATION

KEY TO ABBREVIATIONS AND ACRONYMS:

N/D = Not determined, N/A = Not applicable, STEL = Short-Term Exposure Limit, TWA = Time-Weighted Average

KEY TO THE H-CODES CONTAINED IN SECTION 3 OF THIS DOCUMENT (for information only):

H303: May be harmful if swallowed; Acute Tox Oral, Cat 5
H304: May be fatal if swallowed and enters airways; Aspiration, Cat 1
H315: Causes skin irritation; Skin Corr/Irritation, Cat 2
H318: Causes serious eye damage; Serious Eye Damage/Irr, Cat 1
H401: Toxic to aquatic life; Acute Env Tox, Cat 2
H411: Toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 2

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

Section 15: National Chemical Inventory Listing information was modified.
Section 15: Special Cases Table information was deleted.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, re-publication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

Appendix I. Chemicals Safety Data Sheets

3 – Safety Data Sheets of chemicals used during operation phase

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

SECTION 1: PRODUCT AND COMPANY IDENTIFICATION

Product Name: Triethylene Glycol

Synonyms: Di-beta-hydroxyethoxyethane; 2,2'-Ethylene dioxybis(ethanol); 2,2'-Ethylene dioxydiethanol; Ethylene glycol dihydroxydiethyl ether; Glycol bis(hydroxyethyl)ether; TEG; Triglycol

CAS Number: 112-27-6

Chemical Formula: (CH₂OCH₂CH₂OH)₂ (C₆ H₁₄ O₄)

General Use: Antifreeze

Manufacturer: KMCO, 16503 Ramsey Road, Crosby, Texas 77532

KMTEx, 2450 S. Gulfway Drive, Port Arthur, Texas 77641

24-HOUR EMERGENCY NUMBER - CHEMTREC: 1-800-424-9300

KMCO PHONE: (281) 328-3501

FAX: (281) 328-9528

KMTEx PHONE: (409) 985-4200

FAX: (409) 985-6350

Restrictions on Use:

SECTION 2: HAZARD(S) IDENTIFICATION

Hazard Classification:

OSHA Hazards: No OSHA Hazards

Target Organs: May cause damage to kidneys through prolonged or repeated exposure.

GHS Classification:

Eye irritation (Category 2B)

Skin irritation (Category 3)

Specific target organ toxicity – single exposure (Category 3)

Specific target organ toxicity – repeated exposure (Category 2)

Signal Word: WARNING

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

Hazard Statements:

H302	Harmful if swallowed
H316	Causes mild skin irritation.
H320	Causes eye irritation.
H335	May cause respiratory irritation.
H373	May cause damage to organs through prolonged or repeated exposure.

Precautionary Statements:

P261	Avoid breathing dust/fumes/gas/mist/vapors.
P264	Wash thoroughly after handling.
P270	Do not eat drink or smoke when using this product.
P301 + P312	IF SWALLOWED: Call a POISON CENTER or doctor / physician if you feel unwell.
P330	Rinse mouth.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.
P314	Get medical advice/attention if you feel unwell.

NFPA Rating

Health hazard:	1
Fire:	1
Reactivity:	0

Description of Any Other Hazards Not Otherwise Classified: none known

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

<u>INGREDIENT Name:</u>	<u>CAS NUMBER</u>	<u>%wt. or %v</u>
Triethylene Glycol	112-27-6	95
Diethylene Glycol	111-46-6	4
Tetraethylene Glycol	112-60-7	1

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

SECTION 4: FIRST AID MEASURES

EYES: Thoroughly flush the eyes with large amounts of clean low-pressure water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Seek medical attention.

SKIN: Wash skin with soap and copious amounts of water. Seek medical attention.

INGESTION: NEVER give anything by mouth to an unconscious person. If vomiting does occur, have victim lean forward to prevent aspiration. Rinse mouth with water. Immediately have victim drink several glasses of water to dilute. Seek medical attention.

INHALATION: Remove person to fresh air. If signs/symptoms continue, get medical attention. Give oxygen or artificial respiration as needed.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS: Treat in accordance to symptoms (decontamination, vital functions), no known specific antidote

SECTION 5: FIRE-FIGHTING MEASURES

SUITABLE EXTINGUISHING MEDIA: Dry chemical, foam or carbon dioxide. Water spray may be used to keep fire exposed containers cool, dilute spills to nonflammable mixtures, protect personnel attempting to stop leak, and disperse vapors.

UNSUITABLE EXTINGUISHING MEDIA: Direct water stream.

SPECIAL FIRE FIGHTING PROCEDURES: Evacuate area. Do not use direct water stream to extinguish fires. Product may travel with water and reignite. Vapors can flow along surfaces to distant ignition source and flash back. Do not release runoff from fire control methods to sewers or waterways.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Above flash point, vapor-air mixtures are explosive within flammable limits. Contact with strong oxidizers may cause fire. Containers may explode when involved in a fire.

HAZARDOUS COMBUSTION PRODUCTS: Carbon monoxide, carbon dioxide

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

SPECIAL PROTECTIVE EQUIPMENT AND PRECAUTIONS FOR FIRE FIGHTERS: Wear full protective clothing and NIOSH – approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive breathing mode.

SECTION 6: ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS: Use appropriate personal protective equipment. Avoid breathing vapors, mist or gas. Avoid contact with spilled material. Insure adequate ventilation. Remove all sources of ignition. Use non-sparking tools and equipment.

PROTECTIVE CLOTHING: Standard work uniform. Impervious gloves. Safety glasses. Personnel should increase PPE level as deemed appropriate in any given situation.

EMERGENCY PROCEDURES:

SMALL SPILLS: Contain and recover liquid when possible. Collect liquid in appropriate container or absorb with an inert material (such as vermiculite or dry sand) and place in chemical waste container. Do not use combustible materials such as sawdust for the cleanup.

LARGE SPILLS:

Containment: Shut off source of leak if safe to do so. Dike far ahead of liquid spill for later disposal. Do not allow material to enter sewers or waterways.

Cleanup: Contain and recover liquid when possible. Collect liquid in appropriate container. Absorb residue with an inert material (such as vermiculite or dry sand) and place in chemical waste container. Do not use combustible materials such as sawdust for the cleanup.

SECTION 7: HANDLING AND STORAGE

HANDLING PRECAUTIONS: Do not get on skin or in eyes. Do not inhale vapor or mist. Take normal fire prevention measures.

STORAGE REQUIREMENTS: Keep container tightly closed in a cool, dry and well-ventilated place. Product is hygroscopic.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS: Controls should be such that adequate ventilation is provided.

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

VENTILATION: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work place by controlling it at its source.

RESPIRATORY PROTECTION: Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA / NIOSH approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (e.g. cleaning spills, reactor vessels, or storage tanks), wear an SCBA. *Warning! Air purifying respirators do not protect workers in oxygen-deficient atmospheres.* If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.

EYE PROTECTION: Wear protective eyeglasses or chemical safety goggles, per OSHA eye- and face-protection regulations (29 CFR 1910.133) Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with, contact lenses.

SKIN PROTECTION: Wear chemically protective gloves, boots, aprons and gauntlets to prevent prolonged or repeated skin contact.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Make emergency eyewash stations, safety/quick drench showers and washing facilities available in work areas.

WORK HYGIENIC PRACTICES: Never eat, drink or smoke in work areas. Practice good personal hygiene after using this material especially before eating, drinking, smoking, using the toilet, or applying cosmetics. Separate contaminate work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. Discard belts and shoes that cannot be cleaned.

Revision: 0

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE: Liquid

APPEARANCE AND COLOR: Clear/Colorless

ODOR: Mild odor

FLASH POINT: 350° F (176.6° C)

UPPER/LOWER FLAMMABILITY OR EXPLOSIVE LIMITS: N/A

AUTO IGNITION TEMPERATURE: 700 °F (371 °C)

DECOMPOSITION TEMPERATURE: N/A

VAPOR PRESSURE: <0.01 mm Hg @ 20 C

ODOR THRESHOLD: N/A

VAPOR DENSITY (air = 1): 5.2

pH: 6-9

RELATIVE DENSITY: 9.3 lbs/gal @ 20°C

SPECIFIC GRAVITY (H₂O =1 AT 4 C): 1.125

MELTING POINT / FREEZING POINT: -5° C (23° F)

WATER SOLUBILITY: Soluble

OTHER SOLUBILITIES: Alcohols, methyl isosbutyl carbitol

INITIAL BOILING POINT AND BOILING RANGE: 285° C (545° F)

EVAPORATION RATE (BuAc = 1): N/A

PARTITION COEFFICIENT: n-OCTANOL/WATER: N/A

VISCOSITY: 29cP @ 20° C

REFRACTIVE INDEX: 1.447 @ 20° C

FORMULA WEIGHT: 150.7 g/mol

SECTION 10: STABILITY AND REACTIVITY

REACTIVITY: none under normal handling

STABILITY: stable at room temperature under normal storage and handling conditions

CONDITIONS TO AVOID (STABILITY): N/A

INCOMPATIBILITY (MATERIAL TO AVOID): Strong oxidizing agents, strong acids

HAZARDOUS DECOMPOSITION BY-PRODUCTS: Carbon oxides are expected to be, under fire conditions, the primary hazardous decomposition products.

HAZARDOUS POLYMERIZATION: N/A

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

CONDITIONS TO AVOID (POLYMERIZATION): N/A

HAZARDOUS POLYMERICATION BY-PRODUCTS: N/A

SECTION 11: TOXICOLOGICAL INFORMATION

SIGNS AND SYMPTOMS OF OVEREXPOSURE: N/A

ACUTE EFFECTS:

EYE CONTACT: Can be irritating to the eyes.

SKIN CONTACT: Can cause skin irritation if absorbed through skin.

INHALATION: Can cause respiratory tract irritation if inhaled.

INGESTION: Harmful if ingested.

TARGET ORGAN EFFECTS: May cause damage to organs through prolonged or repeated exposure.

CHRONIC EFFECTS: May cause severe kidney problems through prolonged or repeated exposure. Brain damage may also occur. Skin allergy can develop.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Persons with pre-existing skin disorders, eye problem or impaired liver, kidney or respiratory function may be more susceptible to the effects of this substance

ACUTE TOXICITY VALUES

ORAL LD50 (Rabbit): 15000 mg/kg

DERMAL LD50 (Rabbit): >20 g/kg

INHALATION LC50 (state animal): N/A

LISTED CARCINOGEN:

No component of this product present at levels greater than or equal to 0.1 % is identified as a carcinogen or potential carcinogen by NTP / IARC / OSHA.

REPRODUCTIVE TOXICITY: Overexposure may cause reproductive disorder(s) based on tests with laboratory animals

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

TERATOGENICITY: Laboratory experiments have shown teratogenic effects

SECTION 12: ECOLOGICAL INFORMATION

DATA FROM TOXICITY TESTS ON AQUATIC AND/OR TERRESTRIAL ORGANISMS:

Ectotoxicity (aquatic and terrestrial, where available):

Acute Daphnia Toxicity (Triethylene Glycol)

EC50 / 48h / Water flea – 46500 mg/l

Acute Fish Toxicity (Triethylene Glycol)

LC50 / 24 hours / Goldfish - >5000 mg/l

Acute Fish Toxicity (Triethylene Glycol)

LC50 / 96 h / Golden orfe - >100 mg/l

Acute Fish Toxicity (Tetraethylene Glycol)

LC50 / 96 h / Onocorhynchus mykiss - >1000 mg/l

Acute Daphnia Toxicity (Tetraethylene Glycol)

EC50 / 48 h / Daphnia magna - >1000 mg/l

Acute Fish Toxicity (Diethylene Glycol)

LC50 / 96 h / Pimephales promelas – 75200 mg/l

Acute Daphnia Toxicity (Diethylene Glycol)

EC50 / 48 h / Daphnia magna – 84000 mg/l

ENVIRONMENTAL FATE: Biodegradation is expected.

BIOACCUMULATION POTENTIAL: Does not bioaccumulate

POTENTIAL TO MOVE FROM SOIL TO GROUNDWATER: No specific data available

OTHER ADVERSE ENVIRONMENTAL EFFECTS: No data available

SECTION 13: DISPOSAL CONSIDERATIONS

CONTAINERS TO USE: No specific recommendations

Triethylene Glycol

Date of Preparation: 06/15

SDS No. 30261

Revision: 0

RECOMMENDED DISPOSAL METHODS: Whatever cannot be saved for recovery or recycling should be disposed of in an approved waste facility in accordance with Federal, State/Provincial and Local requirements.

PHYSICAL AND CHEMICAL PROPERTIES THAT MAY AFFECT DISPOSAL ACTIVITIES: No specific information available

WHENEVER POSSIBLE, MATERIAL SHOULD NOT BE ALLOWED TO ENTER SEWAGE DISPOSAL SYSTEMS.

SPECIAL PRECAUTIONS FOR LANDFILL OR INCINERATION ACTIVITIES: No specific information available

SECTION 15: REGULATORY INFORMATION

U.S. FEDERAL REGULATIONS

TSCA (TOXIC SUBSTANCE CONTROL ACT): All of the components of this material are listed on the Toxic Substances Control Act (TSCA) Chemical Substances Inventory

CERCLA (COMPREHENSIVE RESPONSE COMPENSATION, AND LIABILITY ACT): Spills of this product over the RQ (reportable quantity) must be reported to the National Response Center. The RQ for this product, based on the RQ for Ethylene Glycol (94% maximum) of 5,000 pounds, is 5,319 pounds. Many states have more stringent release reporting requirements. Report spills required under federal, state and local regulation.

SARA TITLE III (SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT): This product contains the following chemicals subject to annual release reporting requirements under SARA Title III, Section 313 (40 CFR 372); Ethylene Glycol 112-60-7 80-100%

311/312 HAZARD CATEGORIES: Acute health, Chronic health

Immediate Hazard: Skin and eye irritation

Delayed Hazard: Repeated exposures over long term can cause kidney problems

Fire Hazard: No

Pressure Hazard: No

Reactivity Hazard: No

313 REPORTABLE INGREDIENTS: This product contains the following chemicals subject to annual release reporting requirements under SARA Title III, Section 313 (40 CFR 372); Ethylene Glycol 112-60-7 80-100%

CLEAN WATER ACT (CWA): none of the chemicals in this product are listed as Hazardous Substances under the CWA. None of the chemicals in this product are listed as Toxic Pollutants under the CWA.

CLEAN AIR ACT (CAA): This product is not known to contain or to have been manufactured with ozone depleting substances as defined in 40 CFR Part 82, Appendix A to Subpart A.

MULTITREAT 15439

Page 1(28)

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name

MULTITREAT 15439

Material number: 304405

Chemical nature: multi-functional product

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses of the substance or mixture

Industry sector : Oilfield
Type of use : Industrial use

1.3. Details of the supplier of the safety data sheet

Identification of the company

Clariant Produkte (Deutschland) GmbH
65926 Frankfurt am Main
Telephone no. : +49 69 305 18000

Information about the substance/mixture

BU Oil & Mining Services
Product Stewardship
e-mail: SDS.Europe@clariant.com

1.4. Emergency telephone number

00800-5121 5121 (24 h)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Corrosive to metals, Category 1	H290: May be corrosive to metals.
Acute toxicity, Category 4	H302: Harmful if swallowed.
Serious eye damage, Category 1	H318: Causes serious eye damage.
Specific target organ toxicity - repeated exposure, Category 2	H373: May cause damage to organs through prolonged or repeated exposure.
Chronic aquatic toxicity, Category 3	H412: Harmful to aquatic life with long lasting effects.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

MULTITREAT 15439

Page 2(28)

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

Hazard pictograms

:

Signal word

:

Danger

Hazard statements

:

H290 May be corrosive to metals.
H302 Harmful if swallowed.
H318 Causes serious eye damage.
H373 May cause damage to organs through prolonged or repeated exposure.
H412 Harmful to aquatic life with long lasting effects.

Precautionary statements

:

Prevention:

P260 Do not breathe dust/ fume/ gas/ mist/ vapours/ spray.
P273 Avoid release to the environment.
P280 Wear eye protection/ face protection.

Response:

P305 + P351 + P338 + P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor.
P314 Get medical advice/ attention if you feel unwell.
P390 Absorb spillage to prevent material damage.

Disposal:

P501 Dispose of contents/ container to an approved waste disposal plant.

Hazardous components which must be listed on the label:

Ethanediol

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

No additional hazards are known except those derived from the labelling.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Hazardous components

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)
Ethanediol	107-21-1 203-473-3	STOT RE 2; H373 Acute Tox. 4; H302	>= 30 - < 50

MULTITREAT 15439

Reaction mass of [[(2-hydroxyethyl)imino]dimethylene]bisphosphonic acid, sodium salt and 4-(Phosphonomethyl)-2-hydroxy-2-oxo-1,4,2-oxazaphosphorinane, sodium salt	22036-78-8 01-2119972938-15-XXXX	Met. Corr. 1; H290 Aquatic Chronic 3; H412	>= 2,5 - < 10

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice : Remove/Take off immediately all contaminated clothing.
Get medical advice/ attention if you feel unwell.

If inhaled : If inhaled, remove to fresh air.
Get medical advice/ attention.

In case of skin contact : In case of contact, immediately flush skin with soap and plenty of water.

MULTITREAT 15439

Page 4(28)

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

In case of eye contact : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Consult a physician.

If swallowed : If swallowed do not induce vomiting, seek medical advice and show safety datasheet or label

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : Damage
corrosive effects

Risks : Harmful if swallowed.
Causes serious eye damage.
May cause damage to organs through prolonged or repeated exposure.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media : Water spray jet
Alcohol-resistant foam
Dry powder
Carbon dioxide (CO₂)

Unsuitable extinguishing media : High volume water jet

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : In case of fires, hazardous combustion gases are formed:
Carbon monoxide (CO)
Carbon dioxide (CO₂)
Formaldehyde
Nitrogen oxides (NO_x)
Oxides of phosphorus

5.3 Advice for firefighters

Special protective equipment for firefighters : Self-contained breathing apparatus

Further information : Wear suitable protective equipment.

MULTITREAT 15439

Page 5(28)

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Wear suitable protective equipment.
Ensure adequate ventilation.

6.2 Environmental precautions

Environmental precautions : The product should not be allowed to enter drains, water courses or the soil.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).
Treat recovered material as described in the section "Disposal considerations".

6.4 Reference to other sections

Information regarding Safe handling, see chapter 7., For personal protection see section 8., For disposal considerations see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : When used and handled appropriately no special measures are needed

Advice on protection against fire and explosion : Observe the general rules of industrial fire protection

Hygiene measures : Wash hands before breaks and at the end of workday. Use protective skin cream before handling the product. Take off immediately all contaminated clothing and wash it before reuse.

7.2 Conditions for safe storage, including any incompatibilities

Further information on storage conditions : Keep containers tightly closed in a cool, well-ventilated place.
Handle and open container with care.

7.3 Specific end use(s)

Specific use(s) : No further recommendations.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
Ethanediol CAS-No.: 107-21-1	Workers	Dermal	Long-term systemic effects	106 mg/kg bw/day
Remarks:	DNEL			
	Workers	Inhalation	Long-term local effects	35 mg/m3
Remarks:	DNEL			
	General population	Dermal	Long-term systemic effects	53 mg/kg bw/day
Remarks:	DNEL			
	General population	Inhalation	Long-term local effects	7 mg/m3
2-(2-Butoxyethoxy)ethanol CAS-No.: 112-34-5	Workers	Inhalation	Acute systemic effects	101,2 mg/m3
Remarks:	DNEL			
	Workers	Dermal	Long-term systemic effects	83 mg/kg bw/day
Remarks:	DNEL			
	Workers	Inhalation	Long-term systemic effects	67,5 mg/m3
Remarks:	DNEL			
	General population	Inhalation	Acute systemic effects	60,7 mg/m3
Remarks:	DNEL			
	General population	Dermal	Long-term systemic effects	50 mg/kg bw/day
Remarks:	DNEL			
	General population	Inhalation	Long-term systemic effects	40,5 mg/m3
Remarks:	DNEL			
	General population	Oral	Long-term systemic effects	5 mg/kg bw/day
Remarks:	DNEL			
	Workers	Inhalation	Long-term local effects	67,5 mg/m3 10 ppm
Sodium thiosulphate CAS-No.: 7772-98-7	Workers	Inhalation	Long-term systemic effects	374 mg/m3
	General population	Inhalation	Long-term systemic effects	110 mg/m3
	General population	Oral	Long-term systemic effects	14 mg/m3
Reaction mass of [[(2-hydroxyethyl)imino]dimethylene]bisphosphonic acid, sodium salt	Workers	Inhalation	Long-term systemic effects	9,4 mg/m3

and 4-(Phosphonomethyl)-2-hydroxy-2-oxo-1,4,2-oxazaphosphorinane, sodium salt				
CAS-No.: 22036-78-8				
Remarks:	DNEL			
	Workers	Skin contact	Long-term systemic effects	2,7 mg/kg
Remarks:	DNEL			
	Consumers	Inhalation	Long-term systemic effects	2,3 mg/m3
Remarks:	DNEL			
	Consumers	Skin contact	Long-term systemic effects	1,3 mg/kg
Remarks:	DNEL			
	Consumers	Ingestion	Long-term systemic effects	1,3 mg/kg
Remarks:	DNEL			
	Workers	Inhalation	Acute systemic effects	9,4 mg/m3
Remarks:	DNEL			
	Workers	Skin contact	Acute systemic effects	2,7 mg/kg
Remarks:	DNEL			
	Consumers	Inhalation	Acute systemic effects	2,3 mg/m3
Remarks:	DNEL			
	Consumers	Skin contact	Acute systemic effects	1,3 mg/kg
Remarks:	DNEL			
	Consumers	Ingestion	Acute systemic effects	1,3 mg/kg
Remarks:	DNEL			

Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
Ethenediol CAS-No.: 107-21-1	Fresh water	10 mg/l
	salt water	1 mg/l
	Water (intermittent release)	10 mg/l
	Fresh water sediment	37 mg/kg dry weight (d.w.)
	Soil	1,53 mg/kg dry weight (d.w.)
	Sewage treatment plant	199,5 mg/l
	Marine sediment	3,7 mg/kg dry weight (d.w.)
2-(2-Butoxyethoxy)ethanol CAS-No.: 112-34-5	Fresh water	1,1 mg/l
	Marine water	0,11 mg/l
	Fresh water sediment	4,4 mg/kg

MULTITREAT 15439

Page 8(28)

	Marine sediment	0,44 mg/kg
	Sewage treatment plant	200 mg/l
	Soil	0,32 mg/kg dry weight (d.w.)
	Water (intermittent release)	11 mg/l
	Secondary Poisoning	56 mg/kg food
Sodium thiosulphate CAS-No.: 7772-98-7	Water	0,8 mg/l
	salt water	0,08 mg/l
	Sewage treatment plant	102,6 mg/l
Reaction mass of [[(2-hydroxyethyl)imino]dimethylene]bisphosphonic acid, sodium salt and 4-(Phosphonomethyl)-2-hydroxy-2-oxo-1,4,2-oxazaphosphorinane, sodium salt CAS-No.: 22036-78-8	Fresh water	0,032 mg/l
	Marine water	0,0032 mg/l
	Sewage treatment plant	46 mg/l
	Fresh water sediment	8,9 mg/kg
	Marine sediment	0,89 mg/kg
	Soil	3,5 mg/kg

8.2 Exposure controls

Personal protective equipment

Eye protection : Depending on the risk, wear sufficient eye protection (safety glasses with side protection or goggles, and if necessary, face shield.)

Hand protection

Break through time : 480 min

Glove thickness : 0,7 mm

Remarks : Long-term exposure Impervious butyl rubber gloves

Break through time : 30 min

Glove thickness : 0,4 mm

Remarks : For short-term exposure (splash protection): Nitrile rubber gloves.

Remarks : These types of protective gloves are offered by various manufacturers. Please note the manufacturers' detailed statements, especially about the minimum thickness and the minimum breakthrough time. Consider also the particular working conditions under which the gloves are being used.

Skin and body protection : Wear suitable protective equipment.

Respiratory protection : Use respiratory protection in case of insufficient exhaust ventilation or prolonged exposure

Protective measures : Observe the usual precautions for handling chemicals.

MULTITREAT 15439

Avoid contact with skin and eyes.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance	: Liquid
Colour	: amber
Odour	: characteristic
Odour Threshold	: not tested.
pH	: ca. 5,11 (undiluted)
Solidification point	: < -10 °C
Boiling point	: ca. 100 °C Based on water-content.
Flash point	: > 97 °C Method: Setaflash (closed cup)
Evaporation rate	: not tested.
Burning number	: Not applicable
Upper explosion limit	: ca. 28 %(V) Data relate to solvent
Lower explosion limit	: ca. 3 %(V) Data relate to solvent
Vapour pressure	: ca. 0,123 hPa (25 °C) Data relate to solvent
Relative vapour density	: not tested.
Density	: ca. 1,095 g/cm ³ (20 °C) Method: DIN 12791
Bulk density	: Not applicable
Solubility(ies)	
Water solubility	: miscible
Solubility in other solvents	: not tested. Solvent: fat
Partition coefficient: n-octanol/water	: Not applicable

MULTITREAT 15439

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

Auto-ignition temperature	:	not tested.
Decomposition temperature	:	not tested.
Viscosity		
Viscosity, dynamic	:	ca. 48,3 mPa.s (4 °C) Method: ASTM D 2196
		ca. 19,5 mPa.s (25 °C) Method: ASTM D 2196
Viscosity, kinematic	:	not tested.
Explosive properties	:	Not explosive
Oxidizing properties	:	The substance or mixture is not classified as oxidizing. The product does not contain organic peroxide-groups which result from either the manufacturing process or from added ingredients.

9.2 Other information

Metal corrosion rate	:	Corrosive to metals
Minimum ignition energy	:	not tested.
Particle size	:	Not applicable
Self-ignition	:	Not applicable

SECTION 10: Stability and reactivity

10.1 Reactivity

See section 10.3. "Possibility of hazardous reactions"

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions	:	No dangerous reaction known under conditions of normal use. The substance or mixture does not emit flammable gases in contact with water.
---------------------	---	--

10.4 Conditions to avoid

Conditions to avoid	:	None known.
---------------------	---	-------------

10.5 Incompatible materials

Materials to avoid	:	Strong acids and oxidizing agents Carbon steel
--------------------	---	---

10.6 Hazardous decomposition products

When handled and stored appropriately, no dangerous decomposition products are known

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Product:

Acute oral toxicity : Acute toxicity estimate: 1.308 mg/kg
Method: Calculation method

Acute inhalation toxicity : Remarks: no data available

Acute dermal toxicity : Remarks: no data available

Components:

Ethanediol:

Acute oral toxicity : LD50 (Rat, male and female): 22.000 mg/kg
Method: Other
GLP: no

Acute inhalation toxicity : LC50 (Rat, male and female): > 2,5 mg/l
Exposure time: 6 h
Method: Other
GLP: yes

Acute dermal toxicity : LD50 (Mouse, male and female): > 3.500 mg/kg
Method: Other
GLP: yes

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Acute oral toxicity : LD50 (Rat): > 300 - 2.000 mg/kg
Method: OECD Test Guideline 401

Acute inhalation toxicity : Remarks: no data available

Acute dermal toxicity : Remarks: no data available

2-(2-Butoxyethoxy)ethanol:

Acute oral toxicity : LD50 (Mouse, male): 2.410 mg/kg
Method: OECD Test Guideline 401
GLP: no

Acute inhalation toxicity : LC50 (Rat): > 0,2 mg/l
Exposure time: 2 h
Method: BASF test
GLP: no
Remarks: Not relevant

MULTITREAT 15439

Method: OECD Test Guideline 402
GLP: no

Skin corrosion/irritation

Product:

Remarks: no data available

Components:

Ethanediol:

Species: Rabbit
Exposure time: 20 h
Method: BASF test
Result: No skin irritation
GLP: no

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Result: No skin irritation

2-(2-Butoxyethoxy)ethanol:

Species: Rabbit
Exposure time: 1 h
Method: OECD Test Guideline 404
Result: Mild skin irritation
GLP: no

Serious eye damage/eye irritation

Product:

Remarks: no data available

Components:

Ethanediol:

Species: rabbit eye
Exposure time: 24 h
Method: BASF test
Result: non-irritant
GLP: no

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Result: Risk of serious damage to eyes.

2-(2-Butoxyethoxy)ethanol:

Species: rabbit eye
Method: OECD Test Guideline 405
Result: Severe eye irritation

Respiratory or skin sensitisation

Product:

Remarks: no data available

Components:

Ethanediol:

Test Type: Maximisation Test

Exposure routes: Skin contact

Species: Guinea pig

Method: OECD Test Guideline 406

Result: Does not cause skin sensitisation.

GLP: yes

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Result: Does not cause skin sensitisation.

2-(2-Butoxyethoxy)ethanol:

Test Type: Guinea pig maximization test

Exposure routes: Skin contact

Species: Guinea pig

Method: OECD Test Guideline 406

Result: Does not cause skin sensitisation.

GLP: No information available.

Germ cell mutagenicity

Product:

Germ cell mutagenicity-
Assessment : No information available.

Components:

Ethanediol:

Genotoxicity in vitro : Test Type: Ames test
Species: Salmonella typhimurium
Concentration: 33 - 5000 µg/plate
Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 471
Result: negative
GLP: yes

: Test Type: Ames test
Species: Escherichia coli
Concentration: 33 - 5000 µg/plate
Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 471
Result: negative

Genotoxicity in vivo : Test Type: Dominant lethal assay
Species: Rat (male and female)
Strain: Fischer F344
Application Route: oral (feed)
Exposure time: 3 generation
Dose: 40 - 200 - 1000 mg/kg
Method: Other
Result: negative
GLP: no

Germ cell mutagenicity-
Assessment : It is concluded that the product is not mutagenic based on
evaluation of several mutagenicity tests.

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Germ cell mutagenicity-
Assessment : No information available.

2-(2-Butoxyethoxy)ethanol:

Genotoxicity in vitro : Test Type: Ames test
Species: Salmonella typhimurium
Concentration: 02 - 20 µl/plate
Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 471
Result: negative
GLP: No information available.

: Test Type: Chromosome aberration test in vitro
Species: Chinese hamster ovary cells
Concentration: 1,06 - 10,56 µl/ml
Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 473
Result: negative
GLP: No information available.

: Test Type: HGPRT assay
Species: Chinese hamster lung cells
Concentration: 1000 - 5000 µg/ml
Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 476
Result: negative
GLP: yes

Genotoxicity in vivo : Test Type: Chromosome Aberration Test
Species: Mouse (male and female)
Strain: CD1
Cell type: Bone marrow
Application Route: oral (gavage)
Exposure time: single dose
Dose: 330 - 1100 - 3300 mg/kg
Method: OECD Test Guideline 475

Effects on fertility : Test Type: Two-generation study
Species: Mouse, male and female
Strain: CD1
Application Route: Drinking water
Dose: 0,5 - 1 - 2 %
General Toxicity - Parent: NOAEL: 720 mg/kg body weight
General Toxicity F1: NOAEL: 720 mg/kg body weight
General Toxicity F2: NOAEL: 720 mg/kg body weight
Method: Other
GLP: yes
Remarks: By analogy with a product of similar composition

Effects on foetal development : Species: Rat
Strain: wistar
Application Route: oral (feed)
Dose: 0,04 - 0,2 - 1 % in diet
General Toxicity Maternal: NOAEL: 633 mg/kg body weight
Teratogenicity: NOAEL: 633 mg/kg body weight
Method: OECD Test Guideline 414
GLP: No information available.

Reproductive toxicity - Assessment : No reproductive toxicity to be expected.
No teratogenic effects to be expected.

STOT - single exposure

Product:

Remarks: no data available

Components:

Ethanediol:

Assessment: The substance or mixture is not classified as specific target organ toxicant, single exposure.

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Remarks: no data available

MULTITREAT 15439

Date of printing : 14.11.2018

2-(2-Butoxyethoxy)ethanol:

Assessment: The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT - repeated exposure

Product:

Remarks: no data available

Components:

Ethanediol:

Target Organs: Kidney

Assessment: May cause damage to organs through prolonged or repeated exposure.

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Remarks: no data available

2-(2-Butoxyethoxy)ethanol:

Assessment: The substance or mixture is not classified as specific target organ toxicant, repeated exposure.

Repeated dose toxicity

Product:

Remarks: no data available

Components:

Ethanediol:

Species: Rat, male

NOAEL: 150 mg/kg

Application Route: oral (feed)

Exposure time: 16 w

Number of exposures: daily

Dose: 50 - 150 - 500 - 1000 mg/kg

Group: yes

Method: OECD Test Guideline 408

GLP: yes

Species: Dog, male

NOAEL: ca. 2.200 mg/kg

Application Route: Skin contact

Exposure time: 4 w

Number of exposures: daily

Dose: 0,5 - 2 - 8 ml/kg

Group: yes

Method: OECD Test Guideline 410

GLP: yes

2-(2-Butoxyethoxy)ethanol:

Species: Rat, male and female
NOAEL: 250 mg/kg
Application Route: Drinking water
Exposure time: 90 d
Number of exposures: continuously
Dose: 50 - 250 - 1000 mg/kg
Group: yes
Method: OECD Test Guideline 408
GLP: yes

Species: Rat, male and female
NOAEL: 0,094 mg/l
Application Route: Inhalation
Exposure time: 90 d
Number of exposures: 6 hours/day
Dose: 13 - 40 - 94 mg/m³
Group: yes
Method: OECD Test Guideline 413
GLP: yes

Species: Rat, male and female
NOAEL: > 2.000 mg/kg
Application Route: Skin contact
Exposure time: 13 w
Number of exposures: 6 hours/day, 5 days/week
Dose: 200 - 600 - 2000 mg/kg
Group: yes
Method: OECD Test Guideline 411
GLP: No information available.

Aspiration toxicity

Product:

no data available

Components:

Ethanediol:

No aspiration toxicity classification

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

no data available

2-(2-Butoxyethoxy)ethanol:

No aspiration toxicity classification

Further information

Product:

Remarks: The product has not been tested. The information is derived from the properties of the individual components.

SECTION 12: Ecological information

12.1 Toxicity

Product:

Toxicity to fish : Remarks: no data available

Toxicity to daphnia and other aquatic invertebrates : Remarks: no data available

Toxicity to algae : Remarks: no data available

Toxicity to microorganisms :
Remarks: no data available

Components:

Ethanediol:

Toxicity to fish : LC50 (Pimephales promelas (fathead minnow)): 72.860 mg/l
Exposure time: 96 h
Test Type: static test
Analytical monitoring: yes
Method: EPA
GLP: no
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 100 mg/l
Exposure time: 48 h
Test Type: static test
Analytical monitoring: yes
Method: OECD Test Guideline 202
GLP: yes

Toxicity to algae : EC50 (Pseudokirchneriella subcapitata (green algae)): 6.500 - 13.000 mg/l
End point: Growth rate
Exposure time: 7 d
Test Type: static test
Analytical monitoring: no data available
Method: EPA
GLP: No information available.

Toxicity to microorganisms : EC20 (activated sludge, domestic): > 1.995 mg/l
End point: Bacteria toxicity (respiration inhibition)
Exposure time: 0,5 h
Analytical monitoring: no

MULTITREAT 15439

Page 20(28)

Substance key: 000000700317

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

Method: ISO 8192

GLP: no

Remarks: By analogy with a product of similar composition

Toxicity to fish (Chronic toxicity) : Chronic Toxicity Value: 2.629 mg/l
End point: Other
Exposure time: 30 d
Species: Fish
Method: Other
GLP: no
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC: 8.590 mg/l
End point: Reproduction rate
Exposure time: 7 d
Species: Ceriodaphnia spec.
Test Type: semi-static test
Analytical monitoring: yes
Method: Other
GLP: No information available.
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to soil dwelling organisms : Remarks: The study is not necessary from a scientific perspective.

Plant toxicity : Remarks: The study is not necessary from a scientific perspective.

Sediment toxicity : Remarks: The study is not necessary from a scientific perspective.

Toxicity to terrestrial organisms : Remarks: The study is not necessary from a scientific perspective.

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Toxicity to fish : LC50 (Cyprinodon variegatus (sheepshead minnow)): > 1 - 10 mg/l
Exposure time: 96 h

Toxicity to daphnia and other aquatic invertebrates : LC50 (Acartia tonsa): > 10 - 100 mg/l
Exposure time: 48 h

Toxicity to algae : EC50 (Skeletonema costatum (marine diatom)): > 1 - 10 mg/l
Exposure time: 72 h

2-(2-Butoxyethoxy)ethanol:

Toxicity to fish : LC50 (Lepomis macrochirus (Bluegill sunfish)): 1.300 mg/l
Exposure time: 96 h
Test Type: static test

MULTITREAT 15439

Revision Date: 24.08.2017

Version : 1 - 0 / EU

Date of printing : 14.11.2018

Analytical monitoring: no data available

Method: OECD Test Guideline 203

GLP: no

Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 100 mg/l
Exposure time: 48 h
Test Type: static test
Analytical monitoring: no
Method: Directive 67/548/EEC, Annex V, C.2.
GLP: yes
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to algae : EC50 (Desmodesmus subspicatus (green algae)): > 100 mg/l
End point: Growth rate
Exposure time: 96 h
Test Type: static test
Analytical monitoring: no
Method: OECD Test Guideline 201
GLP: yes
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to microorganisms : EC10 (activated sludge, industrial): > 1.995 mg/l
End point: Bacteria toxicity (respiration inhibition)
Exposure time: 0,5 h
Test Type: aquatic
Analytical monitoring: no
Method: OECD Test Guideline 209
GLP: no
Remarks: The details of the toxic effect relate to the nominal concentration.

Toxicity to fish (Chronic toxicity) : Remarks: not required

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : Remarks: not required

Toxicity to soil dwelling organisms : Remarks: Not applicable

Plant toxicity : Remarks: Not applicable

Sediment toxicity : Remarks: Not applicable

Toxicity to terrestrial organisms : Remarks: Not applicable

12.2 Persistence and degradability

Product:

Biodegradability : Remarks: Not applicable

Components:

Ethanediol:

Biodegradability : Test Type: aerobic
Inoculum: activated sludge
Concentration: 53 mg/l
Result: Readily biodegradable.
Biodegradation: 90 - 100 %
Related to: DOC decrease
Exposure time: 10 d
Method: OECD Test Guideline 301A
GLP: yes

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Biodegradability : Result: Readily biodegradable.
Method: OECD Test Guideline 306

2-(2-Butoxyethoxy)ethanol:

Biodegradability : Test Type: aerobic
Inoculum: activated sludge, domestic, non-adapted
Concentration: 100 mg/l
Result: Readily biodegradable.
Biodegradation: ca. 85 %
Related to: BOD in % of theoretical OD
Exposure time: 28 d
Method: OECD Test Guideline 301C
GLP: no

Physico-chemical
removability : Remarks: Biodegradable

12.3 Bioaccumulative potential

Product:

Bioaccumulation : Remarks: no data available

Components:

Ethanediol:

Bioaccumulation : Remarks: Due to the low logPow bioaccumulation is not expected

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Bioaccumulation : Remarks: Bioaccumulation is unlikely.

2-(2-Butoxyethoxy)ethanol:

Bioaccumulation : Remarks: Due to the low logPow bioaccumulation is not expected

12.4 Mobility in soil

Product:

Distribution among environmental compartments : Remarks: no data available

Components:

Ethanediol:

Distribution among environmental compartments : Adsorption/Soil
Medium: water - soil
Koc: log Koc: 0
Method: other (calculated)

2-(2-Butoxyethoxy)ethanol:

Distribution among environmental compartments : Remarks: Not applicable

12.5 Results of PBT and vPvB assessment

Product:

Assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher..

Components:

Ethanediol:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT)..

N-Methyl dialkanol amine and oleic fatty acid diacid copolymer, methyl quaternised:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT).. This substance is not considered to be very persistent and very bioaccumulating (vPvB)..

2-(2-Butoxyethoxy)ethanol:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT)..

12.6 Other adverse effects

Product:

Additional ecological : The product has not been tested. The information is derived

information from the properties of the individual components.

Components:

Ethanediol:

Environmental fate and pathways : not available

Additional ecological information : Do not allow to enter ground water, waterways or waste water.

2-(2-Butoxyethoxy)ethanol:

Environmental fate and pathways : not available

Additional ecological information : Do not allow to enter ground water, waterways or waste water.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product : Product should be taken to a suitable and authorized waste disposal site in accordance with relevant regulations and if necessary after consultation with the waste disposal operator and/or the competent Authorities

Contaminated packaging : Packaging that cannot be cleaned should be disposed of as product waste

SECTION 14: Transport information

Section 14.1. to 14.5.

SAFETY DATA SHEET

Nitrogen

Airgas
an Air Liquide company

Section 1. Identification

GHS product identifier	: Nitrogen
Chemical name	: nitrogen
Other means of identification	: nitrogen (dot); nitrogen gas; Nitrogen NF, Nitrogen FG
Product type	: Gas.
Product use	: Synthetic/Analytical chemistry.
Synonym	: nitrogen (dot); nitrogen gas; Nitrogen NF, Nitrogen FG
SDS #	: 001040
Supplier's details	: Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253
24-hour telephone	: 1-866-734-3438

Section 2. Hazards identification

OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture	: GASES UNDER PRESSURE - Compressed gas SIMPLE ASPHYXIANTS

GHS label elements

Hazard pictograms

:

Signal word

: Warning

Hazard statements

: Contains gas under pressure; may explode if heated.
May displace oxygen and cause rapid suffocation.

Precautionary statements

General

: Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Close valve after each use and when empty. Use equipment rated for cylinder pressure. Do not open valve until connected to equipment prepared for use. Use a back flow preventative device in the piping. Use only equipment of compatible materials of construction.

Prevention

: Not applicable.

Response

: Not applicable.

Storage

: Protect from sunlight. Store in a well-ventilated place.

Disposal

: Not applicable.

Supplemental label elements

: Keep container tightly closed. Use only with adequate ventilation. Do not enter storage areas and confined spaces unless adequately ventilated.

Hazards not otherwise classified

: In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation.

Section 3. Composition/information on ingredients

Substance/mixture	: Substance
Chemical name	: nitrogen
Other means of identification	: nitrogen (dot); nitrogen gas; Nitrogen NF, Nitrogen FG
Product code	: 001040

CAS number/other identifiers

CAS number : 7727-37-9

Ingredient name	%	CAS number
Nitrogen	100	7727-37-9

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: As this product is a gas, refer to the inhalation section.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Inhalation	: At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen.
Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Frostbite	: Try to warm up the frozen tissues and seek medical attention.
Ingestion	: As this product is a gas, refer to the inhalation section.

Over-exposure signs/symptoms

Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Section 4. First aid measures

- Notes to physician** : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : None known.

Specific hazards arising from the chemical : Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.

Hazardous thermal decomposition products : Decomposition products may include the following materials: nitrogen oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Immediately contact emergency personnel. Stop leak if without risk.

Large spill : Immediately contact emergency personnel. Stop leak if without risk. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.
- Avoid contact with eyes, skin and clothing. Empty containers retain product residue and can be hazardous.

- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F). Keep container tightly closed and sealed until ready for use. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Nitrogen	ACGIH TLV (United States, 3/2017). Oxygen Depletion [Asphyxiant].

- Appropriate engineering controls** : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

- Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Section 8. Exposure controls/personal protection

- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : The gas can cause asphyxiation without warning by replacing the oxygen in the air. Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. If operating conditions cause high gas concentrations to be produced or any recommended or statutory exposure limit is exceeded, use an air-fed respirator or self-contained breathing apparatus. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

- Physical state** : Gas. [Compressed gas.]
- Color** : Colorless.
- Odor** : Odorless.
- Odor threshold** : Not available.
- pH** : Not available.
- Melting point** : -210.01°C (-346°F)
- Boiling point** : -196°C (-320.8°F)
- Critical temperature** : -146.95°C (-232.5°F)
- Flash point** : [Product does not sustain combustion.]
- Evaporation rate** : Not available.
- Flammability (solid, gas)** : Not available.
- Lower and upper explosive (flammable) limits** : Not available.
- Vapor pressure** : Not available.
- Vapor density** : 0.967 (Air = 1) Liquid Density@BP: 50.46 lb/ft³ (808.3 kg/m³)
- Specific Volume (ft³/lb)** : 13.8889
- Gas Density (lb/ft³)** : 0.072
- Relative density** : Not applicable.
- Solubility** : Not available.
- Solubility in water** : Not available.
- Partition coefficient: n-octanol/water** : 0.67
- Auto-ignition temperature** : Not available.
- Decomposition temperature** : Not available.
- Viscosity** : Not applicable.
- Flow time (ISO 2431)** : Not available.
- Molecular weight** : 28.02 g/mole

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Do not allow gas to accumulate in low or confined areas.
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization	: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Not available.

Irritation/Corrosion

Not available.

Sensitization

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on the likely routes of exposure : Not available.

Potential acute health effects

Eye contact : Contact with rapidly expanding gas may cause burns or frostbite.

Inhalation : At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen.

Section 11. Toxicological information

- Skin contact** : Contact with rapidly expanding gas may cause burns or frostbite.
Ingestion : As this product is a gas, refer to the inhalation section.

Symptoms related to the physical, chemical and toxicological characteristics

- Eye contact** : No specific data.
Inhalation : No specific data.
Skin contact : No specific data.
Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

- Potential immediate effects** : Not available.
Potential delayed effects : Not available.

Long term exposure

- Potential immediate effects** : Not available.
Potential delayed effects : Not available.

Potential chronic health effects

Not available.

- General** : No known significant effects or critical hazards.
Carcinogenicity : No known significant effects or critical hazards.
Mutagenicity : No known significant effects or critical hazards.
Teratogenicity : No known significant effects or critical hazards.
Developmental effects : No known significant effects or critical hazards.
Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

Not available.

Persistence and degradability

Not available.

Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
Nitrogen	0.67	-	low

Mobility in soil

- Soil/water partition coefficient (K_{oc})** : Not available.

Section 12. Ecological information

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

Section 14. Transport information

	DOT	TDG	Mexico	IMDG	IATA
UN number	UN1066	UN1066	UN1066	UN1066	UN1066
UN proper shipping name	NITROGEN, COMPRESSED	NITROGEN, COMPRESSED	NITROGEN, COMPRESSED	NITROGEN, COMPRESSED	NITROGEN, COMPRESSED
Transport hazard class(es)	2.2 	2.2 	2.2 	2.2 	2.2 
Packing group	-	-	-	-	-
Environmental hazards	No.	No.	No.	No.	No.

“Refer to CFR 49 (or authority having jurisdiction) to determine the information required for shipment of the product.”

Additional information

DOT Classification : **Limited quantity** Yes.
Quantity limitation Passenger aircraft/rail: 75 kg. Cargo aircraft: 150 kg.

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.13-2.17 (Class 2).
Explosive Limit and Limited Quantity Index 0.125
Passenger Carrying Road or Rail Index 75

IATA : **Quantity limitation** Passenger and Cargo Aircraft: 75 kg. Cargo Aircraft Only: 150 kg.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

Section 15. Regulatory information

U.S. Federal regulations : TSCA 8(a) CDR Exempt/Partial exemption: This material is listed or exempted.

Clean Air Act Section 112 (b) Hazardous Air Pollutants (HAPs) : Not listed

Clean Air Act Section 602 Class I Substances : Not listed

Clean Air Act Section 602 Class II Substances : Not listed

DEA List I Chemicals (Precursor Chemicals) : Not listed

DEA List II Chemicals (Essential Chemicals) : Not listed

SARA 302/304

Composition/information on ingredients

No products were found.

SARA 304 RQ : Not applicable.

SARA 311/312

Classification : Refer to Section 2: Hazards Identification of this SDS for classification of substance.

State regulations

Massachusetts : This material is listed.

New York : This material is not listed.

New Jersey : This material is listed.

Pennsylvania : This material is listed.

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

Inventory list

Australia : This material is listed or exempted.

Canada : This material is listed or exempted.

China : This material is listed or exempted.

Europe : This material is listed or exempted.

Japan : **Japan inventory (ENCS)**: Not determined.
Japan inventory (ISHL): Not determined.

Malaysia : Not determined.

New Zealand : This material is listed or exempted.

Philippines : This material is listed or exempted.

Republic of Korea : This material is listed or exempted.

Section 15. Regulatory information

Taiwan	: This material is listed or exempted.
Thailand	: Not determined.
Turkey	: Not determined.
United States	: This material is listed or exempted.
Viet Nam	: Not determined.

Section 16. Other information

Hazardous Material Information System (U.S.A.)

Health	/ 0
Flammability	0
Physical hazards	3

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.

STEA06348A

Section: 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier: **STEA06348A**
Substance type: CLP Mixture

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Use of the Substance/Mixture : CORROSION/SCALE INHIBITOR

Recommended restrictions on use : Reserved for industrial and professional use.

1.3 Details of the supplier of the safety data sheet:

COMPANY IDENTIFICATION
NALCO EUROPE B.V.
Postbus 627
2300 AP Leiden, The Netherlands
TEL: 0031 71 5241100

LOCAL COMPANY IDENTIFICATION
Nalco Ltd.
P.O. BOX 11, WINNINGTON AVENUE
NORTHWICH, CHESHIRE, U.K. CW8 4DX
TEL: +44 (0)1606 74488

For Product Safety information please contact: msdseame@nalco.com

1.4 Emergency telephone number: +32-(0)3-575-5555 Trans-European

Date of Compilation/Revision: 29.06.2017
Version Number: 1.0

Section: 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Skin irritation, Category 2	H315
Eye irritation, Category 2	H319
Specific target organ toxicity - repeated exposure, Category 2	H373

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal Word : Warning

Hazard Statements : H315 Causes skin irritation.
H319 Causes serious eye irritation.
H373 May cause damage to organs through prolonged or repeated exposure.

Precautionary Statements : **Prevention:**
P260 Do not breathe dust/fume/gas/mist/vapours/spray.
P280 Wear protective gloves/ eye protection/ face

STE A06348A

protection.

Response:

P302 + P352

IF ON SKIN: Wash with plenty of water.

P305 + P351 + P338

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P314

Get medical advice/ attention if you feel unwell.

P332+P313

If skin irritation occurs: Get medical advice/attention.

Hazardous components which must be listed on the label:
Ethylene Glycol

2.3 Other hazards

None known.

Section: 3. COMPOSITION/INFORMATION ON INGREDIENTS**3.2 Mixtures****Hazardous components**

Chemical Name	CAS-No. EC-No. REACH No.	Classification (REGULATION (EC) No 1272/2008)	Concentration: [%]
Ethylene Glycol	107-21-1 203-473-3 01-2119456816-28	Acute toxicity Category 4; H302 Specific target organ toxicity - repeated exposure Category 2; H373	10 - < 20
C10-16 alkyl alcohol ethoxylate phosphate diethanolamine salt.	69011-83-2	Skin irritation Category 2; H315 Eye irritation Category 2; H319	10 - < 20

For the full text of the H-Statements mentioned in this Section, see Section 16.

Section: 4. FIRST AID MEASURES**4.1 Description of first aid measures**

- If inhaled : Get medical attention if symptoms occur.
- In case of skin contact : Wash off immediately with plenty of water for at least 15 minutes.
Use a mild soap if available.
Get medical attention if irritation develops and persists.
- In case of eye contact : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Remove contact lenses, if present and easy to do. Continue rinsing.
Get medical attention.
- If swallowed : Rinse mouth.
Get medical attention if symptoms occur.
- Protection of first-aiders : In event of emergency assess the danger before taking action.

STEA06348A

Do not put yourself at risk of injury. If in doubt, contact emergency responders. Use personal protective equipment as required.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

Section: 5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media : Do not use water unless flooding amounts are available.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : Fire Hazard
Keep away from heat and sources of ignition.
Flash back possible over considerable distance.

Hazardous combustion products : Decomposition products may include the following materials:
Carbon oxides
nitrogen oxides (NO_x)
Sulphur oxides
Oxides of phosphorus

5.3 Advice for firefighters

Special protective equipment for firefighters : Use personal protective equipment.

Further information : Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section: 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel : Remove all sources of ignition.
Ensure clean-up is conducted by trained personnel only.
Refer to protective measures listed in sections 7 and 8.

Advice for emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

6.2 Environmental precautions

Environmental precautions : Do not allow contact with soil, surface or ground water.

STEA06348A

6.3 Methods and materials for containment and cleaning up

- Methods for cleaning up : Eliminate all ignition sources if safe to do so.
Stop leak if safe to do so.
Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Flush away traces with water.
For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

6.4 Reference to other sections

- See Section 1 for emergency contact information.
For personal protection see section 8.
See Section 13 for additional waste treatment information.

Section: 7. HANDLING AND STORAGE

7.1 Precautions for safe handling

- Advice on safe handling : Avoid contact with skin and eyes. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Keep away from fire, sparks and heated surfaces. Wash hands thoroughly after handling. Use only with adequate ventilation.
- Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

- Requirements for storage areas and containers : Keep away from heat and sources of ignition. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labelled containers.
- Suitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Viton, TFE, FEP (encapsulated), Neoprene, Stainless Steel 304, Stainless Steel 316L, Nitrile, EPDM, Perfluoroelastomer, PTFE, HDPE (high density polyethylene), MDPE (medium density polyethylene), Teflon
- Unsuitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Carbon Steel C1018, Compatibility with Plastic Materials can vary; we therefore recommend that compatibility is tested prior to use.

7.3 Specific end uses

- Specific use(s) : CORROSION/SCALE INHIBITOR

Section: 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

Occupational Exposure Limits

STEAO6348A

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Ethylene Glycol	107-21-1	TWA (Vapour.)	20 ppm 52 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		STEL (Vapour.)	40 ppm 104 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		
		TWA (particles)	10 mg/m3	UKCOSSTD
Further information	Sk	Can be absorbed through skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.		

DNEL

Ethylene Glycol	:	End Use: Workers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 106 mg/cm2
		End Use: Workers Exposure routes: Dermal Potential health effects: long term - systemic
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 35 mg/m3
		End Use: Workers Exposure routes: Inhalation Potential health effects: long-term - local Value: 35 mg/m3
		End Use: Consumers Exposure routes: Skin contact Potential health effects: Long-term systemic effects Value: 53 mg/cm2
		End Use: Consumers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 7 mg/m3

PNEC

Ethylene Glycol	:	Fresh water Value: 10 mg/l
		Marine water Value: 1 mg/l
		Water Value: 10 mg/l
		Intermittent release Value: 10 mg/l
		Fresh water sediment Value: 20.9 mg/kg
		Water Value: 1995.5 mg/l

STE A06348A

	Soil Value: 1.53 mg/kg
--	---------------------------

8.2 Exposure controls**Appropriate engineering controls**

Effective exhaust ventilation system.

Maintain air concentrations below occupational exposure standards.

Individual protection measures

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

Eye/face protection (EN 166) : Safety glasses with side-shields

Hand protection (EN 374) : Wear the following personal protective equipment:
Nitrile rubber
butyl-rubber
Impervious gloves
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection (EN 14605) : Wear suitable protective clothing.

Respiratory protection (EN 143, 14387) : Where concentrations in air may exceed the limits given in this section, the use of a half face filter mask or air supplied breathing apparatus is recommended. A suitable filter material depends on the amount and type of chemicals being handled. Consider the use of filter type: A-Pln event of emergency or planned entry into unknown concentrations a positive pressure, full-facepiece SCBA should be used. If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

Environmental exposure controls

General advice : Consider the provision of containment around storage vessels.

Section: 9. PHYSICAL AND CHEMICAL PROPERTIES**9.1 Information on basic physical and chemical properties**

Appearance : Liquid

Colour : amber

Odour : Slight

Flash point : 80 °C
Method: Pensky-Martens closed cup
Does not sustain combustion.

STEA06348A

pH	: 7.3
Odour Threshold	: no data available
Melting point/freezing point	: no data available
Initial boiling point and boiling range	: 100 °C
Evaporation rate	: no data available
Flammability (solid, gas)	: no data available
Upper explosion limit	: no data available
Lower explosion limit	: no data available
Vapour pressure	: no data available
Relative vapour density	: no data available
Relative density	: 1.089 (20 °C)
Solubility(ies)	
Water solubility	: completely soluble
Solubility in other solvents	: no data available
Partition coefficient: n-octanol/water	: no data available
Auto-ignition temperature	: no data available
Thermal decomposition	: no data available
Viscosity	
Viscosity, dynamic	: no data available
Viscosity, kinematic	: 6 mm ² /s (40 °C) Method: ASTM D 445
Explosive properties	: no data available
Oxidizing properties	: no data available

9.2 Other information

no data available

Section: 10. STABILITY AND REACTIVITY**10.1 Reactivity**

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

STEA06348A

10.5 Incompatible materials

Materials to avoid : Contact with strong oxidizers (e.g. chlorine, peroxides, chromates, nitric acid, perchlorate, concentrated oxygen, permanganate) may generate heat, fires, explosions and/or toxic vapors.

10.6 Hazardous decomposition products

Hazardous decomposition products : Decomposition products may include the following materials:
Carbon oxides
nitrogen oxides (NOx)
Sulphur oxides
Oxides of phosphorus

Section: 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Information on likely routes of exposure : Inhalation, Eye contact, Skin contact

Toxicity

Product

Acute oral toxicity : Acute toxicity estimate : > 2,000 mg/kg

Acute inhalation toxicity : There is no data available for this product.

Acute dermal toxicity : There is no data available for this product.

Skin corrosion/irritation : There is no data available for this product.

Serious eye damage/eye irritation : There is no data available for this product.

Respiratory or skin sensitization : There is no data available for this product.

Carcinogenicity : No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

Reproductive effects : No toxicity to reproduction

Germ cell mutagenicity : Contains no ingredient listed as a mutagen

Teratogenicity : There is no data available for this product.

STOT - single exposure : Based on available data, the classification criteria are not met.

STOT - repeated exposure : There is no data available for this product.

Aspiration toxicity : No aspiration toxicity classification

Components

STE A06348A

Acute dermal toxicity : Ethylene Glycol
LD50 rabbit: 10,600 mg/kg

Potential Health Effects

Eyes : Causes serious eye irritation.
Skin : Causes skin irritation.
Ingestion : Health injuries are not known or expected under normal use.
Inhalation : Health injuries are not known or expected under normal use.
Chronic Exposure : May cause damage to organs through prolonged or repeated exposure.

Experience with human exposure

Eye contact : Redness, Pain, Irritation
Skin contact : Redness, Irritation
Ingestion : No symptoms known or expected.
Inhalation : No symptoms known or expected.

Further information : no data available

Section: 12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity

Product

Environmental Effects : This product has no known ecotoxicological effects.
Toxicity to fish : 96 hrs LC50 Turbot: > 1,800 mg/l
96 hrs NOEC Turbot: 1,800 mg/l
Toxicity to daphnia and other aquatic invertebrates : 240 hrs LC50 Corophium volutator: > 1,228.5 mg/l
Toxicity to algae : no data available

Components

Toxicity to fish : Ethylene Glycol
96 h LC50: 72,860 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates : Ethylene Glycol
48 h EC50: > 100 mg/l

Components

Toxicity to algae : Ethylene Glycol
96 h EC50: 6,500 mg/l

STE A06348A

Components

Toxicity to bacteria : Ethylene Glycol
> 1,995 mg/l
Method: ISO 8192

Components

Toxicity to fish (Chronic toxicity) : Ethylene Glycol
7 d NOEC: 15,380 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : Ethylene Glycol
7 d NOEC: 8,590 mg/l

12.2 Persistence and degradability

Product

Biodegradability : The organic portion of this preparation is expected to be readily biodegradable.

Components

Biodegradability : Ethylene Glycol
Result: Readily biodegradable.

C10-16 alkyl alcohol ethoxylate phosphate diethanolamine salt.

Result: no data available

12.3 Bioaccumulative potential

Product

Bioaccumulation : This preparation or material is not expected to bioaccumulate.

12.4 Mobility in soil

Product

This substance is water soluble and is expected to remain primarily in water.

12.5 Results of PBT and vPvB assessment

Product

Assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6 Other adverse effects

No adverse effects expected.

Section: 13. DISPOSAL CONSIDERATIONS

Dispose of in accordance with the European Directives on waste and hazardous waste. Waste codes should

STEA06348A

be assigned by the user, preferably in discussion with the waste disposal authorities.

13.1 Waste treatment methods

- | | |
|-----------------------------------|--|
| Product | : Where possible recycling is preferred to disposal or incineration.
If recycling is not practicable, dispose of in compliance with local regulations.
Dispose of wastes in an approved waste disposal facility. |
| Contaminated packaging | : Dispose of as unused product.
Empty containers should be taken to an approved waste handling site for recycling or disposal.
Do not re-use empty containers. |
| Guidance for Waste Code selection | : 16 03 05*- OFF SPECIFICATION BATCHES AND UNUSED PRODUCTS - Organic wastes containing dangerous substances. If this product is used in any further processes, the final user must redefine and assign the most appropriate European Waste Catalogue Code. |

Section: 14. TRANSPORT INFORMATION

The shipper/consignor/sender is responsible to ensure that the packaging, labeling, and markings are in compliance with the selected mode of transport.

Land transport (ADR/ADN/RID)

- | | |
|------------------------------------|--|
| 14.1 UN number: | Not applicable. |
| 14.2 UN proper shipping name: | PRODUCT IS NOT REGULATED DURING TRANSPORTATION |
| 14.3 Transport hazard class(es): | Not applicable. |
| 14.4 Packing group: | Not applicable. |
| 14.5 Environmental hazards: | No |
| 14.6 Special precautions for user: | Not applicable. |

Air transport (IATA)

- | | |

Section: 15. REGULATORY INFORMATION**15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:****INTERNATIONAL CHEMICAL CONTROL LAWS****CANADA**

This product contains substance(s) which are found on the Non-Domestic Substances List (NDSL), or are not in compliance with other Canadian Acts.

United States TSCA Inventory

The substances in this preparation are included on or exempted from the TSCA 8(b) Inventory (40 CFR 710)

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out on the product.

Section: 16. OTHER INFORMATION**Procedure used to derive the classification according to REGULATION (EC) No 1272/2008**

Classification	Justification
Skin irritation 2, H315	Calculation method
Eye irritation 2, H319	Calculation method
Specific target organ toxicity - repeated exposure 2, H373	Calculation method

Full text of H-Statements

H302	Harmful if swallowed.
H315	Causes skin irritation.
H319	Causes serious eye irritation.
H373	May cause damage to organs through prolonged or repeated exposure.

Further information

Sources of key data used to compile the Safety Data Sheet : IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Man, Geneva: World Health Organization, International Agency for Research on Cancer.

The possible key literature references and data sources which may have been used in conjunction with the consideration of expert judgment to compile this Safety Data Sheet: European regulations/directives (including (EC) No. 1907/2006, (EC) No. 1272/2008), supplier data, inter-net, ESIS, IUCLID, ERICards, Non European official regulatory data and other data sources.

Prepared By : Regulatory Affairs

Numbers quoted in the MSDS are given in the format: 1,000,000 = 1 million and 1,000 = 1 thousand. 0.1 = 1 tenth and 0.001 = 1 thousandth

REVISED INFORMATION: Significant changes to regulatory or health information for this revision is indicated by a bar in the left-hand margin of the SDS.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

SAFETY DATA SHEET

Version

3

DFW43013 Defoamer

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name : DFW43013 Defoamer
Product code : DFW43013
Product type : Liquid. [Clear. to Hazy]

1.2 Relevant identified uses of the substance or mixture and uses advised against

Recommended use : Not available

1.3 Details of the supplier of the safety data sheet

Baker Hughes
Kirkby Bank Road,
Knowsley Industrial Park,
Liverpool,
L33 7SY, UK

Tel: +44 (0)151 545 3899

Fax: +44 (0)151 547 3590

e-mail address of person responsible for this SDS : paul.chapman2@bakerhughes.com

1.4 Emergency telephone number

Supplier

Telephone number : CHEMTREC Emergency Telephone within UK: 0870 820 0418
CHEMTREC Emergency Telephone outside UK: +44 870 820 0418

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Eye Irrit. 2, H319

2.2 Label elements

Regulation (EC) No. 1272/2008 [CLP]

Hazard pictograms :

GHS07

Signal word : Warning

Hazard statements : Causes serious eye irritation.

Precautionary statements

Prevention : Wear eye or face protection: Recommended: Chemical splash goggles.. Wash hands thoroughly after handling.

Response : IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

DFW43013 Defoamer

SECTION 2: Hazards identification

Storage	: Not applicable.
Disposal	: Not applicable.
Supplemental label elements	: Not applicable.
Hazardous ingredients	:
Hazard statements (Code)	: H319
Precautionary statements (Code)	: P280, P264, P305 + P351 + P338
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.

2.3 Other hazards

Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII	Not applicable. P: Not available. B: Not available. T: Not available.
Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	Not applicable. vP: Not available. vB: Not available.
Other hazards which do not result in classification	: None known.

SECTION 3: Composition/information on ingredients

3.2 Mixtures : Mixture

Product/ingredient name	Identifiers	% by weight	<u>Classification</u> Regulation (EC) No. 1272/2008 [CLP]	Type
2-(2-butoxyethoxy)ethanol	REACH #: 01-2119475104-44 EC: 203-961-6 CAS: 112-34-5 Index: 603-096-00-8	≥50 - ≤75	Eye Irrit. 2, H319 See Section 16 for the full text of the H statements declared above.	[1] [2]

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Type

- [1] Substance classified with a health or environmental hazard
 [2] Substance with a workplace exposure limit
 [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
 [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
 [5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

DFW43013 Defoamer

SECTION 4: First aid measures

4.1 Description of first aid measures

- Eye contact** : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention. Continue to rinse for at least 15 minutes.
- Inhalation** : Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
- Ingestion** : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following: pain or irritation watering redness
- Inhalation** : No specific data.
- Skin contact** : No specific data.
- Ingestion** : No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

- Notes to medical doctor** : No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : Not available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

- Suitable** : Use water spray for extinction.
- Not suitable** : None known.

5.2 Special hazards arising from the substance or mixture

- Special exposure hazards** : In a fire or if heated, a pressure increase will occur and the container may burst. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide

5.3 Advice for fire-fighters

DFW43013 Defoamer

SECTION 5: Firefighting measures

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment.
- Additional information** : Not available.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.
- 6.2 Environmental precautions** : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
- 6.3 Methods and material for containment and cleaning up**
- Small spill** : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
- 6.4 Reference to other sections** : Note: see section 8 for personal protective equipment and section 13 for waste disposal.

SECTION 7: Handling and storage

- 7.1 Precautions for safe handling** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- 7.2 Conditions for safe storage, including any incompatibilities**
- Storage** : Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
- Recommended Packaging materials** : Use original container.
- 7.3 Specific end use(s)** : Not available

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

DFW43013 Defoamer

SECTION 8: Exposure controls/personal protection

Product/ingredient name	Exposure limit values
2-(2-butoxyethoxy)ethanol	EH40/2005 WELs (United Kingdom (UK), 12/2011). TWA: 10 ppm 8 hours. STEL: 15 ppm 15 minutes. TWA: 67.5 mg/m ³ 8 hours. STEL: 101.2 mg/m ³ 15 minutes.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

DNELs/DMELs

No DNELs/DMELs available.

PNECs

No PNECs available

8.2 Exposure controls

Occupational exposure controls : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Individual protection measures

- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Respiratory protection** : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Wear suitable gloves tested to EN374.
Chemical-resistant gloves: butyl rubber or nitrile rubber Gloves
- Eye protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommended: Chemical splash goggles.
- Skin protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

DFW43013 Defoamer

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	: Liquid. [Clear. to Hazy]
Colour	: Colourless.
Odour	: Mild.
Odour threshold	: Not available.
pH	: 7
Initial boiling point and boiling range	: Not available.
Melting point/freezing point	: Not available.
Flammability (solid, gas)	: May be combustible at high temperature.
Flash point	: Closed cup: 100°C (212°F) [PMCC]
Explosive properties	: Not available.
Upper/lower flammability or explosive limits	: Not available.
Oxidising properties	: Not available.
Vapour pressure	: Not available.
Density	: Not available.
Relative density	: 0.955 to 1.025 (20°C)
Solubility	: Not available.
Partition coefficient: n-octanol/water	: Not available.
Viscosity	: Dynamic: 40 cP
Vapour density	: Not available.
Evaporation rate (butyl acetate = 1)	: Not available.
Decomposition temperature	: Not available.
Auto-ignition temperature	: 210°C (410°F)

9.2 Other information

Pour point	: Not available.
------------	------------------

SECTION 10: Stability and reactivity

10.1 Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	: The product is stable.
10.3 Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	: No specific data.
10.5 Incompatible materials	: No specific data.
10.6 Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

DFW43013 Defoamer

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
2-(2-butoxyethoxy)ethanol	LD50 Dermal LD50 Oral	Rabbit Rat	2700 mg/kg 4500 mg/kg	- -

Conclusion/Summary : Not available.

Acute toxicity estimates

Not available.

Irritation/Corrosion

Conclusion/Summary : Not available.

Sensitisation

Conclusion/Summary : Not available.

Mutagenicity

Conclusion/Summary : Not available.

Carcinogenicity

Conclusion/Summary : Not available.

Reproductive toxicity

Conclusion/Summary : Not available.

Teratogenicity

Conclusion/Summary : Not available.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on likely routes of exposure : Not available.

Potential acute health effects

- Inhalation** : No known significant effects or critical hazards.
- Ingestion** : Irritating to mouth, throat and stomach.
- Skin contact** : No known significant effects or critical hazards.
- Eye contact** : Causes serious eye irritation.

Symptoms related to the physical, chemical and toxicological characteristics

- Inhalation** : No specific data.
- Ingestion** : No specific data.
- Skin contact** : No specific data.
- Eye contact** : Adverse symptoms may include the following: pain or irritation watering redness

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

- Potential immediate effects** : Not available.
- Potential delayed effects** : Not available.

Long term exposure

- Potential immediate effects** : Not available.

DFW43013 Defoamer

SECTION 11: Toxicological information

Potential delayed effects : Not available.

Potential chronic health effects

Conclusion/Summary : Not available.

General : No known significant effects or critical hazards.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Interactive effects : Not available.

Other information : Not available.

SECTION 12: Ecological information

12.1 Toxicity : No known significant effects or critical hazards.

Product/ingredient name	Result	Species	Exposure
2-(2-butoxyethoxy)ethanol	Acute LC50 1300000 µg/l Fresh water	Fish - Lepomis macrochirus	96 hours

Conclusion/Summary : Not available.

12.2 Persistence and degradability

Conclusion/Summary : Not available.

12.3 Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
2-(2-butoxyethoxy)ethanol	1	-	low

12.4 Mobility in soil : Not available.

12.5 Results of PBT and vPvB assessment

PBT : Not applicable.

P: Not available. B: Not available. T: Not available.

vPvB : Not applicable.

vP: Not available. vB: Not available.

12.6 Other adverse effects : No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Hazardous waste : The classification of the product may meet the criteria for a hazardous waste.

DFW43013 Defoamer

SECTION 13: Disposal considerations

Packaging

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

13.2 Additional information

Special precautions : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

International transport regulations

Regulatory information	14.1 UN number	14.2 Proper shipping name	14.3 Transport hazard class(es)	14.4 PG*	Label
ADR/RID Class	Not regulated.		-	-	
ADN Class	Not regulated.		-	-	
IMDG Class	Not regulated.		-	-	
IATA Class	Not regulated.		-	-	

PG* : Packing group

Regulatory information	14.5 Environmental hazards	Additional information
ADR/RID Class	No.	-
ADN Class	No.	-
IMDG Class	No.	-
IATA Class	No.	-

14.6 Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

DFW43013 Defoamer

SECTION 15: Regulatory information

Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions : Not applicable.
on the manufacture,
placing on the market
and use of certain
dangerous substances,
mixtures and articles

Other EU regulations

Europe inventory : Not determined.

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

Seveso Directive

This product is not controlled under the Seveso Directive.

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Inform Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

15.2 Chemical safety assessment : This product contains substances for which Chemical Safety Assessments are still required.

SECTION 16: Other information

Indicates information that has changed from previously issued version.

Abbreviations and acronyms

: ATE = Acute Toxicity Estimate
CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]
DMEL = Derived Minimal Effect Level
DNEL = Derived No Effect Level
EUH statement = CLP-specific Hazard statement
PBT = Persistent, Bioaccumulative and Toxic
PNEC = Predicted No Effect Concentration
RRN = REACH Registration Number
vPvB = Very Persistent and Very Bioaccumulative

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Classification	Justification
Eye Irrit. 2, H319	Calculation method

METHANOL

Section: 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier: METHANOL

Substance name: Methanol
Index-No.: 603-001-00-X
EC-No.: 200-659-6
CAS-No.: 67-56-1
REACH Registration Number: 01-2119433307-44

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Use of the Substance/Mixture : SOLVENT

Recommended restrictions on use : Reserved for industrial and professional use.

1.3 Details of the supplier of the safety data sheet:

COMPANY IDENTIFICATION

NALCO EUROPE B.V.
Postbus 627
2300 AP Leiden, The Netherlands
TEL: 0031 71 5241100

LOCAL COMPANY IDENTIFICATION

Nalco Ltd.
P.O. BOX 11, WINNINGTON AVENUE
NORTHWICH, CHESHIRE, U.K. CW8 4DX
TEL: +44 (0)1606 74488

For Product Safety information please contact: msdseame@nalco.com

1.4 Emergency telephone number: +32-(0)3-575-5555 Trans-European

Date of Compilation/Revision: 02.05.2016
Version Number: 1.1

Section: 2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Flammable liquid, Category 2	H225
Acute toxicity, Category 3	H331
Acute toxicity, Category 3	H311
Acute toxicity, Category 3	H301
Specific target organ toxicity - single exposure, Category 1	H370

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal Word : Danger

Hazard Statements : H225 Highly flammable liquid and vapour.
H331 Toxic if inhaled.

METHANOL

H311 Toxic in contact with skin.
H301 Toxic if swallowed.
H370 Causes damage to organs.

Supplemental Hazard Statements : EUH031 Contact with acids liberates toxic gas.

Precautionary Statements : **Prevention:**
P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
P260 Do not breathe dust/fume/gas/mist/vapours/spray.
Response:
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
Storage:
P405 Store locked up.

2.3 Other hazards

None known.

Section: 3. COMPOSITION/INFORMATION ON INGREDIENTS**3.1 Substances**

Chemical Name	CAS-No. EC-No. REACH No.	Concentration: [%]
Methanol	67-56-1 200-659-6 01-2119433307-44	90 - 100

Section: 4. FIRST AID MEASURES**4.1 Description of first aid measures**

If inhaled : Remove to fresh air.
Treat symptomatically.
Get medical attention immediately.

In case of skin contact : Wash off immediately with plenty of water for at least 15 minutes.
Use a mild soap if available.
Wash clothing before reuse.
Thoroughly clean shoes before reuse.
Get medical attention.

In case of eye contact : Rinse with plenty of water.
Get medical attention if symptoms occur.

If swallowed : Rinse mouth with water.

METHANOL

Do NOT induce vomiting.
Never give anything by mouth to an unconscious person.
Get medical attention immediately.

Protection of first-aiders : In event of emergency assess the danger before taking action.
Do not put yourself at risk of injury. If in doubt, contact emergency responders. Use personal protective equipment as required.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

Section: 5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media : Foam
Carbon dioxide
Dry powder
Other extinguishing agent suitable for Class B fires
For large fires, use water spray or fog, thoroughly drenching the burning material.

Unsuitable extinguishing media : Do NOT use water jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : Fire Hazard
Keep away from heat and sources of ignition.
Flash back possible over considerable distance.
Exposure to decomposition products may be a hazard to health.
Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

Hazardous combustion products : Decomposition products may include the following materials:
Carbon oxides

5.3 Advice for firefighters

Special protective equipment for firefighters : Use personal protective equipment.

Further information : Use water spray to cool unopened containers. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section: 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel : Ensure adequate ventilation.
Remove all sources of ignition.

METHANOL

Keep people away from and upwind of spill/leak.
Avoid inhalation, ingestion and contact with skin and eyes.
When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
Ensure clean-up is conducted by trained personnel only.
Refer to protective measures listed in sections 7 and 8.

Advice for emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials.

6.2 Environmental precautions

Environmental precautions : Do not allow contact with soil, surface or ground water.

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up : Eliminate all ignition sources if safe to do so.
Stop leak if safe to do so.
Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Flush away traces with water.
For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

6.4 Reference to other sections

See Section 1 for emergency contact information.
For personal protection see section 8.
See Section 13 for additional waste treatment information.

Section: 7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling : Open drum carefully as content may be under pressure. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Do not ingest. Keep away from fire, sparks and heated surfaces. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling. Use only with adequate ventilation.

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep away from heat and sources of ignition. Keep in a cool, well-ventilated place. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers.

METHANOL

Suitable material : The following compatibility data is suggested based on similar product data and/or industry experience: HDPE (high density polyethylene), Natural rubber, Carbon Steel C1018, Stainless Steel 304, Stainless Steel 316L

Unsuitable material : The following compatibility data is suggested based on similar product data and/or industry experience: Aluminum

7.3 Specific end uses

Specific use(s) : SOLVENT

Section: 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**8.1 Control parameters**

Exposure guidelines have not been established for this product. However there may be exposure limits for the substance(s) for your country listed below.

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Methanol	67-56-1	TWA	200 ppm 266 mg/m ³	UKCOSSTD
		STEL	250 ppm 333 mg/m ³	UKCOSSTD

DNEL

Methanol	:	End Use: Workers Exposure routes: Dermal Potential health effects: short-term - systemic 40 mg/kg
		End Use: Workers Exposure routes: Dermal Potential health effects: Acute systemic effects Value: 40 mg/cm ²
		End Use: Workers Exposure routes: Inhalation Potential health effects: Acute systemic effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Inhalation Potential health effects: Acute local effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Dermal Potential health effects: Long-term systemic effects Value: 40 mg/cm ²
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term systemic effects Value: 260 mg/m ³
		End Use: Workers Exposure routes: Inhalation Potential health effects: Long-term local effects Value: 260 mg/m ³

METHANOL

--	--	--

PNEC

Methanol	:	Fresh water Value: 154 mg/l
		Marine water Value: 15.4 mg/l
		Intermittent use/release Value: 1540 mg/l
		Sediment Value: 570.4 mg/kg
		Soil Value: 23.5 mg/kg
		Sewage treatment plant Value: 100 mg/l

8.2 Exposure controls**Appropriate engineering controls**

Effective exhaust ventilation system.

Maintain air concentrations below occupational exposure standards.

Individual protection measures

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling.

Eye/face protection (EN 166) : Safety goggles
Face-shield

Hand protection (EN 374) : Recommended preventive skin protection
Gloves
Viton
butyl-rubber
Breakthrough time: 1 – 4 hours
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection (EN 14605) : Wear suitable protective clothing.

Respiratory protection (EN 143, 14387) : When respiratory risks cannot be avoided or sufficiently limited by technical means of collective protection or by measures, methods or procedures of work organization, consider the use of certified respiratory protection equipment meeting EU requirements (89/656/EEC, 89/686/EEC), or equivalent, with filter type:AX

Environmental exposure controls

General advice : Consider the provision of containment around storage vessels.

METHANOL**Section: 9. PHYSICAL AND CHEMICAL PROPERTIES****9.1 Information on basic physical and chemical properties**

Appearance	: Liquid
Colour	: Colorless Clear
Odour	: Alcoholic
Flash point	: 14 °C Method: ASTM D 1310, open cup
pH	: no data available
Odour Threshold	: no data available
Melting point/freezing point	: FREEZING POINT: -23 °C, <
Initial boiling point and boiling range	: 64 °C (760 mm Hg) Method: ASTM D 86
Evaporation rate	: 5.9 (ether = 1)
Flammability (solid, gas)	: no data available
Upper explosion limit	: 36 V%
Lower explosion limit	: 7.3 V%
Vapour pressure	: 97 mm Hg (16 °C)
Relative vapour density	: 1.1 (Air = 1)
Relative density	: 0.79 (16 °C) ASTM D-1298
Density	: 0.79 g/cm ³
Solubility(ies)	
Water solubility	: completely soluble
Solubility in other solvents	: no data available
Partition coefficient: n-octanol/water	: no data available
Auto-ignition temperature	: 464 °C
Thermal decomposition temperature	: no data available
Viscosity	
Viscosity, dynamic	: 0.6 mPa.s (20 °C)
Viscosity, kinematic	: no data available
Explosive properties	: no data available
Oxidizing properties	: no data available

METHANOL

9.2 Other information

no data available

Section: 10. STABILITY AND REACTIVITY

10.1 Reactivity

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

10.5 Incompatible materials

Materials to avoid : Strong oxidizing agents
Strong acids
Alkali metals

10.6 Hazardous decomposition products

Hazardous decomposition products : Decomposition products may include the following materials:
Carbon oxides

Section: 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Information on likely routes of exposure : Inhalation, Eye contact, Skin contact

Toxicity

Product

Acute oral toxicity : There is no data available for this product.
Acute inhalation toxicity : There is no data available for this product.
Acute dermal toxicity : There is no data available for this product.
Skin corrosion/irritation : There is no data available for this product.

Serious eye damage/eye irritation : Result: Mild eye irritation

Respiratory or skin sensitization : There is no data available for this product.

Carcinogenicity : No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible

METHANOL

or confirmed human carcinogen by IARC.

Reproductive effects : No toxicity to reproduction
Germ cell mutagenicity : Contains no ingredient listed as a mutagen
Teratogenicity : There is no data available for this product.
STOT - single exposure : Causes damage to organs.
STOT - repeated exposure : There is no data available for this product.
Aspiration toxicity : No aspiration toxicity classification

Potential Health Effects

Eyes : Health injuries are not known or expected under normal use.
Skin : Toxic in contact with skin.
Ingestion : May cause blindness if swallowed. Toxic if swallowed.
Inhalation : Toxic if inhaled.
Chronic Exposure : Health injuries are not known or expected under normal use.

Experience with human exposure

Eye contact : No information available.
Skin contact : No information available.
Ingestion : No information available.
Inhalation : Respiratory irritation, Cough
Further information : no data available

Section: 12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity

Product

Environmental Effects : This product has no known ecotoxicological effects.
Environmental Effects - Acute aquatic toxicity Assessment : This product has no known ecotoxicological effects.
Environmental Effects - Chronic aquatic toxicity Assessment : This product has no known ecotoxicological effects.
Toxicity to fish : no data available
Toxicity to daphnia and other : no data available

METHANOL

aquatic invertebrates

Toxicity to algae : no data available

Components

Toxicity to fish : Methanol
96 h LC50: 15,400 mg/l

Components

Toxicity to daphnia and other aquatic invertebrates : Methanol
48 h EC50: > 10,000 mg/l

Components

Toxicity to algae : Methanol
72 h EC50: 22,000 mg/l

Components

Toxicity to bacteria : Methanol
> 1,000 mg/l
Method: OECD Test Guideline 209

Components

Toxicity to fish (Chronic toxicity) : Methanol
8.3 d NOEC: 7,900 mg/l

12.2 Persistence and degradability

Product

Biodegradability : The organic portion of this preparation is expected to be readily biodegradable.

Biodegradation Assessment : The organic portion of this preparation is expected to be readily biodegradable.

Components

Biodegradability : Methanol
Result: Readily biodegradable.

12.3 Bioaccumulative potential

Product

Bioaccumulation : This preparation or material is not expected to bioaccumulate.

Components

Bioaccumulation : Methanol
Carp, Exposure time: 72 d, Bioconcentration factor (BCF): 1 - 4.5, Bioaccumulation is unlikely.

12.4 Mobility in soil

Product

METHANOL

The portion in water is expected to be soluble or dispersible.

12.5 Results of PBT and vPvB assessment

Product

Assessment : This substance is not considered to be persistent, bioaccumulating nor toxic (PBT)., This substance is not considered to be very persistent nor very bioaccumulating (vPvB).

12.6 Other adverse effects

No adverse effects expected.

Section: 13. DISPOSAL CONSIDERATIONS

Dispose of in accordance with the European Directives on waste and hazardous waste. Waste codes should be assigned by the user, preferably in discussion with the waste disposal authorities.

13.1 Waste treatment methods

Product : Where possible recycling is preferred to disposal or incineration.
If recycling is not practicable, dispose of in compliance with local regulations.
Dispose of wastes in an approved waste disposal facility.

Contaminated packaging : Dispose of as unused product.
Empty containers should be taken to an approved waste handling site for recycling or disposal.
Do not re-use empty containers.

Guidance for Waste Code selection : 16 03 05*- OFF SPECIFICATION BATCHES AND UNUSED PRODUCTS - Organic wastes containing dangerous substances. If this product is used in any further processes, the final user must redefine and assign the most appropriate European Waste Catalogue Code.

Section: 14. TRANSPORT INFORMATION

The shipper/consignor/sender is responsible to ensure that the packaging, labeling, and markings are in compliance with the selected mode of transport.

Land transport (ADR/ADN/RID)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3, 6.1
14.4 Packing group: II
14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.

Air transport (IATA)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3, 6.1
14.4 Packing group: II

METHANOL

14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.

Sea transport (IMDG/IMO)

14.1 UN number: UN 1230
14.2 UN proper shipping name: METHANOL
14.3 Transport hazard class(es): 3 , 6.1
14.4 Packing group: II
14.5 Environmental hazards: No
14.6 Special precautions for user: Not applicable.
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

Section: 15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
:

INTERNATIONAL CHEMICAL CONTROL LAWS

CANADA

The substance(s) in this preparation are included in or exempted from the Domestic Substance List (DSL).

UNITED STATES

The substances in this preparation are included on or exempted from the TSCA 8(b) Inventory (40 CFR 710)

NATIONAL REGULATIONS GERMANY

Water contaminating class : WGK 1
(Germany) Classification according VwVwS, Annex 4.

15.2 Chemical Safety Assessment:

No Chemical Safety Assessment has been carried out.

Section: 16. OTHER INFORMATION

Full text of H-Statements

H225 Highly flammable liquid and vapour.
H301 Toxic if swallowed.
H311 Toxic in contact with skin.
H331 Toxic if inhaled.
H370 Causes damage to organs.

Further information

Sources of key data used to compile the Safety Data Sheet : IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Man, Geneva: World Health Organization, International Agency for Research on Cancer.

The possible key literature references and data sources which may have been used in conjunction with the consideration of expert judgment to compile this Safety Data Sheet: European regulations/directives (including (EC) No. 1907/2006, (EC) No. 1272/2008, 67/548/EEC, 1999/45/EC), supplier data, inter-net, ESIS, IUCLID, ERICards, Non European official regulatory data and other data sources.

Prepared By : Regulatory Affairs

Numbers quoted in the MSDS are given in the format: 1,000,000 = 1 million and 1,000 = 1 thousand. 0.1 = 1 tenth and 0.001 = 1 thousandth

REVISED INFORMATION: Significant changes to regulatory or health information for this revision is indicated by a bar in the left-hand margin of the SDS.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Data revizuirii: 05.03.2018

2.2 Elemente pentru etichetă

Etichetare (Regulamentul (CE) Nr. 1272/2008)

Pictograme de pericol :

Cuvânt de avertizare : Pericol

Fraze de pericol : H226 Lichid și vapori inflamabili.
H304 Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H315 Provoacă iritarea pielii.
H332 Nociv în caz de inhalare.
H351 Susceptibil de a provoca cancer.
H373 Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
H411 Toxic pentru viața acvatică având efecte de lungă durată.

Fraze de precauție : **Prevenire:**
P210 A se păstra departe de surse de căldură, suprafețe fierbinți, scântei, flăcări și alte surse de aprindere. Fumatul interzis.
P260 Nu inspirați ceața/vaporii/spray-ul.
P273 Evitați dispersarea în mediu.
P280 Purați mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/ echipament de protecție a feței.
Intervenție:
P301 + P310 ÎN CAZ DE ÎNGHIȚIRE: sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ sau un medic.
P331 NU provocați vomă.
Eliminare:
P501 Eliminați conținutul/recipientele conform prevederilor legale în vigoare

2.3 Alte pericole

Note : Pericol ridicat de alunecare ca urmare a deversării accidentale a produsului.
Nu sunt cunoscute pericole suplimentare generate de produs pentru oameni și mediu.
Conform informațiilor de până acum, nu conține compusi care îndeplinesc criteriile de PBT sau vPvB.

SECȚIUNEA 4. MĂSURI DE PRIM AJUTOR

4.1 Descrierea măsurilor de prim ajutor

Indicații generale	:	Din cauza materialelor vărsate, suprafața devine alunecoasă. Înainte de a încerca să salvați victimele, izolați zona de toate sursele potențiale de aprindere, incluzând deconectarea alimentării cu energie electrică. Asigurați o ventilație suficientă și verificați dacă este prezentă o atmosferă sigură și respirabilă înainte de intrarea în spații închise. Este necesară protecția proprie a persoanelor care acordă măsurile de prim ajutor.
Inhalare	:	După inhalarea accidentală a vaporilor, persoana (persoanele) afectată (afectate) trebuie transportată (transportate) la aer curat. A se solicita asistență medicală de urgență. Dacă victima este înconștientă și nu respiră: asigurați-vă că nu există obstrucții ale respirației și dispuneți administrarea respirației artificiale de către personal instruit. Dacă este necesar, aplicați masaj cardiac extern și cereți sfatul medicului. Dacă victima este înconștientă și respiră: așezați-o în poziția de recuperare. Administrați oxigen dacă este necesar. În cazul unor simptome persistente este necesară consultarea medicului.
Contact cu pielea	:	După contactul cu pielea se spală bine zona cu apă și săpun. Dacă a fost expus întreg corpul, persoana trebuie spălată în întregime, mai ales părul acesteia. Îndepărtați îmbrăcămintea contaminată, încălțăminte contaminată și eliminați-le în siguranță. Se acopera zonele corpului afectate cu haine curate și care nu adera la aceste zone. Cereți sfatul medicului dacă apar și persistă iritații, umflături sau înroșire a pielii. Atunci când utilizați echipamente de înaltă presiune, se poate produce injectarea produsului. Dacă se produc leziuni la presiuni mari, solicitați imediat asistență medicală profesionistă. Nu așteptați să apară simptomele. În caz de arsuri termice minore: răciți zona afectată. Țineți zona arsă sub un jet de apă rece timp de cel puțin cinci minute sau până când durerea scade în intensitate. În orice caz, hipotermia trebuie să fie evitată.
Contact cu ochii	:	După contactul cu ochii clătiți timp de 10-15 minute, ținând pleoapele deschise cu jet de apă sau cu soluție din recipientul pentru spălarea ochilor. Îndepărtați lentilele de contact, dacă sunt prezente și sunt ușor de scos. Continuați clătirea. În cazul unor simptome de durată, este necesară consultarea unui oftalmolog.
Ingerare, Absorbție substanță în plămâni	:	În caz de ingerare, presupuneți întotdeauna că a avut loc aspirația. Victima trebuie trimisă imediat la spital. Nu așteptați să apară simptomele. Nu induceți vomă deoarece există un risc ridicat de aspirație. Nu administrați nimic pe gură unei persoane înconștiente.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

4.2 Cele mai importante simptome și efecte, atât acute cât și întârziate

Simptome	: Grețuri, vărsături și diaree, precum și pericolul unei pneumonite de origine chimică din cauza aspirației pe parcursul înghițirii sau al vomei. Vaporii produsului în concentrație ridicată pot conduce la apariția unor iritații ale ochilor și ale mucoaselor (nas, gât). După inhalarea pe termen lung a vaporilor concentrați este posibilă apariția durerilor de cap, a amețelilor, a stărilor euforice, de nervozitate, a tremurului, a spasmelor tonico-clonice, pierderea cunoștinței, insuficiența circulatorie și paralizia centrală a sistemului respirator. Concentrații foarte ridicate pot provoca pierderea cunoștinței chiar și după perioade foarte scurte de expunere. Simptome la contactul cu pielea: înroșire, iritație. Simptome la contactul cu ochii: iritație ușoară (nespecifică).
Efecte	: În caz de aspirație, există riscul de apariție a pneumonitei chimice.

4.3 Indicații privind orice fel de asistență medicală imediată și tratamente speciale necesare

Tratament	: Tratament simptomatic. Dacă este necesar, solicitați spitalizarea persoanei. După înghițirea unor cantități mai mari de 1-2 ml/kg greutate corporală este necesară administrarea de cărbune activ (aproximativ 50 g) și spitalizarea persoanei. În cazul unei stări puternice de agitație, este necesară sedarea persoanei (la indicația medicului).
------------------	--

SECȚIUNEA 5. MĂSURI DE COMBATERE A INCENDIILOR

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare	: Pentru focarele mici de incendiu: pulbere uscată de stingere, Spumă (numai personal special instruit); Ceață de apă (numai personal special instruit); bioxid de carbon (CO ₂); Alte gaze inerte (în conformitate cu reglementările); Nisip sau pământ. În cazul unui focar de incendiu extins: spumă sau apa pulverizată.
Mijloace de stingere necorespunzătoare	: Jet direct/compact de apă; (poate cauza extinderea focarului de ardere prin stropire); Se va evita utilizarea simultană de spumă și apă pe aceeași suprafață deoarece apa distruge spuma.

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Pericol specific din cauza substanței sau amestecului, din cauza produselor de combustie sau din cauza gazelor generate prin ardere.	: Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Această substanță plutește și se poate reaprinde la suprafața apei. A se feri de sursele de aprindere. Este permisă numai utilizarea sculelor, dispozitivelor și echipamentelor care nu produc scântei sau realizate în construcție antiexplozivă și rezistente la solvenți. Trebuie avuți în vedere potențialii produși de combustie, cum ar fi CO, SO _x sau NO _x . Combustia incompletă poate genera un amestec complex de particule solide și lichide aeropurtate și gaze, inclusiv monoxid de carbon și compuși organici și anorganici neidentificați.
---	--

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

5.3 Recomandări destinate pompierilor

Echipament special de protecție	:	În cazul unui incendiu de proporții sau în spațiile închise și insuficient aerisite, purtați îmbrăcăminte de protecție ignifugă completă și un aparat de respirat autonom (SCBA) cu o mască pentru întreaga față acționat în modul de presiune pozitivă.
Informații suplimentare	:	Răcirea imediată a recipientelor și a ambalajelor din apropiere cu apă pulverizată, și, dacă este posibil, îndepărtarea acestora din zona de pericol. Reziduurile de ardere și apa contaminată utilizată la stingerea incendiilor trebuie eliminate conform prevederilor impuse de autoritățile locale. Asigurați o rezervă de apă pentru stingere.

SECȚIUNEA 6. MĂSURI DE LUAT ÎN CAZ DE DISPERSIE ACCIDENTALĂ

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Precauții pentru personal	:	Se acționează din aceeași direcție cu direcția vântului (atenție la schimbarea direcției vântului). Alertați personalul de urgență. Dacă se poate efectua în siguranță, opriți sau izolați scurgerea la sursă. Îndepărtați toate sursele de foc din apropiere. Identificarea, marcarea și limitarea accesului în zona cu pericol de explozie. Nu este permis accesul persoanelor neautorizate. Exceptând deversările de mică amploare: Fezabilitatea oricăror acțiuni trebuie întotdeauna evaluată și avizată, dacă este posibil, de o persoană competentă instruită responsabilă cu gestionarea situației de urgență. În cazul unei emisii de amploare, alertați locuitorii aflați în direcția de bătaie a vântului. Dacă este necesar, notificați autoritățile competente în conformitate cu toate reglementările în vigoare. Personalul de prim-ajutor trebuie să poarte echipament individual de protecție. Aerisirea corespunzătoare a încăperilor contaminate. Evitați contactului cu pielea. Deversări de mică amploare: hainele de lucru antistatice normale sunt, de obicei, suficiente. Deversări de amploare: costum pentru întregul corp din material antistatic și rezistent la substanțe chimice; Mănuși de lucru care asigură rezistență adecvată la substanțe chimice, în special la hidrocarburi aromatice. Notă: mănușile din PVA (alcool polivinilic) nu sunt impermeabile și nu sunt potrivite pentru utilizare în caz de urgență. Cască de lucru. Pantofi sau cizme de siguranță antistatice nederapante. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii. Protecție respiratorie: Se poate utiliza mască, pentru protecția parțială sau totală a feței, cu filtru pentru vapori organici sau un aparat de respirat autonom (SCBA), în funcție de amploarea deversării și de nivelul estimat de expunere. Dacă situația nu poate fi evaluată complet sau dacă este posibilă lipsa oxigenului, trebuie utilizate doar aparate SCBA. A se evita contactul direct cu materialul degajat. Evitați formarea de scântei. În zona de pericol, este recomandată oprirea utilajelor, echipamentelor și a autovehiculelor care nu sunt realizate în construcție antiexplozivă. Fumatul este interzis. Nu este permisă acționarea întrerupătoarelor și pornirea echipamentelor electrice care pot conduce la formarea de scântei. Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului.
----------------------------------	---	--

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

6.2 Precauții pentru mediul înconjurător

Precauții pentru mediul înconjurător	:	Se va opri scurgerea produsului în condiții de siguranță. Prevenirea scurgerii în canalizări, cursuri de apă, subsoluri sau spații închise prin realizarea unor diguri de nisip și/sau pământ sau prin alte măsuri adecvate de stopare scurgere (bariere plutitoare, skimming sau alte tehnici de ordin mecanic). Materialul absorbant contaminat poate să prezinte același grad de pericolozitate ca și produsul scurs. Deversarea în mediu trebuie evitată. Dacă produsul deversat a poluat mediul (a ajuns în canalizări, cursuri de apă, sol sau aer) este necesară informarea autorităților relevante.
---	---	---

6.3 Metode și materiale pentru izolarea incendiilor și pentru curățenie

Procedee adecvate pentru curățare sau absorbție sau izolare	:	Aspirarea /evacuarea prin pompare a cantităților mari. Colectarea cantităților reziduale cu materiale absorbante neinflamabile, de exemplu nisip, pământ sau liant pentru ulei, respectiv îndiguirea acestora. Deversările de ampolare pot fi acoperite atent cu spumă, dacă este disponibilă, pentru a limita formarea norilor de vaporii. Nu utilizați jeturi directe. Observație: pe măsură ce crește cantitatea de substanță absorbită în liant, crește viteza de evaporare și, prin aceasta, pericolul de incendiu. În caz de contaminare a solului, îndepărtați solul contaminat și tratați în conformitate cu reglementările locale. În cazul deversărilor de mică ampolare în ape închise (cum ar fi porturile), izolați produsul cu bariere plutitoare sau alte echipamente. Colectați produsul vărsat cu materiale absorbante plutitoare adecvate/specifice. Deversările mari în ape deschise trebuie izolate cu bariere plutitoare sau alte mijloace mecanice. Dacă acest lucru nu este posibil, controlați propagarea și colectați produsul prin separare mecanică (skimming) sau alte mijloace mecanice. Utilizarea agenților de dispersie trebuie avizată de un expert și, dacă este necesar, aprobată de autoritățile locale. Colectați produsul recuperat și alte materiale în rezervoare sau containere adecvate în vederea revalorificării sau eliminării în siguranță. Colectarea deșeurilor în containere etichetate adecvat pentru deșeurile periculoase și eliminarea ulterioară conform normelor și legislației în vigoare.
Procedee neadecvate pentru curățare sau absorbție sau izolare	:	Fără date disponibile

6.4 Trimitere la alte secțiuni

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

6.5 Informații suplimentare

Adoptați măsuri corespunzătoare condițiilor și reglementărilor locale.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

SECȚIUNEA 7. MANIPULARE ȘI DEPOZITARE

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări pentru manipularea în condiții de securitate	:	Procurați instrucțiuni speciale înainte de utilizare. Se va utiliza numai în sistem închis. Aspirarea vaporilor la locul de emisie. În cazul în care este disponibil, pentru evacuarea în aer liber a gazelor de ardere și a aerului uzat se va folosi un separator, respectiv epurator de aer. Dacă este posibil, se va face aerisirea încăperii la nivelul solului. Evitarea contactului cu pielea, cu ochii și cu îmbrăcămintea. A nu se ingera. Nu este permisă inhalarea vaporilor. Evitați scurgerea produsului. A se utiliza și depozita doar în exterior sau într-un spațiu bine aerisit. Utilizați echipamentul de protecție individuală conform cerințelor. Pentru mai multe informații despre echipamentele de protecție și condițiile de operare, a se vedea scenariile de expunere.
Recomandări de prevenire a incendiului și a exploziei	:	Produsul evaporat este mai greu decât aerul și se acumulează la nivelul solului. Aveți grijă la acumularea în puțuri și spațiile închise. A nu se utiliza aer comprimat pentru operațiuni de umplere, descărcare sau manipulare. În amestec cu aerul, vaporii pot forma un amestec exploziv. Prevenirea pătrunderii în canalizare și în subsoluri. Prevenirea pătrunderii în sol și în ape. Adoptați măsuri împotriva încărcării electrostatice. Legați la centura de împământare toate echipamentele de lucru. A se feri de sursele de aprindere. Utilizarea de echipamente / armături protejate împotriva exploziilor și a unor instrumente care nu produc scântei. Fumatul interzis. Asigurați-vă că toate reglementările relevante privind facilitățile de manipulare și depozitare a produselor inflamabile sunt respectate.

A se vedea și Secțiunea 8 (Controale ale expunerii/Protecția personală) și Secțiunea 13 (Considerații privind eliminarea).

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Cerințe pentru spațiile de depozitare și containere	<p>: Dispunerea zonei de depozitare, construcția rezervoarelor, echipamentele și procedurile de operare trebuie să respecte legislația europeană, națională sau locală relevantă.</p> <p>Instalațiile de depozitare trebuie proiectate cu împrejurimi adecvate pentru a preveni poluarea solului și apelor în caz de scurgeri sau deversări.</p> <p>Recipientele vor fi păstrate închise etanș și într-un loc bine ventilat.</p> <p>Este permisă numai utilizarea unor recipiente staționare autorizate.</p> <p>Toate rezervoarele și echipamentele se vor lega la centura de împământare.</p> <p>Depozitați într-un spațiu corespunzător.</p> <p>De regulă este necesară existența unui spațiu de depozitare etanșat și rezistent.</p> <p>Curățarea, inspectarea și întreținerea structurii interne a rezervoarelor de depozitare trebuie efectuate doar de personal calificat și echipat corespunzător, conform prevederilor din reglementările naționale, locale sau ale companiei.</p> <p>Înainte de intrarea în rezervoarele de stocare sau a începerii unor lucrări în spații închise, trebuie efectuată proba de gaze (prezența hidrocarburilor, conținutul de oxigen) respectiv testată prezența atmosferei explozive.</p> <p>Materialele recomandate pentru containere sau căptușelile containerelor includ oțel moale, oțel inoxidabil.</p> <p>Materiale nepotrivite: Anumite materiale sintetice pot fi nepotrivite pentru containere sau căptușeala containerelor, în funcție de specificațiile și utilizarea materialului.</p> <p>Compatibilitatea trebuie verificată împreună cu producătorul.</p> <p>Dacă produsul se livrează în containere:</p> <p>Păstrați produsul numai în ambalajul (recipientul) original.</p> <p>Etichetați containerele în mod corespunzător.</p> <p>A se proteja de lumina solară.</p> <p>Vapori de hidrocarburi ușoare se pot acumula în spațiile libere ale containerelor.</p> <p>Aceștia pot cauza pericole de inflamabilitate/explozie.</p> <p>Containerelor golite pot conține reziduuri inflamabile ale produsului.</p> <p>Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.</p>
Informații suplimentare asupra condițiilor de depozitare	<p>: Evitarea efectului termic.</p> <p>A se feri de sursele de aprindere.</p>

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri de protecție în cazul depozitării în comun	:	A nu se depozita împreună cu: substanțe periculoase explozive, gaze, alte substanțe periculoase explozive, substanțe solide periculoase inflamabile, substanțe periculoase piroforice sau care se autoîncălesc, substanțe periculoase care, în contact cu apa, degajă gaze inflamabile, substanțe periculoase puternic oxidante, azotat de amoniu și produse care conțin azotat de amoniu, peroxizi organici și substanțe periculoase auto-reactive, substanțe periculoase necombustibile încadrate în categoriile de toxicitate acută 1 și 2 / foarte toxice, substanțe infecțioase, substanțe radioactive, Restricții la depozitarea împreună cu: substanțe periculoase oxidante, substanțe periculoase necombustibile, cu toxicitate acută cat. 3 / toxice sau cu efecte cronice, solide combustibile, alte substanțe combustibile și necombustibile, Ca urmare a normelor specifice de depozitare și din cauza caracteristicilor speciale ale substanțelor/amestecurilor dintr-un depozit, în urma evaluării riscurilor, pot rezulta și alte limitări (restricții).
--	---	---

7.3 Utilizare finală specifică (utilizări finale specifice)

Instrucțiuni legate de utilizări specifice	:	Se va utiliza numai în scopurile relevante menționate în Secțiunea 1.2. Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Utilizare finală: muncitor

Rute de expunere: Cronică dermică, sistemic

Valoare: 2,9 mg/kg g.c./zi

Cel mai sensibil criteriu: Toxicitate cu doze repetate (dermic) NOAEL 30/kg/zi, DNEL, CAS-NR.: 68334-30-5

Utilizare finală: Populație generală

Rute de expunere: expunere acută, inhalare, sistemic

Valoare: 2600 mg/m³

Cel mai sensibil criteriu: Toxicitate acută (inhalare) NOEC 6000 mg/m³, DNEL, CAS-NR.: 68334-30-5

Utilizare finală: Populație generală

Rute de expunere: expunere cronică, inhalare, sistemic

Valoare: 20 mg/m³

Cel mai sensibil criteriu: Dezvoltare (dermic) NOEL 125 mg/kg/zi, DNEL, CAS-NR.: 68334-30-5

Utilizare finală: Populație generală

Rute de expunere: Cronică dermică, sistemic

Valoare: 1,3 mg/kg g.c./zi

Cel mai sensibil criteriu: Toxicitate cu doze repetate (dermic) NOAEL 30/kg/zi, DNEL, CAS-NR.: 68334-30-5

PNEC pentru produs

Substanța component principal al produsului este un complex de hidrocarburi cu structură variabilă sau necunoscută. Metodele tradiționale pentru determinarea PNEC nu sunt aplicabile, nefiind astfel posibilă determinarea unei singure valori PNEC reprezentative pentru astfel de substanțe.

8.2 Controale ale expunerii

Se va utiliza numai în scopurile relevante menționate în Secțiunea 1.2., Pentru informații referitoare la aplicații specifice, consultați scenariile de expunere din anexă.

Măsuri generale de protecție

Măsuri de igienă	:	Asigurați-vă că sunt instituite măsuri de administrare adecvate. Evitarea contactului cu ochii, cu pielea și cu îmbrăcămintea. Hainele contaminate cu produs trebuie schimbate imediat și curățate înainte de reutilizare.
------------------	---	--

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Echipament personal de protecție

Protecție respiratorie	:	Când se produc vapori: utilizați protecție respiratorie cu filtru A pentru gaz, culoare caracteristică maro (A1 până la 0,1 vol%, A2 până la 0,5 vol%, A3 până la 1 vol%). În cazul unor concentrații ridicate și în situația în care nu există informații suficiente, se va utiliza numai aparat pentru protecția respirației autonom (izolant).
Protecția mâinilor	:	<p>În practică, durata de utilizare a mănușilor recomandate pentru protecția împotriva substanțelor chimice poate fi mai redusă decât timpul de penetrare determinat conform normelor EN 374 din cauza numărului mare de factori de influență (de exemplu temperatură, sarcină mecanică). În cazul unui posibil contact cu mâinile, a se purta mănuși de protecție rezistente împotriva pătrunderii lichidelor.</p> <p>Material: Nitril; Timpul de penetrare: 480 min Grosimea materialului: 0,40 mm Metodă de verificare: EN 374</p> <p>Material: Viton; Timpul de penetrare: 480 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Butil; Timpul de penetrare: 120 min Grosimea materialului: 0,70 mm Metodă de verificare: EN 374</p> <p>Material: Policloropren; Timpul de penetrare: 60 min Grosimea materialului: 0,60 mm Metodă de verificare: EN 374</p>
Protecția ochilor / feței	:	Ochelari de protecție cu ecrane laterale. Ochelari de protecție și/sau mască de protecție a feței, dacă este posibil(ă) sau se anticipează stropirea sau contactul cu ochii.
Protecția corpului	:	Utilizarea, în toate cazurile, de îmbrăcăminte rezistentă la foc și antistatică pe termen lung. Cască de lucru. Pantofi sau cizme de siguranță antistatice nederapante. Dacă este necesar, termorezistente.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Controlul expunerii mediului

Controlul expunerii mediului	:	Se va utiliza pe cât posibil aparatură închisă. Dacă există risc de expunere, trebuie asigurată extracția/ventilația adecvată. Respectarea valorilor limită cu privire la emisii, dacă este cazul, asigurând o ventilație cu evacuare a aerului (dacă este necesar). A se vedea și Secțiunea 6 " Măsuri de luat în caz de dispersie accidentală ".
------------------------------	---	--

8.3 Informații suplimentare

În situația concretă de utilizare, ca urmare a evaluării individuale de pericol poate fi necesară utilizarea de echipamente diferite de protecție a persoanei.

SECȚIUNEA 9. PROPRIETĂȚI FIZICE ȘI CHIMICE

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect	:	lichid
Stare de agregare	:	lichid
Culoare	:	ușor gălbui
Miros	:	specific de produs petrolier
Prag de acceptare a mirosului	:	miros clar perceptibil

Vâscozitate cinematică	2,0 - 4,5 mm ² /s la 40 °C	EN ISO 3104	
Vâscozitate dinamică			Nedeterminat
Proprietăți explozive		Derivație din structura chimică	nu este exploziv
Proprietăți oxidante		Derivație din structura chimică	neoxidant

9.2 Alte informații

nu există date

SECȚIUNEA 10. STABILITATE SI REACTIVITATE

10.1 Reactivitate

Stabil chimic în condiții normale de depozitare și manipulare, cu respectarea prevederilor din Secțiunea 7.

10.2 Stabilitate chimică

Stabil chimic în condiții normale de depozitare și manipulare, cu respectarea prevederilor din Secțiunea 7.

10.3 Posibilitatea de reacții periculoase

Reacții potențial periculoase : Amestecurile de vapori / aer care prezintă pericol de explozie pot fi prezente, chiar și în recipiente goale, necurățate.
Dacă este puternic încălzit: Pericol de ardere spontană
Reacții cu substanțele oxidante.

10.4 Condiții de evitat

Condiții de evitat : A se feri de surse de căldură, flacără deschisă și alte surse similare de foc.

10.5 Materiale incompatibile

Materiale de evitat : acizi tari și agenți oxidanți;

10.6 Produși de descompunere periculoși

Produși de descompunere periculoși : Nedeterminat

10.7 Informații suplimentare

vapori invizibili, mai grei decât aerul

SECȚIUNEA 11. INFORMAȚII TOXICOLOGICE

11.1 Informații privind efectele toxicologice

Toxicitate acută

Efect oral acut	:	LD50 șobolan Metodă: OECD 420 Substanță de test: 68334-30-5 Doză: aprox. 7.600 mg/kg g.c.
Efect acut la inhalare	:	LC50 șobolan Doză: 3,6 mg/l / 4 o Metodă: OECD 403 Substanță de test: 68334-30-5
Efect acut cutanat	:	LD50 iepure Doză: > 5 ml/kg gc Metodă: OECD 434 Substanță de test: 68334-30-5 (aprox. >4.300 mg/kg g.c./zi)
Alte efecte acute	:	nu există date
Alte efecte	:	nicio informație

Corodarea/iritarea pielii

Iritația pielii	:	iepure Rezultat: Iritant pentru piele Metodă: OECD 404 Substanță de test: 68334-30-5
-----------------	---	---

Lezarea gravă/iritarea ochilor

Iritația ochilor	:	iepure Rezultat: nu este iritant Metodă: OECD 405 Substanță de test: 68334-30-5 posibilă iritație temporară
------------------	---	---

Sensibilizarea căilor respiratorii sau a pielii

sensibilizare	:	Metodă: OECD 406 Substanță de test: 68334-30-5 Nu există informații cu privire la posibile efecte de sensibilizare
---------------	---	--

Mutagenitatea celulelor germinative

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Genotoxicitate în vitro	: testul Ames Rezultat: negativ cu activare metabolica Metodă: Test Ames modificat conform ASTM E 1687 Substanță de test: 68334-30-5
Genotoxicitate în vivo	: Încercare micronucleară (clastogenicitate) Substanță de test: 68476-30-2 Metodă: OECD 475 Rezultat: negativ
	: Test de aberatie cromozomiala Substanță de test: 64741-44-2 Metodă: OECD 475 Rezultat: negativ
Evaluare toxicologică / Mutagenitatea celulelor germinative	: Pe baza datelor disponibile, nu este clasificat ca mutagen.

Cancerogenitatea

Efect cancerigen	: Substanță de test: 10 distilate medii Metodă: Nedeterminat Studii privind efectele cancerigene la șoareci dermic Rezultat: pozitiv LOAEL Doză: 25 mg/kg/gc/zi cronic șoarece
Evaluare toxicologică / Cancerogenitatea	: Clasificat în conformitate cu Regulamentul CLP (CE) a UE nr. 1272/2008 la categoria 2 H351

Toxicitate pentru reproducere

Toxicitate pentru reproducere/fertilitate	: Mod de aplicare: orală; șobolan Substanță de test: distilate, grele, C18-50 - ramificate, ciclice și liniare Metodă: US EPA Ghidul de testare a efectelor asupra sănătății OPPTS 870.3800 și OECD 416 NOAEL (F1); Doză: 1000 mg/kg gc/zi
Toxicitate pentru dezvoltare/teratogenicitate	: Mod de aplicare: piele; șobolan Substanță de test: 64741-49-7 Metodă: OECD 414 NOAEL Doză: 125 mg/kg/zi (toxicitate maternală/la dezvoltare)
Evaluare toxicologică / Toxicitate pentru dezvoltare/teratogenicitate Toxicitate pentru reproducere/fertilitate	: În baza datelor disponibile, nu este clasificat ca fiind toxic pentru dezvoltare sau teratogenic.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Toxicitate asupra unui organ țintă specific - expunere unică

Toxicitate asupra unui organ țintă specific - expunere unică	:	Rute de expunere: nu există date
--	---	----------------------------------

Toxicitate asupra unui organ țintă specific - expunere repetată

Efecte în cazul expunerii repetate sau de lungă durată	:	Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
--	---	---

Pericol prin aspirare

Toxicitate prin aspirare	:	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
--------------------------	---	---

Efecte neurologice

Efecte neurologice	:	nu există date
Efecte narcotice	:	Concentrațiile ridicate pot avea efecte narcotice.

Evaluare toxicologică /

Toxicitate la doză repetată	:	NOEL dermic; Doză: 0,5 ml/kg (sistemic); 0,0001 ml/kg (local); Metodă: OECD 410
	:	NOAEC (inhalare) doză: >1,71 mg/l/90d (sistemic); 0,88 mg/l/90 d (local); metodă: OECD 413; substanță de test: cel mai probabil 68334-30-6

11.2 Informații suplimentare

Datele de mai sus sunt pentru componentul principal, CAS-Nr. 68334-30-5
(dacă nu se menționează altfel)

SECȚIUNEA 12. INFORMAȚII ECOLOGICE

12.1 Toxicitatea

Toxicitate acută

Toxicitate acută la pești	:	LL50 Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 65 mg/l Durată de expunere: 96 o Metodă: OECD 203
---------------------------	---	---

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

		NOEL Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 10 mg/l Durată de expunere: 96 o Metodă: OECD 203
Toxicitate acută în cazul nevertebratelor acvatice	:	NOEL Specii: Daphnia magna (Purici de apă mari) Doză: 46 mg/l Durată de expunere: 48 o Metodă: OECD 202
Toxicitatea pentru alge și plantele acvatice	:	ErL50 Specii: Pseudokirchneriella subcapitata Doză: 22 mg/l Durată de expunere: 72 o Metodă: OECD 201
Toxicitate la microorganisme	:	NOEL Specii: Tetrahymena pyriformis Doză: 3.217 mg/l Durată de expunere: 40 o Substanță de test: motorină de vid, motorina hidrocracată și combustibili distilați Metodă: QSAR
		EL50 Specii: Tetrahymena pyriformis Doză: > 1.000 mg/l Durată de expunere: 40 o Substanță de test: motorină de vid, motorina hidrocracată și combustibili distilați Metodă: QSAR
Toxicitate pentru organismele edafice	:	nu există date
Toxicitate în cazul plantelor terestre	:	nu există date
Toxicitate asupra altor organisme terestre (care nu sunt mamifere)	:	nu există date

Toxicitate cronică

Toxicitate pentru pești (Toxicitate cronică)	:	NOEL Specii: Oncorhynchus mykiss (pastrav curcubeu) Doză: 0,083 mg/l Durată de expunere: 14 z Substanță de test: motorină de vid, motorina hidrocracată și combustibili distilați Metodă: QSAR
---	---	---

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Toxicitate la daphnia și alte nevertebrate acvatic. (Toxicitate cronică)	:	NOEL Specii: Daphnia magna Doză: 0,2 mg/l Durată de expunere: 21 z Substanță de test: motorină de vid, motorina hidrocracată si combustibili distilați Metodă: (Q)SAR
Acvatică acută	:	EL50: >1000 mg/l/ 40h; NOEL: 3,217 mg/l, nu există criterii de clasificare pentru toxicitate acvatică acută
Acvatică cronică	:	Toxic pentru organismele acvatice, poate provoca efecte adverse pe termen lung asupra mediului acvatic
Date de toxicitate în sol	:	nu există date
Alte organisme relevante din punct de vedere al mediului	:	nu există date

12.2 Persistență și degradabilitate

Persistență, Biodegradare	:	Greu biodegradabil.
----------------------------------	---	---------------------

12.3 Potențial de bioacumulare

Bioacumulare	:	Nu sunt disponibile date relevante. Potențial de bioacumulare (Coeficient de partiție (n-octanol/apă)): nu există date
---------------------	---	---

12.4 Mobilitate în sol

Mobilitate	:	Note: Nu lăsați produsul să fie eliberat necontrolat în mediu.
Transport între diferite medii	:	nu există date
Capacitate de eliminare fizico-chimică	:	Acest produs este insolubil în apă și plutește la suprafața acesteia. Poate fi separat mecanic, în stații de tratare a apelor uzate.

12.5 Rezultate ale evaluării PBT și vPvB

Rezultate ale evaluării PBT și vPvB	:	Conform informațiilor de până acum, nu conține compusi care îndeplinesc criteriile de PBT sau vPvB.
--	---	---

12.6 Alte efecte adverse

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Efecte asupra stațiilor de epurare	:	nicio informație
Alte efecte adverse	:	Nu evacuați produsul în sistemul de canalizare, cursuri de apă și pe sol. În caz de accident, contactați echipele speciale de intervenție și anunțați autoritățile locale competente.

12.7 Alte informații

Alte informații	:	Datele de mai sus sunt pentru componentul principal, CAS-Nr. 68334-30-5 (dacă nu se menționează altfel)
-----------------	---	---

SECȚIUNEA 13. CONSIDERAȚII PRIVIND ELIMINAREA

13.1 Metode de tratare a deșeurilor

Instrucțiuni privind eliminarea deșeurilor de produs	:	Reziduurile de produs vor fi eliminate conform prevederilor legale.
Instrucțiuni privind eliminarea deșeurilor de ambalaj	:	În măsura în care produsul a fost livrat în ambalaj, de preferat, ambalajele goale vor fi refolosite sau, dacă nu există această posibilitate, vor fi transportate la un punct de valorificare / eliminare finală a deșeurilor periculoase. Nu sudați, lipiți, perforați, tăiați sau incinerați containerele goale, cu excepția cazului în care au fost curățate corespunzător.
Codul deșeurilor conform Catalogului european al deșeurilor în cazul utilizării conform Secțiunii 1:		
Cod deșeu de produs	:	13 07 01* ulei combustibil și combustibil diesel
Cod deșeu de ambalaj	:	15 01 10* ambalaje care conțin reziduuri de substanțe periculoase sau sunt contaminate cu substanțe periculoase

13.2 Informații suplimentare

Codul de deșeu depinde de originea deșeurilor și, în situații individuale, poate diferi de informațiile de mai sus.

Legislația privind eliminarea deșeurilor de produs:

Legea nr 211/2011 privind regimul deșeurilor, cu modificările și completările ulterioare;

HG 235/2007 privind gestionarea uleiurilor uzate;

OMAPM nr.756/2004 pentru aprobarea Normativului tehnic privind incinerarea deșeurilor;

HG 349/2005 privind depozitarea deșeurilor, cu modificările și completările ulterioare;

HG 856/2002 privind evidența gestiunii deșeurilor și pentru aprobarea listei cuprinzând deșeurile, inclusiv deșeurile periculoase, cu modificările și completările ulterioare;

HG 1061/2008 privind transportul deșeurilor periculoase și nepericuloase pe teritoriul României.

Legislația pentru deșeurile de ambalaje:

Ordinul nr. 794/2012 privind procedura de raportare a datelor referitoare la ambalaje și deșeurile de ambalaje;

Legea nr. 249/2015 privind modalitatea de gestionare a ambalajelor și deșeurilor de ambalaje, cu modificările și completările ulterioare.

Informații suplimentare

La cerere, producătorul vă oferă informații suplimentare referitoare la clasificarea produsului pentru transport.

SECȚIUNEA 15. INFORMAȚII DE REGLEMENTARE

15.1 Regulamente/legislație în domeniul securității, sănătății și al mediului specifice (specifică) pentru substanța sau amestecul în cauză

Dispoziții comunitare privind protecția sănătății și a mediului

Directiva 2010/75/UE privind emisiile industriale (prevenirea și controlul integrat al poluării) - Capitolul V - Dispoziții speciale aplicabile instalațiilor și activităților care utilizează solvenți organici.	:	Produsul nu face obiectul directivei COV dacă se utilizează în scopurile prevăzute (vezi secțiunea 1.2).
Regulamentul (CE) nr. 1907/2006, Anexa XVII	:	nr. 3 - Substanțe sau amestecuri lichide considerate periculoase conform definițiilor din Directiva 67/548/CEE și Directiva 1999/45/CE;
Directiva 2012/18/UE a Parlamentului European și a Consiliului din 4 iulie 2012 privind controlul pericolelor de accidente majore care implică substanțe periculoase, de modificare și ulterior de abrogare a Directivei 96/82/CE a Consiliului (SEVESO III).	:	Anexă I, Partea 1: P5c LICHIDE INFLAMABILE E2 Periculoase pentru mediul acvatic în categoria cronic 2. Anexa I Partea 2: 34. Produse petroliere și carburanți alternativi. (c) distilate de petrol, exclusiv fracția grea (inclusiv motorină, combustibil gazos pentru încălzirea locuințelor și amestecurile).
Directiva 92/85/CEE a Consiliului din 19 octombrie 1992 privind introducerea de măsuri pentru promovarea îmbunătățirii securității și a sănătății la locul de muncă în cazul lucrătoarelor gravide, care au născut de curând sau care alăptează [a zecea directivă specială în sensul articolului 16 alineatul (1) din Directiva 89/391/CEE]	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Directiva 94/33/CE a Consiliului din 22 iunie 1994 privind protecția tinerilor la locul de muncă	:	Produsul face obiectul restricțiilor stabilite prin legislația națională de transpunere a Directivei.
---	---	---

Alte reglementări:

Regulamentul (CE) nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a Directivei 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1907/2006, cu modificările și completările ulterioare.

Legea 360/2003 privind regimul substanțelor și preparatelor chimice periculoase, cu modificările și completările ulterioare;

HG 1093/2006 privind stabilirea cerințelor minime de securitate și sănătate pentru protecția lucrătorilor împotriva riscurilor legate de expunerea la agenți cancerigeni sau mutageni la locul de muncă, cu modificările și completările ulterioare;

Regulamentul (CE) nr.1907/2006 privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), cu modificările și completările ulterioare.

HG 477/2009 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) nr. 1.907/2006 al Parlamentului European și al Consiliului privind înregistrarea, evaluarea, autorizarea și restricționarea substanțelor chimice (REACH), de înființare a Agenției Europene pentru Produse Chimice, de modificare a Directivei 1999/45/CE și de abrogare a Regulamentului (CEE) nr. 793/93 al Consiliului și a Regulamentului (CE) nr. 1.488/94 al Comisiei, precum și a Directivei 76/769/CEE a Consiliului și a directivelor 91/155/CEE, 93/67/CEE, 93/105/CE și 2000/21/CE ale Comisiei

HG 398 /2010 privind stabilirea unor măsuri pentru aplicarea prevederilor Regulamentului (CE) nr. 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1.999/45/CE, precum și de modificare a Regulamentului (CE) nr. 1.907/2006

Legea 319/2006 privind Securitatea și sănătatea în muncă, cu modificările și completările ulterioare;

HG 1218/2006 privind stabilirea cerințelor minime de securitate și sănătate în muncă pentru asigurarea protecției lucrătorilor împotriva riscurilor legate de prezența agenților chimici, cu modificările și completările ulterioare;

OUG 122/2010 privind stabilirea sancțiunilor aplicabile pentru încălcarea prevederilor Regulamentului (CE) 1.272/2008 al Parlamentului European și al Consiliului din 16 decembrie 2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor, de modificare și de abrogare a directivelor 67/548/CEE și 1999/45/CE, precum și de modificare a Regulamentului (CE) 1.907/2006, cu modificările și completările ulterioare.

Legea nr.59/2016 privind controlul asupra pericolelor de accident major în care sunt implicate substanțe periculoase.

OUG 96/2003 privind protecția maternității la locul de muncă, cu modificările și completările ulterioare.

HG 600/2007 privind protecția tinerilor la locul de muncă, cu modificările și completările ulterioare

Hotărârea nr. 893/2006 pentru modificarea Hotărârii Guvernului nr. 1.593/2002 privind aprobarea Planului național de pregătire, răspuns și cooperare în caz de poluare marină cu hidrocarburi.

15.2 Evaluarea securității chimice

S-a efectuat evaluarea privind siguranța chimică pentru componenta principală, în cadrul procesului de înregistrare REACH. S-a confirmat faptul, că în caz de controlare a componentei principale ca substanță primară se poate asigura controlul corespunzător și pentru celelalte componente ale amestecului. În consecință, în Anexă sunt listate scenariile de expunere elaborate pentru componenta principală. CAS-NR.: 68334-30-5

SECȚIUNEA 16. ALTE INFORMAȚII

Textul integral al frazelor de pericol H menționate la Secțiunile 2 și 3

Acute Tox.	Toxicitate acută
Aquatic Chronic	Toxicitate acvatică cronică
Asp. Tox.	Pericol de aspirare
Carc.	Carcinogenicitate
Flam. Liq.	Lichide inflamabile
Skin Irrit.	Corodarea/Iritarea pielii
STOT RE	Toxicitate asupra unui organ țintă specific - expunere repetată

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

STOT SE	Toxicitate asupra unui organ țintă specific - o singură expunere
H225	Lichid și vapori foarte inflamabili.
H226	Lichid și vapori inflamabili.
H301	Toxic în caz de înghițire.
H304	Poate fi mortal în caz de înghițire și de pătrundere în căile respiratorii.
H311	Toxic în contact cu pielea.
H315	Provoacă iritarea pielii.
H331	Toxic în caz de inhalare.
H332	Nociv în caz de inhalare.
H351	Susceptibil de a provoca cancer.
H370	Provoacă leziuni ale organelor (nerv optic (nervus opticus), sistem nervos central).
H373	Poate provoca leziuni ale organelor (timus, ficat, măduvă osoasă) în caz de expunere prelungită sau repetată.
H411	Toxic pentru viața acvatică având efecte de lungă durată.

Linia verticală (I) la capătul din stânga și/sau textul de culoare roșie indică modificarea față de versiunea principală anterioară. Aceste date sunt conforme informațiilor și experienței de care dispunem la data menționată a prelucrării fișei și se referă exclusiv la produsul care poate fi identificat cu claritate în baza codului de produs, în starea de livrare a acestuia. În cazul utilizării diferite față de cele menționate la secțiunea 1, sau dacă produsul este amestecat cu alte materiale ori este alterat în cursul procesului de producție, există posibilitatea ca declarațiile specificate în fișa cu date de securitate să nu fie valabile fără restricții sau să nu mai fie valabile deloc. Informațiile nu pot fi aplicate asupra altor produse cu denumiri identice sau similare. Această fișă nu scutește în niciun caz utilizatorul de cunoașterea și aplicarea tuturor textelor care reglementează activitatea sa. Acest produs nu trebuie utilizat pentru altă aplicație sau aplicații decât cele specificate, fără consultarea prealabilă a furnizorului. Este obligația utilizatorului să evalueze și să folosească acest produs în siguranță și conform cu toate legile și reglementările aplicabile. Puteți contacta furnizorul pentru a vă asigura că acest document este cea mai nouă versiune. Modificarea acestui document este strict interzisă.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Anexă

Scenariile de expunere pentru cele mai frecvente utilizari sunt enumerate mai jos. Dacă este necesar, se pot furniza la cerere și alte scenarii de expunere.

1. Titlu scurt al Scenariului de expunere: 01a - Distribuția substanței/materialului

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC4: Producție chimică în cadrul căreia există posibilitatea de expunere PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC9: Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire) PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC4: Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC5: Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol ERC6a: Utilizarea unui intermediar ERC6b: Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol) ERC6c: Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC6d: Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol) ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoriea Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESERC 1.1b.v1
Procese, sarcini, activități acoperite	: Încărcarea în vrac (incluzând încărcarea în nave maritime/barje, vagoane de cale ferată/autocisterne și containere intermediare de transport în vrac) și reambalarea (incluzând canistre și recipiente mici) a substanței/materialului, inclusiv eșantionarea, depozitarea, descărcarea și activitățile de laborator asociate. Nu include emisiile din timpul transportului.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

- ERC4, Utilizarea unui aditiv de prelucrare nereactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC5, Utilizare într-un spațiu industrial care conduce la includerea în sau pe un articol
ERC6a, Utilizarea unui intermediar
ERC6b, Utilizarea unui aditiv de prelucrare reactiv într-un spațiu industrial (fără includere în sau pe un articol)
ERC6c, Utilizarea unui monomer în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC6d, Utilizarea de regulatori de proces reactivi în procese de polimerizare într-un spațiu industrial (cu sau fără includere în sau pe un articol)
ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

- Tonaj pentru utilizare regională : 31 10E6 t/an
Tonaj anual la amplasament (tone/an) : 61.000
Tonaj zilnic maxim la amplasament (kg/zi) : 200.000
Frațiune de tonaj UE utilizată în regiune : 0,1
Frațiune din tonajul regional utilizat la nivel local: : 0,002
Note : Substanța este un produs UVCB complex. Preponderent hidrofoba.
MSafe (tonaj maxim permis la amplasament) : 670.000 kg/zi
Note : Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

- Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

- Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

- Factor de emisie sau de eliberare/degajare: : 0,1 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apa reziduală.

Condiții tehnice și măsuri / măsuri organizaționale

- Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 90,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de eliminare: 83,3 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de >= (%): 0 %

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de toxicitatea secundară a elementului apă dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, nu este necesară tratarea apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 94,9 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1** : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Producție chimică sau de rafinare în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC4** : Producție chimică în cadrul căreia există posibilitatea de expunere
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC9** : Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire)
- PROC15** : Utilizare ca reactiv de laborator

Caracteristici produs

Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).

Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor

Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa

Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Frecvența și durata folosirii

Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează
altfel)

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate alte măsuri specifice.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Manipulați substanța în cadrul unui sistem închis.

CS503 Încărcare și descărcare deschisă în vrac

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Manipulați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Nu au fost identificate alte măsuri specifice.

CS503 Încărcare și descărcare deschisă în vrac

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Purtați mănuși corespunzătoare testate conform EN374.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS501 Încărcare și descărcare închisă în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS503 Încărcare și descărcare deschisă în vrac

Purtați mănuși corespunzătoare testate conform EN374.

CS6 Umplere a canistrelor și a recipientelor mici

Purtați mănuși corespunzătoare testate conform EN374.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acestora

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,024

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,2

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 02 - Formularea & (re)ambalarea substanțelor/materialelor și amestecurilor

Stadiul ciclului de viață	: F: Formulare sau reambalare
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC4: Producție chimică în cadrul căreia există posibilitatea de expunere PROC5: Amestecare sau combinare în procese discontinue PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC9: Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire) PROC14: Tabletare, comprimare, extrudare, peletizare, granulare PROC15: Utilizare ca reactiv de laborator
Categorie de eliberare în mediu	: ERC2: Formulare în amestec
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVO SpERC 2.2.v1
Procese, sarcini, activități acoperite	: Formularea, ambalarea și reambalarea substanței și a amestecurilor acesteia în loturi sau prin operațiuni continue, inclusiv depozitarea, transferurile de materiale, amestecarea, tabletarea, comprimarea, peletizarea, extrudarea, ambalarea la scară mare și mică, întreținerea, eșantionarea și activitățile de laborator asociate.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC2, Formulare în amestec

Cantitatea folosită

Tonaj pentru utilizare regională	: 30 10E6 t/an
Tonaj anual la amplasament (tone/an)	: 30.000
Tonaj zilnic maxim la amplasament (kg/zi)	: 100.000
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,001
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoa.
MSafe (tonaj maxim permis la amplasament)	: 100.000 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Frecvența și durata folosirii

Expunere continuă : 300 zile de emisii (zile/an),
Degajare continuă.

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce : 10
Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 1,00 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,02 %
Apă
Factor de emisie sau de eliberare/degajare: : 0,01 %
Sol
Note : Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apa reziduală. Frație degajată din proces în aer (după măsuri tipice de management al riscurilor la amplasament în conformitate cu cerințele Directivei UE privind emisiile de solvenți)
Factorii de eliberare/degajare în apă și sol se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM)

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%): 96,7 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%): 35,1 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Preveniți descărcarea substanței nedizolvate în sau recuperați-o din apele reziduale de la amplasament. Dacă se evacuează la stația de tratare a apelor menajere uzate, este necesară tratarea suplimentară a apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 96,7 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Metode de valorificare : Valorificarea și reciclarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1 : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2 : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3 : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC4 : Producție chimică în cadrul căreia există posibilitatea de expunere
- PROC5 : Amestecare sau combinare în procese discontinue
- PROC8a : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC9 : Transferul de substanță sau amestecuri în recipiente mici (linie de umplere dedicată, inclusiv cu cântărire)
- PROC14 : Tabletare, comprimare, extrudare, peletizare, granulare
- PROC15 : Utilizare ca reactiv de laborator

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor
- Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa
- Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Frecvența și durata folosirii

- Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează altfel)

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

CS136 Procese discontinue la temperaturi ridicate

Asigurați ventilație cu extragerea aerului la punctele unde apar emisii.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate măsuri specifice.

CS15 Expuneri generale (sisteme închise).

Manipulați substanța în cadrul unui sistem închis.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate măsuri specifice.

CS14 Transferuri în vrac.

Manipulați substanța în cadrul unui sistem închis.

CS30 Operațiuni de amestecare (sisteme deschise).

Asigurați ventilație cu extragerea aerului la punctele unde apar emisii.

CS100 Producția sau prepararea articolelor prin tabletare, comprimare, extrudare sau peletizare

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Depozitați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

CS136 Procese discontinue la temperaturi ridicate

Nu au fost identificate alte măsuri specifice.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Utilizați pompe pentru canistre sau turnați cu atenție din container/recipient.

CS14 Transferuri în vrac.

Nu au fost identificate măsuri specifice.

CS30 Operațiuni de amestecare (sisteme deschise).

Nu au fost identificate alte măsuri specifice.

CS100 Producția sau prepararea articolelor prin tabletare, comprimare, extrudare sau peletizare

Nu au fost identificate alte măsuri specifice.

CS6 Umplere a canistrelor și a recipientelor mici

Nu au fost identificate alte măsuri specifice.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

CS136 Procese discontinue la temperaturi ridicate

Nu au fost identificate alte măsuri specifice.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea. Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS15 Expuneri generale (sisteme închise).

Nu au fost identificate alte măsuri specifice.

CS16 Expuneri generale (sisteme deschise).

Purtați mănuși corespunzătoare testate conform EN374.

CS2 Eșantionare a procesului

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS14 Transferuri în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS30 Operațiuni de amestecare (sisteme deschise).

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS100 Producția sau prepararea articolelor prin tabletare, comprimare, extrudare sau peletizare

Purtați mănuși corespunzătoare testate conform EN374.

CS6 Umplere a canistrelor și a recipientelor mici

Purtați mănuși corespunzătoare testate conform EN374.

CS36 Activități de laborator.

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL)/fără efect derivat (DNEL) atunci când sunt implementate măsurile de management al riscurilor (RMM)/condițiile operaționale (OC) descrise la secțiunea 2. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,027

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,91

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 12a - Utilizare drept combustibil sau carburant: Industrial

Stadiul ciclului de viață	: IS: Utilizare în spații industriale
Domeniu de utilizare	: nu se aplică
Categorie proces	: PROC1: Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente. PROC2: Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC3: Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente PROC8a: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate PROC8b: Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate PROC16: Utilizarea combustibililor
Categorie de eliberare în mediu	: ERC7: Utilizarea unui fluid funcțional într-un spațiu industrial
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVO SpERC 7.12a.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea ca și / ori în combustibil sau carburant (sau aditivi sau componente de aditivi pentru combustibil sau carburant) și include activități asociate cu transferul, utilizarea, întreținerea echipamentelor și manipularea deșeurilor acestora.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC7, Utilizarea unui fluid funcțional într-un spațiu industrial

Cantitatea folosită

Tonaj pentru utilizare regională	: 3,7 10E6 t/an
Tonaj anual la amplasament	: 1,5 10E6 t/an
Tonaj zilnic maxim la amplasament (kg/zi)	: 5 10E6
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,4
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoa.
MSafe (tonaj maxim permis la amplasament)	: 5 10E6 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 300 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
---------------------------------------	------

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Factor de diluare locală în apă de mare : 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degajare: : 0,500 %
Aer
Factor de emisie sau de eliberare/degajare: : 0,001 %
Apă
Factor de emisie sau de eliberare/degajare: : 0 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberarea/degajarea inițială, înainte de aplicarea măsurilor de management al riscurilor (RMM). Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală.

Condiții tehnice și măsuri / măsuri organizaționale

Aer : Tratați emisiile în aer pentru a asigura o eficiență tipică de îndepărtare/eliminare de: 95,0 %
apă : Tratați apele reziduale de la amplasament (înainte de evacuarea în apa receptoare) pentru a asigura eficiența necesară de îndepărtare/eliminare de \geq (%): 98,7 %
apă : Dacă se evacuează la stația de tratare a apelor menajere uzate, asigurați eficiența necesară de îndepărtare/eliminare din apele reziduale de la amplasament de \geq (%): 74,1 %
Note : Practicile obișnuite variază de la un amplasament la altul, astfel încât se utilizează estimările minime ale eliberărilor/degajărilor/emisiilor din cadrul proceselor. Riscul asociat cu expunerea mediului este cauzat de sedimentul din apa dulce. Dacă se evacuează la stația de tratare a apelor menajere uzate, este necesară tratarea suplimentară a apelor reziduale de la amplasament.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 98,7 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

PROC1 : Producție chimică sau de rafinare în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

- PROC2** : Productie chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu conditii de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor
- Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (conditii STP). < 5 hPa
- Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Frecvența și durata folosirii

- Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate alte măsuri specifice.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Manipulați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m³/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Îndepărtarea totală din apele reziduale conform măsurilor de la amplasament și din afara acestuia : 94,9 %
Tratarea nămolului : Măsuri organizaționale pentru prevenirea/limitarea degajărilor de la amplasament: A nu se aplica nămoluri industriale pe/în solurile naturale. Nămolurile trebuie incinerate, izolate sau valorificate.

Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

2.2 Scenariu de contribuție pentru controlul expunerii lucrătorului pentru:

- PROC1** : Producție chimică sau de rafinărie în proces închis fără probabilitate de expunere sau în procese cu condiții de izolare echivalente.
- PROC2** : Producție chimică sau de rafinărie în proces închis continuu cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC3** : Fabricare sau formulare în industria chimică în procese discontinue închise cu expunere ocazională controlată sau în procese cu condiții de izolare echivalente
- PROC8a** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități nespecializate
- PROC8b** : Transfer de substanțe sau amestecuri (încărcare și descărcare) în unități specializate
- PROC16** : Utilizarea combustibililor

Caracteristici produs

- Concentrația substanței în amestec/articol : Acoperă procentul de substanță în produs de până la 100% (cu excepția cazului în care se menționează altfel).
- Formă fizică (în momentul folosirii) : Lichid, cu potențial de generare a aerosolilor
- Presiune de vapori : Presiunea vaporilor este dată la temperatură și presiune standard (condiții STP). < 5 hPa
- Note : Presupune implementarea unui standard de bază adecvat privind igiena profesională., Presupune utilizarea la nu mai mult de 20°C peste temperatura ambiantă, dacă nu este menționat altfel.

Frecvența și durata folosirii

- Acoperă expunerile zilnice de până la 8 ore : 8 o
(cu excepția cazului în care se menționează altfel)

Condiții tehnice și măsuri

CS135 Măsuri generale aplicabile tuturor activităților

Controlați orice potențială expunere folosind măsuri precum sisteme izolate sau închise, unități proiectate și întreținute corespunzător și un standard adecvat de ventilație generală. Goliți sistemele și liniile de transfer înainte de a afecta etanșeitatea. Goliți și spălați echipamentele, acolo unde este posibil, înainte de efectuarea lucrărilor de întreținere.

G19 Măsuri generale (substanțe iritante pentru piele)

Nu au fost identificate alte măsuri specifice.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Utilizați pompe pentru canistre sau turnați cu atenție din container.

CS507 Activități de realimentare cu combustibil/carburant

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Asigurați un standard adecvat de ventilație generală (nu mai puțin de 3 - 5 schimburi de aer pe oră) sau Asigurați-vă că operațiunea este efectuată în spațiul exterior (în aer liber).

CS39 Curățare și întreținere echipamente.

Goliți sistemul înainte de deschiderea sau întreținerea echipamentelor.

CS67 Depozitare.

Depozitați substanța în cadrul unui sistem închis.

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Măsuri organizaționale pentru prevenirea/limitarea eliminării, dispersiei și expunerii:

CS135 Măsuri generale aplicabile tuturor activităților

Acolo unde există potențial de expunere: Asigurați-vă că personalul relevant este informat cu privire la potențialul expunerii și cunoaște acțiunile de bază pentru reducerea la minimum a expunerilor; monitorizați eficacitatea măsurilor de control; asigurați examinări medicale regulate, după cum este necesar; identificați și implementați acțiuni corective.

G19 Măsuri generale (substanțe iritante pentru piele)

Asigurați instruirea de bază a angajaților astfel încât să prevină / minimizeze expunerile și să raporteze orice efecte asupra pielii care ar putea să se producă.

CS14 Transferuri în vrac.

Nu au fost identificate alte măsuri specifice.

CS8 Transferuri în canistre/în loturi

Nu au fost identificate alte măsuri specifice.

CS507 Activități de realimentare cu combustibil/carburant

Nu au fost identificate alte măsuri specifice.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Nu au fost identificate alte măsuri specifice.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

Condiții și măsuri legate de protecție personală, igienă și evaluarea stării de sănătate

CS135 Măsuri generale aplicabile tuturor activităților

Când există posibilitatea de expunere: asigurați-vă că este disponibil echipament de protecție adecvat, curățați scurgerile de produs și eliminați deșeurile în conformitate cu cerințele legale.

G19 Măsuri generale (substanțe iritante pentru piele)

Evitați contactul direct al pielii cu produsul. Identificați suprafețele potențiale de contact indirect cu pielea. Purtați mănuși (testate conform EN374) dacă este posibil un contact al mâinilor cu substanța/materialul. Curățați contaminarea/substanțele/materialele scurse/vărsate de îndată ce acestea apar. Îndepărtați imediat prin spălare contaminarea pielii.

CS14 Transferuri în vrac.

Purtați mănuși corespunzătoare testate conform EN374.

CS8 Transferuri în canistre/în loturi

Purtați mănuși corespunzătoare testate conform EN374.

CS507 Activități de realimentare cu combustibil/carburant

Purtați mănuși corespunzătoare testate conform EN374.

GEST_12I Utilizare drept combustibil/carburant, CS107 (sisteme închise)

Nu au fost identificate alte măsuri specifice.

CS39 Curățare și întreținere echipamente.

Purtați mănuși rezistente la produse chimice (testate conform EN374) și efectuați instruirea la nivel de bază a angajatului.

CS67 Depozitare.

Nu au fost identificate alte măsuri specifice.

3. Estimarea expunerii și referința la sursa acesteia

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru estimarea expunerii la locul de muncă, cu excepția cazului în care se indică altfel.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

4.1. Sănătate:

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL) / fără efect derivat (DNEL) atunci când sunt implementate Măsurile de Management al Riscului (RMM)/Condițiile Operaționale (OC) descrise la Secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente. Datele disponibile referitoare la pericole nu permit derivarea unui nivel DNEL pentru efectele iritante asupra pielii. Datele disponibile referitoare la pericole nu justifică necesitatea stabilirii unui nivel DNEL pentru alte efecte asupra sănătății. Măsurile de management al riscurilor se bazează pe caracterizarea calitativă a riscurilor.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului. Eficiența necesară de evacuare pentru apele reziduale poate fi atinsă cu ajutorul tehnologiilor de la amplasament/din afara amplasamentului, fie separat, fie în combinație. Eficiența de eliminare necesară pentru aer poate fi realizată folosind tehnologiile de la amplasament, în mod separat sau în combinație. Detalii suplimentare privind tehnologiile de scalare și control sunt furnizate în fișa de date SpERC (<http://cefic.org/en/reach-for-industries-libraries.html>).

Rata maximă de caracterizare a riscului pentru emisiile de aer RCRair

0,024

Rata maximă de caracterizare a riscurilor pentru emisiile de ape reziduale RCRwater

0,077

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

1. Titlu scurt al Scenariului de expunere: 12c - Utilizare drept combustibil sau carburant - Consumatori

Stadiul ciclului de viață	: C: Utilizare de către consumatori
Domeniu de utilizare	: nu se aplică
Categorie produs	: PC13: Combustibili/carburanți
Categorie de eliberare în mediu	: ERC9a: Utilizare larg răspândită a unui fluid funcțional (la interior) ERC9b: Utilizare larg răspândită a unui fluid funcțional (la exterior)
Alte informații	: Categoria Eliberări specifice în mediu (Special Environmental Release Category, SpERC) ESVOC SpERC 9.12c.v1
Procese, sarcini, activități acoperite	: Acoperă utilizarea de către consumatori a combustibililor/carburanților.

2.1 Scenariu de contribuție pentru controlul expunerii ambientale pentru:

ERC9a, Utilizare larg răspândită a unui fluid funcțional (la interior)

ERC9b, Utilizare larg răspândită a unui fluid funcțional (la exterior)

Caracteristici produs

Cantitatea folosită

Tonaj pentru utilizare regională	: 19 10E6 t/an
Tonaj anual la amplasament (tone/an)	: 9.500
Tonaj zilnic maxim la amplasament (kg/zi)	: 26.000
Fracțiune de tonaj UE utilizată în regiune	: 0,1
Fracțiune din tonajul regional utilizat la nivel local:	: 0,0005
Note	: Substanța este un produs UVCB complex. Preponderent hidrofoba.
MSafe (tonaj maxim permis la amplasament)	: 180.000 kg/zi
Note	: Tonaj maxim permis la amplasament (MSafe) pe baza degajării în urma îndepărtării totale prin tratarea apelor reziduale

Frecvența și durata folosirii

Expunere continuă	: 365 zile de emisii (zile/an), Degajare continuă.
-------------------	---

Factori de mediu neinfluențați de managementul riscurilor

Factor de diluare locală în apă dulce	: 10
Factor de diluare locală în apă de mare	: 100

Alte condiții de operare date care afectează expunerea mediului

Factor de emisie sau de eliberare/degașare:	: 0,1 %
Aer	
Factor de emisie sau de eliberare/degașare:	: 0,001 %
Apă	

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Factor de emisie sau de eliberare/degajare: : 0,001 %
Sol
Note : Toți factorii de eliberare/degajare se referă la eliberare/degajare din proces de utilizare cu dispersie largă. Factorii de eliberare/degajare pentru aer și sol se referă exclusiv la utilizarea regională. Eliberarea/degajarea în apă înseamnă eliberarea/degajarea în apă reziduală.

Condiții și măsuri asociate stației de tratare a apelor urbane reziduale.

Tipul stației de tratare a apelor reziduale : Stație de tratare a apelor menajere uzate
Debitul efluentului în stația de tratare a apelor reziduale : 2.000 m3/d
Eficiență (Stație de tratare a apelor reziduale) : 94,9 %
Note : Condiții și măsuri asociate stației de tratare a apelor urbane reziduale: Nu se aplică deoarece nu are loc degajare în apele reziduale.

Condiții și măsuri aferente tratării externe a deșeurilor în vederea eliminării

Tratarea deșeurilor : Emisiile rezultate din ardere sunt limitate prin măsuri obligatorii de control al emisiilor de evacuare. Emisiile rezultate din ardere sunt avute în vedere în cadrul evaluării regionale a impactului. Tratarea și eliminarea externă a deșeurilor trebuie să respecte reglementările locale și/sau naționale în vigoare.

Condiții și măsuri aferente valorificării externe a deșeurilor

Metode de valorificare : Această substanță este consumată în timpul utilizării și nu sunt generate deșeuri ale acesteia.

2.2 Scenariu de contribuție pentru controlul expunerii consumatorului pentru:

PC13 : Combustibili/carburanți

Caracteristici produs

Concentrația substanței în amestec/articol : Dacă nu este menționat altfel, se referă la concentrații de până la 100%
Formă fizică (în momentul folosirii) : Lichid
Presiune de vapori : Presiune de vapori > 0,1 hPa
Note : Dacă nu se specifică altfel, acoperă cantitățile de utilizare de până la 37500 g [ConsOC2]; acoperă suprafața de contact cu pielea de până la 420 cm2 [ConsOC5]
Dacă nu este menționat altfel, se referă la frecvența de utilizare de până la 0,143 ori/zi (ConsOC4); Se referă la expunerea de până la 2 ore/caz (ConsOC14); Dacă nu este menționat altfel, presupune utilizarea la temperatura ambiantă. Presupune utilizarea într-o cameră de 20 m3. Presupune utilizarea cu ventilație obișnuită.

Alte condiții de exploatare date care afectează expunerea consumatorilor

Activitatea (în aer liber/în spații interioare) : PC13:Carburanți--Lichid - subcategorii adăugate: Alimentare cu carburanți a autovehiculelor
Volum încăpere : 100 m3
Note : Dacă nu este menționat altfel, se referă la concentrații până la 100%. Se referă la utilizarea de până la 52 zile/an. Se referă la utilizarea de până la o dată/zi de utilizare. Se referă la suprafețe de contact cu pielea de până la 210 cm2. Pentru fiecare caz de utilizare, se referă la cantități utilizate de până la 37500 g. Se referă la utilizarea în aer liber. Acoperă utilizarea într-o încăpere cu dimensiunea de 100m3; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,05 ore/caz.
Activitatea (în aer liber/în spații interioare) : PC13:Combustibili--Lichid -: combustibil pentru încălzirea locuințelor
Volum încăpere : 100 m3

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 120 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Se referă la suprafețe de contact cu pielea de până la 210.00 cm2., Pentru fiecare caz de utilizare, se referă la cantități utilizate de până la 1500 g., Acoperă utilizarea în condiții de ventilație casnică tipică., Acoperă utilizarea într-o încăpere cu dimensiunea de 20m3; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,03 ore/caz.
Activitatea (în aer liber/în spații interioare)	:	PC13:Carburanți--Lichid - subcategorii adăugate: Echipament pentru grădină - Utilizare
Volum încăpere	:	100 m3
Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 26 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Pentru fiecare caz de utilizare, se referă la cantități utilizate până la 750 g., Se referă la utilizarea în aer liber., Acoperă utilizarea într-o încăpere cu dimensiunea de 100m3; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 2 ore/caz.
Activitatea (în aer liber/în spații interioare)	:	PC13:Carburanți--Lichid (subcategorii adăugate): Echipament pentru grădină - Alimentare cu carburanți
Volum încăpere	:	34 m3
Note	:	Dacă nu este menționat altfel, se referă la concentrații până la 100%., Se referă la utilizarea de până la 26 zile/an., Se referă la utilizarea de până la o dată/zi de utilizare., Se referă la suprafețe de contact cu pielea de până la 420 cm2., Pentru fiecare caz de utilizare, se referă la cantități utilizate până la 750 g., Se referă la utilizarea într-un garaj pentru o singură mașină (34 m3) cu folosirea ventilației obișnuite., Acoperă utilizarea într-o încăpere cu dimensiunea de 34m3; , Pentru fiecare caz de utilizare, se referă la expunerea de până la 0,03 ore/caz.

Condiții și măsuri legate de protecția consumatorului (ex. sfaturi de comportament, protecție personală și igienă)

Mod de aplicare	:	PC13:Carburanți--Lichid - subcategorii adăugate: Alimentare cu carburanți a autovehiculelor
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Combustibili--Lichid -: combustibil pentru încălzirea locuințelor
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Carburanți--Lichid - subcategorii adăugate: Echipament pentru grădină - Utilizare
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite
Mod de aplicare	:	PC13:Carburanți--Lichid (subcategorii adăugate): Echipament pentru grădină - Alimentare cu carburanți
Note	:	Nu sunt identificate măsuri specifice de management al riscurilor (RMM) în afara acelor condiții operaționale (OC) stabilite

3. Estimarea expunerii și referința la sursa acestora

3.1. Sănătate:

Instrumentul ECETOC TRA a fost utilizat pentru a estima expunerile consumatorilor, în conformitate cu conținutul raportului ECETOC nr. 107 și cu Capitolul R15 din IR&CSA TGD. În situațiile în care determinanții expunerii diferă de aceste surse, atunci aceștia sunt indicați.

3.2. Mediu înconjurător:

Metoda Blocurilor de Hidrocarburi (HBM) a fost folosită pentru calcularea expunerii mediului înconjurător conform modelului Petrorisk.

4. Ghid pentru utilizatorul din aval în vederea evaluării faptului, dacă lucrează în interiorul limitelor stabilite prin scenariul de expunere

Fișă cu Date de Securitate conform Regulamentului (CE) nr.1907/2006

Motorina Standard
Nr. produs 450000

Data emiterii: 01.10.1991
Data revizuirii: 05.03.2018

4.1. Sănătate:

Nu se preconizează că expunerile prognozate vor depăși nivelul cu efect minim (DMEL) / fără efect derivat (DNEL) atunci când sunt implementate Măsurile de Management al Riscului (RMM)/Condițiile Operaționale (OC) descrise la Secțiunea 2. În cazul în care sunt adoptate alte măsuri de management al riscurilor/condiții operaționale, utilizatorii trebuie să se asigure că riscurile sunt gestionate la niveluri cel puțin echivalente.

4.2. Mediu înconjurător:

Recomandările se bazează pe condițiile de operare presupuse care pot să nu fie aplicabile tuturor amplasamentelor; astfel, poate fi necesară scalarea pentru a determina măsurile adecvate de management al riscurilor specifice amplasamentului.

SECȚIUNEA 2: Identificarea pericolelor

2.1 Clasificarea substanței sau a amestecului

Clasificare conform Regulamentului (CE) nr. 1272/2008 (CLP)

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

<i>Clasa de pericol</i>	<i>Clasa și categoria de pericol</i>	<i>Categorie</i>	<i>Fraza de pericol</i>
corodarea/iritarea pielii	Skin Corr. 1C	1C	H314
lezarea gravă a ochilor/iritarea ochilor	Eye Dam. 1	1	H318
sensibilizarea pielii	Skin Sens. 1A	1A	H317
periculos pentru mediul acvatic - pericol acut	Aquatic Acute 1	1	H400
periculos pentru mediul acvatic - pericol cronic	Aquatic Chronic 1	1	H410

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

Cele mai importante efecte adverse fizico-chimice, asupra sănătății umane și asupra mediului

Corodarea pielii produce leziunea ireversibilă a pielii; anume, necroza vizibilă trecând de epidermă și ajungând până la dermă. Vărsarea și apa de stingere a incendiului pot cauza poluarea cursurilor de apă.

2.2 Elemente pentru etichetă

Etichetarea în conformitate cu Regulamentul (CE) nr. 1272/2008 (CLP)

Cuvânt de avertizare pericol

Pictograme

GHS05, GHS07,
GHS09

Frazele de pericol

H314 Provoacă arsuri grave ale pielii și lezarea ochilor.
H317 Poate provoca o reacție alergică a pielii.
H410 Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Frazele de precauție

P261 Evitați să inspirați ceața/vaporii/spray-ul.
P273 Evitați dispersarea în mediu.
P280 A se purta mănuși de protecție/îmbrăcăminte de protecție/echipament de protecție a ochilor/echipament de protecție a feței/protecție a auzului/....
P301+P330+P331 ÎN CAZ DE ÎNGHIȚIRE: clătiți gura. NU provocați vomă.
P303+P361+P353 ÎN CAZ DE CONTACT CU PIELEA (sau cu părul): Scoateți imediat toată îmbrăcăminte contaminată. Clătiți pielea cu apă [sau faceți duș].
P304+P340 ÎN CAZ DE INHALARE: transportați persoana la aer liber și mențineți-o într-o poziție confortabilă pentru respirație.
P305+P351+P338 ÎN CAZ DE CONTACT CU OCHII: Clătiți cu atenție cu apă timp de mai multe minute. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți.
P310 Sunați imediat la un CENTRU DE INFORMARE TOXICOLOGICĂ/un medic.
P501 Aruncați conținutul/recipientul în conformitate cu reglementările locale/regionale/naționale/internaționale.

Informații suplimentare privind pericolele

EUH071 Corosiv pentru căile respiratorii.

Pentru textul complet al abrevierilor: a se vedea SECȚIUNEA 16.

SECȚIUNEA 4: Măsurile de prim ajutor

4.1 Descrierea măsurilor de prim ajutor

Observații generale

Nu lăsați persoana afectată nesupravegheată. Evacuați victima din zona de pericol. Mențineți persoana afectată la căldură, nemișcată și acoperită. Scoateți imediat toată îmbrăcămintea contaminată. În caz de pierdere a cunoștinței, așezați persoana în poziție laterală stabilă. Nu-i administrați niciodată ceva pe gură.

După inhalare

În caz de iritare a tractului respirator, consultați un medic.

După contactul cu pielea

Scoateți îmbrăcămintea contaminată. După contactul cu pielea, scoateți imediat toată îmbrăcămintea contaminată și spălați imediat cu multă apă. Sunați imediat la un medic.

După contactul cu ochii

Clătiți din abundență cu apă proaspătă și curată, timp de cel puțin 10 minute, ținând pleoapele depărtate. Scoateți lentilele de contact, dacă este cazul și dacă acest lucru se poate face cu ușurință. Continuați să clătiți. Sunați un medic imediat.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

După ingerare

Se clătește gura cu apă (numai dacă persoana este conștientă). NU provocați vomă. Sunați imediat la un medic.

4.2 Cele mai importante simptome și efecte, atât acute, cât și întârziate

Provoacă arsuri grave ale pielii și lezarea ochilor. Ingestion causes pain, burns, abdominal pain, possible general impact (shock).

4.3 Indicații privind orice fel de asistență medicală imediată și tratamentele speciale necesare

No specific antidot is known. Treatment of the symptoms.

SECȚIUNEA 5: Măsurile de combatere a incendiilor

5.1 Mijloace de stingere a incendiilor

Mijloace de stingere corespunzătoare

Pulverizare de apă, Spumă rezistentă la alcool, Praf de extingtor, Dioxid de carbon (CO₂)

Mijloace de stingere necorespunzătoare

Jet continuu de apă

5.2 Pericole speciale cauzate de substanța sau amestecul în cauză

Produși de combustie periculoși

Oxizi de azot (NO_x), Monoxid de carbon (CO), Dioxid de carbon (CO₂), Oxizi de sulf (SO_x)

5.3 Recomandări destinate pompierilor

Mențineți containerele reci prin pulverizarea de apă. A nu se inspira fumul în caz de incendiu și/sau explozie. Nu lăsați apa folosită la stingerea incendiului să pătrundă în canalizări sau în cursurile de apă. Colectați separat apa contaminată folosită la stingerea incendiilor. Stingeți incendiul de la o distanță rezonabilă, luând măsuri normale de precauție.

Echipamentul de protecție special destinat pompierilor

Echipament de protecție chimică, Folosiți aparate de protecție respiratorie adecvate

SECȚIUNEA 6: Măsurile de luat în caz de dispersie accidentală

6.1 Precauții personale, echipament de protecție și proceduri de urgență

Pentru personalul care nu este implicat în situații de urgență

Evacuați persoana într-un loc sigur.

Pentru personalul care intervine în situații de urgență

Purtați aparat de respirat dacă sunteți expus la vapori/praf/spray/gaze. Utilizați echipamentul de protecție individuală conform cerințelor.

6.2 Precauții pentru mediul înconjurător

Păstrați la distanță față de canalele de scurgere și apele de suprafață sau subterane. Rețineți apa de spălare contaminată și eliminați-o. Chemicals generally shouldn't reach surface water.

6.3 Metode și material pentru izolarea incendiilor și pentru curățenie

Sfaturi privind modul de izolare a unei cantități vărsate

Acoperirea canalelor de evacuare

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Sfaturi privind modul de curățare a unei cantități vărsate

Ștergeți cu material absorbant (de ex. cârpă, fleece). Colectați scurgerile de produs: Material absorbant (de exemplu, nisip, diatomit, liant acid, liant universal, rumeguș etc.)

Tehnica adecvată de izolare

Utilizarea materialelor absorbante.

Alte informații referitoare la vărsări și dispersii

Puneți în containere adecvate pentru eliminare. Ventilați zona afectată.

6.4 Trimitere la alte secțiuni

Secțiunea 7: Manipularea și depozitarea. A se vedea și secțiunile 8 și 13 din fișa cu date de securitate.

SECȚIUNEA 7: Manipularea și depozitarea

7.1 Precauții pentru manipularea în condiții de securitate

Recomandări

Măsurile de prevenire a incendiilor, precum și a generării de aerosoli și praf

Nu sunt necesare măsuri speciale.

Sfaturi privind igiena generală la locul de muncă

Spălați mâinile după utilizare. Nu mâncați, beți sau fumați în zonele de lucru. Îndepărtați îmbrăcămintea contaminată și echipamentul de protecție înainte de a pătrunde în zonele în care se ia masa. Nu țineți niciodată mâncarea sau băutura în apropiere de produsele chimice. Nu puneți niciodată produsele chimice în recipiente care sunt folosite în mod obișnuit pentru mâncare sau băutură. A se păstra departe de hrană, băuturi și hrană pentru animale.

7.2 Condiții de depozitare în condiții de securitate, inclusiv eventuale incompatibilități

Proiectarea specială a spațiilor de depozitare sau a rezervoarelor

Păstrați ambalajul închis ermetic și într-un loc bine ventilat.

Temperatura de depozitare

Temperatura de depozitare recomandată: <40 °C.

Compatibilitățile privind ambalarea

Păstrați numai în recipientul original. Pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR).

7.3 Utilizare finală specifică (utilizări finale specifice)

Biocid. Produse chimice de tratare a apei. Agent de condiționare.

SECȚIUNEA 8: Controale ale expunerii/protecția personală

8.1 Parametri de control

Valorile limită naționale

Valori limită de expunere profesională (Limite de expunere la locul de muncă)

nu este relevant

8.2 Controale ale expunerii

Controale tehnice corespunzătoare

Ventilație generală.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Măsuri de protecție individuală (echipamentul de protecție personală)

Trebuie să existe garanții, ca instalațiile de clătire a ochilor și dușurile de siguranță să se afle aproape de locul de muncă.

Protecția ochilor/feței

A se purta mască de protecție a ochilor/feței.

Protecția pielii

Chemical resistant protective clothing.

Protecția mâinilor

A se purta mănuși corespunzătoare. Mănușile de protecție chimică adecvate sunt testate conform EN 374. Verificați etanșeitatea/impermeabilitatea înainte de utilizare. În scopuri speciale, se recomandă să verificați rezistența la produse chimice a mănușilor de protecție menționate mai sus, împreună cu furnizorul acestor mănuși. In case of spray contact at least protection index 2 recommended, according to more than 30 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.4 mm

In case of prolonged and intensive contact protection index 6 recommended, according to more than 480 min. penetration time (EN 374).

Layer thickness of gloves at least: 0.7 mm.

Tipul de material

PVC: policlorură de vinil, PE: polietilenă, CR: cauciuc cloroprenic (clorobutadienic), NBR: cauciuc acrilonitrilbutadienic, IIR: cauciuc izobuten-izoprenic (butilcauciuc), FKM: elastomer cu fluor

Timpul de perforare a materialului din care sunt fabricate mănușile

Momentul de cedare și însușirile de origine ale materialului trebuie luate în considerare

Alte măsuri de protecție

Spălați-vă mâini bine după utilizare.

Protecția respirației

În cazul în care ventilarea este insuficientă, purtați echipament de protecție respiratorie.

Controlul expunerii mediului

Considerații privind eliminarea: a se vedea secțiunea 13.

SECȚIUNEA 9: Proprietățile fizice și chimice

9.1 Informații privind proprietățile fizice și chimice de bază

Aspect

Starea fizică	lichid
Culoarea	galben - verde - albastru deschis
Miros	fara miros
Pragul de acceptare a mirosului	nu este aplicabilă

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Alți parametri de securitate

pH (valoare)	ca. 4 – 6 (in aqueous solution: 10 ⁹ /l)
Punctul de topire/punctul de înghețare	ca. -5 °C
Punctul inițial de fierbere și intervalul de fierbere	ca. 102 °C
Punctul de aprindere	>101 °C
Viteza de evaporare	nedeterminat
Inflamabilitatea (solid, gaz)	nu este relevant (fluid)
Limita superioară/inferioară de inflamabilitate sau de explozie	nedeterminat
Presiunea de vapori	nedeterminat
Densitatea vaporilor	aceste informații nu sunt disponibile
Densitatea	ca. 1,04 g/cm ³ la 20 °C

Solubilitatea (solubilitățile)

Solubilitatea în apă	miscibil în orice proporție
-----------------------------	-----------------------------

Coeficientul de partiție

- n-octanol/apă (log KOW)	aceste informații nu sunt disponibile
Temperatura de autoaprindere	>600 °C
Temperatura de descompunere	nu există date disponibile

Vâscozitatea

Vâscozitatea cinematică	4,5 mm ² /s
Vâscozitatea dinamică	4,6 mPa s la 20 °C
Proprietăți explozive	nici una/nici unul
Proprietăți oxidante	nici una/nici unul

9.2 Alte informații

Nu există informații suplimentare.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

SECȚIUNEA 10: Stabilitate și reactivitate

10.1 Reactivitate

Acest material nu este reactiv în condiții normale de mediu ambiant.

10.2 Stabilitate chimică

Materialul este stabil în condiții ambientale normale, precum și în condițiile de temperatură și presiune în care se anticipează că vor avea loc depozitarea și manipularea.

10.3 Posibilitatea de reacții periculoase

Nu se cunosc reacții periculoase.

10.4 Condiții de evitat

Nu există condiții specifice cunoscute care trebuie evitate.

10.5 Materiale incompatibile

Nu există informații suplimentare.

10.6 Produși de descompunere periculoși

Produșii de descompunere periculoși anticipați în mod rezonabil care sunt produși în urma utilizării, depozitării, vărsării și încălzirii nu sunt cunoscuți. Produși de combustie periculoși: a se vedea secțiunea 5.

SECȚIUNEA 11: Informații toxicologice

11.1 Informații privind efectele toxicologice

Nu sunt disponibile date de testare pentru întregul amestec.

Procedura de clasificare

Metoda pentru clasificarea amestecului se bazează pe ingredientele amestecului (formula de aditivitate).

Toxicitate acută

Nu se clasifică ca fiind toxic(ă) acut(ă).

Product ATEmix oral : >2000 mg/kg
Product ATEmix dermal : >2000 mg/kg

Toxicitatea acută a componentilor amestecului

Denumirea substanței	Nr. CAS	Calea de expunere	Efect	Valoare	Specii
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	orală	LD50	64 ^{mg} /kg	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	prin inhalare: praf/ceață	LC50	0,33 ^{mg} /l/4h	șobolan
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	dermică	LD50	87,12 ^{mg} /kg	iepure

Corodarea/iritarea pielii

Provoacă arsuri grave ale pielii și lezarea ochilor.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

Lezarea gravă a ochilor/iritarea ochilor

Provoacă leziuni oculare grave.

Sensibilizarea căilor respiratorii sau a pielii

Poate provoca o reacție alergică a pielii.

Mutagenicitatea celulelor embrionare

Nu sunt disponibile date de testare pentru întregul amestec.

Cancerigenitate

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitatea pentru reproducere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - o singură expunere

Nu sunt disponibile date de testare pentru întregul amestec.

Toxicitate asupra unui organ țintă specific - expunere repetată

Nu sunt disponibile date de testare pentru întregul amestec.

Pericol prin aspirare

Nu se clasifică ca prezentând pericol prin aspirare.

Alte informații

Corosiv pentru căile respiratorii.

SECȚIUNEA 12: Informații ecologice

12.1 Toxicitatea

Foarte toxic pentru mediul acvatic cu efecte pe termen lung.

Toxicitate acvatică (acută) a componentelor amestecului					
<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Efect</i>	<i>Durata de expunere</i>	<i>Valoare</i>	<i>Specii</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	LC50	96 h	0,19 mg/l	pește
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	EC50	48 h	0,16 mg/l	nevertebrate acvatice
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	ErC50	72 h	19,9 µg/l	alge

Revizuire: 31.03.2021

Toxicitate acvatică (cronică) a componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Efect</i>	<i>Valoare</i>	<i>Specii</i>	<i>Durata de expunere</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	LC50	0,07 mg/l	pește	14 d
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	EC50	>0,18 mg/l	nevertebrate acvatice	21 d
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	ErC50	45,6 µg/l	alge	120 h

12.2 Persistența și degradabilitatea

Nu este ușor biodegradabil(ă).

Degradabilitatea componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>Proces</i>	<i>Rata de degradare</i>	<i>Timp</i>	<i>Metoda</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	generare de dioxid de carbon	>60 %	29 d	

12.3 Potențialul de bioacumulare

A worth-mentioning accumulation in organisms is not expected.

Potențial de bioacumulare a componentelor amestecului

<i>Denumirea substanței</i>	<i>Nr. CAS</i>	<i>BCF</i>	<i>Log KOW</i>	<i>BOD5/COD</i>
masă de reacție compusă din 5-cloro-2-metil-2H-izotiazol-3-onă și 2-metil-2H-izotiazol-3-onă (3:1)	55965-84-9	54	≥-0,34 – ≤0,63 (pH valoare: 7, 10 °C)	

12.4 Mobilitatea în sol

Nu sunt disponibile date.

12.5 Rezultatele evaluării PBT și vPvB

Nu este aplicabilă.

Ferrocid 8583

număr articol: 48202

Numărul versiunii: Vers. 8.0
Înlocuiește versiunea din: 21.01.2021 (Vers. 7)

Revizuire: 31.03.2021

12.6 Alte efecte adverse

Potențialul de a afecta sistemul endocrin

Niciun ingredient nu figurează pe listă.

Observații

A nu se arunca în rețeaua de canalizare sau în apa de suprafață.

SECȚIUNEA 13: Considerații privind eliminarea

13.1 Metode de tratare a deșeurilor

Acest produs și ambalajul său se vor depozita ca un deșeu periculos. Alocarea de numere de identificare/marcaje pentru reziduuri trebuie să se efectueze corespunzător OID, specific procesului și branșei. Eliminarea deșeurilor de produs se va face conform legii 211/2011 privind regimul deșeurilor. ¶ Eliminarea deșeurilor de ambalaje se face cf. HG 621/2005 privind gestionarea ambalajelor și deșeurilor de ambalaje; HG 856/2002- evidența gestiunii deșeurilor și aprobarea listei deșeurilor. Legea 249/2015 privind modalitatea de gestionare a ambalajelor și a deșeurilor de ambalaje.

Informații relevante pentru tratarea deșeurilor

Este un deșeu periculos; pot fi utilizate exclusiv ambalajele omologate (de ex. conf. ADR). Ambalajele golite complet pot fi reciclate. Manipulați ambalajele contaminate în același mod ca și substanța respectivă.

Observații

Vă rugăm să luați în considerare dispozițiile naționale sau regionale relevante. Deșeurile vor fi selectate pe categorii care pot fi tratate separat de către facilitățile de gestionare a deșeurilor de la nivel local sau național. A nu se arunca în rețeaua de canalizare sau în apa de suprafață. Evitați dispersarea în mediu.

SECȚIUNEA 14: Informații referitoare la transport

14.1 Numărul ONU	3265
14.2 Denumirea corectă ONU pentru expediție	LICHID ORGANIC COROSIV, ACID, N.S.A.

Legendă

R3

- Nu se utilizează în:
 - articole decorative destinate producerii unor efecte de lumină sau de culoare prin intermediul unor faze diferite, de exemplu, în lămpi decorative și în scrumiere;
 - obiecte destinate producerii de farse și capcane;
 - jocuri pentru unul sau mai mulți participanți sau orice alt articol destinat unei folosințe similare, chiar și cu aspecte decorative.
- Este interzisă introducerea pe piață a articolelor care nu se conformează punctului 1.
- Nu se introduc pe piață dacă conțin colorant, cu excepția cazului în care este necesar din motive fiscale, sau parfum ori ambele, dacă:
 - pot fi utilizate drept combustibili în lămpi decorative cu ulei pentru a fi furnizate publicului larg; și
 - prezintă un pericol în caz de inhalare și sunt etichetate cu R65 sau H304.
- Lămpile decorative cu ulei destinate publicului larg nu sunt introduse pe piață decât dacă sunt conforme standardului european privind lămpile decorative cu ulei (EN 14059), adoptat de Comitetul European de Standardizare (CEN).
- Fără a aduce atingere punerii în aplicare a altor dispoziții comunitare referitoare la clasificarea, ambalarea și etichetarea substanțelor și a amestecurilor periculoase, furnizorii se asigură, înainte de introducerea pe piață, că sunt respectate următoarele cerințe:
 - uleiurile lampante, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate vizibil, lizibil și de neșters după cum urmează: „A nu se lăsa la îndemâna copiilor lămpi umplute cu acest lichid” și, începând cu 1 decembrie 2010, „Doar o înghițitură de ulei lampant – sau chiar suptul fitilului lămpilor – poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt marcate, începând cu 1 decembrie 2010, lizibil și de neșters, după cum urmează: „O singură înghițitură din acest lichid poate cauza leziuni pulmonare care constituie o amenințare la adresa vieții”;
 - uleiurile lampante și lichidele de aprins focul pentru barbecue, etichetate cu R65 sau H304, destinate publicului larg, sunt îmbuteliate, începând cu 1 decembrie 2010, în recipiente negre opace care nu depășesc 1 litru.
- Până la 1 iunie 2014 cel târziu, Comisia solicită Agenției Europene pentru Produse Chimice să pregătească un dosar, în conformitate cu articolul 69 din prezentul regulament, în scopul de a interzice, dacă este cazul, lichidele de aprins focul pentru barbecue și combustibilii pentru lămpile decorative, etichetați R65 sau H304, destinați publicului larg.
- Persoanele fizice sau juridice care introduc pe piață pentru prima oară uleiuri lampante și lichide de aprins focul pentru barbecue, etichetate cu R65 sau H304, furnizează autorității competente din statul membru în cauză, până la 1 decembrie 2011 și apoi anual, date privind soluții alternative pentru uleiul lampant și lichidele de aprins focul pentru barbecue etichetate R65 sau H304. Statele membre pun datele respective la dispoziția Comisiei.

Lista substanțelor care fac obiectul autorizării (REACH, Anexa XIV) / SVHC - lista substanțelor candidate

niciun ingredient nu figurează pe listă

Directiva Seveso

2012/18/UE (Seveso III)

Nr.	Substanță periculoasă/categorii de pericol	Cantități relevante (tone) ale substanțelor pentru încadrarea amplasamentelor de nivel inferior și de nivel superior	Note
E1	pericole pentru mediu (periculoase pentru mediul acvatic, cat. 1)	100 200	56)

Observație

56) periculoase pentru mediul acvatic în categoria acut 1 sau cronic 1

Abrevieri si acronime

Abr.	Descrieri ale abrevierilor utilizate
Acute Tox.	Toxicitate acută
ADN	Accord européen relatif au transport international des marchandises dangereuses par voies de navigation intérieures (Acordul european privind transportul internațional al mărfurilor periculoase pe căile navigabile interioare)
ADR	Accord européen relatif au transport international des marchandises dangereuses par route (Acordul european referitor la transportul rutier internațional al mărfurilor periculoase)
Aquatic Acute	Periculos pentru mediul acvatic - pericol acut
Aquatic Chronic	Periculos pentru mediul acvatic - pericol cronic
BCF	Bioconcentration factor (factor de bioconcentrare)
BOD	Consumul biochimic de oxigen
CAS	Chemical Abstracts Service (departament care deține cea mai cuprinzătoare listă a substanțelor chimice)
CLP	Regulamentul (CE) Nr. 1272/2008 privind clasificarea, etichetarea și ambalarea substanțelor și a amestecurilor
COD	Consumul chimic de oxigen
DGR	Reglementări privind Mărfurile Periculoase (a se vedea IATA/DGR)
EC50	Concentrația Efectivă 50%. CE50 corespunde concentrației unei substanțe testate care produce schimbări de 50% în efect (de ex., asupra creșterii) într-un interval de timp specificat
EINECS	European Inventory of Existing Commercial Chemical Substances (Inventarul european al substanțelor chimice existente introduse pe piață)
ELINCS	European List of Notified Chemical Substances (Lista europeană a substanțelor chimice notificate)
EmS	Emergency Schedule (Plan de urgență)
ErC50	≡ CE50: în această metodă, acea concentrație a substanței de testat care determină o reducere cu 50 % fie a creșterii (CEb50), fie a vitezei de creștere (CEr50) în comparație cu testul martor
Eye Dam.	Lezare gravă a ochiului
Eye Irrit.	Iritant pentru ochi
factor M	Înseamnă un factor de multiplicare. Acesta se aplică concentrației unei substanțe clasificate ca fiind periculoasă pentru mediul acvatic, toxicitate acută categoria 1 sau toxicitate cronică categoria 1, și care se utilizează pentru determinarea, prin metoda însumării, a clasificării unui amestec, în care este prezentă substanța
IATA	International Air Transport Association (Asociația Internațională de Transport Aerian)
IATA/DGR	Dangerous Goods Regulations (DGR) for the air transport (IATA) (Reglementări privind Mărfurile Periculoase pentru transportul aerian)

Ferrocid 8583

**EMERGENCY
TELEPHONE NUMBER** Carechem: +44 (0) 1235 239 670 (24/7)

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture**

Product definition Mixture
Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Acute Tox. 4, H302
 STOT RE 2, H373

See Section 16 for the full text of the H statements declared above.

See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards.

2.2 Label elements**Hazard pictograms**

Signal word Warning

Hazard statements H302 - Harmful if swallowed.
 H373 - May cause damage to organs through prolonged or repeated exposure.

Precautionary statements

Prevention P260 - Do not breathe vapour.
 P270 - Do not eat, drink or smoke when using this product.
 P264 - Wash hands thoroughly after handling.

Response P314 - Get medical attention if you feel unwell.
 P301 + P312, P330 - IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth.

Storage Not applicable.

Disposal P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

See Section 16 for the full text of the H statements declared above.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures**4.1 Description of first aid measures****Eye contact** In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention if irritation develops.**Skin contact** In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.**Inhalation** If inhaled, remove to fresh air. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Get medical attention if symptoms occur.**Product name** Transaqua HT2**Product code** 462602-FR01**Page:** 2/12**Version** 12 **Date of issue** 16 October 2020**Format** United Kingdom (UK)**Language** ENGLISH**Date of previous issue** 23 October 2018.

(United Kingdom)

SECTION 4: First aid measures

Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Get medical attention. If ingested, call a physician or Poison Control Center immediately. Get medical attention urgently informing the doctor that a product containing ethylene glycol has been ingested and specific treatment may be required. Transport casualty together with the product container, its label, or the safety data sheet urgently to hospital. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

Potential acute health effects

Inhalation	Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Ingestion	Harmful if swallowed. Ethylene glycol: Ingestion of ethylene glycol can cause metabolic acidosis, kidney damage, central nervous system depression, and convulsions. The estimated human lethal dose is approximately 100 ml (3.4 ounces for an adult).
Skin contact	No known significant effects or critical hazards.
Eye contact	No known significant effects or critical hazards.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious at first but within a few hours tissue becomes swollen, discoloured and extremely painful with extensive subcutaneous necrosis. Surgical exploration should be undertaken without delay. Thorough and extensive debridement of the wound and underlying tissue is necessary to minimise tissue loss and prevent or limit permanent damage. Note that high pressure may force the product considerable distances along tissue planes.
Specific treatments	Ethylene Glycol: Gastric irrigation, ethanol or fomepizole may have value in treatment. Consult physician.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media	In case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.
Unsuitable extinguishing media	Do not use water jet. The use of a water jet may cause the fire to spread by splashing the burning product.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO ₂) (carbon monoxide, carbon dioxide) nitrogen oxides (NO, NO ₂ etc.)

5.3 Advice for firefighters

Special precautions for fire-fighters	No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.
--	---

Product name	Transaqua HT2	Product code	462602-FR01	Page:	3/12
Version	12	Date of issue	16 October 2020	Format	United Kingdom (UK) (United Kingdom)
Date of previous issue	23 October 2018.	Language	ENGLISH		

SECTION 5: Firefighting measures

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Contact emergency personnel. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Avoid breathing vapour or mist. Provide adequate ventilation. Put on appropriate personal protective equipment.

For emergency responders

Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".

6.2 Environmental precautions

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and material for containment and cleaning up

Small spill

Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Contaminated absorbent material may pose the same hazard as the spilt product. Dispose of via a licensed waste disposal contractor.

6.4 Reference to other sections

See Section 1 for emergency contact information.
See Section 5 for firefighting measures.
See Section 8 for information on appropriate personal protective equipment.
See Section 12 for environmental precautions.
See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Protective measures

Put on appropriate personal protective equipment. Do not breathe vapour or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Do not reuse container. Empty containers retain product residue and can be hazardous.

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store and use only in equipment/containers designed for use with this product. Do not store in unlabelled containers.

Not suitable

Prolonged exposure to elevated temperature.

7.3 Specific end use(s)

Recommendations

See section 1.2 and Exposure scenarios in annex, if applicable.

Product name Transaqua HT2

Product code 462602-FR01

Page: 4/12

Version 12 **Date of issue** 16 October 2020

Format United Kingdom (UK)

Language ENGLISH

Date of previous issue 23 October 2018.

(United Kingdom)

SECTION 8: Exposure controls/personal protection**8.1 Control parameters****Occupational exposure limits**

Product/ingredient name	Exposure limit values
Ethylene glycol	EH40/2005 WELs (United Kingdom (UK)). Absorbed through skin. TWA: 10 mg/m ³ 8 hours. Issued/Revised: 12/2001 Form: Particulate STEL: 104 mg/m ³ 15 minutes. Issued/Revised: 4/2005 Form: Vapour TWA: 52 mg/m ³ 8 hours. Issued/Revised: 4/2005 Form: Vapour STEL: 40 ppm 15 minutes. Issued/Revised: 4/2005 Form: Vapour TWA: 20 ppm 8 hours. Issued/Revised: 4/2005 Form: Vapour

Whilst specific OELs for certain components may be shown in this section, other components may be present in any mist, vapour or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Recommended monitoring procedures

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Derived No Effect Level

No DNELs/DMELs available.

Predicted No Effect Concentration

No PNECs available

8.2 Exposure controls**Appropriate engineering controls**

Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits.
All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained.
Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.

Individual protection measures**Hygiene measures**

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment.
The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Eye/face protection

Safety glasses with side shields.

Skin protection**Hand protection****General Information:**

Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).

Gloves should be chosen in consultation with the supplier / manufacturer and taking account of a full assessment of the working conditions.

(United Kingdom)

SECTION 8: Exposure controls/personal protection

Recommended: Butyl gloves.
Neoprene gloves.
Breakthrough time:

Breakthrough time data are generated by glove manufacturers under laboratory test conditions and represent how long a glove can be expected to provide effective permeation resistance. It is important when following breakthrough time recommendations that actual workplace conditions are taken into account. Always consult with your glove supplier for up-to-date technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:

Continuous contact:

Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained.
If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.

Short-term / splash protection:

Recommended breakthrough times as above.
It is recognised that for short-term, transient exposures, gloves with shorter breakthrough times may commonly be used. Therefore, appropriate maintenance and replacement regimes must be determined and rigorously followed.

Glove Thickness:

For general applications, we recommend gloves with a thickness typically greater than 0.35 mm.

It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be based on consideration of the task requirements and knowledge of breakthrough times.
Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.

Note: Depending on the activity being conducted, gloves of varying thickness may be required for specific tasks. For example:

- Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.
- Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.

Skin and body

Use of protective clothing is good industrial practice.
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

Refer to standards:

Respiratory protection: EN 529
Gloves: EN 420, EN 374
Eye protection: EN 166
Filtering half-mask: EN 149
Filtering half-mask with valve: EN 405
Half-mask: EN 140 plus filter
Full-face mask: EN 136 plus filter
Particulate filters: EN 143
Gas/combined filters: EN 14387

SECTION 8: Exposure controls/personal protection**Environmental exposure controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties**9.1 Information on basic physical and chemical properties****Appearance**

Physical state	Liquid.
Colour	Brown. [Light]
Odour	Not available.
Odour threshold	Not available.
pH	8.9 [Conc. (% w/w): 100%]
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Pour point	-33 °C
Flash point	Closed cup: Not applicable. [Water content interferes with flash point determination.]
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	1000 kg/m ³ (>1 g/cm ³) at 15°C
Solubility(ies)	Miscible in water.
Partition coefficient: n-octanol/water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 2.3 mm ² /s (2.3 cSt) at 40°C
Explosive properties	Not available.
Oxidising properties	Not available.

9.2 Other information

No additional information.

SECTION 10: Stability and reactivity

10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Product name Transaqua HT2

Product code 462602-FR01

Page: 7/12

Version 12 **Date of issue** 16 October 2020

Format United Kingdom (UK)

Language ENGLISH

Date of previous issue 23 October 2018.

(United Kingdom)

SECTION 11: Toxicological information**11.1 Information on toxicological effects****Acute toxicity estimates**

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapours) (mg/l)	Inhalation (dusts and mists) (mg/l)
Transaqua HT2 ethane-1,2-diol	1087 500	N/A N/A	N/A N/A	N/A N/A	N/A N/A

Information on likely routes of exposure

Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects**Inhalation**

Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

Ingestion

Harmful if swallowed. Ethylene glycol: Ingestion of ethylene glycol can cause metabolic acidosis, kidney damage, central nervous system depression, and convulsions. The estimated human lethal dose is approximately 100 ml (3.4 ounces for an adult).

Skin contact

No known significant effects or critical hazards.

Eye contact

No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics**Inhalation**

May be harmful by inhalation if exposure to vapour, mists or fumes resulting from thermal decomposition products occurs.

Ingestion

No specific data.

Skin contact

No specific data.

Eye contact

No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure**Inhalation**

Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.

Ingestion

Ingestion of large quantities may cause nausea and diarrhoea.

Skin contact

Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.

Eye contact

Potential risk of transient stinging or redness if accidental eye contact occurs.

Potential chronic health effects**General**

May cause damage to organs through prolonged or repeated exposure. May cause damage to organs through prolonged or repeated exposure. (kidney)

Carcinogenicity

No known significant effects or critical hazards.

Mutagenicity

No known significant effects or critical hazards.

Developmental effects

Birth defects and decreased fetal weight have been observed in laboratory animals fed ethylene glycol in large amounts repeatedly during pregnancy.

Fertility effects

No known significant effects or critical hazards.

SECTION 12: Ecological information**12.1 Toxicity****Environmental hazards**

Not classified as dangerous

12.2 Persistence and degradability

Expected to be biodegradable.

12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

Product/ingredient name	LogP _{ow}	BCF	Potential
Ethylene glycol	-1.36	-	low

12.4 Mobility in soil**Soil/water partition coefficient (K_{oc})**

Not available.

Mobility

Spillages may penetrate the soil causing ground water contamination.

Product name Transaqua HT2	Product code 462602-FR01	Page: 8/12
Version 12	Date of issue 16 October 2020	Format United Kingdom (UK)
Date of previous issue 23 October 2018.	Language ENGLISH	(United Kingdom)

SECTION 12: Ecological information**12.5 Results of PBT and vPvB assessment**

Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.

12.6 Other adverse effects

Other ecological information Miscible in water.

SECTION 13: Disposal considerations**13.1 Waste treatment methods****Product**

Methods of disposal Undiluted fluid Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.
Diluted Fluid Diluted fluid should not be discharged into sewage systems unless provided for by local regulations. Dispose under conditions approved by the local authority or via a licensed waste disposal contractor.

Hazardous waste Yes.

European waste catalogue (EWC)

Waste code	Waste designation
13 01 13*	other hydraulic oils

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

Packaging

Methods of disposal Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

Special precautions This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Empty containers represent a fire hazard as they may contain flammable product residues and vapour. Never weld, solder or braze empty containers. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Other information At sea, used or unwanted product should be stored for eventual discharge into port approved waste oil disposal facilities.

SECTION 15: Regulatory information**15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture****EU Regulation (EC) No. 1907/2006 (REACH)****Annex XIV - List of substances subject to authorisation****Annex XIV**

None of the components are listed.

Substances of very high concern

None of the components are listed.

Other regulations**REACH Status**

The company, as identified in Section 1, sells this product in the EU in compliance with the current requirements of REACH.

United States inventory (TSCA 8b)☒ All components are active or exempted.**Australia inventory (AICS)**

All components are listed or exempted.

Canada inventory

At least one component is not listed in DSL but all such components are listed in NDSL.

China inventory (IECSC)

At least one component is not listed.

Japan inventory (ENCS)

At least one component is not listed.

Korea inventory (KECI)

At least one component is not listed.

Philippines inventory (PICCS)

At least one component is not listed.

Taiwan Chemical Substances Inventory (TCSI)

At least one component is not listed.

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

EU - Water framework directive - Priority substances☒ None of the components are listed.**Seveso Directive**

This product is not controlled under the Seveso Directive.

15.2 Chemical safety assessment

A Chemical Safety Assessment has been carried out for one or more of the substances within this mixture. A Chemical Safety Assessment has not been carried out for the mixture itself.

SECTION 16: Other information**Abbreviations and acronyms**

ADN = European Provisions concerning the International Carriage of Dangerous Goods by Inland Waterway
 ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road
 ATE = Acute Toxicity Estimate
 BCF = Bioconcentration Factor
 CAS = Chemical Abstracts Service
 CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]

Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.

Product Name: MOBIL EAL 224H
Revision Date: 06 Sep 2019
Page 1 of 10

SAFETY DATA SHEET

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

PRODUCT

Product Name: MOBIL EAL 224H
Product Description: Plant/Vegetable Oil
Product Code: 201560105010, 601831-00, 973407
Intended Use: Hydraulic fluid

COMPANY IDENTIFICATION

Supplier: EXXON MOBIL CORPORATION
22777 Springwoods Village Parkway
Spring, TX 77389 USA
24 Hour Health Emergency 609-737-4411
Transportation Emergency Phone 800-424-9300 or 703-527-3887 CHEMTREC
Product Technical Information 800-662-4525
MSDS Internet Address www.exxon.com, www.mobil.com

SECTION 2 HAZARDS IDENTIFICATION

This material is not hazardous according to regulatory guidelines (see (M)SDS Section 15).

Other hazard information:

HAZARD NOT OTHERWISE CLASSIFIED (HNOC): None as defined under 29 CFR 1910.1200.

PHYSICAL / CHEMICAL HAZARDS

No significant hazards.

HEALTH HAZARDS

High-pressure injection under skin may cause serious damage. Mildly irritating to skin. May be irritating to the eyes, nose, throat, and lungs.

ENVIRONMENTAL HAZARDS

No significant hazards.

NFPA Hazard ID:	Health: 1	Flammability: 1	Reactivity: 0
HMIS Hazard ID:	Health: 1	Flammability: 1	Reactivity: 0

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 2 of 10

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

Name	CAS#	Concentration*	GHS Hazard Codes
2,6-DI-TERT-BUTYLPHENOL	128-39-2	1 - < 2.5%	H315, H400(M factor 1), H410(M factor 1)

* All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

As per paragraph (i) of 29 CFR 1910.1200, formulation is considered a trade secret and specific chemical identity and exact percentage (concentration) of composition may have been withheld. Specific chemical identity and exact percentage composition will be provided to health professionals, employees, or designated representatives in accordance with applicable provisions of paragraph (i).

SECTION 4 FIRST AID MEASURES

INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

SKIN CONTACT

Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 3 of 10

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Unusual Fire Hazards: Pressurized mists may form a flammable mixture.

Hazardous Combustion Products: Aldehydes, Incomplete combustion products, Oxides of carbon, Smoke, Fume, Sulfur oxides

FLAMMABILITY PROPERTIES

Flash Point [Method]: >221°C (430°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/D

SECTION 6

ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

PROTECTIVE MEASURES

Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required due to toxicity or flammability of the material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 4 of 10

SECTION 7

HANDLING AND STORAGE

HANDLING

Avoid contact with skin. Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during switch-loading operations). Use proper bonding and/or ground procedures. However, bonding and grounds may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Static Accumulator: This material is a static accumulator.

STORAGE

The type of container used to store the material may affect static accumulation and dissipation. Do not store in open or unlabelled containers.

SECTION 8

EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits/standards for materials that can be formed when handling this product: When mists/aerosols can occur the following are recommended: 5 mg/m³ - ACGIH TLV (inhalable fraction), 5 mg/m³ - OSHA PEL.

No biological limits allocated.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 5 of 10

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Chemical resistant gloves are recommended.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

Chemical/oil resistant clothing is recommended.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9

PHYSICAL AND CHEMICAL PROPERTIES

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION

Physical State: Liquid
Color: Pale Yellow
Odor: Characteristic
Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 °C): 0.921
Flammability (Solid, Gas): N/A
Flash Point [Method]: >221°C (430°F) [ASTM D-92]
Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D
Autoignition Temperature: N/D
Boiling Point / Range: N/D
Decomposition Temperature: N/D
Vapor Density (Air = 1): N/D
Vapor Pressure: [N/D at 20 °C]
Evaporation Rate (n-butyl acetate = 1): N/D
pH: N/A
Log Pow (n-Octanol/Water Partition Coefficient): N/D

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 6 of 10

Solubility in Water: Negligible

Viscosity: 36.8 cSt (36.8 mm²/sec) at 40 °C | 8.3 cSt (8.3 mm²/sec) at 100°C

Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: N/D

Melting Point: N/A

Pour Point: -34°C (-29°F)

SECTION 10 STABILITY AND REACTIVITY

REACTIVITY: See sub-sections below.

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

INFORMATION ON TOXICOLOGICAL EFFECTS

Hazard Class	Conclusion / Remarks
Inhalation	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Irritation: No end point data for material.	Negligible hazard at ambient/normal handling temperatures.
Ingestion	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on assessment of the components.
Skin Corrosion/Irritation: No end point data for material.	Mildly irritating to skin with prolonged exposure. Based on assessment of the components.
Eye	
Serious Eye Damage/Irritation: No end point data for material.	May cause mild, short-lasting discomfort to eyes. Based on assessment of the components.
Sensitization	
Respiratory Sensitization: No end point data for material.	Not expected to be a respiratory sensitizer.
Skin Sensitization: No end point data for material.	Not expected to be a skin sensitizer. Based on assessment of the components.
Aspiration: Data available.	Not expected to be an aspiration hazard. Based on physico-chemical properties of the material.
Germ Cell Mutagenicity: No end point data for material.	Not expected to be a germ cell mutagen. Based on assessment of the components.

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 7 of 10

Carcinogenicity: No end point data for material.	Not expected to cause cancer. Based on assessment of the components.
Reproductive Toxicity: No end point data for material.	Not expected to be a reproductive toxicant. Based on assessment of the components.
Lactation:	Not expected to cause harm to breast-fed children.
Specific Target Organ Toxicity (STOT)	
Single Exposure: No end point data for material.	Not expected to cause organ damage from a single exposure.
Repeated Exposure: No end point data for material.	Not expected to cause organ damage from prolonged or repeated exposure. Based on assessment of the components.

OTHER INFORMATION

For the product itself:

Repeated and/or prolonged exposure may cause irritation to the skin, eyes, or respiratory tract.

The following ingredients are cited on the lists below: None.

--REGULATORY LISTS SEARCHED--

1 = NTP CARC

2 = NTP SUS

3 = IARC 1

4 = IARC 2A

5 = IARC 2B

6 = OSHA CARC

SECTION 12

ECOLOGICAL INFORMATION

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

PERSISTENCE AND DEGRADABILITY

Biodegradation:

Majority of components -- Expected to be readily biodegradable.

ECOLOGICAL DATA

Ecotoxicity

Test	Duration	Organism Type	Test Results
Aquatic - Acute Toxicity	96 hour(s)	Americamysis bahia	LC50 >5000 mg/l
Aquatic - Acute Toxicity	96 hour(s)	Oncorhynchus mykiss	LC50 >5000 mg/l

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 8 of 10

Aquatic - Chronic Toxicity	7 day(s)	Ceriodaphnia dubia	NOELR >5000 mg/l
Aquatic - Chronic Toxicity	7 day(s)	Pimephales promelas	NOELR >5000 mg/l

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products. Even though this product is biodegradable, it must not be indiscriminately discarded into the environment. Protect the environment. Dispose of used oil at designated sites. Minimize skin contact. Do not mix used oils with solvents, brake fluids or coolants.

REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

SECTION 14 TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

Marine Pollutant: No

AIR (IATA): Not Regulated for Air Transport

SECTION 15 REGULATORY INFORMATION

Product Name: MOBIL EAL 224H

Revision Date: 06 Sep 2019

Page 9 of 10

OSHA HAZARD COMMUNICATION STANDARD: This material is not considered hazardous in accordance with OSHA HazCom 2012, 29 CFR 1910.1200.

Listed or exempt from listing/notification on the following chemical inventories: AICS, DSL, ENCS, IECSC, ISHL, KECI, PICCS, TCSI, TSCA

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302

SARA (311/312) REPORTABLE GHS HAZARD CLASSES: None.

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The following ingredients are cited on the lists below: None.

--REGULATORY LISTS SEARCHED--

1 = ACGIH ALL	6 = TSCA 5a2	11 = CA P65 REPRO	16 = MN RTK
2 = ACGIH A1	7 = TSCA 5e	12 = CA RTK	17 = NJ RTK
3 = ACGIH A2	8 = TSCA 6	13 = IL RTK	18 = PA RTK
4 = OSHA Z	9 = TSCA 12b	14 = LA RTK	19 = RI RTK
5 = TSCA 4	10 = CA P65 CARC	15 = MI 293	

Code key: CARC=Carcinogen; REPRO=Reproductive

SECTION 16

OTHER INFORMATION

N/D = Not determined, N/A = Not applicable

KEY TO THE H-CODES CONTAINED IN SECTION 3 OF THIS DOCUMENT (for information only):

H315: Causes skin irritation; Skin Corr/Irritation, Cat 2

H400: Very toxic to aquatic life; Acute Env Tox, Cat 1

H410: Very toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 1

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

Section 08: Exposure Control - Note information was modified.

Section 09: Viscosity information was modified.

Section 11: Dermal Lethality Test Comment information was added.

Section 15: National Chemical Inventory Listing information was modified.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate

Product Name: MOBIL EAL 224H
